182. Return to an Address to His Royal Highness the Governor General of the 3rd February, 1916, for a copy of all Orders in Council, letters, telegrams, reports and other documents regarding the proposed public building in Prince Rupert for post office and other purposes, and regarding the land proposed for such public building and the purchase of such land. Presented March 13, 1916.—*Mr. Knowles*.. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

183. Return to an Address to His Royal Highness the Governor General of the 7th February, 1916, for a copy of the Order in Council or departmental order dismissing Mr. Bayfield from the position of Superintendent of Dredging in British Columbia; and also a copy of the Order in Council or departmental order appointing J. L. Nelson in his place. Presented March 13, 1916.—*Mr. Pugsley*.. .. ..*Not printed.*

184. Return to an Order of the House of the 23rd February, 1916, for a copy of all reports and documents concerning the surveys made by the Federal Government during the autumn of 1914 of Lake Matapedia and the river of the same name down to the village of Amqui. Presented March 13, 1916.—*Mr. Lapointe (Kamouraska)*.. ..*Not printed.*

185. Return to an Order of the House of the 13th March, 1916, for a copy of the pension list in force in Canada for disabled soldiers and of all petitions, letters or other documents relating to the amendment or readjustment of the same. Presented March 14, 1916.—*Printed for distribution and sessional papers.*

186. Return to an Order of the House of the 16th February, 1916, for a copy of all letters, petitions, correspondence and telegrams between the Government, the engineers, and all other persons concerning the building of the post office at Rigaud; also of the amounts of money paid to divers persons for such building, furnishing, the land, the care of the grounds and other works. Presented March 15, 1916.—*Mr. Boyer*.. .. ..*Not printed.*

187. Return to an Order of the House of the 6th March, 1916, for a return showing the different rural mail routes in the constituency of Medicine Hat, with their location and date of establishment; and also all rural mail routes now being established or under consideration at the present time in the same constituency. Presented March 15, 1916.—*Mr. Buchanan*.. .. ..*Not printed.*

187*a*. Return to an Order of the House of the 20th March, 1916, for a return showing:—1. The reason for the delay in the establishment of the rural mail routes, reported under consideration, in the constituency of Medicine Hat. 2. When these routes were first applied for. 3. If the applications possessed the required number of signatures. 4. If tenders have been invited. If so, for what routes. 5. Why the lowest tenders were not accepted, and the routes established. 6. If any tenders are being invited for these routes. 7. If there is a likelihood of any of these routes being operated immediately. Presented March 27, 1916.—*Mr. Buchanan*.. .. ..*Not printed.*

188. Return to an Order of the House of the 21st February, 1916, for a copy of all letters, telegrams, investigations and reports relating to the dismissal of Joseph Fleming, conductor Intercolonial Railway, and in regard to his reinstatement. Presented March 16, 1916.—*Mr. Macdonald*.. .. ..*Not printed.*

189. Return to an Order of the House of the 18th March, 1915, for a copy of all petitions, telegrams, communications and other documents relating to the dismissal of Mr. Hubert Paquin, postmaster of St. Gilbert de Portneuf. Presented March 16, 1916.—*Mr. Delisle.* *Not printed.*

190. Return to an Order of the House of the 16th February, 1916, for a copy of all letters, petitions, correspondence and telegrams, exchanged between the Government, its Inquiry Commissioner, Mr. G. H. Bergeron, and all other persons, concerning the inquiry, the dismissal and replacing of the postmasters of the different post offices mentioned below; and of all correspondence relating to the appointments of the present postmasters who replace the former ones, who had been either dismissed or replaced for one reason or another:—St. Lazare Village, Vaudreuil Station, Pointe Fortune, Val des Eboulis, Mont Oscar, St. Justine de Newton, Ste. Marthe. Presented March 16, 1916.—*Mr. Boyer.* *Not printed.*

191. Dismissal of Mr. Chisholm, Inspector of Indian Agencies, Saskatchewan.—(*Senate*). *Not printed.*

192. Return to an Order of the House of the 28th February, 1916, for a return showing:—1. The names, rank and military qualifications of the officers on the Headquarters Staff of the 1st, 2nd and 3rd Divisional Areas, including those on Staffs of Camps and Schools of Instruction, on October 1, 1915. 2. The names of those of the above who on that date had volunteered, taken the oath and been attested for overseas service. Presented March 20, 1916.—*Mr. Proulx*.. .. ..*Not printed.*

193. Return to an Order of the House of the 21st February, 1916, for a return showing:—1. How many persons have been employed by the Department of Militia since the beginning of the war in the examining, appraising or testing of materials, such as clothing, harness, etc., purchased for military purposes. 2. How many of such employees are practical trades people, experts, or otherwise experienced persons in the respective callings connected with the various materials as purchased. Presented March 20, 1916.—*Mr. Verville*.. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

194. Return to an Order of the House of the 6th March, 1916, for a copy of all telegrams, letters, petitions and documents of all kinds referring in any way to the application of Mrs. Flora McIntyre, of River Dennis, Inverness County, N.S., for the Fenian Raid Veteran Bounty of her late husband, Angus McIntyre, late of River Dennis. Presented March 20, 1916.—*Mr. Chisholm (Inverness)*.. .. ..*Not printed.*

195. Return to an Order of the House of the 13th March, 1916, for a return showing:—1. The names, dates of appointment, post office addresses at time of appointment, and former occupations of the censors employed by the Militia Department at Louisburg and North Sydney, Nova Scotia. 2. The names of all the said censors who are also decoders, and the names and addresses of all who are employed in the censorship service at the above points. 3. The amount paid to each censor or decoder since the 4th of August, 1914, up to the 1st February, 1916, or to any party or person in connection with the censorship or decoding services at the above places. Presented March 20, 1916.—*Mr. McKenie.*
Not printed.

196. Return to an Order of the House of the 3rd February, 1916, for a copy of all letters, telegrams, agreements and all other papers relative to the creation of a Board of Conciliation, during the year 1915, under the Industrial Disputes Investigation Act in regard to the employees of the Nova Scotia Steel Company, in the county of Pictou. Presented March 20, 1916.—*Mr. Macdonald*.. .. ..*Not printed.*

197. Return to an Order of the House of the 6th March, 1916, for a list of the employees in the Dominion Police Force, with the salary of each of them. Presented March 20, 1916. —*Mr. Boulay*.. .. ..*Not printed.*

198. Return showing:—1. Whether the Government have taken cognizance of the following article published in the Montreal "Gazette" on November 1, 1915:—"Canadian Help Comes from Sale of Gift Flour. Foodstuffs not Needed by the English Poor were Bought for Belgian Relief.—Funds to Aid East Coast.—Hon. Walter Long Suggested to Canadian Government that $750,000 be Allotted, and Latter Agreed.—(Special cable from the "Gazette's" resident staff correspondent.)

"London, October 31,—'Canada's aid to the east coast towns of England, which are suffering through the war, is the subject of some misconception,' said Sir George Perley to-day. In a statement in the Commons, Hon. Walter Long said that the necessary funds for a Government scheme of help for hotel and lodging house keepers had been generously provided by the Canadian Government. This gave rise to the idea that the Dominion was taking a new step, but the fact is that no money is coming from Canada. Of the flour sent by Canada a year ago to relieve distress in England, very little was distributed, as poverty was in no way abnormal. Some 400,000 bags of this flour were transferred to the American committee for Belgian relief, which purchased them. The money paid for this flour being in the hands of the Local Government Board, Hon. Walter Long, as President of the Board, suggested to Sir George Perley that this might be utilized for the relief of the east coast towns where the season had been ruined owing to the lack of railway facilities and the disinclination of the public to visit the east coast because of the possibility of German naval or aerial raids. The Dominion Government acquiesced in this proposal, and the sum of $750,000, part of the proceeds of the sale of the flour, has now been allotted for this purpose. Canada's generosity will therefore go to alleviate the distress of a large number of better-class people, who are direct sufferers from the war, instead of the destitute poor, for whom it was intended, but who, it develops, were not in need of it." 2. Whether the said article is accurate. If not, in what respect it is inaccurate. Presented March 20, 1916.—*Mr. Papineau.*
Not printed.

198*a*. Return showing:—1. Whether the Government is aware that the following extract from an article was published on the 12th January, 1915, in the Montreal "Gazette":—

"Distress Caused in England by War is Negligible.—Comparatively Small Portion of Colonial Gifts Used for National Relief.—Much Went to Belgians.—War Office also took Large Share.—Salvation Army has Scheme Requiring Canadian Co-operation.—(Special cable from the "Gazette's" resident staff correspondent.)

"London, January 11.—Very satisfactory evidence of the comparative absence in England of any distress caused by the war is furnished by a report on the special work of the Local Government Board arising out of the war, which was issued to-day as a White Paper. The action by Noel Kershaw, dealing with the disposition of the gifts from the Colonies, shows that only a small part of the goods allocated has been required for relieving the distress of civilians.

"The following is the disposition of the 940,530 bags of flour received from Canada: To the local committees for the relief of distress, 90,474; to the Belgian Refugees Committees, 1,691; transferred to the War Office, 99,760; further offer to the War Office, 300,000; to the Belgian Relief Commission, 443,886; sold, owing to damage, 4,719." 2. Who had charge of accepting delivery and the shipping of this flour. 3. Whether the Government have any information of the shortage of 59,430 bags of flour, alleged in said article. If not, what became of the flour that was short. Presented March 20, 1916.—*Mr. Papineau*.. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

199. Return to an Order of the House of the 6th March, 1916, for a return showing the amounts contributed from the constituency of Medicine Hat for machine guns, and by whom contributed or forwarded. Presented March 21, 1916.—*Mr. Buchanan*.. ..*Not printed.*

200. Return to an Order of the House of the 13th March, 1916, for a copy of all letters, petitions, recommendations and other documents in the possession of the Post Office Department relating to the appointment of the postmaster at West Roachdale, Guysborough County, Nova Scotia, to take the place of J. H. McGuire, deceased. Presented March 21, 1916.—*Mr. Sinclair*.. .. ..*Not printed.*

201. Return to an Order of the House of the 28th February, 1916, for a return showing in detail the payment or payments amounting to $647.50, paid to P. A. Stoddart, fishery guardian, Shelburne County, N.S., during the year ending March 31, 1915. Presented March 21, 1916.—*Mr. Kyte*.. .. ..*Not printed.*

202. Return to an Order of the House of the 28th February, 1916, for a copy of all correspondence, letters, telegrams and documents of all kinds relating to the chartering of the vessel *Starling*, by the Department of Marine and Fisheries. Presented March 21, 1916. *Mr. Kyte*.. .. ..*Not printed.*

203. Return to an Order of the House of the 7th February, 1916, for a copy of all documents, letters, messages, correspondence and reports concerning a conference between the Minister of Agriculture and certain representatives of the Mennonite Church in or about July, 1873, and referred to in a certain letter dated 23rd July, 1873, signed by P. M. Lowe, Secretary of the Department of Agriculture, and addressed to Messrs. David Klassen, Jacob Peters, Heinrich Wiebe and Cornelius Toews, delegates from Southern Russia. Presented March 21, 1916.—*Mr. McCraney*.. .. ..*Not printed.*

204. Return to an Order of the House of the 13th March, 1916, for a copy of all letters, telegrams, petitions, memorials and other documents relating to the subsidizing by the Government of the construction of ships in British Columbia, or of ships when built; or as to the laying down or constructing or assisting in the construction in British Columbia of twenty-five ships by the Government, or as to assisting by subsidies or otherwise in the construction of ships in the Dominion. Presented March 23, 1916.—*Mr. Macdonald.* *Not printed.*

205. Return to an Order of the House of the 13th March, 1916, for a copy of the affidavit of David W. McLean, Windsor, N.S., to whom Warrant No. 25737 was issued for Fenian Raid Bounty, and also a copy of all correspondence and other documents relating to the payment of the same. Presented March 23, 1916.—*Mr. Macdonald*.. .. .. ..*Not printed.*

206. Return to an Order of the House of the 9th March, 1916, for a return showing:—1. The amount collected in wharfage on goods landed on Government wharves in the county of Victoria, at Neils Harbour, Ingonish, Englishtown, South Gut, Baddeck, Little Narrows, Nyaiga, and Big Bras d'Or. 2. The amount collected at each of the above places, by whom collected, and how much returned to the Government in each case. Presented March 27, 1916.—*Mr. McKenzie*.. .. ..*Not printed*

207. Return to an Order of the House of the 20th March, 1916, for a return showing:—The names of the 54 Canadian officers employed in the Canadian Pay and Record Office, London, and amounts per month paid to each of them. Presented March 27, 1916.—*Mr. Macdonald*.. .. ..*Not printed.*

208. Return to an Order of the House of the 3rd February, 1916, for a copy of all letters, telegrams, petitions, directions and other documents relative to the surveys for a railway under the Railway Department, which have been carried on during the past summer, at points east and west from Sunnybrae, in the county of Pictou. Presented March 27, 1916.—*Mr. Macdonald*.. .. ..*Not printed.*

209. Return to an Order of the House of the 21st February, 1916, for a copy of all papers, agreements, letters, telegrams and other documents relating to the proposal to purchase, lease, or use of, the railway known as the Vale Railway, county of Pictou, and to the operation of the same by the Railway Department. Presented March 27, 1916.—*Mr. Macdonald*.. .. ..*Not printed.*

210. Return to an Order of the House of the 7th February, 1916, for a return showing the number and purpose of all commissions appointed by the Government since 1911, and the cost of each, together with names of the various members of such commissions. Presented March 27, 1916.—*Mr. Pardee*.. .. ..*Not printed.*

211. Return to an Order of the House of the 6th March, 1916, for a copy of all correspondence, letters, telegrams and documents relating to the dismissal or resignation of Dr. W. T. Patton from the service of the Veterinary Inspection Branch of the Department of the Interior, and his re-appointment and his later dismissal or resignation. Presented March 27, 1916.—*Mr. Buchanan*.. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

211*a*. Return to an Order of the House of the 3rd April, 1916, for a copy of all correspondence, letters, telegrams and documents relating to the dismissal or resignation of Dr. W. T. Patton, from the service of the Veterinary Inspection Branch of the Department of Agriculture at Coutts, Alberta, and his re-appointment and later dismissal or resignation. 212. Return to an Order of the House of the 28th February, 1916, for a copy of all accounts, telegrams, letters, bills of costs and other documents relating to the case of J. P. Dionne against the King, before the Exchequer Court, in which case Mr. Leo Bérube was attorney and Mr. E. H. Cimon was counsel, both being lawyers of Fraserville. Presented March 27, 1916.—*Mr. Gauvreau*.. .. ..*Not printed*

212*a*. Return to an Order of the House of the 5th April, 1916, for a copy of all telegrams and letters from Leo Berube, lawyer, M.P.P., to the Minister of Justice, relating to the production of the official and public documents asked for by C. A. Gauvreau, M.P., in the case of J. P. Dionne vs. The King, and of any answers of the Minister of Justice to such telegrams and letters. Presented April 10, 1916.—*Mr. Gauvreau*.. .. ..*Not printed*

213. Return to an Address to His Royal Highness the Governor General, of the 7th February, 1916, for a copy of all correspondence with the Imperial authorities in connection with the purchase of horses, and the prohibiting of the export of horses. Presented March 27, 1916.—*Sir Wilfrid Laurier*.. .. ..*Not printed.*

214. Return to an Order of the House of the 1st March, 1916, for a copy of all correspondence, telegrams, reports and documents of all kinds relating to the visits of a fair wage officer to New Glasgow, N.S., in connection with the schedule of wages of men employed in works making shells at that place. Presented March 28, 1916.—*Mr. Macdonald.*
Not printed.

215. Copy of Order in Council P.C. No. 634, dated 24th March, 1916, *re* the prohibition of the exportation of certain goods including nickel, nickel ore and nickel matte, to certain foreign ports. Presented by Sir Robert Borden, March 28, 1916.
Printed for sessional papers only.

216. Return to an Order of the House of the 6th March, 1916, for a copy of all correspondence, accounts, vouchers, memoranda, etc., relating to the construction of a launch way and boat house at Bear Cove Beach, Halifax County, N.S., and completed in 1914. Presented March 29, 1916.—*Mr. Maclean (Halifax)*.. .. ..*Not printed.*

217. Return to an Order of the House of the 6th March, 1916, for a detailed statement of the expenditure last year at McNair's Cove, Nova Scotia, giving the names of the workmen, the number thus employed, the amount paid to each; also the amount paid for supplies and material, and the names of the persons to whom the same was paid. Presented March 29, 1916.—*Mr. Chisholm (Antigonish)*.. .. ..*Not printed.*

218. Return to an Order of the House of the 6th March, 1916, for a copy of all correspondence, accounts, vouchers, receipts, etc., in connection with the construction of a wharf at Shad Bay, Halifax County, N.S., in 1914 and 1915. Presented March 29, 1916.—*Mr. Maclean (Halifax)*.. .. ..*Not printed.*

219. Return to an Order of the House of the 16th March, 1916, for a return showing:—1. Whether the Government has received any complaints as to the manner of supplying clothing to the Royal Military College, or as to its fit, workmanship or materials employed, or as to any delay in furnishing the cadets with clothing. 2. If so, from whom such complaints have been received. 3. On what grounds. 4. What form the complaint was in. 5. The nature of the complaint. 6. If the Government is aware as to whether or not there has been dissatisfaction as to the fit, workmanship and materials employed, or as to any delay in furnishing the cadets with clothing. 7. If it is true, as alleged, that the late Commandant of the Royal Military College, Colonel Crowe, before he left, recommended a change of system for the supply of clothing, and outlined the features of such a system. 8. If so, the details of the plan suggested. 9. To what extent the plan suggested by Colonel Crowe was adopted. If not adopted, why not. 10. Whether the present Commandant of the Royal Military College made any suggestions as to a change in the system of supplying clothing to the cadets. 11. If so, the changes which he suggested. Presented March 30, 1916.—*Mr. Carvell.*
Not printed.

220. Escape of alien enemies from detention camps at Amherst, N.S.—(*Senate*)..*Not printed.*

Return to an Order of the House of the 21st February, 1916, for a copy of all letters, petitions, papers, telegrams, tenders and other documents relating to the establishment of a rural mail route from Alma, through Sylvester and Loch Broom, and as to the closing of the post offices at Sylvester and Loch Broom. Presented March 31, 1916.—*Mr. Macdonald*.. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

222. Return to an Order of the House of the 3rd February, 1916, for a copy of all petitions, letters, papers, telegrams, tenders and other documents relating to the establishment of rural mail route from Scotsburn to North Scotsburn, Rogers Hill and Hardwood Hill, and as to the closing of any post offices on said route. Presented March 31, 1916.—*Mr. Macdonald*.. .. .. .

CONTENTS OF VOLUME 28—*Continued.*

232. Return to an Order of the House of the 15th March, 1916, for a copy of all letters, telegrams and petitions in the possession or under the control of the Post Office Department having reference to the dismissal of Postmaster McRitchie at North River Centre, Victoria County, Nova Scotia, and to the appointment of Neil McLeod in his place. Presented April 5, 1914.—*Mr. McKenzie*.. .. ..*Not printed.*

233. Return to an Order of the House of the 27th March, 1916, for a copy of all petitions, correspondence, telegrams, recommendations and other papers or documents in the possession of the Postmaster General or his department, relating to the dismissal of James Hall, Postmaster at Milford Haven Bridge, Guysborough County, Nova Scotia, and the appointment of Guy O'Connor, as his successor. Presented April 5, 1916.—*Mr. Sinclair.* *Not printed.*

234. Return to an Order of the House of the 7th February, 1916, for a report showing the apportioning of electoral polling divisions in Manitoba, made by judges under authority of the Dominion Elections Act, 7-8 Edward VII, Chapter 26. Presented April 5, 1916.—*Sir Wilfrid Laurier*.. .. ..*Not printed.*

235. Return to an Order of the House of the 23rd February, 1916, for a copy of all profiles, reports, correspondence and all documents concerning the construction of a viaduct at Amqui, on the Intercolonial Railway, at the place called Traverse Dubé, Dubé Crossing; also of the plans of properties belonging to the Intercolonial Railway at Amqui, and of the land leased to the Municipality of Amqui, with a copy of the lease affecting such land. Presented April 5, 1916.—*Mr. Lapointe (Kamouraska)*.. .. .. ..*Not printed.*

236. Return to an Order of the House of the 20th March, 1916, for a return showing the number of horses bought for remounts in Alberta, the persons from whom they were purchased, and the amount paid for each horse. Presented April 6, 1916.—*Mr. Buchanan.* *Not printed.*

237. Return to an Order of the House of the 15th March, 1916, for a return showing:—1. Who has been furnishing food, clothing and other necessary supplies to the soldiers at North Sydney and Sydney Mines, since the 4th August, 1914, to the 1st February, 1916. 2. The names and amounts paid to each, and amounts due to each on 1st February, 1916, over and above what has already been paid. 3. Whether the said supplies of all kinds were obtained or called for by public tender. If so, how the tenders were called, and who the tenderers were. 4. If the contracts for such supplies were always given to the lowest tenderer. 5. The names of those who tendered, and the figures of the tenders in each case. 6. The different methods by which tenders were invited, and for what classes of merchandise or supplies. Presented April 6, 1916.—*Mr. McKenzie*.. ..*Not printed.*

238. Order in Council No. P.C. 680, dated 23rd March, 1916, respecting the application of the Industrial Disputes Investigation Act, 1907, in the case of disputes between employers and employees affecting the delivery of war supplies. Presented by Hon. Mr. Roche, April 6, 1916.. .. ..*Not printed.*

239. Return to an Order of the House of the 13th March, 1916, for a copy of all the evidence taken by the Commission appointed to inquire into claims for damages made against the Militia Department in the town of Sydney Mines, Nova Scotia, and of the report made upon each claim or case, said claims being for damages to lands and other property. Presented April 7, 1916.—*Mr. McKenzie*.. .. ..*Not printed.*

240 Return to an Order of the House of the 1st March, 1916, for a copy of all letters, correspondence and telegrams between the Speaker, the Clerk of the House of Commons, the Civil Service Commission and the Minister of Finance in regard to the proposed appointment of Mr. H. Crossley Sherwood, as Assistant Clerk of Routine and Records, from 1st October, 1914, down to the present date. Presented April 7, 1916.—*Mr. Turriff.* *Not printed.*

240*a*. Supplementary Return to an Order of the House of the 1st March, 1916, for a copy of all letters, correspondence and telegrams between the Speaker, the Clerk of the House of Commons, the Civil Service Commission and the Minister of Finance in regard to the proposed appointment of Mr. H. Crossley Sherwood, as Assistant Clerk of Routine and Records, from 1st October, 1914, down to the present date. Presented April 10, 1916.—*Mr. Turriff*.. .. ..*Not printed.*

241. Return to an Order of the House of the 20th March, 1916, for a copy of all recommendations, letters, telegrams and correspondence relating to the recent appointment of a lightkeeper at Arisaig, N.S. Presented April 7, 1916.—*Mr. Chisholm (Antigonish).* *Not printed.*

242. Return to an Order of the Senate dated 31st March, 1916:—For a copy of all papers, letters and all correspondence regarding the passport granted to W. F. Bauman, an alien enemy. The said Bauman is a Bavarian.—(*Senate*).. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

243. Return to an Order of the House of the 3rd February, 1916, for a copy of all letters, telegrams, or other communications sent to the Government or any member or department thereof before 15th August, 1914, pointing out the necessity of granting relief to the settlers in the drouth-stricken area of Alberta. Presented April 10, 1916.—*Mr. Buchanan*.. .. .. .

CONTENTS OF VOLUME 28—*Continued.*

254. Return to an Order of the House of the 21st February, 1916, for a copy of all letters, papers, telegrams and other documents relating to the survey in the harbour of Pictou, for a proposed new bridge, by the Railway Department; and also a statement showing the amounts paid in connection with said survey, the names of the persons to whom paid, and the purposes for which they were paid. Presented April 11, 1916.—*Mr. Macdonald*.. .. .. .

CONTENTS OF VOLUME 28—*Continued.*

265. Return to an Order of the House of the 12th April, 1916, for a return showing:—1. How many clerks there are in the Finance Department who belong to and are paid from the outside service vote and who work in the inside service. 2. The names of said clerks. 3. Salary paid to each. 4. How long each has been in the service of the Department. 5. If all or any of these clerks have passed any examination. If so, what examination and on what date or dates. Presented April 26, 1916.—*Mr. Turriff*.. .. .. ..*Not printed.*

266. Return to an Order of the House of the 23rd February, 1916, for a return showing:—1. The number of permanent employees in the Department of Inland Revenue in 1915-16. 2. How many there will be in 1916-17. 3. How much money was paid in salaries for temporary employees in each of the following years: 1912-13, 1913-14, 1914-15 and 1915-16. 4. The names of the temporary employees and the dates of their appointment, respectively. Presented April 26, 1916.—*Mr. Lanctot*.. .. ..*Not printed.*

267. Return to an Order of the Senate dated the 14th instant, showing the number of men recruited up to the first day of April, 1916.—(*Senate*).. .. ..*Not printed.*

268. Return to an Order of the Senate, dated the 23rd day of March, 1916, of all papers and documents dealing with the escapes and the liberation of alien enemy prisoners from the detention camp situated at Banff, in the province of Alberta. Ordered, That the same do lie on the table.—(*Senate*).. .. ..*Not printed.*

269. Return to an Order of the House of the 19th April, 1916, for a return showing:—1. Whether there is a Director of Recruiting and Organizations in England for the Canadian Service. 2. If so, his name and duties. 3. The number employed upon his staff. 4. The total expenses of his staff. Presented April 28, 1916.. .. ..*Not printed.*

270. Return to an Order of the Senate, dated 11th instant:—For a copy of an application made by Rev. Isaac Hunter Macdonald, of Kintore, Ontario, to the Militia Department for a position of chaplain or major; also, of all copies of letters, papers or telegrams either recommending or opposing said application.—(*Senate*).. .. ..*Not printed.*

271. Return to an Address to His Royal Highness the Governor General of the 29th March, 1916, for a copy of all petitions received by the Governor General in Council requesting the disavowal of the Act of the Legislature of the Province of Ontario, Chapter 45, 5 George V, 1915, concerning the School Commission of the Roman Catholic Schools of the City of Ottawa, and of all documents, memoranda, reports, letters and correspondence concerning the said petitions for disavowal, or concerning the said Act of the Legislature of the Province of Ontario, 5 George V, Chapter 45. Presented May 1, 1916.—*Mr. Lapointe (Kamouraska)*.. .. ..*Not printed.*

271*a*. Order in Council and Report of Minister of Justice transmitting to Lieutenant Governor of Ontario copy of petition from Samuel Genest and others, praying for the disallowance of an Act of the Legislature of Ontario, Chapter 45 of 5 George V (1915). Order in Council and Report of Minister of Justice on the Statutes of the Legislature of Ontario, passed in the 5th year of His Majesty's reign (1915). Report of Prime Minister of Ontario on petition relating to the disallowance of an Act of the Legislature of Ontario, Chapter 45 of 5 George V (1915). Presented May 3, 1916.—*Mr. Lapointe (Kamouraska)*.. .. ..*Printed for sessional papers only.*

272. Return to an Order of the House of the 20th March, 1916, for a copy of all telegrams, letters, correspondence and contracts between the Quebec Harbour Commission and Benjamin Demers, of the parish of St. Nicolas, county of Lévis, concerning the purchase of the St. Nicolas quarry. Presented May 1, 1916.—*Mr. Bourassa*.. .. ..*Not printed.*

273. Return to an Order of the House of the 13th March, 1916, for a return showing a list of vessels belonging to the Canadian Government which are on service under the provision of the Canadian Naval Act, and of all vessels not now in service and their present condition and suitability for service, and also for a copy of all letters, petitions or communications had by or with the Government in regard to the establishment of a Canadian Naval Brigade. Presented May 1, 1916.—*Mr. Macdonald*.. .. .. ..*Not printed.*

274. Return to an Order of the House of the 29th March, 1916, for a copy of all correspondence, petitions and papers, including the report of Charles Bruce, engineer, in the possession of the Department of Marine and Fisheries relating to the construction of a bait freezer at White Head, Nova Scotia. Presented May 1, 1916.—*Mr. Sinclair*

Not printed.

275. Duplicate Return to an Order of the House of the 17th March, 1915, for a copy of all correspondence and reports relating to the purchase of 25,000 shovels of special pattern, mentioned in Order in Council P.C. 2302, dated 4th September, 1914, on page 38 of memoranda respecting work of the Department of Militia and Defence, and also relating to any further purchases of such shovels. Presented May 1, 1916.—*Mr. Hughes (P.E.I.)*.. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

276. Return to an Order of the House of the 5th April, 1916, for a copy of all letters, telegrams, offers, tenders, reports, contracts and documents relating to the sale or other disposal of small arms ammunition since 4th August, 1914. Presented May 1, 1916.—*Mr. Macdonald*.. .. .. .

CONTENTS OF VOLUME 28—*Continued.*

284. Return to an Order of the House of the 27th March, 1916, for a return showing the names and addresses of all persons in the Public Service of any and every Department of the Government of Canada, in the counties of Cape Breton, Victoria, Inverness, Richmond, Guysborough, Antigonish and Pictou, Province of Nova Scotia. Presented May 4, 1916. —*Mr. Carroll*.. .. ..*Not printed.*

285. Return to an Order of the House of the 17th February, 1916, for a return showing the amount which has been paid out for printing outside of the Printing Bureau in each province, in each of the years 1912, 1913, 1914 and 1915, and to whom paid. Presented May 5, 1916.—*Mr. Best*.. .. ..*Not printed.*

285*a*. Supplementary Return to an Order of the House of the 17th February, 1916, for a return showing the amount which has been paid out for printing outside of the Printing Bureau in each province, in each of the years 1912, 1913, 1914 and 1915, and to whom paid. Presented May 17, 1916.—*Mr. Best*.. .. ..*Not printed.*

286. Report of the Commission on the Waterworks and Sewerage Systems of Canada. Presented by Hon. Mr. Hazen, May 8, 1916.. .. ..*Not printed.*

287. Return to an Order of the House of the 12th April, 1916, for a return showing:—1. How many clerks there are in the Customs Department who belong to and are paid from the outside service vote and who work in the inside service. 2. The names of said clerks. 3. Salary paid to each. 4. How long each has been in the service of the Department. 5. If all or any of these clerks have passed any examination. If so, what examination and on what date or dates. Presented May 10, 1916.—*Mr. Turriff*.. .. .. ..*Not printed.*

288. Return to an Order of the House of the 6th March, 1916, for a return showing the amounts paid under retroactive clause of the Act providing for an impost of 50 cents per proof gallon on all spirits taken from bond between the date of the outbreak of war and the date of the passage of such Act; and also by whom paid, and the date of payment. Presented May 10, 1916.—*Mr. Graham*.. .. ..*Not printed.*

289. Return to an Order of the House of the 3rd February, 1916, for a return showing the names of all employees of the Government of Canada in the inside and outside service who have enlisted since the 4th day of August, 1914, for overseas service; and the names of all employees of the Government of Canada in the inside and outside service who have enlisted since the 4th day of August, 1914, for home defence; also the salary received by each previous to enlisting; and the rate of pay received by each since enlisting; specifying those, if any, who continue to enjoy the salaries paid them before their enlistment and the amount of same. Presented May 10, 1916.—*Mr. Kyte*..*Not printed.*

290. Return to an Order of the Senate, dated 26th April, 1916, for:—A copy of the agreement between the Government of Canada, acting for the Transcontinental Railway, the Canadian Pacific Railway Company and the Canadian Northern Railway Company for the construction, operation and maintenance of the Union Station at Quebec, which the Honourable the Acting Minister of Railways says (*Hansard*, page 2690) is to be used by these three railways.—(*Senate*).. .. ..*Not printed.*

291. Return to an humble Address of the Senate, dated 29th March, 1916, to His Royal Highness the Governor General; praying His Royal Highness to have laid on the Table of the Senate:—A statement of all expenses to date in connection with the expenditures of public moneys at Port Nelson; also an estimate of the further expenditure to complete the works at Port Nelson on Hudson Bay.—(*Senate*).. .. ..*Not printed.*

292. Return to an Order of the House of the 3rd April, 1916, for a copy of all investigations, letters and correspondence whatsoever, regarding the dismissal of J. B. Deschênes and Thomas Bernier, employees on the Intercolonial Railway at Rivière du Loup. Presented May 12, 1916.—*Mr. Boulay*.. .. ..*Not printed.*

293. Return to an Order of the House of the 19th April, 1916, for a return showing a list of the decoders and censors employed at Halifax since the war broke out, together with the names, dates of employment, total amount paid, by whom recommended, and former employment of each. Presented May 12, 1916.—*Mr. Sinclair*.. .. ..*Not printed.*

294. Return to an Order of the House of the 22nd March, 1916, for a return showing:—1. Whether there is a list of companies, firms, or persons resident in Halifax, N.S., at present in the Department of Militia and Defence from whom are asked tenders for war supplies on behalf of the said Department or War Purchasing Commission. If so, the names of such companies, firms or persons. 2. During the calendar year 1915, whether public tenders were asked for any war supplies at Halifax, N.S. 3. If so, the nature of the supplies for which tenders were asked, to whom tenders were awarded, and the prices, for the said respective articles or supplies. Presented May 12, 1916.—*Mr. Maclean (Halifax)*.. .. ..*Not printed.*

295. Reports of engineers relating to the Lotbinière and Megantic Railway; the Quebec, Montmorency and Charlevoix Railway between Quebec and Cape Tourmente; and the Quebec and Saguenay Railway from Cape Tourmente to Nairn Falls, near Murray Bay. Presented by Hon. Mr. Reid, May 15, 1916.. .. ..*Not printed.*

CONTENTS OF VOLUME 28—*Concluded.*

295a. Correspondence in respect to the offer of sale to the Government of Canada of the Quebec, Montmorency and Charlevoix Railway, the Quebec and Saguenay Railway and the Lotbinière and Megantic Railway. Presented by Hon. Mr. Reid, May 16, 1916.
Not printed.

296. Return to an Address to His Royal Highness the Governor General of the 1st March, 1916, for a copy of all correspondence, letters, telegrams, Orders in Council, etc., relating to the transfer by the Government of Ontario to the Government of Canada, of the rights held by the former in the lakes, dams, etc., contiguous to or forming a part of the Trent Valley Waterways System. Presented May 17, 1916.—*Mr. Graham.*
Not printed.

297. Return to an Order of the House of the 1st May, 1916, for a copy of all papers, telegrams, letters and other documents in connection with the decision to locate an interior storage elevator at Calgary, Alberta. Presented May 17, 1916.. .. ..*Not printed.*

298. Return to an Order of the House of the 12th April, 1916, for a return showing the plan and description of the proposed permanent harbour quay line in the harbour at Pictou, and for a copy of all papers, letters, telegrams and other documents relating to the establishment of the same. Presented May 17, 1916.—*Mr. Macdonald .. ..Not printed.*

299. Return to an Order of the House of the 21st February, 1916, for a copy of all tenders, offers, letters, telegrams and other documents relating to the arrangements for the handling of freight and coal at Pictou, in connection with the boats engaged in the winter service between Pictou and Prince Edward Island during the year 1914-1915, and during the present season. Presented May 18, 1916.—*Mr. Macdonald .. .. ..Not printed.*

FORTY-EIGHTH ANNUAL REPORT

OF THE

DEPARTMENT OF MARINE AND FISHERIES

For the Fiscal Year

1914-15

MARINE

PRINTED BY ORDER OF PARLIAMENT.

OTTAWA
PRINTED BY J. DE L. TACHÉ, PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1915

[No. 21—1916.]

To Field Marshal, His Royal Highness Prince Arthur William Patrick Albert, Duke of Connaught and of Strathearn, K.G., K.T., K.P., etc., etc., etc., Governor General and Commander in Chief of the Dominion of Canada.

MAY IT PLEASE YOUR ROYAL HIGHNESS:

I have the honour to submit herewith, for the information of Your Royal Highness and the Parliament of Canada, the Forty-Eighth Annual Report of the Department of Marine and Fisheries, Marine Branch.

I have the honour to be,

Your Royal Highness's most obedient servant,

J. D. HAZEN,

Minister of Marine and Fisheries.

REPORT

OF THE

DEPUTY MINISTER OF MARINE AND FISHERIES

To the Honourable J. D. Hazen,
Minister of Marine and Fisheries.

Sir,—I have the honour to report on the transactions and service of the different branches of the Marine Department for the fiscal year ending March 31, 1915—Forty-eighth Annual Report.

This report contains the annual reports in detail of the officials in charge of separate branches of the department for the fiscal year, and of the outside service under control of harbour commissioners, portwardens, inspectors of live stock shipments and shipping masters, for the calendar year 1914.

In reviewing the service of the department as a whole, it can be said, that in improving navigation no interruption occurred. New aids to navigation were established and the former aids, generally speaking, were successfully maintained. The necessary changes considered and contemplated in connection with the estimated expenditure, with the exception of a few noteworthy instances, were carried out. Some of these changes and a large part of the new construction, as will be seen by the detailed reports, were completed, while progress was made in unfinished work. Two important instances, in which no progress was made, are the suspension of work on the icebreaking steamer for the St. Lawrence river and a large dredge for the ship channel deepening. The contractors for the icebreaker informed the department that their shipyard at Montreal had been requisitioned by the British Government and they applied for an extension of time in which to complete the steamer.

These two important interruptions account largely for the large unexpended balances of the appropriation by Parliament for carrying on the construction work of this department.

Some difficulties were encountered in districts in taking up large buoys owing to unexpected rough and cold weather, especially in the Quebec district. The efforts were finally successful and the buoys were secured.

Progress was made in several of the most important harbours of the country in deepening channels, anchorages and construction of docks. The new Marine depot at St. John, N.B., and the extensive wharf will provide facilities for handling large buoys, lighthouse supplies and berthing accommodation for the departmental steamers; the depot is not yet completed.

On the 29th of May, 1914, the most serious marine disaster in the history of the country occurred in the St. Lawrence river, four miles below Father point, by the sinking of the Canadian Pacific ocean liner *Empress of Ireland,* caused by the collision with the Norwegian coal steamer *Storstadt;* the loss of life was serious, causing the deepest regret. An investigation of the most thorough kind was made into the question of the responsibility for the collision. The proceedings and judgment of the Court of Inquiry is contained in a special report published by the department. It is shown that the collision was in no way due to any fault in aids to navigation, lack of sea room, nor depth of water in the river. On the other hand it was shown that the river affords ample room for navigation of large ships and the aids are on an extensive scale.

The Parliamentary appropriation for the fiscal year was $7,405,684.25, the total expenditure was $6,202,908.16, leaving an unexpended balance of $1,202,776.09. The net revenue of the department was $795,550.27, of this amount the sum of $493,000 was received as the purchase price of the icebreaking steamer *Earl Grey* from the Russian Government. The statement of expenditure in connection with the different services and the statement of revenue form appendix No. 5 of this report.

Several harbours were proclaimed during the year and the harbourmasters appointed.

The subdivisions and branches of service under which the whole work of the Marine Department was carried out, are as follows:—

The construction of lighthouses and fog-alarms by the Engineer's Branch.

The maintenance of lights, gas buoys and other buoys by the Commissioner of Lights' Branch.

The Lighthouse Board which decides the necessity for aids to navigation.

The ship channel, St. Lawrence river and Sorel shipyard.

Meteorological and magnetic service.

Investigations into wrecks.

Wrecks and casualties.

Board of steamboat inspection.

Marine hospitals.

Submarine signals.

Shipping under the Merchants' Shipping Act.

Legislation and administration of laws relating to the Department of Marine.

Humane service in connection with seamen and life-saving stations.

Winter communication.

Removal of obstructions to navigation.

Pilotage, masters and mates, and seamen.

Government of ports and proclaiming of harbours in the Dominion.

Control of harbours and government wharves.

Dominion steamers, Marine Department.

Port wardens.

Wreck receivers.

Harbour commissioners.

LIGHTHOUSE CONSTRUCTION, IMPROVEMENTS AND REPAIRS.

The work of construction of lighthouses, lightkeepers' dwellings, light-towers, fog-alarm buildings, boat-houses, protection work, and repairs to lighthouses in general, are specified in the Chief Engineer's report. Many improvements were made by changing the lights to higer power.

New lights and aids to navigation established, changes and improvements and repairs at existing stations and lighthouse and buoy depots, are detailed in the report of the Chief Engineer, appendix No. 1 to this report. Extensive improvements were made at a number of stations, and minor improvements and repairs at others.

In Nova Scotia three lighthouses with dwellings, sheds and other outbuildings, were begun; five fog-alarm buildings, three with dwellings, and one concrete tower, were erected; three pole lights and extensive repairs, changes and improvements were made at 34 stations. Minor repairs were made at other stations.

In New Brunswick, five lighthouses were begun; two fog-alarms; three combined lights and dwellings, six pole lights and one steel skeleton tower, were erected. One lightship was established; one concrete tower erected; the work at the St. John buoy and beacon depot was continued and extensive changes and improvements made at 20 different stations; five lighthouse sites were selected and minor repairs were carried out at a number of stations.

In Prince Edward Island, changes and improvements were made at eight different stations and minor repairs carried out at a number of others.

In Quebec, two lighthouses were begun. Four pole lights, one steel skeleton tower and one dwelling were erected. Extensive changes and improvements were made at twenty-one different stations, and minor repairs at a number of others.

In the Montreal district, three new lighthouses were begun. Eight beacons were built. One steel skeleton tower, was erected, and extensive changes and improvements made at six stations.

In Ontario and the Northwest territories, two steel skeleton towers were erected, and 5 pole lights, and one concrete tower. One Aga gas beacon was installed, five fog-alarms established and extensive repairs and improvements made at three stations.

In British Columbia, two skeleton towers, four pole lights, two concrete towers and keepers' dwellings were erected and one fog-alarm building was begun. A large number of beacons consisting of day beacons, acetylene beacons, two Aga gas beacons, and seven concrete beacons were established and extensive changes and improvements made at three stations.

In Hudson bay and strait, ten Aga gas beacons were erected and the lights installed.

Notices to Mariners were issued as usual apprising mariners of the establishment of new lights and buoys and changes in Canadian waters, and as far as possible, in waters contiguous to our waters. Many of these notices included changes in navigation in British waters owing to the war in Europe. All Notices to Mariners were sent to custom houses to deliver to masters departing from the ports.

REMOVAL OF OBSTRUCTIONS TO NAVIGATION.

As usual the work of removing obstruction, such as hulks, logs and other obstructions was carried on in different localities. Part of the work was performed under contract and part by use of Dominion steamers as will be seen by the following extract from the Chief Engineer's report:—

Bear River, N.S., removal of stumps cost	$ 10 00
Margaree Harbour, N.S., removal of wreck of steamer *Elector* by contract, cost	150 00
Guysboro Harbour, N.S., hulk removed, cost	32 85
Yarmouth Harbour, N.S., hulk removed, cost	10 00
North Head, Grand Manan, N.B., sunken moorings removed under contract, cost	75 00
St. John river, "dead heads" removed, cost	44 75
Charlottetown Harbour, P.E.I., removal of hulk of steamer *Elfin* under contract, cost	500 00
Lachine, P.Q., removal of wrecks of steamer *Rhoda* by day labour, cost	1,273 81
Lake St. Clair, removal of the wreck of the *Chas. Crawford*, contract, cost	1,450 00
Lake Erie removal near Amherstburg of the wreck of the *City of London* by contract, cost	4,900 00
Summerside, P.E.I. Harbour, removal of submerged logs by Dominion steamer *Brant*.	
Port Dalhousie, Ont., removal of the *Delver* by the owners.	
Incidental expenses	82 53
Total expenditure	$8,528 94

LIGHTHOUSE SUPPLY SERVICE.

Lighthouse supplies consisting of illuminating oil, lamps, paints, etc., were delivered at lightstations by Dominion steamers. The superintendents of lights in each agency prepared lists of quantities and supervised the delivery of the articles, at the same time carried out inspection of the stations. The superintendents reported to the agents on the east and west coasts and the Superintendent of Lights for Ontario to the department. The work of the different supply boats is described under the heading of Dominion Steamers.

REPORT OF THE COMMISSIONER OF LIGHTS.

This report contains statements of the aids to navigation maintained throughout the year and the number of the new gas buoys that were established during that period. A convenient table of the different lighthouses, buoys, beacons and lightkeepers is included in the report; from it may be ascertained the number of lighthouses, keepers and aids kept up in the separate provinces and the total for the year in the Dominion.

A comparison with the year 1913-14 will show an increase in different orders of lights.

In 1913-14 the total number of lights maintained of all kinds was 1,461. The order of lights ranging, 1st order to 7th order indicates the candle power. The lights are also divided into dioptric or lens lights and the catoptric or reflector lights. Some of the lights are also electric lights with incandescent and arc lamps.

The distance at which the lights can be seen at sea from the stations is stated in the List of Lights published separately from this report.

The table above referred to contains also the number of fog-alarms that are in operation, of the diaphone and other types.

The diaphone fog-alarms increased from 98 in 1913-14 to 105. In the buoy service all types of buoys increased in 1914-15.

The coast buoys, consisting of gas buoys, combined sounding and lighted buoys, show an increase from 319 to 336. Lightkeepers increased from 1,040 to 1,066. The whistling buoys from 30 to 31 and the bell buoys from 82 to 86. Total of gas, whistling and bell buoys in operation this year is 453.

The report in full forms appendix No. 2 of this report.

ST. LAWRENCE RIVER SHIP CHANNEL.

Repentigny channel from Isle Ste. Thérèse to Lavaltrie was completed to a depth of 15 feet at E.L.W., buoyed out and opened to navigation. There is now a channel for light draught vessels of 55 miles, except for half a mile below Pt. aux Trembles, from Montreal to lake St. Peter, outside of the ship channel.

The 30-foot project between Montreal and Quebec is completed, with the exception of 1·75 miles at St. Augustin bar, where operations will be carried on next season. Vessels of deep draught pass now during rising or high tide.

Widening of Cap à la Roche channel and curve is completed.

Widening of Varennes curve near Montreal is completed to 650 feet.

Widening of Cap Charles channel completed.

Grondines channel (Horseback bar) has been widened to 450 feet.

The channel approach to Montreal floating dock is completed to a minimum width of 900 feet and depth of 30 feet E.L.W.

From Quebec to the Traverse below Quebec, a distance of 60 miles, 6·65 miles required dredging. Two miles have yet to be dredged in the north channel, the south channel having been completed in 1912 and opened to navigation.

Thirty-five-foot new project.

The channel termed the 35-foot channel is the same channel as that now known as the 30-foot channel, which will be deepened to 35 feet under the new project.

Under the survey made for the 35-foot project it was found that 90 miles of dredging would have to be done along the course of the channel from Montreal to the Traverse below Quebec. This of course means dredging at points as shown on the profile map. Some portions of the channel in their natural state do not require dredging at all as the water is very deep.

Progress of dredging operations in the 35-foot project, E.L.W., has been as follows:—

Division No. 1.—Montreal to Sorel, distance, 45 miles; length dredged in 1914, 2·35 miles; length yet to be dredged, 24·51 miles.

Division No. 2.—Sorel to Batiscan, distance, 36 miles; length dredged in 1914, 0·01 mile; length yet to be dredged, 18·50 miles.

Division No. 3.—Lake St. Peter, length of division, 20 miles; length dredged in 1914, 2·67 miles; length yet to be dredged, 3·09 miles.

Division No. 4.—Batiscan to Quebec, distance 59 miles. No dredging was done in 1914. Yet to be dredged 15·54 miles.

Division No. 5.—Quebec to Goose cape, distance 66 miles (North channel). No dredging was done in 1914; length yet to be dredged in this division is 7·39 miles. The total length dredged in 1914 in the 35-foot channel was 5·03 miles, leaving 69.03 miles yet to be done.

The Cap à la Roche semaphore which shows the available depth of water in the dredged channel at Cap à la Roche at different stages of the tide was put in operation on the 7th of May, and the St. Nicholas semaphore, showing depth over undredged St. Augustin bar on the 9th of May, 1914. Arrangements were also made with Bell Telephone Company for special wire to connect Cap à la Roche and Point Citrouille semaphore stations on October 5, 1914. This new addition to aids to navigation has given great satisfaction to the shipping interest.

The usual sweeping was done during the season, but no obstruction was found.

The number of cubic yards dredged during the season amounted to 6,225,143, at a cost of $1,036,846.65. The total cost from 1851 to end of the fiscal year 1915 (March 31) of the ship channel, including plant, etc., from Montreal to Father point, was as follows:—

Dredging	$11,542,341 81
Plant, ships, surveys, etc.	6,761,627 37
	$18,303,969 18

The dredging fleet consists of 15 dredges, 20 tugs, 5 coal barges, 3 stone lifters, 1 rock cutter, 1 hopper barge, 3 soundings scows, 1 floating shop, 4 winch scows, 30 dumping scows, 1 derrick scow.

A contract was given in October, 1914, to the Canadian Vickers, Ltd., of Montreal, to build one of the largest sea-going elevator dredges in the world, to be added to the dredging fleet.

Two serious accidents occurred during the season. On September 18, C.G.S. *Montmagny* collided with the collier *Lingan* near Crane island. The *Montmagny* was sunk, and fourteen lives lost.

On October 16 ss. *Batiscan* collided with tug *Muriel*. The *Muriel* was sunk, and one life lost. There were also some minor accidents. None of them, however, can be attributed to any fault in the channel.

Icebreaking was carried on as usual by the steamers *Lady Grey* and *Montcalm*. The winter of 1914-15 was an unusually mild one.

The ice stopped at the bridge two or three times during the winter, but was broken up easily.

SIGNAL SERVICE.

The Marine Telegraph Signal Service at Quebec, Halifax, St. John, North Sydney, river and gulf of St. Lawrence, and telephonic and reporting service between Quebec and Montreal, were combined on the 1st of April, 1914, under the heading of Signal Service, with headquarters at Quebec.

A private telephone line has been established between the Signal Service office, Montreal, and the Canal office at Lachine, giving movements of vessels, and by arrangement with the Department of Railways and Canals their officials at Lachine, Soulanges, Cornwall, Galops, Welland and Sault Ste. Marie report several times daily the movements of vessels to the Signal Service at Montreal.

In August, the Batiscan signal station was closed and a new one opened at Pointe Citrouille, and an additional telephone line installed between the latter place and Three Rivers connecting with the St. Jean signal station.

The signal station at Verchères is to be closed and replaced by two new ones, one at Cap St. Michel and the other at Bellmouth curve. It has also been decided to establish signal stations in the lighthouses at point Tupper, N.S., and Scatarie island, N.S., and a reporting station in the Main-à-Dieu, N.S., lighthouse.

A report of the Signal Service at the Citadel, Halifax, prepared by D. H. Williams, Lieut. R.C.E., is contained in appendix No. 11, and shows the number of vessels of different kinds that entered the harbour and vessels that passed.

ICEBREAKING.

Icebreaking in the St. Lawrence river is reported upon at length in the report of the Superintendent of the St. Lawrence ship channel. Captain McLean of the *Lady Grey* states in his report on icebreaking service that the weather on the 18th of November, 1914, turned cold and continued so for a week. The *Lady Grey* and *Bellechasse* were sent to Three Rivers to be held in readiness to assist vessels navigating the St. Lawrence river. The *Manchester Spinner* passed outward on the 4th of December and was the last vessel for sea. The weather became moderate and the winter of 1914-15 was exceptionally mild, the thermometer registering zero or below on two or three occasions only.

Although this was the case the steamers *Montcalm* and *Lady Grey* were kept engaged in breaking up ice-jams at various points in the river nearly the whole winter season. Two of the most difficult ice-jams to remove was one at the bridge above Quebec, and the other in the lower part of Quebec harbour.

In the early part of the winter the *Montcalm* had been sent down the river from Quebec to the gulf, therefore, the service of the two steamers in breaking accumulations at the same time, early in the season, was impossible, and icebridges or jams formed at different points, causing laborious operations throughout the winter. It is stated that their efforts, although successful, were the most difficult since the icebreaking service was established in 1909.

Icebreaking in the harbour of Port Arthur and in the north channel of lake Huron are referred to in the Chief Engineer's report. The work, under contract, during the winter of 1914-15, was continued.

Winter communication between Prince Edward Island and the mainland, kept up by the *Minto* and *Stanley* and the small iceboats between cape Tormentine and cape Traverse, is referred to under the head of Dominion Steamers.

SOREL SHIPYARD.

At the beginning of the fiscal year all the vessels that had been undergoing repairs and alterations during the winter were about ready to begin the coming season's operations.

The first vessels of the fleet to leave Sorel cleared on the 4th of May and began work in the ship channel. Repairs to the ship channel fleet are divided into summer and winter repairs in the performance of the work of the year at the yard; summer work of this kind being generally due to accidents while the vessels and dredges are operating.

Extensive repairs and alterations were made to some of the different kinds of vessels, including the usual overhauling; in other cases, minor repairs and overhauling only were necessary.

Sixteen dredges were put and kept in thorough working condition during the year, but one received winter repairs at Quebec.

Seventeen tugs of the ship channel fleet were overhauled, repaired and painted, during the winter months; several of them were again taken to the shipyard during the summer for minor repairs, and in the cases requiring replacing of broken propellers and repairing damage to rudders, were hauled out.

Five steam barges of the same fleet received ordinary repairs during winter, three of them were repaired slightly during the summer.

Three sounding scows were hauled out of the water and had their hulls repaired; twenty-eight dumping scows were kept in working order by making frequent repairs to the hydraulic cylinders and hopper doors and eight of these scows were drawn from the water to make repairs to their hulls; the floating shop was equipped with beds for the crew; the stone lifter, rock cutter, derrick, scows, winch scow and pile driver were also kept in repair by work done at the shipyard.

The *Frontenac* and *Lady Grey,* also of the ship channel fleet, were overhauled and painted, the former received slight summer repairs and renewals of part of the vessel during the winter; the latter being employed in winter work as well as summer received necessary repairs, was painted and machinery and hull put in good working condition.

Two tugs belonging to the Public Works Department were hauled out of the water and repaired.

Repairs of different kinds were made to the four or five tugs used in the Construction of Lights service of this department.

Lightships 1, 2 and 3 were hauled up from the water, painted below the water line and elsewhere. New deck plates replaced the old ones, and other substantial work was done in renewing the lightships.

The new construction work consisted of building tugs and scows for the ship-channel operations and other branches of departmental service. Vessels laid down the year previous were completed or the work advanced. The vessels under construction are known by numbers 45 and 46, twin-screw combined tugs and fire boats; 54, a wooden patrol boat; 57, a twin-screw steel-testing boat for the ship channel; 59, a tug to be employed below Quebec; 60, a buoy service boat for the Ottawa river; 61 and 62,

hopper barges, and 63, a coal barge; 47 to 50, steel dumping scows, and 64 to 67, also steel dumping scows.

Several yard buildings were altered and repaired and a small number moved to more convenient locations.

Appendix No. 4 is the report in detail of the Sorel Shipyard work and a statement of expenditure showing the total amount expended at the shipyard to have been $1,579,115.48.

DOMINION STEAMERS.

NOVA SCOTIA DISTRICT.

Lady Laurier.

The *Lady Laurier* is a twin-screw steel vessel, 214·9 feet long, 34·2 feet wide, 17·2 feet deep; 439 net, 1,051 gross tonnage and 186 nominal horse-power. She was built in Paisley, Scotland, in 1902. This vessel is employed in the lighthouse and buoy service of this department, under the direction of the Nova Scotia agency.

This ship was in the lighthouse and buoy service at the beginning of the fiscal year and continued work until the 26th of July, when she was put in dry dock. Repairs to plating, decks, tanks and railing were made. The bottom was cleaned and painted and a new wireless equipment installed, besides other minor repairs.

She was then transferred to the naval service for a short time, and afterwards resumed work in the lighthouse and buoy service, which was continued until the close of the fiscal year, except a few days in January and March, 1915, when she underwent minor repairs and boiler cleaning.

Stanley.

The *Stanley* is a single-screw steel vessel, built in Govan, G.B., in 1888, specially for winter navigation in the strait of Northumberland, and is 207·8 feet long, 32·0 feet wide, 17°9 feet deep; 395 net, 914 gross tonnage, and 300 nominal horse-power.

The *Stanley* made a trip to the Magdalen islands, cape Race, Newfoundland, and Cabot strait during the month of April and continued in the lighthouse and buoy service until the 1st of August when she was transferred for a short time to the Naval Department.

She was laid up for annual overhaul and repairs on the 1st of September. The boilers were scaled and cleaned and caulked, Weir's pump repaired, condenser retubed, pumps overhauled and repaired, engines repaired, a Sellar injector fitted, electric lights repaired and all piping put in good repair, and she was transferred to the Prince Edward Island agency 11th December for winter navigation between the island and the mainland.

Aranmore.

The *Aranmore* is an iron screw steamer built in Dundee, Scotland, in 1890. She is 241·5 feet long, 34·8 feet wide, 15·7 feet deep, 500 net, 1,170 gross tonnage, and has 260 horse-power.

This steamer was bought by the department from James Holliday, Esq., of the city of Quebec, on the 3rd of July, 1914, and in August went to Port Burwell with coal for the *Minto* and to take gas tanks and pole lights for Hudson strait.

She returned in October and distributed coal to fog-alarm stations in the bay of Fundy and was put on the slip for repairs, resumed supply work on the western shore, was again put on slip for repairs and in January began work and continued operations until the end of the fiscal year.

NEW BRUNSWICK DISTRICT.

Aberdeen.

The *Aberdeen* is a single-screw steel vessel, built in Paisley, Scotland, in 1894, and is 180 feet long, 31·1 feet wide, 16·9 feet deep, 274 net, 674 gross tonnage and 200 nominal horse-power.

The Aberdeen is employed in the lighthouse and buoy service under the control of New Brunswick agency and was at St. John at the beginning of the fiscal year, and continued operations until August 27, when she was hauled on Dartmouth slip. She left the slip on the 29th and resumed work.

Boiler repairs were made at St. John from the 1st to the 4th December, when she resumed work.

On the 30th of December she was ordered to proceed to a wreck at Tucket island, but owing to rough sea could render no assistance.

On the 27th of February she was moved to berth No. 6, St. John, and remained there until the 12th of March, undergoing repairs to winch and general overhauling, and resumed operations. Was at St. John at close of year.

Lansdowne.

The *Lansdowne* is a wooden steamer built at Maccan, N.S., in 1884, and is 188·6 feet long, 32·1 wide, 15·8 feet deep; 463 net, 680 gross tonnage and 80 nominal horse-power.

This steamer is employed in the lighthouse and buoy service under the direction of the New Brunswick agency. At the beginning of the fiscal year she was at Westport, N.S., and continued operations until the 6th of May, when a buoy hawser got caught in propeller and the steamer had to be towed to St. John and divers employed to clear hawser from propeller.

While at anchor off cape Sable the ship struck bottom several times and sprang a leak. She was placed on the Marine railway on the 19th of September for repairs. She was taken off the Marine railway on the 29th of September and began regular service, but on the 19th of October she had to be placed on Hilyard's blocks for overhaul and repairs, came off blocks on the 14th of November and continued operations until the close of the fiscal year.

PRINCE EDWARD ISLAND DISTRICT.

Earl Grey.

The *Earl Grey,* an icebreaking freight and passenger steamer, built specially to keep up communication between Prince Edward Island and the mainland during the winter season, was sold to the Russian Government in September, 1914.

Immediately after the outbreak of the war in Europe negotiations were opened by the Russian Government for the purchase of this steamer to be used in winter navigation at Archangel; the steamer was sold for the sum of $493,000.

Minto.

The *Minto,* is a single-screw steel vessel, built in Dundee, G.B., in 1899, specially for winter navigation in Northumberland strait, between Prince Edward Island and the mainland, is 225 feet long, 32·7 feet wide, 18 feet deep, 446 net, 1,090 gross tonnage, and her engines develop 216 nominal and 2,900 indicated horse-power.

The *Minto* was on the Pictou-Georgetown route at the beginning of the fiscal year, was on the Charlottetown-Pictou route from the 3rd to the 19th April, 1914. She broke ice in Summerside harbour on the 20th, left for Judique, C.B., on the 22nd to assist SS. *Glencliffe,* finished towing her clear of ice on the 26th, and returned to Charlottetown on the 28th, left for Pictou on the 30th, returned on May 4th, entered the service of the Steam Navigation Company, in which she remained until the 25th May, and sailed for Pictou on the 29th to go on the "slip." She left Pictou for Halifax on June 2nd to prepare for Hudson bay trip, on which she sailed on July 3rd.

The *Minto* arrived at Halifax from the Hudson bay trip on the 5th of October, went on the slip, had repairs made to boilers, engines, other parts of machinery and tackle, had hull repaired and painted and the vessel was put in fit condition for winter navigation. She left the slip on the 24th of October, arrived at Charlottetown on the 29th. She remained at the Marine wharf, Charlottetown, preparing for winter service until the 22nd December, when she began the winter service between Charlottetown and Pictou. She began on the 24th of December on the Georgetown-Pictou route, where she remained until the end of the fiscal year.

The *Minto* made 60½ round trips, carried 14,526,314 pounds of freight, 476,440 pounds expressage, 3,186 passengers, provided 2,963 meals and 1,118 berths to passengers.

She earned	$10,219 03	from	freight.
"	952 60	"	expressage.
"	4,215 00	"	passengers.
"	296 30	"	meals.
"	1,118 00	"	berths.
"	1,225 00	"	Steamship Navigation Co.
"	23 40	"	meals, etc.
Total,	$18,049 33.		

Stanley.

The *Stanley* was transferred from the Nova Scotia agency to that of Prince Edward Island on the 1st of December, 1914, to take the place of the *Earl Grey,* sold to the Russian Government.

From the 2nd to the 10th December, she was engaged in lifting buoys in Charlottetown harbour, was under repairs from the 11th to the 16th, went on the Summerside and Tormentine route on the 17th where she plied until the 24th December, when owing to ice conditions, she sailed for Georgetown and remained on the Georgetown-Pictou route to the close of the fiscal year.

The *Stanley* made 36 round trips, carried 7,281,819 pounds freight, 267,559 pounds expressage, 1,746 passengers, served 1,423 meals and 694 berths were occupied by passengers during the season.

During the winter service, she earned $4,984 51 from freight.

"	"	535 11	"	expressage.
"	"	2,224 25	"	passengers.
"	"	142 30	"	meals.
"	"	694 00	"	berths.

The meals are furnished by the steward, who pays the ship 10 cents each meal for the privilege.

Brant.

The *Brant* is a wooden vessel, built in Charlottetown, P.E.I., in 1898, is 100·4 feet long, 19·1 feet wide, 9·5 feet deep, 58 net, 142 gross tonnage, and has 33 horse-power.

The *Brant* was at the Marine wharf, Charlottetown, undergoing repairs until the 4th of May, 1914, when she began the buoy service, which she carried on until the 16th December, when she was transferred to the Naval Service and sailed for Halifax. She again began the buoy service in Nova Scotia waters, until the 11th of January, when she was returned to the Naval Service until the 27th January to the 25th of February, then entered on harbour buoy work and was returned again to the Naval Service, in which she continued until the close of the fiscal year.

Her earnings for special service were: $10 for towing schooner *J. E. Garland;* $225 for towing dredge *No. 9;* $150 for towing dredge *No. 9;* total, $385.

WINTER MAIL SERVICE BETWEEN CAPE TORMENTINE, N.B., AND CAPE TRAVERSE, PRINCE EDWARD ISLAND.

The mail boats and boathouses were put in good state of repair before the opening of the winter mail service, which began on January 16, 1915, with six boats leaving both sides, and continued with few interruptions until the 27th of February, and from the 13th to the 31st of March, making 50 trips from each side, earning $154.80.

QUEBEC DISTRICT.

Champlain.

The *Champlain* is a screw steel vessel, built in Paisley, Scotland, in 1904, is 120 feet long, 30·3 feet wide and 17·6 feet deep, is of 225 net, 522 gross tonnage, and 87 nominal horse-power.

She is under the command of Captain René Pelletier, carries a crew of from 26 to 28 men and is employed the year round in the ferry service between Murray Bay, Cap-à-l'Aigle, St. Irénée, on the north shore of the St. Lawrence river and Rivière Ouelle wharf, on the south shore, which is connected at Rivière Ouelle junction with the main line of the Intercolonial railway.

Owing to severe storms and heavy ice, she failed to make crossing 33 times from the 1st of January to the 9th of March.

She carried 8,486 passengers, 7,266 bags of mail weighing 121,065 pounds, and 1,815 tons of merchandise, furnished 1,576 meals to passengers and earned $7,196.65.

Druid.

The *Druid* is a single-screw steel vessel, built in Paisley, Scotland, in 1902, is 160 feet long, 30·1 feet wide, 12·5 feet deep, 149 net, 503 gross tonnage, and 59 horse-power.

She is employed in the lighthouse and buoy service under the control of the Quebec agency, is under the command of Captain Michel Gagnon, carries a crew of 31 men and has sailed from the 1st of April to the 30th of November, a distance of 13,316 miles.

Eureka.

The *Eureka* is a single-screw, steel vessel built in Glasgow, Scotland, in 1893, is 98·7 feet long, 22·0 feet wide, 11·0 feet deep, 170 gross, 19 net tonnage, and 60 horse-power.

The *Eureka* employed as a pilot tender, is under the command of Captain J. B. Bélanger, and carries a crew of 19 men. She leaves for the pilotage station at Father point, at the opening of navigation, takes on and off pilots, guiding ocean vessels up or down the river until late in the fall when she returns to Quebec where she is wintered and is fitted out for next season's operations.

Montcalm.

The *Montcalm* is a powerful twin-screw steel vessel, specially designed for ice-breaking in the St. Lawrence river and built at Yokers, G.B., in 1904.

She is 245 feet long, 40·6 feet wide, 15·7 feet deep, of 526 net, 1,432 gross tonnage, 406 nominal and 4,250 indicated horse-power. The vessel is in charge of Captain Edgar Pelletier and carries a crew of 67 men.

The *Montcalm* was employed in the lighthouse services during the summer and left Quebec for the Magdalen islands on the 20th of June, with lighthouse supplies, and returned on the 6th of July. The *Montcalm* sailed to the North shore and Newfoundland on the 28th of July with supplies; returned on the 17th of August, sailed for Bay Chaleur and Gaspé on the 10th of September and returned on the 4th of October.

The *Montcalm* sailed on her last supply trip for the season on the 20th October, sailing for the strait of Belle Isle, the north shore of Newfoundland, and returned

to Quebec on the 11th of November, was then kept in readiness to render aid to in-coming and out-going vessels and to help the *Druid* in raising buoys in the river St. Lawrence.

She sailed up the Saguenay on the 11th December to render aid to the steamer *Charterhouse,* began a trip to Seven islands on the 23rd December, returned on the 30th and sailed for Gulf ports on the 28th February, 1915, returning on the 6th of March.

Montmagny.

The *Montmagny* is a single-screw steamer, built of steel, in Sorel shipyard, in 1909, and is 212·6 feet long, 34·8 feet wide, 19·5 feet deep, 723 net, 1,269 gross tonnage, and 148 horse-power.

She was under the command of Captain F. X. Pouliot, carries a crew of 48 men and is employed in construction work, transporting workmen and materials to light-house stations in the river and gulf of St. Lawrence, strait of Belle isle and bay Chaleur.

While on a cruise to Gaspé coast, Newfoundland, and Anticosti, she was, on the 18th of September, run into and sunk near Beaujeu bank by the collier *Lingan* and fourteen lives lost.

Rouville.

The *Rouville,* a wooden steamer built at Sorel, P.Q., shipyard, in 1906, is 125 feet long, 26 feet wide, 14·2 feet deep; her net tonnage is 144 tons and her gross tonnage is 301 tons, and horse-power 54 nominal.

She was employed in the construction work, and replaced the *Champlain* on the Rivière-Ouelle-Murray Bay ferry service for a short time and the *Eureka* on the pilotage service from the 22nd of April until the 12th of May; made several trips to the strait of Belle isle and the Saguenay river on construction work, and left Quebec for Halifax on the 11th December, operated under control of Halifax agency, making trip to Sable island, attending to buoys and supplies until February, when she was laid up for repairs, was handed over to the Naval service on the 12th of March, returned to the same agency on the 17th, under which she worked until the close of the fiscal year.

MONTREAL DISTRICT.

Dollard.

The *Dollard* is a twin-screw steel vessel built in Kingston, Ontario, by the Collingwood Shipping Company, Ltd., in 1912, and is 170 feet long, 31·6 feet wide, 15·6 feet deep. This vessel was employed during the season in placing buoys and patrolling the ship channel from Platon to Montreal.

Maggie May.

The *Maggie May* is a tug, chartered by the department during the season of navigation, and was employed in the lighthouse, buoy and construction works on the Ottawa river, lake St. Louis, Rideau river and lakes.

Shamrock.

The *Shamrock* is a single-screw, wooden vessel, built at Quebec in 1894, is 117·3 feet long, 25 feet wide, 9·7 feet deep, 237 gross, 161 net tonnage, and 61 horse-power.

This boat is employed in the lighthouse and buoy service and was used during the first part of the season in placing buoys in the "Ship Channel" and afterwards when painting and supplying different lighthouses and lifting buoys in the fall.

BRITISH COLUMBIA DISTRICT.

Estevan.

The *Estevan* is a twin-screw, steel vessel built in Collingwood, Ontario, in 1912, and is 212 feet long, 38 feet wide, 15·3 feet deep, 1,161·42 gross, 606·61 net tonnage, has 174 horse-power and a speed of 12 knots an hour.

This vessel was overhauled at Yarrows, Ltd., Esquimalt, before the beginning of the fiscal year and began placing and attending to aids to navigation in the gulf of Georgia on the 18th of April, landing lighthouse supplies and overhauling aids to navigation from cape Mudge to the Alaska boundary.

The vessel was transferred to the Naval service and worked under the direction of the senior naval officer at Esquimalt from August the 12th to the 19th of September. She went to Victoria on the 24th to have repairs made to machinery and hull cleaned and painted, had slight repairs to machinery made at Esquimalt and on the 12th November again began the buoy service, which continued to the end of the year.

Quadra.

The *Quadra* is a screw, steel vessel built in Paisley, Scotland, in 1891. She is 174·5 feet long, 31·1 feet wide, 13·6 feet deep, has 265 net, 573 gross tonnage, and 120 nominal horse-power.

She is in the lighthouse and buoy service and was in this service until the 30th of July, when the ship was transferred to the Naval service until the 12th of August, when she was cleaned and repaired, and on the 19th resumed ordinary duties until the 8th of October, when she was turned over to Yarrows Ltd., at Esquimalt, for annual overhaul and repairs and continued regular work from the 16th of November until the close of the fiscal year..

Leebro.

The *Leebro* is a wooden, steam vessel built at Victoria, B.C., in 1908, and is 123·5 feet long, 28·8 feet wide, 11·1 feet deep, 198 net, 323 gross tonnage, and 23 horse-power.

This is a chartered steamer and was employed during the whole fiscal year in the lighthouse and construction service.

ONTARIO DISTRICT.

Simcoe.

The *Simcoe* is a steel twin-screw vessel of 217 horse-power, built by Swan, Hunter & Wingham, Richardson, Ltd., Newcastle-on-Tyne, G.B., in 1909, and is 180 feet long, 35·2 feet wide, 15·5 feet deep, 913 gross and 438 net tonnage.

She is employed in the lighthouse and buoy service on the Great Lakes and Georgian bay.

From the opening of navigation to the 22nd of September she was employed in the lighthouse and buoy service and then went into the Collingwood dry dock for repairs, where she remained until the 3rd of October, when she resumed work, which she continued until the close of navigation.

Lambton.

The *Lambton* is a single-screw steel vessel of 89 horse-power, built in Sorel shipyard, Quebec, in 1909. She is 108 feet long, 25·1 feet wide, 12·7 feet deep, 324 gross, and 182 net tonnage.

She is employed in lighthouse and buoy construction and supply services on the Great Lakes and Georgian bay and wintered at Parry Sound, where she was painted above water line and on the 15th of May sailed for Kingston, where she was placed on dry dock on the 24th. She was painted below water line, had propeller changed and necessary repairs made. The vessel resumed work on the 29th of May and continued until the close of navigation; wintered at Parry Sound in 1914-15, where she had repairs made to boilers and machinery preparatory to spring operations.

Scout.

The *Scout* is a twin-screw wooden vessel, built at Cardinal, Ont., in 1900, and is 103·6 feet long, 25·6 feet wide, 9·2 feet deep, 176 gross, 70 net tonnage, and has 12 horse-power.

She was repaired and fitted out in April, and went into commission on the 20th, continued work in the lighthouse and buoy service from Valleyfield to Presqu'ile under the direction of the officer in charge of Prescott Lighthouse Depot until the 15th of December, 1914, when she was laid up for winter; and repairs were made to hull and machinery during the month of March.

Reserve.

The *Reserve* is a single-screw, wooden vessel, 80·4 feet long, 17·5 feet wide, 5·8 feet deep, 114 gross, 37 net tonnage and 5 horse-power. She was built in Buffalo, N.Y., in 1884, and is used principally as a tug to tow and move scow *Parry Sound* in connection with the maintenance of aids to navigation in the Prescott division from Valleyfield to Presqu'ile.

Being overhauled and repaired she went into commission on the 20th of April, 1914, continued in the lighthouse and buoy service until the 16th of December, when she was laid up for winter; and was repaired in March, in preparation for next season's operations.

METEOROLOGICAL SERVICE.

Weather reports were received at the Central Station, Toronto, from 532 stations, including telegraph, climatological and storm signal stations; 363 of the observers receive remuneration, the remainder perform the service without remuneration. Of

the number in receipt of salaries 35 are employed at the central office. Persons in receipt of pay increased from 332 to 363 during the fiscal year. A few wireless stations ceased to report owing to the war going on in Europe.

Storm warnings were issued to 112 display stations in Canada, and of 2,037 warnings 88 per cent were verified. This service was extended to Newfoundland and warnings of expected storms were issued on 34 occasions. Storm warnings and forecasts were also issued to the wireless stations on the Great Lakes.

The new observatories at St. John, N.B, and Victoria, B.C., have been completed; these observatories are described in appendices to the Director's report and are well adapted and equipped for every branch of the service.

The full report of the Director of the Meteorological Service forms appendix No. 6 of this report.

SICK AND DISTRESSED MARINERS.

Under the provisions of the Canada Shipping Act, chapter 113, part 5, s. 338, R.S., dues of 1½ cents per ton, registered tonnage, are levied on every vessel entering any port of the province of Quebec, Nova Scotia, New Brunswick, Prince Edward Island, and British Columbia. The money thus collected forms the sick mariners' fund. Vessels of the burden of 100 tons and less pay duty once in each calendar year, and vessels of more than 100 tons, registered tonnage, three times in each year.

The officers and seamen of all fishing vessels not registered in Canada do not pay sick mariners' dues nor participate in the benefits accruing therefrom, but such vessels registered in Canada may pay dues and participate in the benefits; and if of more than 100 tons, only for the voyage at the beginning of which payment has been made; such vessels shall enjoy the same rights and benefits as are enjoyed by vessels which pay dues and are not engaged in fishing.

The Act, chapter 113, Canadian Shipping, does not apply to the province of Ontario, so no dues are collected from vessels in that province.

PROVINCE OF QUEBEC.

At the port of Quebec, sick mariners are cared for at the Jeffrey Hale and Hotel Dieu hospitals, at a per diem allowance of $1.50 for each seaman, including medical attendance and board.

At the port of Montreal, sick mariners are cared for at the General and Notre Dame hospitals, the charges at each institution being $1.50 a day, including board and medical attendance. Infectious and contagious diseases are attended at the Alexandra and St. Paul hospitals.

At the port of Three Rivers, sick mariners are cared for at the St. Joseph's hospital, per diem rate, 90 cents for each seaman. The medical officer receives $350 per annum for his services.

At the port of Chicoutimi, sick mariners are cared for at the St. Valier hospital; rate, $1.20 a day for each seaman, including treatment and board.

At the port of St. Johns the mariners are attended at the St. Johns hospital; rate, 90 cents a day. The medical officer receives a salary of $600 a year.

At the ports of Rimouski, Montmagny, Sorel and Rivière-du-Loup, sick mariners are attended at the local hospitals, and the medical services are rendered by the port physician.

PROVINCE OF NOVA SCOTIA.

Marine hospitals are maintained at Louisburg, Lunenburg, Sydney, and Yarmouth.

At the port of Halifax, sick mariners are cared for at Victoria General hospital; rate, $1.50 a day, including board and treatment. Contagious cases are treated at the City Isolation hospital.

At Pictou, sick mariners are taken to the Pictou Cottage hospital; rate, $1 a day. The medical officer is paid a yearly salary of $400.

At North Sydney, sick mariners are attended at the Hamilton Memorial hospital; rate, $1 a day. The medical officer receives a salary of $750 a year, including drugs supplied.

At Windsor, sick mariners are treated at the Payzant Memorial hospital; rate, $1 a day. The medical officer receives a salary of $120 a year.

At Amherst, sick mariners are treated at the Island View hospital; rate, $4.50 a week. The medical and surgical services are rendered by the port physician.

At Parrsboro and vicinity, sick mariners are taken to the Cottage hospital at Springhill; rate, $1.50 a day, including all costs.

At the port of Digby, sick mariners are treated in a designated hospital; rate, $3 a week, besides a salary of $50 for the caretaker. The medical officer receives a salary of $250 a year.

PROVINCE OF BRITISH COLUMBIA.

At Victoria, sick mariners are treated at the St. Joseph's hospital; rate, $1.40 a day.

At Vancouver, sick mariners are treated at the St. Paul hospital; rate, $1.50 a day, including all costs.

At Nanaimo, seamen are treated at the Nanaimo hospital; rate, $1 a day. The medical officer receives a salary of $600 a year.

At New Westminster, sick mariners are taken to the St. Mary's hospital; rate, $1.50 a day, including all costs.

At Chemainus and Ladysmith, sick mariners are treated in the local hospitals at the rate of $1 a day, besides medical and surgical services.

At Prince Rupert, sick mariners are treated in the Prince Rupert General hospital; rate, $2 a day. The port physician receives a salary of $500 a year.

PROVINCE OF NEW BRUNSWICK.

A marine hospital is operated and maintained at Douglastown for sick mariners arriving at Chatham, Newcastle, and vicinity. The medical officer receives a salary of $450 a year, and the keeper $250 a year.

At St. John, sick mariners are treated in the General Public Commissioners' hospital; rate, $1.50 a day, including all costs.

At Campbellton, treatment is given at Hotel Dieu hospital; rate, $5 a week. The medical officer receives a salary of $350 per annum.

At Moncton, sick mariners are treated at the Moncton hospital; rate, $4 a week. The medical officer receives a salary of $200 a year.

PROVINCE OF PRINCE EDWARD ISLAND.

At Charlottetown, sick mariners are treated in the Charlottetown and Prince Edward Island hospitals; rate, $1.50 a day, including all costs.

At Summerside, sick mariners are treated at the Prince County hospital, rate, $1 a day. The port physician receives a salary of $250 a year.

Where no hospital is maintained in any port of the maritime provinces, Quebec, or British Columbia, the collectors of customs are authorized to care for sick mariners entitled to receive the benefits of the fund.

Statement of receipts and expenditure on account of "Sick and Distressed Seamen" from the fiscal year 1904 to 1914, both inclusive:—

——	Receipts.	Expenditure.
	$ cts.	$ cts.
1904	61,778 29	50,801 78
1905	58,372 34	51,000 18
1906	60,183 90	50,120 42
1907	44,704 59	34,362 11
1908	69,364 45	59,957 92
1909	53,732 31	66,349 26
1910	55,567 41	54,859 50
1911	60,637 11	54,779 27
1912	63,663 41	52,172 75
1913	70,540 52	54,294 71
1914	72,602 43	65,397 85

Total amount of salaries paid to medical officers during the year 1914-15 was $15,398.51.

Number of seamen treated was 3,030, compared with 3,245 in the preceding year, while the number of days of hospital treatment was 22,140.

Number of vessels which paid sick mariners dues during the year 1914-15 was 3,148, and the number of men employed on these vessels, 65,221.

INVESTIGATION INTO WRECKS.

Captain L. A. Demers, Dominion Wreck Commissioner, reported that 26 formal, 10 preliminary and one departmental investigations into the cause of wrecks and casualties were held during the year ending December 31, 1914.

As a result of the investigations, three masters' certificates were suspended for one month, two for three months, one for six months and one for one year. One master was fined, and nine reprimanded or censured.

Two mates's certificates were suspended for three months, one mate cautioned and one exonerated.

Two 2nd mates' certificates were suspended for three months, one cautioned and one exonerated.

Three pilots' certificates were suspended for three months, and one cancelled.

In the case of four wrecks or casualtiqs it was adjudged that no one was to blame.

WRECK AND CASUALTIES OF SEA-GOING AND INLAND WATERS' VESSELS REPORTED.

The total casualties during the year amounted to 257 vessels with a total tonnage of 212,842.85 tons, and loss of $5,211,700 and 1,114 lives.

Of this total 212 were coasting and sea-going vessels, with 181,055·85 tons; loss, $5,083,765, and 1,113 lives; while forty-five casualties were to inland waters vessels of 31,787 tons, causing a loss of $127,935 and one life.

The amount of damage was not stated in the reports of 104 sea-going and coasting and 27 inland waters casualties.

The number of total losses was: sea-going and coasting, 31 steam and 41 sailing vessels; and of this number 52 were Canadian, 6 British and 14 foreign vessels; inland waters vessels, 5, all of which were Canadian.

SHIPPING.

The total number of vessels remaining on the Register Books of the Dominion on the 31st of December, 1914, was 8,772, measuring 932,422 tons, being an increase of 227 vessels and 35,457 tons, as compared with 1913. The number of steamers on the Register Books on the same date was 4,054, with a gross tonnage of 744,783. Assuming the average value to be $30 per ton, the value of the net registered tonnage of Canada on the 31st December, 1914, would be $27,972,660.

The number of new vessels built and registered in the Dominion of Canada during the year 1914, was 327, measuring 43,346 tons net register. Estimating the value of the new tonnage at $45 per ton, gives a total value of $1,950,570.

A comparative statement showing the tonnage of each of the Maritime States of the world is again given in the List of Shipping.

During the year 212 vessels were removed from the Register Books, and a detailed statement is given showing the cause of their removal.

It is estimated that 45,163 men and boys, etc., inclusive of the masters, were employed on ships registered in Canada during the year 1914.

The List of Shipping is a separate report and contains details of registered ships.

MASTERS AND MATES, NAVIGATION SCHOOLS AND PILOTAGE.

In appendix No. 9 of this report will be found the number of applicants for Masters and Mates certificates, the number who passed the examination and the number that failed, and a list of certificates issued to Masters and and Mates.

During the year the following certificates were issued: 14 masters', 18 mates', and 17 second mates', sea-going; 84 masters' and 68 mates' coasting certificates of competency: one master's certificate of service of inland waters; 32 masters' and 52 mates' certificates of competency for inland waters; two masters certificates of service minor inland waters; 52 masters' and 25 mates' minor inland waters certificates of competency, and 32 temporary certificates.

Applicants who failed numbered one for mate and two for second mate, sea-going; six for master, four for mate, coasting; five for master and four for mate, inland waters; seven for master and four for mate, minor inland waters; one for master's temporary certificate; fifteen failed to pass the eyesight test.

The receipts for fees from applicants for masters' and mates' certificates amounted to $4,561, and the expenditure on account of this service to $12,723.17.

In connection with navigation schools numerous sessions were held by nine instructors, but the average attendance of seamen was not as large as the department expected, considering the advantage to seamen.

In the same appendix are included extracts of pilotage reports made by pilotage authorities to the Minister of Marine and Fisheries for the calendar year 1914.

The minister is the constituted pilotage authority for the Montreal and Quebec districts, and all matters relating to pilotage administration are directed and controlled from the Department at Ottawa and placed under control of the General Superintendent of Pilotage in the Montreal and Quebec district. The Decayed Pilotage Fund of the Montreal pilots is disbursed by the Finance Department of the Dominion Government and a similar fund of the Quebec pilots is managed by the Quebec Pilots' Corporation.

The receipts from pilotage service rendered in the Montreal district during the calendar year amounted to $114,388.84, and in the Quebec district to $157,150.05; the total expenditure for maintenance, retired pilots and salaries, amounted to $46,433.07 for the calendar year, paid from Lighthouse and Coast Service appropriation for the administration of pilotage.

Twenty-nine pilotage authorities reported upon the transactions of their districts, and their reports are printed in appendix No. 9.

SABLE ISLAND.

The report of the Superintendent of Sable island was forwarded by the agent at Halifax. It contains an account of the repairs made to the different buildings, and to the life-boats that are maintained on the island. The season was uneventful.

Wreckage of the *City of Sydney* was thrown up on the beach in March last.

The total population of the island is 50.

Patrolling around the island was done as usual.

Stock killed: 30 oxen and 20 hogs, for use of people connected with stations. The stock that remained on hand, were 65 head of cattle, 40 trained horses, 4 colts and 6 hogs.

SUBSIDIZED WRECKING PLANTS.

The Quebec Salvage and Wrecking Company, subsidized by the Government under contract, returns a percentage of the earnings for services rendered to vessels that have been wrecked or requiring assistance from vessels of the company. From the 29th of April until the 30th of December, fifteen vessels in distress or to which casualties occurred received assistance. The services rendered were of greater or less importance, and are mentioned in the report of the company to the department and will be found in appendix No. 15 of this report. It will be seen that some of the vessels

were towed to points where they were repaired temporarily and some repairs were made at the places where the casualties occurred.

In some instances divers examined the vessels to ascertain the injury sustained at the place where the vessels grounded.

On August 5th, the *Lord Strathcona,* one of the company's tugs, operated in connection with the recovery of bodies from the wreck of the ss. *Empress of Ireland,* and continued in the work for 46 days.

The subsidy paid to this company is $25,000 per annum. The *Lord Strathcona* was maintained in readiness to assist vessels at St. John, N.B., during the winter season by special agreement.

The report of the British Columbia Salvage Company contains a detailed account of the operations between the 31st of March, 1914, and 31st March, 1915.

The company's steamer *Salvor* rendered salvage service on six occasions.

Vessels were towed into harbours to receive repairs. It will be seen by the report of the company that the *Salvor* was called upon to render service over an extent of sea waters from the strait of Juan de Fuca to Summer strait, Alaska.

The subsidy paid to the British Columbia Salvage Company was $10,000 per annum under the original agreement.

MONTREAL HARBOUR COMMISSION.

The commission is composed, as last year, of Messrs. W. G. Ross, Farquhar Robertson, and A. E. Labelle, whose report presents in a concise and convenient form the chief features of the past year's operations.

The work under the project of 1909, adopted that year, has been progressing. The improvements indicated in last year's report, to be made in 1914, were carried out, some of the work completed, and a portion of it under way.

In the fall of 1913 the vote for a loan made by Parliament was about expended. A new loan on capital account of $9,000,000 was voted by Parliament early in the spring of 1914 under Act 4-5, George V.

During the year the harbour was visited by His Royal Highness, The Duke of Connaught, Governor General, for the purpose of inspection.

The details of the work done at Montreal at the wharves, sheds, deepening of the harbour, enlarging, partial removal of Moffat island to lessen the St. Mary's current, determining of the boundaries at Longue Pointe and Bout de L'Isle, work in the vicinity of the dry dock, improvements and enlarging of the grain elevators, expenditure and receipts, are all described in detail in the report of the Montreal Harbour Commissioners, which forms appendix No. 13 of this report.

Among the important features of the administration might be mentioned in this brief summary some of the results of the operations in Montreal harbour.

Shipping is divided into transatlantic, coasting and lower ports vessels. The first vessel to arrive was the *Corsican,* which entered on the 29th of April.

The formation of the police force referred to in last year's report was completed in 1914. This force consisted of 35 constables who co-operated with the Dominion force of 40 men and the city police in maintaining order and in assisting to carry

out the regulations of the harbour. Every important entrance was guarded and, as a result, persons having business on the wharves and at the sheds and other places were required to produce passes from the Harbour Commissioners. The system worked satisfactorily and the only troubles experienced were some minor offences.

A noteworthy fact was the increase of tramp vessels to Montreal which took the place of regular liners that had been requisitioned by the Imperial and the Dominion Governments and, therefore, withdrawn from their usual voyages. These tramp steamers numbered 224 and increased the record of arrivals. There were, at one time, 56 steamers in the harbour.

The total tonnage in 1914 of vessels entering was 9,044,457 registered tons. This was a large increase over any previous year. This tonnage of course included all regular transatlantic liners engaged in carrying freight and passengers in the earlier part of the year, as well as coasting and inland waters vessels throughout the season of navigation. In making comparisons between Dominion ports and all Atlantic ports in America, North and South, it should be borne in mind that the open season of navigation for regular trade in Montreal harbour is only seven months of the year. An open season occasionally prolongs the shipping season ten to fifteen days, giving opportunities for colliers and local steamers to enter or depart, and allowing work to be performed in the harbour during the extension.

The exports of products exceeded the exportation of 1913, especially of grain; the total shipments amounting to 75,085,432 bushels, not including grain products.

The grain elevators of the commission handled 62,318,814 bushels, of which 61,484,474 bushels were exported. The grain conveyers from the elevators were extensively used to carry the grain to vessels lying at their berths at the piers.

Delay in unloading grain vessels occurred several times owing to the capacity of the two large elevators being taxed to their extreme limit in loading and unloading, and insufficient storing capacity for the time being. In consequence of the congestion an extension to elevator No. 1 has been begun and will be completed, if possible, in the spring of 1916.

The harbour transferring railway extension progressed and when completed will afford excellent service to any prospective industrial concerns building alongside the track. Fifteen new steel coal cars were added to the rolling stock and about 40,000 tons of coal conveyed to different business concerns. This accommodation gave much satisfaction. The terminal lines were also used in conveying troops and their equipment from the Grand Trunk railway to the Canadian Northern, on the way to Valcartier. After the outbreak of the war steamship lines were employed in carrying war stores and gifts to the sufferers by the war.

The construction work by the Engineering Branch was pursued in the deepening of basin, channels and steamers' berths, and the relieving of the pressure of currents, all by the dredging plant of the harbour.

The work in the vicinity of the floating dock and shipyard was nearly brought to completion. Additions to grain elevator No. 1 progressed, also the improvements and completion of sheds 24 and 25; work at high-level wharves, maintenance generally of the whole harbour work, including the harbour railway tracks and market basin work were continued.

The electric hoists in the sheds, floating crane, grain conveyers, large elevators, floating grain elevators and other earning plant were kept in an efficient state. The plant for performing all harbour work consisting of tugs, dredges, railway plant, fire equipment, life-saving, etc., were kept in good working order.

The total receipts in connection with the revenue account, itemized in the report, amounted to $1,466,364.27, the largest revenue in the history of the Harbour Commission; the disbursements on revenue account totalled $1,459,455.08.

Capital account expenditure for construction work, improvements, changes and repairs amounted to $1,758,368.83. The other financial operations, including advances from the Dominion Government in loans and disbursements for retiring debentures are shown in the general statement of the commissioners, appendix No. 13 of this report

QUEBEC HARBOUR COMMISSION.

Extensive improvements were carried out in the part of the harbour entitled the Harbour Commissioners' property. The harbour front is not entirely under the control of the commissioners as in the case of the harbour of Montreal.

Previous to 1914 the office building and quarters for the staff were separated by the occupancy of different buildings which did not afford proper accommodation, but a convenient arrangement was effected by the construction of a building on Pointe à Carey wharf, upon the site of the former grain elevator of the Great Northern Railway Company, destroyed by fire. The new quarters were occupied by the commissioners and staff during the greater part of 1914.

The work on the bulkhead wall at Princess Louise embankment was vigorously carried on up to August; 800 feet of substructure and 700 feet of superstructure were added to the wall. Filling in of material dredged in the harbour took place and an additional length of 500 feet of superstructure was built.

The grain elevator was completed and put in operation; the water system for supplying vessels with fresh water was extended on pier No. 1. Repairs and general maintenance occupied the attention of the Engineer and his staff.

Water was let into the wet dock in the latter part of April.

The railway of the harbour was extended and over it were conveyed 53,907 cars, about 19,000 of these being empty cars. The system is much used in conveying freight from vessels to the railway lines and from the lines to vessels.

Plant.—Six steel dump scows and ten deck scows were added; the tug *Aviso* was purchased; a bucket ladder dredge and a service tug were also added. The service boat is named *Laval,* is fitted with a salvage plant and a powerful fire-pump of 2,000 gallons per minute capacity. A 50-ton floating crane arrived from the contractors and was put in operation for hoisting guns on board transport vessels; a grain transfer boat arrived in the harbour but was not ready for work in 1914. The commissioners' motorboat was rebuilt.

The terminal railway received a new locomotive, making the fourth belonging to the traffic department.

The new berth on the river St. Charles' side of the breakwater was occupied for the first time and was used by some of the largest liners arriving in the harbour.

The berth is 1,000 feet long and has a depth of water alongside of 35 feet at low water. The shed at the berth has a length of 950 feet by 80.

His Royal Highness the Duke of Connaught, Governor General, inspected the harbour and docks officially.

In August the German barque *Bellas* and the Austrian ss. *Ida* were detained in the harbour owing to the outbreak of the war in Europe.

The first transport ship left Quebec 24th of September and the last on October the 1st, 31 in all. The first Canadian war contingent left by these transport ships, which carried in all 31,000 men, 7,620 horses and wagons, stores, guns and ammunition, etc.

Berths for the ships were available at all times and the harbour was never taxed for accommodation. Eleven of these ships were in port at one time, gross tonnage, 118,000.

During the year the revised by-laws were in operation, which included rates of charges for use of the new floating crane, grain elevator rates, derrick rates and other new plant added to the improved harbour facilities for the accommodation and despatch of vessels.

The St. Charles docks afforded berthing accommodation for vessels of various sizes for loading and unloading cargo consisting of building materials, coal, merchandise and lumber. The total quantity of grain of all kinds handled at elevator No. 2 was 766,128 bushels.

Several vessels seeking the harbour in an injured condition were repaired in the Louise docks.

The total tonnage of transport ships using the harbour amounted to 317,847.

The receipts on revenue account amounted to $287,194.39 and the expenditure to $267,835.54, leaving $19,358.85. The expenditure on capital account amounted to $2,012,301.93. Of this sum $1,994,960.03 was received from the Dominion Government under certain Acts of Parliament, the remainder from moneys at the disposal of the commissioners.

The harbour was open for sea-going vessels in the latter part of April and was clear of ice until the 9th of December. The last ocean-going steamer cleared on the 3rd of December.

The harbour can now be used by the largest size vessels entering the St. Lawrence at any time of the tide, day or night, and steamers of this class are easily berthed. The facilities for landing passengers or embarking are most excellent and freight can be handled even of the heaviest kind by hoists and otherwise with despatch.

The grain elevator has a capacity of 1,000,000 bushels and is well equipped for elevating and loading grain; the new transport grainboat will carry 30,000 bushels.

Appendix No. 13 of this report contains a detailed report of the Quebec Harbour Commissioners in full.

THREE RIVERS, P.Q., HARBOUR COMMISSION.

The report of the Harbour Commissioners of Three Rivers forms part of appendix No. 13. The wharf under construction in that harbour was not completed

in 1914 owing to the difficulty in getting material for the top or deck, consequently the wharf is not used for landing coal as desired.

Trade in the harbour was more or less interfered with by the declaration of war in Europe, but part of the falling off in the lumber trade was due to other causes, principally by the depression in construction of buildings in the United States, to which country a large quantity of building material has hitherto been shipped from Three Rivers. The total quantity of lumber shipped was 29,848,000 feet.

The number of vessels which cleared for ocean ports was 55, tonnage 130,692; barges and canal boats which cleared for the United States numbered 203, tonnage 24,993; and inland water vessels numbered 509, tonnage 107,813; total cleared, 263,498. In addition a number of market boats daily arrived and cleared and the Richelieu and Ontario Navigation Company's boats made regular calls.

The total receipts on revenue account amounted to $23,424.98, and the disbursements in connection with revenue to $19,256.98. Other financial statements appear in the report of the commissioners.

PICTOU, N.S., HARBOUR COMMISSION.

The work principally done consisted of attending to the buoy service, bushing the harbour channel and the East river.

Receipts from harbour dues amounted to $989; payment of harbour master's salary, $200; and other expenses amounted to $478, leaving a balance in the hands of the commissioners from previous years and the year 1914 of $1,635.87.

BELLEVILLE, ONT., HARBOUR COMMISSION.

The report of the commissioners contains a financial statement of the year's transactions and a statement of the imports and exports dealt with by the commissioners.

The receipts from harbour dues were $2,314.77, and expenditure in connection with the revenue account to $936.99. The sinking fund for redeeming debentures amounts to $5,712.55. The report is included in appendix No. 13 of this report.

VANCOUVER, B.C., HARBOUR COMMISSION.

The commissioners report that their work from May, 1914, to the 31st of March, 1915, has been large. Surveys have been made of a preliminary character and plans prepared of proposed changes and improvements in facilities for encouraging trade and manufacturing along the harbour front. The tide flats near Granville street bridge in an area of forty-one acres will be utilized by preparing and laying out sites for industrial and shipping concerns. It is proposed to lay out the reclaimed property in such a way as to give the advantage of railway track convenience and water frontage for berthing vessels.

Headlines have been established to secure as far as possible uniformity at the outer ends of wharves in deep water.

Widening of the channel at the First Narrows, by the Dominion Government, is proceeding; advantages already noticeable are the reduction in the rate of current at this entrance of the inside part of the harbour and safer navigation.

The revenue from harbour dues and rentals amounted to $28,875.94; the disbursements amounted to $29,483.29; outstanding accounts to be deducted from disbursements, $2,315.13.

The report in detail forms part of appendix No. 13 of this report.

TORONTO HARBOUR COMMISSION.

Owing to a re-audit of the accounts of the Toronto Harbour Commission delay has occurred in completing the annual report of the Commissioners for 1914. The harbour master's report forwarded to the department is the only official information received. The entire report of the commissioners will be published separately and will, it is understood, contain details of engineering operations, improvements and financial statements. The portion of the report received forms part of appendix No. 13 of this report.

The new western channel has been completed and has a depth of 16 feet below zero of the harbour gauge, and a clear width of 400 feet. The north pier is 2,236 feet long and the south pier 2,538 feet in length. The revetment wall at the easterly end of this channel has been completed for a distance north and south of the piers.

At the eastern channel 660 feet of concrete superstructure has been added to the east pier.

There was a falling off in the number of arrivals in the port, principally in freight carriers. The first arrival in the harbour was a passenger steamer, on the 4th of April; the last departure was on the 6th of December.

Much dredging was done in Ashbridge bay during the year and the material removed used as filling for the dock. The foundation and approaches of Parkdale Canoe Club were completed and a fair start made on the building. The foundation of a foot bridge from King street to the foot of Wilson avenue was completed and the steelwork will likely be erected during the year 1915.

Three suction dredges were at work during the open season and a total of 733,266 cubic feet of material removed and placed on lowland sections, 40 acres of which have been thereby greatly improved, besides a large quantity of back filling supplied to docks.

Extensive surveys were made and detail levels taken on Toronto island.

Soundings were made in different sections of the harbour, both in summer and winter.

Plans of various kinds were made and carefully filed preparatory to the extensive improvements contemplated by the commission.

The docks and wharves were kept in repair. The southwest portion of dock 3 was taken down to the water line and entirely rebuilt.

STEAMBOAT INSPECTION.

During the fiscal year the work of steamboat inspection was carried out as usual, generally speaking.

The department regrets the death of Mr. Wm. Laurie, inspector of boilers and machinery in the Montreal district; his death occurred on the 12th of November, 1914. Mr. Laurie was the oldest member of the Board of Steamboat Inspection in connection with boilers and machinery.

Mr. John T. Matthews was appointed inspector for Alberta, Saskatchewan and the Northwest Territories, with headquarters at Edmonton, in October, 1914.

The revised rules relating to life-saving appliances on board steamships were approved in November last.

The number of vessels inspected, registered in the Dominion, was 2,037, gross tonnage 681,770; vessels registered elswhere 187, gross tonnage 289,181; vessels not inspected 360, gross tonnage 62,893; the total number of vessels subject to inspection when in commission was 2,583, gross tonnage 1,033,844. The number of steam vessels added to the Dominion was 127, gross tonnage 82,434; vessels broken up or destroyed 82, gross tonnage 17,241.

The fees collected by the inspectors on account of steamboat inspection amounted to $4,042.06, and the fees from examination of engineers to $1,577.

LIST OF INSPECTORS.

Boilers and Machinery.

N. A. Currie, Halifax, N.S.
D. J. Murray, Halifax, N.S.
C. E. Dalton, St. John, N.B.
J. H. Fontaine, Quebec, P.Q.
F. X Hamelin, Sorel, P.Q.
W. Laurie, Montreal, P.Q., died 12-11-14.
J. E. Lunan, Montreal, P.Q.
T. P. Thompson, Kingston, Ont.
J. Dodds, Toronto, Ont.
J. B. Stewart, Toronto, Ont.
G. M. Arnold, Toronto, Ont.
E. W. McKean, Collingwood, Ont.
W. J. Vigars, Port Arthur, Ont.
G. P. Phillips, Kenora, Ont.
J. T. Mathews, Edmonton, Alta.

J. T. Mathews, Edmonton, Alta.
F. F. Pichard, Victoria, B.C.

CORRESPONDENCE AND RECORDS BRANCH.

The Records Branch of the department embraces the receiving, classifying, recording and despatching of letters. The letters and telegrams received are registered, numbered, stamped with date received, indexed, placed on files, and the files charged and distributed to the officers who take action upon the letters and telegrams. Copies of letters are placed upon the files, and the files examined to ascertain if all letters have been answered or acknowledged, and then they are discharged and placed in receptacles.

The registering of letters consists of entering the number of the file and a brief synopsis of the subject of the letter; the indexing includes the card system applied to personal names, and the loose-leaf system applied to locality names, names of subjects, and vessel names.

The letters and telegrams despatched are copied in letter-press books and indexed. The number of letters despatched during the year was 36,592. The increase in the

number of letters received and despatched during the last ten years shows the growth of the work of the department and consequent increase of staff, as a whole, including the Records Branch. An establishment record is maintained in this branch in which the names of all employees of the department, with particulars of service, are recorded and indexed by the loose-leaf and card index system, under the heads of personal names, localities, vessels, and electoral districts, as well as being grouped under the various services.

The letters received in 1901 numbered 18,741, and despatched 13,000; while in the past year 51,832 were received and 36,592 despatched.

SHIPPING AND DISCHARGING OF SEAMEN.

According to the ninety-six returns sent in by shipping masters during the year ending December 31, 1914, 18,987 seamen were shipped, 14,989 discharged, and the sum of $13,325.45 was collected as fees which were retained by the shipping masters as remuneration.

A statement of returns follows:—

	No. of Returns.	Seamen Shipped.	Seamen Discharged	Amount.
Nova Scotia	63	8,817	6,444	$5,737 40
Prince Edward Island	7	214	128	144 65
New Brunswick	13	2,310	2,377	1,415 40
Quebec	7	3,049	1,584	2,151 70
British Columbia	6	4,597	4,456	3,876 30
	96	18,987	14,989	$13,325 45

A statement showing result of returns of the shipping and discharging of seamen, for the year ending December 31, 1914, forms appendix No. 17 to this report.

PORT WARDENS.

Fourteen returns have been received from port wardens during the year—seven from Nova Scotia, one from New Brunswick, two from Quebec, and three from British Columbia.

The total amount of fees collected was $16,032.31, which was collected by port wardens for surveys of hulls, hatches and cargoes and for granting certificates of seaworthiness. The fees range from $8 to $20, according to the time and number of assistants employed in the surveys.

The secretary of the Board of Trade of Montreal, to whom the port warden reports, forwards a full report of the number, kind, nationality and tonnage of the vessels which enter and clear at the port warden's office during the year; the amount and kinds of imports and exports, the time of the opening and closing of navigation and a detailed account of the investments and proceeds thereof during the year.

AGENCIES.

Reports of agents under the control of the department were as usual received at the close of the fiscal year. These reports contain in detail the local work and transactions.

At Halifax the removal of the agency offices and stores from the dockyard to the Dartmouth depot of the department was accomplished. The depot was found too small in most respects for the offices, storehouses and buoy accommodation. Additions were consequently made and work will be proceeded with in 1915 in order to afford wharf and other necessary accommodation. The depot is approached from Halifax by ferry and is less convenient than the dockyard.

The loss of the lightship *Halifax No. 19,* built in Great Britain under contract to be delivered at Halifax, was greatly regretted owing to the loss of all of her crew when the vessel overturned in a gale on the rocky shore at Liscomb, N.S.

The lightship *Anticosti,* usually taken from Anticosti island in the fall and placed off Halifax harbour during the winter, was retained at Halifax.

A full statement of the movements of the steamers employed in this agency and the report on the inspection of lighthouses, and of the local engineer, were included in the report of the agent at Halifax.

STEAMERS UNDER CONSTRUCTION.

There is under construction at Selkirk, Manitoba, a twin-screw steel steamer, to be sheathed with wood, for the use of the Marine and Fisheries branches in Manitoba.

The length of the steamer, between perpendiculars, will be 151 feet, breadth moulded 26 feet 6 inches, depth 13 feet 6 inches, draught loaded 7 feet 6 inches, and coal capacity 60 tons. The engines will be two sets of triple expansion jet condensing

engines of 900 combined indicated horse-power and will be supplied with two scotch type of boilers and Howden's forced draught. Two engines are being built at Polson Iron Works, Toronto, for this steamer.

The steamer will be fitted with appliances for placing and lifting buoys in the marine service and equipped for the fisheries service.

Another steamer is being built in the Sorel shipyard for testing service in the St. Lawrence ship channel. This steamer is also a twin-screw steel steamer, length 140 feet, breadth 35 feet, depth 14 feet, and draught loaded 10 feet, coal capacity 100 tons. The boilers of this steamer will also be of the scotch type and her horse-power 650 indicated.

The machinery for this steamer is being built by New Burrell Johnson Co., of Yarmouth, N.S.

Another steamer is being built in the Sorel shipyard for use in the ship channel work below Quebec, length 120 feet, breadth 24 feet, depth 12 feet 6 inches, draught loaded 10 feet, coal capacity 50 tons.

The machinery will consist of two sets of compounding surface condensing engines of 650 combined indicated horse-power and one scotch boiler. The engines are being built by the New Burrell Johnson Iron Co., Ltd., Yarmouth, N.S.

Another steamer is being built at Sorel shipyard for buoy service in the Ottawa river, to be used in the Montreal agency.

This steamer will be 100 feet long, 21 feet in breadth, 9 feet deep, and when loaded will have a draught of 5 feet 6 inches.

Another vessel, a single-screw steel coal barge, for the St. Lawrence river ship channel service, is also under construction at Sorel.

The leading dimensions are: 172 feet in length, 32 feet in breadth, 13 feet deep, and loaded will have a draught of 10 feet 6 inches.

This vessel is fitted with accommodation for crew and has two large holds for coal The coal will be handled by a steam crane clam having a capacity of one ton, the crane to lift five tons, and can be used for lifting buoys if necessary.

Grenville.

The *Grenville* is intended for the buoy service in the Prescott district and to take the place of the *Scout*.

The vessel is being built in the Polsons Iron Works shipyard at Toronto, and is nearly completed.

She is a single-screw steel steamer and the leading dimensions are, length over all 164 feet, between perpendiculars 155 feet, breadth 30 feet, and depth 13 feet.

The vessel is to be fitted with water ballast tanks and water-tight compartment bulkheads.

The engine is triple expansion, to develop 900 indicated horse-power, with scotch tubular boilers having a working pressure of 180 pounds to the square inch.

The steamer is to have Howdens forced draught system.

A more detailed description will be published in the next Annual Report, as the vessel will be delivered during the fiscal year 1915-16.

NEW ICEBREAKER FOR THE ST. LAWRENCE RIVER.

This icebreaker is being built in the shipyard of Canadian Vickers, Ltd., at Montreal. The vessel was partly constructed when the war broke out in Europe, but circumstances over which the builders had no control caused the suspension of work. The contractors had shown, to the satisfaction of the department, that they were unable at the time to proceed with building and applied for an extension of time in which to build the icebreaker. This extension of time was agreed upon.

The leading dimensions of the icebreaking steamer will be 292 feet in length over all, 275 between perpendiculars, 57 feet 6 inches extreme breadth, 32 feet in depth, and will have a draught of 19 feet.

The propelling engines will be two sets of triple expansion surface condensing engines with working parts 60 to 35 per cent in excess of Lloyds requirements. The boilers are to be two double-ended and four single-ended scotch boilers, allowing a working pressure of 180 pounds of steam per square inch.

The hull will be divided by transverse and longitudinal water-tight bulkheads.

The steamer is to be built under Lloyds special survey and in accordance with the Dominion Steamboat Inspection Act, and is to class 100 A1 at Lloyds.

REVISION OF THE CANADA SHIPPING ACT.

The revision of parts 7 and 9 of The Canada Shipping Act has been making progress and the Bill No. 105 of 1914 was prepared for Parliament. It was read the first time at last session of Parliament.

A. JOHNSTON,

Deputy Minister of Marine and Fisheries.

APPENDIX No. 1.

ANNUAL REPORT OF THE CHIEF ENGINEER OF THE DEPARTMENT OF MARINE.

The Deputy Minister of Marine,
Ottawa.

Sir,—I have the honour to submit the following report of the work done in the several services under the supervision of this office during the twelve months ended March 31, 1915.

There have been no changes in the duties pertaining to this branch during the past year; they remain as enumerated in previous reports.

STAFF.

The following changes have been made during the year in the staff of my office:—H. E. Fosbery, temporarily employed as resident engineer in the New Brunswick agency, was recalled to headquarters and has been employed as an assistant engineer since April 1, 1914; E. E. Clawson was appointed an assistant engineer April 17, 1914; N. T. Binks was employed as a temporary draughtsman from May 1 to August 31, 1914; T. L. O'Hara was employed as a temporary third-class clerk September 26, 1914; Miss E. St. J. Wileman was employed as a typist from September 28, 1914, to March 31, 1915; W. B. Lemont was engaged as construction engineer on October 2, 1914, and has since been engaged in charge of day labour work on outside construction; H. A. Lynch was temporarily employed as draughtsman on October 8, 1914; Gerald T. McInerney was employed as a clerk on November 23, 1914; Leo McInerney was employed as draughtsman November 27, 1914, and on January 14, 1915, was sent to Prescott depot to assist Mr. Chabot and Mr. Thompson.

I desire to testify to the general good conduct of my whole staff, and to the satisfactory way in which they perform the duties allotted to them.

OFFICE WORK.

The largest part of the work done by the general staff of the branch consists in the construction, repair and improvement of light-buildings, fog-alarms, beacons and other aids to navigation, the supply of new or improved illuminating apparatus, etc., the payment of expenditures for these services being made out of the vote of $1,000,000 for construction of aids to navigation. Full details of the work done in this connection during the past year are contained in a separate report in tabular form attached hereto, which gives a complete statement of all expenditure charged to the vote in question. (Inclosure A.)

In addition to the work of this branch done under the above vote, the staff have been called upon to perform work of varied description for other branches of the department, and which may be summed up as follows:—

For the Meteorological Service Branch.—Erection of storm signal masts at the following places: Chatham, N.B.; Scatari, N.S.; and Port Hope, Ont.

For the Naval Department.—One of the department's foremen was lent to the Naval Service Department during the months of December, January, February and March to supervise the construction of a wireless station at Barrington passage, N.S., and completed the work to the satisfaction of the officers of that department.

The work of completion of titles to all properties owned or leased by this department, mentioned in my last year's annual report, has been continued, and title documents have now been obtained to the sites of nearly all our lighthouse, fog-alarm and other public works under the administration of the Marine branch of this department.

The titles to the sites of all public wharves transferred to the control of this department, numbering about 1,000, are also being investigated, and copies of all deeds and other documents, with plans and descriptions affecting the same are being procured for our title records, so that eventually it is hoped to obtain a complete record.

During the past year 204 deeds and other title documents in connection with this work have been added to our records. In the case of all new properties acquired, expropriation plans and descriptions are prepared in my office, and recorded in the county registry offices, in addition to the usual notarial deeds, as an extra precaution.

My branch has also attended to the preparation of expropriation plans and securing of deeds for all sites obtained during the year by the Departments of Fisheries and of Naval Service.

This branch has also undertaken to make a complete record of the limits of all public harbours established in Canada, and these limits are plotted on plans which are constantly being added to and will eventually comprise a set covering the shore line of the whole of the Dominion. This work is now under way, and considerable progress has been made during the past year.

The work in connection with applications for water lots has continued heavy, as will be seen by reference to the draughting-room statistics. Every application has to be examined, entered on an index plan, plans and descriptions checked, and the proposition reported on and valued. This involves a great deal of detail and takes the time of one draughtsman. Both the above branches of work are in charge of Mr. J. W. G. Roberts, whom I desire again to bring to special notice.

Progress has been made in the establishment of headlines in some of the principal public harbours, based on joint action by this department and the Department of Public Works. It is hoped that such establishments will tend to the improvement both in appearance and convenience of the water fronts affected. During the past year headlines have been established by Order in Council in the following harbours:—

Victoria, B.C.; Vanvouver, B.C. (partial); Prince Rupert, B.C.; Sault Ste. Marie, Ont.; Sandwich, Ont.; Ojibway, Ont.; Anderdon (part of Amherstburg), Ont.; Hamilton, Ont.; North Sydney, N.S.

Plans and specifications for all important new buildings and repairs, new vessels, etc., are made or approved in this office.

The following table indicates the work done in the draughting office during the twelve months ended March 31, 1915:—

Description of Work.	Plans Designed.	Plans Received.	Copies Made.	Difference from Last Year.
Lighthouse towers and dwellings	71	16	606	+209
Fog alarm buildings	5	0	78	−159
Details	35	18	750	+421
Wharves, piers, etc	21	190	94	+199
Outbuildings	11	2	134	− 18
Machinery	15	93	108	+ 34
Lanterns and illuminating apparatus	18	177	170	−144
Buoys and appurtenances	13	194	325	− 12
Beacons	4	17	25	+ 26
Steamers	0	22	2	− 88
Land surveys	120	273	868	+541
Plans relating to waterlot applications	10	365	67	−254
Miscellaneous	40	1,309	219	+739
	363	2,676	3,446	+1,484
Total plans for 12 months from April 1, 1914, to March 31, 1915			6,485	+1,484
Charts received and recorded			399	− 3
Charts received and entered in chart books			46	− 5
Photographs received and recorded			200	− 203
Specifications and bills of material written			155	+ 15
Notices to mariners issued (comprising 530 subjects)			158	+ 7

PUBLICATIONS.

The work of preparing and issuing notices to mariners continues to be heavy and urgent. During the past twelve months 158 notices, covering 530 subjects, have been published, being an increase of seven notices and forty-three subjects over last year.

Amongst miscellaneous notices to mariners the following involved considerable research, or labour, in compilation:—

Warnings respecting conditions arising from the war now in progress were issued in a general notice on the outbreak of hostilities, and subsequent notices requiring British ships to show their colours when signalled; respecting the approach to Halifax, N.S.; announcing the temporary discontinuance of Mauger Beach fog-alarm, Nova Scotia; the closing of channels in the approach to the Thames, England; the extinguishing of lights, etc., on the east coast of England and Scotland; the laying of submarine mines in the North sea; signals by vessels when inconvenienced by searchlights; caution when approaching British ports and with regard to discontinuance of aids to navigation; channels to be used in the Thames; suspected craft to be reported; western part of Broughton strait closed (and later reopened); cautions regarding extinction of British Columbia lights; also to masters of British Columbia vessels; special regulations for navigating Barkley sound, B.C. (later cancelled); examination anchorage in Lough Swilly, Ireland; prohibited anchorage in the southern approach to Scapa Flow, Scotland; prohibited passage in Firth of Forth, Scotland; new pilotage stations in the United Kingdom on account of mine-fields; a further similar notice for Scotland; special regulations for traffic in the Mersey; passage north of Ireland prohibited; extensive changes in aids to navigation in North sea and English channel; regulations for approaching Canadian ports, examination and sweeping; another similar notice for British ports; channel south-

ward of Breaksea lightvessel, Wales, prohibited; restriction of navigation in the Irish channel; aids to navigation discontinued in channel north of Orleans island, P.Q.; caution with regard to mined areas in the North sea; regulations for approach to Folkestone, and lightvessels; information regarding lights, lightships and pilotage in the North sea, river Thames, and English channel; also the river Humber; public traffic regulations for the port of Halifax, N.S.

Buoys established, rearranged or improved in character were described in notices to mariners covering the following localities: Princes inlet and approach, Mahone bay, N.S.; Musquodoboit inlet, N.S.; St. Ann harbour, N.S.; Whitby, Ont.; Green shoal and East Templeton, Ottawa river, Ont. and P.Q.; Grande Anse, N.B.; Toronto harbour approaches, Ont.; the channel northwestward of cape Hurd, Ont.; Napanee river, Ont.; the inside channels between Penetanguishene and Parry Sound, Ont.; northwest of Grenadier island, Ont.; Répentigny channel, P.Q.; East bay, Bras d'Or lake, N.S.; Penetanguishene harbour, Ont.; South Nation river mouth, Ont.; Picton, Ont.; Halifax approach, N.S., for war purposes; Lighthouse bank, N.S.; channel northward of Gibbons point, Little Current, Ont. (two notices); St. Simon inlet, N.B.; Collingwood, Ont.; Little Liscomb harbour, N.S.; Pointe Citrouille anchorage, P.Q.; Nanaimo, B.C.; River Philip, N.S.; Horseback bar and Cap Charles channel, P.Q.; approach to Turner island, N.S.; entrance to North Rustico, P.E.I.; and Pitt river, B.C.

Beacons established in the inside channel between Penetanguishene and Parry Sound, Ont.; in the St. Francis river, P.Q.; in Yamaska river, P.Q.; and entrance to Courtenay river, B.C.

Uncharted dangers were described northward and southward of Erasmus islands, Cordero channel, B.C.; in Takush harbour, B.C.; westward of Limestone island, Quatsino sound, B.C.; south of Grand Manan, N.B.; in Blind bay, B.C.; off Plover point, Lewis pass, B.C.; in Skeena river, B.C.; in Rolling roadstead, Esperanza inlet, B.C.; Lockeport, N.S.; and Johns cove, N.S.

Hydrographic notes were compiled respecting Prince Rupert harbour, B.C.; Cap de la Madeleine, P.Q.; Port Essington, Skeena river, B.C.; Murray harbour, P.E.I.; and river Philip, N.S.

Dredging performed, chiefly by the Department of Public Works of Canada, was described in the following localities: Hilton, Ont.; Walker river, Ont.; Whitby, Ont.; Green shoal, Ottawa river, P.Q.; Cap de la Madeleine, P.Q.; in Napanee river, Ont.; Penetanguishene, Ont.; Collingwood, Ont.; and Nanaimo, B.C.; and by the Marine Department ship channel staff at Horseback bar and Cap Charles channel, P.Q.

Regulations governing the operation of swing spans of railway bridges in Canada.

Caution with regard to sweeping operations off ports in Canada.

Directing light-draught vessels navigating the river St. Lawrence between Lanoraie and Varennes to use the Répentigny (north) channel.

Description of the new main channel through the Sandheads at the entrance to the Fraser river, new positions of lightships and South Curve light, and buoyage of channel.

Notice of new edition of *Tide Tables* for the Pacific coast of Canada, for the year 1915, published by the Department of the Naval Service, Ottawa; time of slack water in Dodd narrows and Seechelt rapids.

An item relating to ice patrol service off the east coast of North America, to locate the icebergs and field ice nearest to the trans-Atlantic steamship routes.

During the past twelve months notices relating to waters outside of Canada were issued, covering thirteen items relating to Newfoundland and Labrador, four items relating to the Atlantic, thirteen to the inland, and eight to the Pacific waters of the United States, nine items relating to the Panama canal, and one item relating to Lower

California, as well as five notices relating to transatlantic and one notice relating to transpacific subjects. No attempt is made to issue a complete synopsis of British or foreign notices, but merely to publish items likely to be of immediate interest to Canadian vessels, or to vessels leaving Canadian ports for the more important or frequented foreign ports.

The annual edition of the "List of Lights and Fog Signals" was prepared and published in three separate volumes, one for the Atlantic coast and the river St. Lawrence to head of ocean navigation, one for the inland waters of Canada, and the third for the Pacific coast.

I can again commend Mr. J. M. O'Hanly for the careful and conscientious work he devotes to this division of my branch's work.

PERSONAL INSPECTIONS.

During the past year, as in previous years, pains were taken, both by the Chief Engineer and by his chief assistant, to ascertain by inspection the state of the works under their charge, and such personal supervision is considered of prime importance in securing efficient administration.

Amongst inspection trips made by the Chief Engineer may be enumerated one of the Great Lakes in July, from Prescott to Parry Sound, on the steamer *Lambton*, when most of the lightstations on that stretch were thoroughly examined; an inspection of aids to navigation on lake St. Francis in August, in company with Captain Taylor, officer in charge at Prescott; an inspection of Chenal aux Barques in November in company with Mr. Forneret, engineer in charge of ship channel improvements, to locate aids to navigation for shallow draught vessels; and the location of a new range light at Coles shoal.

In May the Chief Engineer attended the City Planning Conference in Toronto, and laid before the meeting the desirability of improving city water fronts in such a way as to preserve the beauty of the approach while fully utilizing the commercial possibilities; in January, 1915, he attended the annual meeting of the Lake Carriers' Association in Detroit.

From August 29 to October 26, 1914, he was absent on an inspection trip to British Columbia, and in company with Captain Robertson, Agent, and Mr. Wilby, District Engineer, visited all stations at which work was in progress or contemplation, besides inspecting the departmental depot at Prince Rupert. This visit involved a large amount of executive work which has been dealt with in connection with the official administration of the several stations visited, and the results of this trip are considered to be particularly satisfactory.

With a view to keeping in touch with the latest developments in aids to navigation, the Assistant Chief Engineer of the department, Mr. B. H. Fraser, was sent to Europe in April last. He visited the principal factories engaged in the manufacture of lighthouse equipment in France, Germany, Sweden and Great Britain.

He also took up with the lighthouse authorities in the several countries visited the question of the construction of different types of aids to navigation. Copious notes were taken and much information of value collected. This is chiefly of a technical character and was embodied in special reports which have been distributed among the files of the department, where they are available for permanent reference.

LIGHTING OF HUDSON BAY ROUTE.

A development of the department's work during the past year that appears to be worth special mention in this report is the establishment of aids to navigation in

Hudson strait and bay, provided at the request of the Department of Railways and Canals, to facilitate navigation in connection with the railway communications which are now approaching completion.

Ten gas lights were established, an assistant engineer of my branch, Mr. E. E. Clawson, being sent to Hudson bay on the *Minto* to attend to the work of installation. The Aga system, of acetylene dissolved in acetone, was adopted because it was considered that with this system lights could be maintained during the entire season of navigation without attendance. The lights were erected on posts, with tanks charged with gas under pressure, but the lights were not lit. It is proposed to send a government vessel to Hudson bay on the opening of navigation next year to put them in operation.

The total expenditure in connection with the supply and erection of these lights was $68,796.34, as will be found by reference to enclosure A hereto annexed.

DEPARTMENTAL DEPOTS.

Since my last report the departmental wharf in Victoria harbour, British Columbia, has been completed very satisfactorily by Messrs. Parks, Tupper & Fitzpatrick, and the wharf is now in use by the department principally for the storage of heavy buoys. It will be necessary to provide storehouses and equipment in connection with this wharf but the work has been postponed until the new grade of Johnston street has been settled and the new bridge accurately located. It is hoped to make some progress, at least with storage sheds, during the next fiscal year.

At St. John, some delay has occurred in the completion of the wharf by the contractor principally in consequence of unforeseen difficulty in securing a foundation at the northeast corner where the rock drops away very quickly. It is expected that the work will be completed early in the coming fiscal year and that storage sheds at least will be provided during the year.

At Halifax, in consequence of the Department of Naval Service requiring the whole of the dockyard property following war operations, it has been necessary for this department, on very short notice, to reoccupy the old departmental property on the Dartmouth side of the harbour. Emergency works were undertaken to make this property immediately available for the department's requirements, but before the work is completed extensive alterations and improvements will have to be carried out. A careful investigation has been made and reports and estimates submitted covering the above. Numerous points had to be attended to, such as the procuring of necessary approaches, roadways, water supply, light and heat, telephone accommodation, wharf accommodation, workshops, stores, offices, etc. Yard space has to be provided and provision made for the accommodation of the departmental ships and handling of buoys, etc.

Up to the close of the fiscal year $5,183.23 has been expended, as will be seen by enclosure A annexed. Plans have been prepared for an addition to the existing wharves, estimated to cost $15,000, the contract for which will be let next year. The total estimated cost (not including wharves) of adapting the property for the permanent use of the agency is about $35,000.

REMOVAL OF OBSTRUCTIONS.

During the past twelve months the following work has been done under the annual appropriation for the removal of wrecks and obstructions to navigation:—

		Cost.
Bear river, N.S.	Clearing channel of stumps, etc.	$ 10 00
Margaree harbour, N.S.	The wrecked Steamer "Electra" removed by Capt. G. LeBlanc under contract	150 00
Guysboro harbour, N.S.	Hulk of an old vessel removed by the master of Canadian Government steamer "33"	32 85
Barrington passage, N.S.	Wreck of schooner "Annie R. Lewis" removed by Chas. Brister & Son	
Yarmouth harbour, N.S.	Hulk of an old vessel removed	10 00
North head, Grand Manan, N.B.	Several sunken moorings in harbour removed by J. E. Gaskill under contract	75 00
St. John river, N.B.	A number of deadheads causing an obstruction in the channel removed	44 75
Charlottetown harbour, P.E.I.	Wreck of "Elfin" removed by W. H. Batt under contract	500 00
Summerside, P.E.I.	A number of waterlogged and submerged logs lying in the harbour removed by C. G. S. "Brant"	
Lachine, Que.	Wreck of Str. "Rhoda" removed by day labour	1,273 81
Lake St. Clair, Ont.	Wreck of "Chas. Crawford" removed by F. J. Trotter, Amherstburg, under contract	1,450 00
Lake Erie, near Amherstburg, Ont.	Wreck "City of London" removed by F. J. Trotter, Amherstburg, under contract	4,900 00
Port Dalhousie, Ont.	The wrecked dredge "Delver" was removed by the owners.	
A number of small expenditure, such as tug hire, advertising and incidental expenses were incurred		82 53
Total amount expended this year under this vote		$ 8,528 94

MAINTENANCE AND REPAIRS TO WHARVES.

Wharves owned by the Government are usually built by the Department of Public Works of Canada, and on completion come under this department for maintenance (see R.S.C., cap. 112, and amending Acts). We have had formally transferred to our control 372 public wharves, but there are probably twice that number of the completion of which we have not been officially notified, and where wharfingers have not yet been appointed.

This branch attends to minor repairs. Large repairs are undertaken by the Department of Public Works. The following is a list of wharves to which repairs were made by this Department during the past year, with the amount expended in each case:—

Nova Scotia.

Annapolis Royal	$48 73
Hampton	14 00
Kingsport	91 50
Little River	20 06
Pubnico middle, W.	5 80
Westport	32 00
White point	33 76

Quebec.

Amherst	13 72
Anse aux Gascons	19 00
Grand river	15 50
Meehins wharf	8 00
Ste. Cecile du Bic	6 00

Ontario.

Rosseau	6 00
Tenby bay	11 50

New Brunswick.

Caraquet	$15 00
Lamek	22 00

Prince Edward Island.

Charlottetown	8 80
Hickeys wharf	23 25
Higgins shore, Victoria W.	2 97
Mount Stewart wharf	2 10
North Cardigan	4 00
Vernon river, N.	19 50

Montreal District.

Graham wharf	21 10
Hudson	49 00
L'Orignal	12 00
Ste. Anne de Bellevue	14 75

British Columbia.

Sidney	39 70

Under the heading of office work allusion has been made to the extensive undertaking of securing and recording titles to the sites of all public wharves, numbering about 1,000. A great deal of work remains to be done before our records are moderately accurate up to date.

ICE BREAKING.

1. The Canadian Towing and Wrecking Company, Limited, of Port Arthur, contracted with the department to keep the harbours of Port Arthur, Fort William and West Fort William open for navigation until December 7, 1914, and to open those harbours in the spring of 1915, in time to permit upward bound vessels to enter the harbours as soon as the Sault Ste. Marie canal should be open for navigation. The contract is for three years, at $30,000 per annum, and the work continues to be carried out in a way that gives entire satisfaction to the shipping interests.

2. The contract with S. Shipman, of Sault Ste. Marie, Ont., to keep free from ice the channel between Kensington point, on the north shore of St. Joseph channel, and a convenient landing on St. Joseph island or Campement d'Ours island, was renewed for another year, the work beginning in the autumn of 1914 and continuing until the ice had formed to sufficient thickness to permit teams of horses to cross in safety. The work also included the breaking of a channel in the spring before the ice became dangerous, and keeping the channel free until general navigation was resumed. The cost for the year is $500.

3. The usual contribution of $300 was made towards keeping open the St. Croix river in the vicinity of St. Stephen. The annual cost of this work is in the neighbourhood of $1,000 and the department of late years has contributed $300 a year towards this, the remainder being made up locally.

TELEGRAPH OR TELEPHONE CONNECTIONS WITH LIGHT STATIONS.

The department has frequently required information respecting the connection of our principal lightstations, etc., with commercial telegraph or telephone lines, and as it was found that details were not readily available, work having been done at different times by different departments or by private enterprise so that no single central authority was responsible, an attempt has been made to prepare a list of these connections, and the result is appended in tabular form as enclosure B to this report.

It is hoped that another year the list may be made more correct and complete, as the information at present available has not proved entirely satisfactory.

The policy of the department has been to restrict telephonic connections to stations of prime importance, where shipping interests would be benefited by the prompt transmission of ships' movements, or where shipwreck attended by danger to life was to be apprehended, and where early notice of a disaster might bring aid more promptly.

Respectfully submitted,

WM. P. ANDERSON, M. Inst. C.E.,
Chief Engineer.

Chief Engineer's Office,
Department of Marine,
Ottawa, April 1, 1915.

SESSIONAL PAPER No. 21

DETAILED REPORT OF THE CHIEF ENGINEER OF THE DEPARTMENT OF MARINE ON CONSTRUCTION, ESTABLISHMENT AND IMPROVEMENT OF LIGHTHOUSES AND OTHER AIDS TO NAVIGATION, UP TO MARCH 31, 1915.

To the Deputy Minister,
Department of Marine and Fisheries,
Ottawa.

SIR,—I have the honour to submit a detailed report on work done in the construction and establishment of aids to navigation, for the twelve months ending March 31, 1915.

This statement is put in tabular form, and includes every item of expenditure incurred during the year against the vote of one million dollars for construction, etc., but no work done chargeable to other votes.

NOVA SCOTIA.

NEW AIDS TO NAVIGATION.

Lightstation.	Nature of the work.	How performed.	Contractor or foreman.	Expenditure during fiscal year.
				$ cts.
Five islands.....	Accounts outstanding from last year in connection with the erection of a combined wooden lighthouse and dwelling.	.....	.....	207 04
Hardwood isl'nd	Erection of a 23-foot pole with shed at base, also a shelter shed.	Day labour.....	E. J. Geizer.....	573 00
	Provision of a 7th order lens lantern.	Prescott stores..	.....	
Kaulbach island	Erection of two wooden range light towers.	Contract.....	N. J. Robinson, Chester, N.S.	975 00
	Inspection, provision and installation of a 5th order lens for front light and catoptric apparatus for the back.	.....	.....	477 65
Northeast arm..	Erection of 18-foot pole light with shed at base, and installation of 7th order dioptric lens lantern.	Day labour.....	E. J. Geizer.....	130 46
Port Felix.....	Provision of hand fog horn.....	.....	.....	
Salvages.....	Erection of fog alarm building dwelling, outbuildings, provision and erection of class "E" duplicate plant and type "G" diaphone.	Day labour.....	J. L. Colter.....	12,058 46
Watt point.....	Erection of 18-foot pole light, with shed at base, and installation of 7th order lens lantern.	"	E. J. Geizer.....	212 34

CHANGES AND IMPROVEMENTS IN EXISTING AIDS.

Bald rock.....	Erection of iron spindle with slatwork drum.	Day labour.....	D. Thuerber.....	145 10
Battery point....	Illuminating apparatus improved by the installation of a 4th order lens.	"	E. J. Geizer.....	
Beaver harbour.	Erection of a combined wooden lighthouse and dwelling, and also a boathouse.	Contract.....	O. J. O'Brien, Noel, N.S.	4,340 00
	Provision and erection of a 5th order dioptric lens.	Day labour.....	E. J. Geizer.....	1,216 54

APPENDIX No. 2.

REPORT OF THE COMMISSIONER OF LIGHTS.

To the Deputy
Minister of Marine and Fisheries,
OTTAWA.

SIR,—I have the honour to submit the twelfth annual report of this branch. The principal work performed has been an extension of the gas buoy and beacon service throughout the various provinces, together with the maintenance of lights and other aids to navigation throughout the Dominion. The operations of this branch are set forth in tabular form in the following six enclosures, namely:—

Enclosure No. 1.—Statement, by provinces, showing the number of lights of the several orders, lightships, lightboats, lightkeepers, fog-alarm stations, buoys and submarine bells during the fiscal year 1914-15.

Enclosure No. 2.—Statement showing the names of lightstations and lightkeepers during the fiscal year 1914-15.

Enclosure No. 3.—Statement giving a complete list of stations at which gas buoys were in operation throughout the Dominion during the fiscal year 1914-15.

Enclosure No. 4.—Statement showing complete list of stations at which submarine bells were operated during the fiscal year 1914-15.

Enclosure No. 5.—Statement, by localities, giving the number of unlighted buoys, stakes and bushes maintained throughout the Dominion during the fiscal year 1914-15.

Enclosure No. 6.—Statement showing new gas buoys and beacons established during the fiscal year 1914-15.

In conclusion, I desire to express and record my appreciation of the able assistance rendered by my staff, and the untiring application to duty exhibited by each member. It would not have been possible to carry out the large and increasing amount of work which is devolving upon this branch without the co-operation of all the officers connected with it.

I have the honour to be, sir,

Your obedient servant,

J. G. MACPHAIL,

Commissioner

OFFICE OF THE COMMISSIONER OF LIGHTS,
DEPARTMENT OF MARINE AND FISHERIES,
OTTAWA, March 31, 1915.

(Enclosure No. 1.)

STATEMENT, by provinces, showing the number of lights of the several orders, lightships, lightboats, lightkeepers, fog-alarm stations, buoys, and submarine bells

—	1st order lights.	2nd order lights.	3rd order lights.	4th order lights.	5th order lights.	6th order lights.	7th order lights.	Pressed lens lights.	Catoptric lights.	Electric bulb lights.	Total.	Lightships.	Lightboats.	Lightkeepers.	Fog-alarm stations only.	Diaphones.	Fog guns and bombs.	Fog-horns and trumpets.	Fog whistles.	Sirens.	Fog-bells.	Hand fog-horns.	Hand fog-bells.	Gas buoys.	Whistling buoys.	Bell buoys.	Submarine bells.	Other unlighted buoys.	Stakes and bushes.

APPENDIX No. 3.

RIVER ST. LAWRENCE SHIP CHANNEL.

REPORT OF SUPERINTENDENT.

OTTAWA, July 28, 1915.

The Deputy Minister of Marine,
Ottawa, Ont.

SIR,—I have the honour to present the following annual report on the operations for the improvements of the River St. Lawrence Ship Channel, during the fiscal year ending March 31, 1915.

I have the honour to be, sir,

Yours obediently,

V. W. FORNERET, B.A., Sc.,

Superintending Engineer.

History of the Undertaking—Montreal to Quebec.

The St. Lawrence, owing to its situation, is the natural route from the Atlantic to the northern and northwestern half of the North American continent. The possibility of converting Montreal into a deep-water seaport was first suggested in the year 1825, when the Lachine canal was completed and connected Montreal with the Great Lakes, establishing the route commercially.

Light-draught sailing vessels could then reach Montreal without trouble except during a few weeks in the autumn, when they resorted to lightering. Surveys were made with the object of increasing the depth of water in the waterway. After these were completed, the question of which channel to adopt through lake St. Peter was hotly discussed, some favouring the "natural" or old ship channel, and others the "straight channel" through the St. Francis bank. Finally it was decided to proceed with the work of deepening the "straight channel," the aim being to obtain a channel 150 feet in width and to a depth of 14 feet at the lowest water, instead of 10 feet 6 inches at lowest water, as existed in the old ship channel which governed the available depth for navigation between Quebec and Montreal.

The "Board of Works" of Canada was entrusted with the task and began operations in the spring of 1844 and continued till the month of June, 1846, when the work was suspended; the management was changed, and the execution of the work transferred from the Board of Works to the control of the Commissioners of Public Works. The dredging was again resumed in the month of September of the same year. Owing to continued opposition, the work of cutting the "straight channel" was finally suspended on the 16th of September, 1847, and subsequently abandoned. After over sixty years it is now considered that the "straight channel" as commenced, would have been preferable. Nothing more was done on lake St. Peter by the Commissioners of Public Works for three years. The Harbour Commissioners of Montreal then came forward and offered to complete the project expeditiously and economically. The proposal was accepted and an Act was passed in August, 1850, transferring the work of

improving the Ship channel from the Commissioners of Public Works to the Harbour Commissioners of Montreal, who were empowered to charge a tonnage duty sufficient to pay 8 per cent interest upon the outlay, with a 2 per cent contribution to the sinking fund.

Sixteen-foot channel.—The Harbour Commissioners, after examination and the best advice obtainable, adopted the present channel with five tangents instead of two long straight courses, as at first commenced in the "straight channel." Operations were begun in June, 1851, to dredge this channel to 16 feet at low water. Most of the dredging required to attain this depth was in lake St. Peter, but some small shoals had to be removed at Ile Delorier and Lavaltrie channel, and after steady work it was all completed in 1854 to a depth of 16½ feet at low water, and with a width of from 250 to 300 feet.

Twenty-foot Channel.—The work of deepening the channel to attain a depth of 20 feet at low water with a width of 300 feet was continued by the Harbour Commissioners and accomplished in November, 1865. Dredging was necessary at Pointe aux Trembles (en-haut) channel and lake St. Peter to obtain this depth. Several obstructions had also to be removed in order to maintain a more direct channel between cap St. Michel and Lavaltrie, and in Lavaltrie channel. The "south" or Verchères channel had been selected for improvement instead of the old channel or "north channel" by way of Repentigny and St. Sulpice.

The operations of 1866-9 were of limited extent, and consisted chiefly in cleaning up and improving the 20-foot channel which was obtained in 1865.

The completion of the 20-foot channel marked an important era in the history of the St. Lawrence route. The success of the work amply demonstrated that the St. Lawrence could be made available up to Montreal for navigation by the largest class of ocean merchant ships, and the extraordinary increase of Canadian commerce that attended the improvement of the channel showed how imperatively it was demanded by the trade of Canada. No sooner was the new channel fairly in use than the rapid increase of ocean traffic suggested a further deepening, and a vigorous agitation was commenced for a 24-foot channel at low water.

Twenty-five foot Channel.—It was then resolved to deepen the channel to 25 feet, which was accomplished in the fall of 1882. A new channel on the south side of the river, opposite Contrecœur and parallel to the Lavaltrie channel was adopted for this channel, as it was wide and deep and required very little dredging. It was called the Contrecœur channel. This gave a clear depth of 25 feet at low water at all points above cap à la Roche, but at that point and cap Charles an average tide was necessary to pass with the full depth available elsewhere. In the straight parts of the channel the minimum width was 300 feet and at the bends 325 to 450 feet.

Twenty-seven and a-half-foot Channel.—Owing to the growth of trade, it was seen that still further improvement of the channel was required, and the Harbour Commissioners of Montreal obtained permission, by an Order in Council passed the 14th of June, 1883, to proceed with a further deepening to 27½ feet at low water. The work was vigorously pushed forward, and, by 1888, the channel was completed to this depth from Montreal to cap à la Roche, a distance of 107½ miles, from which point to Quebec the tide was necessary to obtain that depth. The channel was 300 feet wide in the straight portions, and 450 feet at the bends.

At this juncture the Federal Government, realizing that the tonnage charges upon the Ship channel were detrimental to the mercantile expansion of Montreal, passed an Act, in 1888, making the Ship channel a national and not a local work, and relieved the Harbour Commissioners of their indebtedness with respect to the Ship channel, and transferred the work, plant, etc., to the Department of Public Works.

The tonnage dues were abolished accordingly, so that since the work came under Federal control, the River St. Lawrence ship channel has been free to commerce of the world.

The Harbour Commissioners carried on the operations for the Department of Public Works till the end of the season of 1888, when the official connection of the commissioners with the ship channel ceased, after having continued for over thirty-eight years.

In January, 1889, the control and management of the work was assumed by the Department of Public Works. During the winter, extensive repairs were made to the dredging plant, which, on the opening of navigation, was set to work at cap à la Roche, Poullier Rayer, and Cap Charles in deepening the channel at those points to 27½ feet at low water, spring tides.

From this date to 1898, the Department of Public Works continued operations, and completed the difficult rock work at Cap a la Roche and Cap Charles to 27½ feet at low water. In addition, many portions of the channel were cleaned up, straightened, and several curves and narrow places widened. Surveys were made and channels were dredged through several shoals between Cap Charles and Quebec to avoid the necessity of waiting for the tide.

Thirty-foot Channel.—The unusually low water of 1895 and 1897, and the increased size of vessels, urgently called for a wider and deeper channel, and larger and more powerful dredges and plant were required.

In 1899 the dredging plant was in a condition to warrant a more extensive plan of operations.

The low water of 1897, the lowest on record, except the short period of unusually low water of 1895, was adopted as the new datum for the 30-foot channel, and is nearly 1½ to 2 feet lower than the ordinary low-water plans of the 27½-foot channel. The object, therefore, was to realize in the shortest possible time, a channel 450 feet wide on the tangents, and from 500 to 750 feet wide at the curves. An anchorage 800 feet wide was also to be provided at White Buoy curve in lake St. Peter. The work also included much straightening of the channel.

The ship channel continued under the control of the Department of Public Works until 1904, when an Order in Council was passed on March 11 transferring the management and control of the River St. Lawrence ship channel, together with the dredging and shipbuilding plant to the Department of Marine and Fisheries, so as to place the supervision of the improvements to navigation on the St. Lawrence route under the department directly responsible for the pilotage and aids to navigation.

Under this department the work was vigorously continued, so that the season of 1907 saw the completion of the channel from Montreal to Batiscan to 30 feet depth at the extreme low water of 1897, a distance of 101 miles. From that point to Quebec, the tide could be used to obtain the same depth. There still remained, however, some widening in lake St. Peter. By the end of the season of 1910, the dredging was all completed to 30 feet to the head of Cap à la Roche curve, 6 miles below Batiscan, including all the widening between Montreal and that point. The completion of this work allowed more dredges to be placed in the Cap à la Roche district, where dredging operations are the most difficult, the current being strong and the material to be removed mostly hard shale rock.

The dredging operations were then carried on with renewed energy and, considering the difficulty of working in this locality, good progress has been made, so that at the close of the season of 1914 only about half a mile of deepening in the Cap à la Roche district was required to give a depth of 30 feet at extreme low water. This is 4½ feet greater depth than in the 27½-foot channel as the low-water plane adopted for the 30-foot project here is 2 feet lower than that of the 27½-foot channel. The widening is nearly completed.

The Cap à la Roche channel was widened from 300 feet to 450 and 550 feet, and the Cap Charles channel from 300 feet to 450 feet with 600 feet at the curve, and completed last season.

Grondines channel was also completed last season to a depth of 30 feet, with a width of 450 feet.

Both the Cap Charles and Grondines channels are to be opened for navigation in the spring of 1915.

The only place that now requires dredging to obtain 30 feet between Cap à la Roche and Quebec is at St. Augustin bar, 14 miles above the latter place. Advantage must still be taken of the tide, by deep-draught vessels, to pass this place, the range of tide being 16½ at springs and 11 at neaps. It is proposed to begin work on this part of the project next season.

Thirty-five foot Channel.—In 1910 the question of further deepening was considered because the rapid increase in the size of vessels was likely to find the 30-foot channel too shallow. The Government therefore resolved to proceed immediately with the deepening of the ship channel to 35 feet at extreme low water of 1897, and in 1910 work started in lake St. Peter. Owing to the undulating character of the river bed, dredging is not required throughout the whole length of the channel between Montreal and Quebec, as at some points the natural depth is more than sufficient to secure 35 feet at extreme low water.

Out of a total distance of 160 miles, 82·24 miles will require dredging. This work is now in active progress, and at the end of the season of 1914, 20·60 miles had been dredged to 35 feet, leaving 61·64 miles unfinished.

SHIP CHANNEL BELOW QUEBEC.

In the spring of 1901 the shipping interests of Montreal brought to the attention of the Honourable the Minister of Public Works, the fact that deep-draught vessels had to wait for the tide to pass St. Thomas and Crane island shoals, which caused these vessels to lose a great deal of valuable time. The officers of the Marine and Fisheries Department at Quebec, who had an intimate knowledge of this part of the river, strongly recommended improving the north channel, commencing below the island of Orleans, as being much better, more easily navigated and having less ice in winter than the south channel. Orders were given to the ship channel staff which was then under the Department of Public Works to make a survey and examination of the north channel with a view to reporting on the practicability and cost of improving that route and adopting it for navigation.

In 1902 a similar survey was made of the south channel, to ascertain what improvements would be required to make a 30-foot channel on the line of the existing route.

A comprehensive report was made on February 24, 1903, by Mr. F. W. Cowie, C.E., who was then Superintending Engineer to the Acting Chief Engineer of the Public Works Department, on the question of the proposed improvements below Quebec.

The report did not recommend the adoption of either route, but advised that the choice should meet with the approval of the underwriters, the shipping interests, and the pilots.

The Transportation Commission visited the locality, going over each channel, and took evidence on the subject. It was finally decided to improve the south channel by dredging it to 30 feet at extreme low tide, and to a width of 1,000 feet.

The parliamentary appropriation for improving the south channel below Quebec became available only late in the autumn of 1905. The ship channel dredging operations had been transferred to the Department of Marine and

Fisheries in 1904. Arrangements were made to have a powerful steel twin-screw hopper hydraulic dredge, constructed at the government shipyard at Sorel. It was estimated that it would take a year and a half to build and equip this powerful machine, which was carefully designed for that special work.

In March, 1906, the Department of Marine and Fisheries received very strong representations that these improvements could not be delayed, and that to wait till 1907 to make a commencement would seriously menace the proposed plans for a largely improved steamship service. The nature of the work below Quebec, the exposed position, want of shelter, etc., made the ordinary American type of dredge out of the question.

The self-propelling sea-going hopper type, as almost altogether used in Great Britain being required, inquiries were made from the dredge builders in Great Britain and ship agents for a dredge immediately available, suitable for this work.

The builders had none on hand, and the only suitable ones offered were in Australia and South Africa. Messrs. Ferguson Bros., one of the largest firms building dredging and harbour plant, wrote stating that there was not a hopper dredger of the capacity mentioned to be bought in England. Messrs. Simons & Company, also large and successful dredge builders, wrote that all their large dredges were fully employed, and that they did not think there was a possibility at that time of procuring a second-hand hopper dredger, either hydraulic or bucket ladder type.

A Dutch pump, at New Orleans, was offered by Messrs. H. E. Moss & Company, of Liverpool, England, for £34,000. The price being very reasonable, on authority of Council the Minister ordered an examination with a view to purchase. The only objection to this dredge was that it had no cutter and therefore not suitable for dredging anything but sand or soft silt. After examination it was decided to purchase it, as Messrs. Moss & Co. had reduced their offer to £30,000.

The dredge was purchased on April 20, 1906, at that price, or $146,000, with interest to date of payment. The vessel was docked and made ready for the long voyage, and all expenses of repairs, wages, provisions, stores, etc., until the dredge reached Quebec, amounted to $10,942.14 and $4,574.17 insurance.

The dredge *Galveston* arrived at Quebec from New Orleans under her own steam, having been twenty-nine days on the voyage. She continued up to Sorel to be thoroughly overhauled and fitted out, additional quarters for the crew being also provided.

South Channel (30 feet at E.L.W.)—The Government having decided to first improve the south channel, preparations were made to start the work. The project had in view a channel 30 feet in depth, at extreme low tide, at Beaujeu bank and St. Thomas' flats, with a width of 1,000 feet.

The changes and improvements on the dredge *Galveston* being completed, she left Sorel for Beaujeu bank, off Crane island, on August 11, 1906, and began operations on August 13, the material consisting of coarse sand and gravel with some layers of soft blue clay. The new hopper hydraulic dredge *Beaujeu* was launched at the government shipyard at Sorel on December 2, 1906, and completed on November 1, 1907. She was then taken down to commence operations on the channel through St. Thomas' flats, the material to be dredged being soft clay, sand, and some stones.

With these two powerful dredges, good progress was made with the work. The Beaujeu bank channel was completed in 1909 to 30 feet at extreme low tide, and the widening finished in 1910. The channel was then opened to navigation.

The St. Thomas channel was completed to a depth of 30 feet at extreme low tide and to a width of 1,000 feet during the season of 1912. The channel was then marked out with gas buoys and opened to navigation. This was considered a great improvement, as deep-draught vessels were not obliged to anchor to wait for the tide to pass Beaujeu bank or St. Thomas' flats, thereby saving much valuable time.

North Channel (35 feet at E.L.T.)—The south channel being now completed, the powerful hydraulic dredge *No. 8 (Beaujeu)* was enabled to be placed at work on the north channel where dredge *No. 9 (Galveston)* had already been operating for a season, as the Government had decided to dredge the north channel between St. Jean island of Orleans, and Goose cape, to a depth of 35 feet at extreme low tide, and to a width of 1,000 feet.

The two powerful sea-going hydraulic dredges *No. 8* and *No. 9,* have since then been at work in that channel, the material to be dredged being sand and gravel.

Although these two dredges have made good progress, there still remains 9,839,-223 cubic yards to be removed.

Owing to requests made by the shipping interests to complete the channel as soon as possible, the Government gave a contract in October, 1914, to the Canadian Vickers, Ltd., of Montreal, to build one of the largest sea-going elevator dredges in the world. With this addition to the dredging first below Quebec, the completion of the north channel will be greatly expedited.

ACCIDENTS IN 1914.

Between Montreal and Quebec.

SB. *J. H. Plummer* grounded on bank when entering the channel to the Vicker's dry dock basin, May 10. Was pulled off easily; apparently no damage. Went on wrong side of buoys.

SB. *Saskatoon* stranded July 24, near Portneuf on south side; steamer went on wrong side of buoy. Considerable damage to bottom.

SS. *Anglo-Brazilian* stranded August 26, on south side of channel, Montreal harbour. Was pulled off with difficulty, some damage to bottom. Due to tow rope breaking.

SB. *Georgetown* was stranded on the south side outside the channel Becancourt lower traverse, on October 9; came off easily, apparently no damage.

SS. *Zealand* stranded on south side of channel, Ile aux Raisin traverse, lake St. Peter, during blinding snowstorm, November 13. Had to be dredged out. No damage.

SS. *Batiscan* collided with ss. *Rossano* at Middle reach, lake St. Peter, November 14. Slight damage. SS. *Rossano* sheered, striking the *Batiscan.*

Between Quebec and Father Point.

SS. *Saturnia* stranded at Lower traverse, April 28. Came off easily. Damage slight.

SS. *Montfort* stranded on Beauport bank, Quebec harbour, April 28. Heavy ice forcing ship on bank. Slight damage.

SS. *Norhilda* stranded at Madame island, September 16. Came off easily. Had no pilot.

C.G.S. *Montmagny* collided near Crane island, September 18, with collier *Lingan,* which carries coal from Sydney, C.B., to Montreal. The *Montmagny* was sunk, and 14 lives were lost.

SS. *Thyra Memier* stranded at White island, October 10. Slight damage. Cause of accident due to dense vapour.

SS. *Batiscan* collided with tug *Muriel* half mile west of Madame Reef buoy, on October 16. The tug *Muriel* was sunk, and one life lost.

C.G.S. *Montcalm* collided with ferry steamer *Lauzon,* Quebec harbour, on November 10. Slight damage.

None of the above accidents can be attributed to any fault of ship channel.

MARINE SIGNAL SERVICE.

Signal stations have been established for the purpose of maintaining communication between ship and shore by means of flag signals.

This system of stations extends from St. John, N.B., Halifax, N.S., cape Race, Nfld., and Belle Isle, up the gulf and river St. Lawrence and through the Great Lakes to Sault Ste. Marie.

Following is a complete list of stations:—

EAST OF QUEBEC.

Name of Station	Location.	Nautical miles from Quebec.	Means of communication.
R—Quebec	Custom-house	0	Telephone.
R—St. Jean d'Orleans	Shore end of wharf	14	"
Crane Island	Lighthouse	32	"
L'Islet	100 yards east of church	40	Telegraph.
Cape Salmon	Lighthouse	81	Telephone and telegraph.
Rivière du Loup	Shore end of wharf	92	Telegraph.
Father Point	Shore end of wharf	157	"
Little Metis	Lighthouse	175	"
Matane	"	200	"
Pointe des Monts	"	219	"
Cape Chatte	"	234	"
Martin River	"	260	"
Cape Magdalen	"	294	"
Fame Point	"	325	"
Cape Rosier	"	349	"
Cap d'Espoir	"	377	"
Pointe Maquereau	"	400	"
West Point	"	332	"
Southwest Point	"	360	"
South Point	"	415	"
Heath Point	"	438	"
Point Escuminac	"	462	"
Amherst Island	"	481	"
St. Paul Island	Main station	540	Telephone.
Money Point	Lighthouse	537	"
Flat Point	"	575	Telegraph.
Cape Ray	"	553	"
Cape Race	"	826	"
Point Amour	"	673	"
Belle Isle	"	734	Wireless-Telegraph.
Camperdown	Near Wireless station		Telephone.
Halifax	The Citadel		"
Brier Island	Near lighthouse		"
Point Lepreaux	Lighthouse		"
Partridge Island	"		"
St. John, N.B.	Custom-house		"

WEST OF QUEBEC.

Bridge Station	¼ mile above new railway bridge on south shore.	6	Telephone.
St. Nicholas	At Tidal semaphore	12	"
Portneuf	In front lighthouse	31	"
Grondines	In old windmill tower	41	"
St. Jean Deschaillons	At tidal semaphore	45	"
Pointe Citrouille	Lighthouse	55	"
Three Rivers	Upper end of government wharf.	68	"
Sorel	Lower end of government wharf.	100	"
Vercheres	In old windmill tower	120	"
Longue Pointe	Point between wharves	134	"
R—Montreal	La Sauvegarde building, Notre Dame street east.	139	"

WEST OF MONTREAL.

Name of Station.	Location.	Nautical miles. from Montreal.	Means of communication.
R—Lachine Canal	Lock No 2	0	Telephone.
R—Lachine Canal	Lachine	8	"
R—Soulanges Canal	Cascades point	21	"
R—Soulanges Canal	Coteau Landing	33	"
R—Cornwall Canal	Cornwall	62	"
R—Galops Canal	Lift lock	99	Telegraph.
R—Welland Canal	Port Dalhousie	298	"
R—Welland Canal	Port Colborne	321	"
R—Soo Canal	Sault Ste. Marie	820	"

Stations marked thus "R" are reporting stations only, and are not equipped for signalling purposes.

All stations have been kept in good repair during the past season.

Brief Summary of Work Performed.

1. Stations report movements of vessels to Montreal, Quebec, Sydney, Halifax, or St. John.

2. Stations report weather conditions daily to Montreal, Quebec, Sydney, Halifax, or St. John.

3. Montreal, Quebec, and St. John publish daily bulletins giving weather and ice conditions and movements of vessels.

4. Montreal and Quebec publish daily bulletins showing the depth of water at various points in the river St. Lawrence ship channel.

5. The Signal Service offices at Montreal, Quebec, and St. John are open day and night for the purpose of furnishing the public with information of shipping matters.

6. The telegraph system of the Department of Public Works on the north shore of the gulf of St. Lawrence reports the movements of vessels engaged in the coasting trade to the Signal Service at Quebec.

7. The collectors of customs at all the seaports in the river and gulf of St. Lawrence, on the Atlantic coast and in the bay of Fundy report the arrival and departure of vessels engaged in the overseas trade.

8. Lloyds' agents at Quebec are furnished daily with full information of the movements of vessels engaged in the overseas trade to and from ports in the province of Quebec.

9. Lloyds' agents at St. John are furnished daily with full information of the movements of vessels engaged in the overseas trade to and from ports in the Maritime provinces.

Improvements Carried out and Completed.

The Signal Service at Halifax, St. John, North Sydney and Quebec, in the river and gulf of St. Lawrence and on the Great Lakes, and the telephonic and reporting service between Quebec and Montreal were combined on the 1st April, 1914, under the heading of Signal Service, with headquarters at Quebec. This consolidation has greatly facilitated the work and has led to many improvements.

An arrangement was made with the Department of Railways and Canals whereby their officials at the Lachine, Soulanges, Cornwall, Galops, Welland, and Sault Ste. Marie canals report several times daily to the Signal Service at Montreal, giving movements of vessels bound to Montreal and points east of that port. In this connec-

tion a private telephone line has been established between the Signal Service office, Montreal, and the Canal office at Lachine. This service has proved itself to be very useful, especially to the shipping interests of the port of Montreal, and will be extended from time to time as conditions may warrant.

In August, the Batiscan signal station was closed and a new station was opened at Pointe Citrouille. This change was made for the purpose of showing the depth of water in the Cap à la Roche channel so that eastbound vessels might come to anchor at pointe Citrouille if necessary. In order to make this service reliable and prompt, an additional telephone line had to be installed between pointe Citrouille and Three Rivers connecting there with the line to St. Jean signal station. This gives a direct circuit between point Citrouille and St. Jean without interference from other stations.

It has been decided to close the Signal station at Verchères and to replace it by two new ones, one at cap St. Michel and one at Bellmouth curve. This arrangement will improve the service considerably, giving it better facilities for showing weather conditions on the river and for reporting the movements of vessels.

It has also been decided to establish signal stations in the lighthouses at point Tupper and Scutari island, and a reporting station in the Main à Dieu lighthouse. These stations will improve the service considerably, giving weather conditions and movements of vessels in territory not previously covered by the Signal Service.

ICE-BREAKING, WINTER 1914-15.

QUEBEC, May 1, 1915.

SIR,—I have the honour to submit the following report on the work of the ice-breaking steamers *Lady Grey* and *Montcalm* during the winter of 1914-15.

Towards the close of the season of navigation of 1914, on November 18, the weather turned cold and continued so for about a week, causing the formation of a great deal of ice, much more than has been observed at a corresponding date for a number of years. The *Lady Grey* was sent to Three Rivers on November 24, and the *Bellechasse* on November 26, to be in readiness to aid incoming and outgoing ships should they require assistance in getting through the ice. The weather moderated shortly after the arrival of these two vessels at Three Rivers, and in a day or so the river was practically clear again, no special inconvenience having been caused to the shipping. The icebreakers, however, remained on "stand by" in case of a recurrence of the trouble and to help the buoy service when the buoys were being lifted. The last vessel the *Manchester Spinner* passed outwards at Three Rivers on December 4, and all the barges were lifted below this point by December 6, so the *Lady Grey* and the *Bellechasse* proceeded to Quebec, the former to prepare for ice-breaking work during the winter, and the latter to be laid up for the season.

The winter of 1914-15 was exceptionally mild, there being only two or three periods of a day or so each when the thermometer registered zero or below.

The ice bridge formed at Port St. Francis on December 10, and by December 22 was solid from this point up to Montreal.

From December 10, until January 31, the river was open from slightly below Port St. Francis to Quebec. On the latter date a bridge was formed at St. Pierre les Becquets, and by February 5 the ice had backed up to Port St. Francis.

Immediately after the ice took at St. Pierre, an attempt was made to send the *Lady Grey* up in order to cut out the jammed ice, but owing to unfavourable ice and weather conditions, she was not able to reach the jam. Had it been possible for this ship to reach St. Pierre shortly after the ice had formed, it would have been a small matter to break it up, and would have done away with the necessity of later on cutting out about 26 miles of ice between this point and Port St. Francis.

During the winter there were two serious ice-jams, one at the bridge and one in Quebec harbour.

The first of these jams formed on December 26, and was the worst that has occurred since ice-breaking operations were undertaken seriously in 1909. The ice blocked from below Quebec bridge upwards as far as could be seen. The *Lady Grey* was alone at the time, as the *Montcalm* was absent on a trip to the gulf. After the *Lady Grey* had been engaged for two days endeavouring to break up this accumulation of ice, all expectations of being able to clear the channel were practically given up, but the work was still pushed ahead, and on January 29, they were successful in cutting the key. With the next rising tide the whole mass moved up stream. Work was carried on all day on December 30, breaking up the ice as it came down, and by evening the channel was once more free.

On February 4, an ice bridge was formed in the lower part of Quebec harbour, but was broken up by the *Lady Grey* and *Montcalm* after about twenty-four hours' work.

The ice stopped at the bridge two or three times during the winter, but was broken up without difficulty. Other jams might have occurred on several occasions, when the Les Ecureuils battures were coming down, but the icebreakers were able to meet these ice fields in the wide water stretch above Cap Rouge, and break them up, so that they passed through the narrows at the bridge without stopping.

The work of breaking up the ice in the upper reaches of the river began on March 8, slightly below St. Pierre les Becquets. Both ships were employed pretty steadily in these operations. By March 15 the river had been cleared to Three Rivers, and by March 24 to Nicolet traverse at the foot of lake St. Peter. The work was pushed ahead without interruption, and on April 3 the icebreakers had arrived at Sorel. As the ice in the lower end of the lake was getting dangerous, the *Lady Grey* was brought back for widening operations at the foot of lake St. Peter, and the *Montcalm* continued the cut upwards to a point 5 miles above Sorel, also widening and preventing the ice jamming in the Sorel islands. The ice in lake St. Peter moved on April 7, but it was not until April 14 that the channel was finally clear to Montreal. As a rule, one icebreaker is able to clear the lake in three days after the first movement has taken place, but this year, owing to the extremely low stage of the water, it took rather more than double the time, as the *Lady Grey* was unable to work as advantageously as usual.

The icebreakers were engaged for thirty-eight days clearing the river of ice from St. Pierre les Becquets to a point 5 miles above Sorel, a distance of 63 miles. This gives an average rate of advance of 1·66 mile per day. This 1·66 mile advance per day means river cleared of ice sufficiently wide to ensure that jamming will not occur. The thirty-eight days is the time that elapsed from the date the work began until it was finished. The actual working time was very much less, as there were delays from fog, being cut off by jams below, and other causes.

Ice-breaking operations have been carried on systematically since 1909 and, with the exception of the year 1912, there has been no flooding. In 1912 an ice-bridge formed at Cap Rouge, while the *Lady Grey* was above at Three Rivers. The *Montcalm* alone was not able to break up the jam at the bridge, and as a result the river was not clear until April 29. Heavy flooding occurred from Ste. Anne de la Parade upwards. These facts, in my opinion, prove conclusively that the work of the icebreakers, in so far as preventing floods is concerned, has proved a success.

The Department of Railways and Canals made the usual request to have the *Lady Grey* break up the bank of frazil ice which forms every winter at the lower entrance to the Soulanges canal. This work was performed on April 22, a week after the river was clear below Montreal, it being impossible to do it sooner, as the Lachine canal was not open.

I have the honour to be, sir,

Your obedient servant,

N. B. McLEAN,
Resident Engineer.

GENERAL INFORMATION.

The Cap à la Roche semaphore which shows the available depth of water in the dredged channel at Cap à la Roche was put in operation for the season on the 7th of May, 1914, and the St. Nicholas semaphore, showing the depth available over the undredged St. Augustin bar, on the 9th of May, 1914.

A new semaphore was established at pointe Citrouille lighthouse, to give the available depth of water in the dredged channel at Cap à la Roche, the depth being shown with large figures on the lighthouse pier.

Arrangements were made with the Bell Telephone Company for a special telephone wire to connect Cap à la Roche semaphore station with Pointe Citrouille semaphore, by which the operator at the former place can telephone to the latter place every 3 inches rise and fall of the tide. This enables deep-draught vessels outward bound to anchor at the new anchorage ground at Pointe Citrouille and wait for the tide to rise, if it is to be found that there is not sufficient depth of water to go through Cap à la Roche with safety.

This new addition to aids to navigation has given great satisfaction to the shipping interests. It was put in operation on the 8th October, 1914.

The Repentigny channel (steamboat channel) from Ile Ste. Thérèse to Lavaltrie was entirely completed to a depth of 15 feet at extreme low water. It was then buoyed out and opened to navigation.

The continuation of the Steamboat channel for light-draught vessels and tows through the islands opposite Sorel to lake St. Peter, by way of the "Grand chenal," was decided upon by the department, and the dredging was commenced and nearly completed during the last season. The depth of the channel to be 15 feet at extreme low water, with a minimum width of 400 feet.

It is proposed to build three lighthouses next season to mark the different courses, and as soon as completed the channel will be buoyed out and opened for navigation. This will avoid the delays and annoyance caused to ocean steamers by tows, at the bends in the vicinity of Stone island.

With the exception of about half a mile in length just below Pointe aux Trembles (opposite Ile aux Vaches) light-draught vessels and tows will be able to keep out of the Ship channel, from Montreal to lake St. Peter, a distance of 55 miles.

The Grondines channel (Horseback bar) was completed to a depth of 30 feet at extreme low water of 1897, and to a width of 450 feet. As soon as the new lights are built next season to mark the new centre line, the buoys will be shifted to give the increased width.

There still remains a short distance at the lower end of Cap Charles channel on the south half to deepen from 27½ feet ordinary low water to 30 feet at extreme low water, the difference between the two datums being 2 feet; the channel is therefore being dredged 4½ feet deeper than the old channel. This remaining part will be completed next season.

The widening of Cap Charles channel and curve is all completed. The lights to mark the new centre line of Cap Charles channel will be built next season. As soon as this is done, the buoys at the lower end will be moved to give the additional width.

Owing to the hard nature of the rock to be removed at Cap à la Roche channel and curve, and the large numbers of boulders to be lifted, the progress at this point has been slow; the widening, however, is nearly completed. The dredging so far has had the good effect of improving the direction of the current.

The widening of Varennes curve was completed to 650 feet. This was proved with the sounding scow and found clear for 30 feet at E.L.W. of 1897. The buoys will be placed next spring to give the additional width. Most of the curve, however, is dredged to 35 feet at extreme low water of 1897.

The channel approach to the Montreal floating dock was completed to a minimum width of 900 feet and to a depth of 30 feet at extreme low water. This now gives a splendid channel of ample width and depth for vessels going and coming out of the floating dock basin. The length of the 30-foot channel actually at the close of navigation season of 1914 equals 66·25 statute miles. The total length requiring dredging is 70·00 miles, there remaining 3·75 miles yet to be done.

On the 35-foot project between Montreal and Quebec, dredging has been done at lake St. Peter, Ste. Anne Traverse, St. Ours Traverse (Contrecœur channel), Varennes curve, and Pointe aux Trembles channel.

The total length dredged equals 20·60 statute miles, total length to be dredged being 82·24 miles, there remaining to be dredged 61·64 miles. Two new dredges were added to the dredging fleet working on the 35-foot project; with this addition much better progress will be made in the future.

Dredges *No. 8* and *No. 9* worked all season in the north channel below Quebec, and good progress was made. This channel is to be 1,000 feet in width and 35 feet at extreme low water. Dredge *No. 8* (*Beaujeu*), however, was taken off for a short time to do some cleaning up in St. Thomas channel through the Flats (south channel).

A contract was given to the Canadian Vickers Shipbuilding Company of Montreal to build a large powerful sea-going elevator dredge on similar lines to the *Corozal*, which was employed on the deepening of the Panama canal, and which is one of the largest and most powerful dredges of that type in the world. The work on this dredge has been delayed owing to unavoidable circumstances, but as soon as completed it will be placed to work on the project below Quebec, where it is very much needed to hasten the work.

The usual sweeping was done during the season of navigation, but no obstruction of a serious nature was found. A considerable number of sandbars were found to have formed in the Champlain channel, but these were all removed by a dredge before the low-water season.

A little cleaning up had also to be done at Batture, Perron and Batiscan curve, but it did not amount to very much.

The total cost from 1851 to the end of the fiscal year ending March 31, 1915, of the Ship channel from Montreal to Father Point, including plant, shops, surveys, etc., is as follows:—

Dredging	$11,542,341 81
Plant, shops, surveys, etc.	6,761,627 37
	$18,303,969 18

The number of cubic yards dredged amounted to 97,526,885, the material varying from very hard shale rock to soft blue clay.

DREDGING OPERATIONS.

Elevator Dredge No. 1 (Laval).—This dredge was constructed in Ottawa in 1894, and is therefore the oldest dredge of the ship channel fleet. The hull is of wood and the dredge buckets are made of cast-steel for work in rock or other hard material.

During the winter of 1913-14 the machinery, etc., of this dredge was given a thorough overhauling and put into good shape for the next season's work.

The details of the operations for the fiscal year, beginning April 1, 1914, were as follows:—

Dredge *No. 1* left Sorel on May 5 and was taken up to Montreal harbour where she arrived the following day. She was laid out in St. Mary's current; several days were lost before she was ready for work, as it takes time and care to place the anchors

in the swift current at that point. She began work on May 11, dredging to 30 feet at extreme low water of 1897, the material being sand, stones, and boulders. Operations were carried on here all season until November 24, when *No. 1* was brought into winter quarters at Sorel.

Owing to the irregular nature of the dredged cut, which consisted mostly of levelling off the tops of small shoals, and also to the fact that the material was hard and the current very swift, the total amount of material dredged was not as large as it would have been had the cut been more regular.

From August until September 11 work was only carried on during daylight, as the current was too strong to work with safety at night. A great deal of stoning had to be done with the aid of a stone lifter, from September 28 until the end of the season. The stone lifter is operated alongside the dredge, and the latter cannot work when stones are being picked up.

In a total of 168 days during which dredge *No. 1* was at work, her machinery was in actual operation 68 per cent of the full working time. The total number of cubic yards dredged amounted to 86,703 at a cost of $64,870.28 or 74·82 cents per cubic yard.

Elevator Dredge No. 2 (*Laurier*).—The hull of this dredge is also of wood having been constructed at the government shipyard at Sorel in 1897. She is equiped with a set of cast-steel buckets, especially designed for work in rock or other hard material.

During the winter of 1913-14 the deck, hull and machinery of this dredge were given a thorough overhauling.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 2* left Sorel on May 4 and was taken up to Varennes curve, where she was laid out the same day to widen and deepen the channel to 35 feet at low water of 1897; the material to be dredged being clay. She worked there until June 13.

On this date *No. 2* was brought down to Sorel, where she remained until June 16, having some repairs made to the boilers. She was then taken down to Cap à la Roche curve and laid out to widen and deepen the channel to 30 feet at low water of 1897; the material to be removed being hard shale, rock and boulders. Work was carried on here until October 16.

This dredge lost a good deal of time at Cap à la Roche curve as there were a great many stones and boulders which had to be lifted by means of a stone lifter. Time was also lost on October 8, 9 and 10, making repairs to the bow winch.

No. 2 left Cap à la Roche on October 16 and laid out at Varennes curve on October 19, where she continued the work of widening, and deepening the channel to 35 feet at low water of 1897 until November 25, when she was taken into winter quarters at Sorel.

In a total of 169 days during which dredge *No. 2* was at work, her machinery was in actual operation 51 per cent of the full working time.

The total number of cubic yards dredged amounted to 124,104 at a cost of $58,701.03 or 47·30 cents per cubic yard.

Elevator Dredge No. 3 (*Lady Aberdeen*).—The hull of this dredge is of steel, the complete vessel having been constructed at the Sorel shipyard in 1900. The buckets are of cast-steel, for working in hard material.

During the winter of 1913-14 the hull and deck were put in good order, and the machinery overhauled and repaired.

The details of the operations of this dredge for fiscal year April 1, 1914, were as follows:—

On May 4, dredge *No. 3* left Sorel and was taken up to Pointe aux Trembles channel and laid out on May 5, to deepen the channel to 35 feet at low water of 1897, the material to be dredged being clay. She continued working there until June 6.

On June 6, *No. 3* was taken down the river and laid out at Grondines on June 9 to widen and deepen the channel to 30 feet at low water of 1897; the material there being clay, stones, and boulders. She worked steadily at Grondines until September 30.

During the time that *No. 3* was employed at Grondines she was considerably delayed as a good many stones and boulders had to be raised with the aid of a stone lifter. Time was also lost from August 31 to September 4, repairing buckets and fitting a new tumbler, and again from September 11 to September 15 making repairs to the top winch.

No. 3 left Grondines on September 30 and was taken back to Pointe aux Trembles and re-laid out there on October 2, to continue the work of deepening the channel to 35 feet. She continued dredging operations there until November 25, when she was taken into winter quarters at Sorel.

The working time of dredge *No. 3* was 172 days, the dredge being in actual operation 63 per cent of the full working time.

The total number of cubic yards removed amounted to $199,507 at a cost of $58,-553.74 or 29·35 cents per cubic yard.

Elevator Dredge No. 4 (Lady Minto).—This dredge is of the same type and design as *No. 3*, and was constructed at the Sorel shipyard in 1900. *No. 4* is also provided with cast-steel buckets for dredging rock and other hard material.

During the winter of 1913-14, this dredge received repairs to her deck and hull, and her machinery was overhauled.

The details of the operations during the season commencing April 1, 1914, were as follows:—

Dredge *No. 4* left Sorel May 4, and was taken to Pointe aux Trembles channel where she was laid out on May 5 to deepen the channel to 35 feet at low water of 1897; the material to be removed being clay, sand, and stones. The dredge was employed throughout the season in this channel, and was brought back to Sorel on November 25 to go into winter quarters.

In a total of 173 days, during which dredge *No. 4* was at work, her machinery was in actual operation 71 per cent of the full working time.

The total number of cubic yards dredged amounted to 142,050 at a cost of $58,-854.83 or 41·43 cents per cubic yard.

Elevator Dredge No. 5 (Lafontaine).—This dredge was constructed at the Sorel shipyard, and was completed in 1901. The hull is of wood, and she is fitted out with cast-steel buckets and has breasting winches of a new type, using wire rope instead of chains for side moorings.

During the winter of 1913-14 the deck, hull, and machinery were given a thorough overhauling.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 5* left Sorel on May 4, and was laid out at Varennes curve the same day to widen and deepen the channel to 35 feet at low water of 1897; the material to be dredged being clay. She workd at Varennes until June 12, when she was taken to Montreal and put into the floating dock for repairs to her hull. These repairs were completed on June 22.

On June 22, *No. 5* was taken down and laid out in St. Sulpice channel, where she was employed until June 26 clearing up some lumps in the new steamboat channel, dredging to a depth of 15 feet at low water of 1897; the material being clay.

She was taken down to Sorel on June 26, and was delayed there two days on account of a heavy northeast wind, and arrived at Cap à la Roche curve on July 1. The dredge was then laid out to deepen the channel to 30 feet at low water of 1897; the material being shale rock. She continued working at Cap à la Roche until November 11.

No. 5 was taken up river again on November 11 and laid out at Varennes curve on November 14. She worked there until November 25, when she was brought into winter quarters at Sorel.

The working time of dredge *No. 5* was 159 days, the dredge being in actual operation 58 per cent of the full working time.

The total number of cubic yards amounted to 219,716, at a cost of $68,367.27, or 31·11 cents per cubic yard.

Elevator Dredge No. 6 (Baldwin).—This dredge was constructed at the Sorel shipyard in 1902, the hull being of wood. *No. 6* is provided with large built-up buckets for work in soft material, but with sufficient teeth to enable her to work in hard-pan, etc.

During the winter of 1913-14 the hull and deck of this dredge were put in good order, the machinery was overhauled and repaired, and a new shoot pump was installed.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 6* left Sorel on May 11 and was taken up the St. Sulpice channel, where she was laid out on May 13 to deepen to 15 feet at low water of 1897; the material being clay and gravel. She worked there until June 4.

On June 4, *No. 6* was brought down to Champlain channel and laid out the next day to clean up some filling that had taken place. She worked there until October 1.

The filling, in Champlain channel having been all cleaned up, *No. 6* was moved down to Batture Perron on October 1 to dredge out some silting that had occurred there. She finished this on October 22.

She left Batture Perron October 22, and was taken up to the head of the "Grand chenal" (new steamboat channel) and laid out the same day to dredge to 15 feet at low water of 1897; the material being clay. This channel lies between Ile Ste. Ignace and Ile de Grace, and joins the ship channel again below Stone island. It is intended for the use of light-draught vessels and tows, in order to relieve the ship channel between Sorel and lake St. Peter of such traffic. She finished the season at the "Grand chenal," going into winter quarters at Sorel on November 21.

Dredge *No. 6* lost time from June 6 to June 13 owing to the water being too high, on account of wind, and repairs; July 20 and 21, removing tumbler bush, and again September 1 and 2 changing tumbler.

In a total of 161 days during which this dredge was at work her machinery was in actual operation 47 per cent of the full working time.

The total number of cubic yards removed amounted to 179,650, at a cost of $57,158.42 or 31·82 cents per cubic yard.

Hydraulic Dredge No. 7 (J. Israel Tarte).—The hull of this dredge is of steel of the same type and general design as the steel hulls of the elevator dredges. She was constructed in 1902 by the Polson Ironworks Company, of Toronto, Canada.

During the winter of 1913-14 this dredge was given a general overhauling. Two new funnels were fitted in place of old ones, discharge pipe outside the hull was renewed, alterations were made to the forced-draught, and twenty-four pontoons were overhauled and repaired.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 7* left Sorel on May 25, and was laid out at the foot of curve No. 3, lake St. Peter on May 26, to deepen the channel to 35 feet at low water of 1897; the material being clay and stones. Work was carried on here until October 1, when the deepening of this curve was completed, and the cut carried through to connect with the deepening already done on the tangent from No. 3 curve to White Buoy curve.

On October 1, *No. 7* was moved up to the foot of curve No. 1, lake St. Peter, and set to work there to deepen to 35 feet. She continued operations at No. 1 curve until November 7, when she was brought into Sorel.

From November 9 to December 2 this dredge was engaged excavating material at the mouth of the Richelieu river. The dredged material was deposited as filling, behind the new wharf at the government shipyard at Sorel.

In a total of 141 days during which this dredge was at work, her machinery was in actual operation 55 per cent of the full working time.

The total number of cubic yards removed amounted to 1,985,665 at a cost of $140,-299.04 or 7·07 cents per cubic yard.

Hydraulic Hopper Dredge No. 8 (Beaujeu).—Steel hull, twin screw. This dredge was constructed at the Sorel shipyard, and completed in 1907.

During the winter of 1913-14 the air chamber opposite hoppers were cleaned by sand blast, old fenders were renewed, centrifugal pump was repaired, new cutter head was fitted, the system of overboard discharge was changed, engines, winches, and boilers were overhauled and repaired.

The details of the operations during the season commencing April 1, 1914, were as follows:—

Owing to the changes that were made on the overboard discharge pipes, dredge *No. 8* was not ready for work until May 29. She left Sorel on that date, proceeded to her station in the north channel below Quebec, arriving there the same day and began operations dredging to a depth of 35 feet at extreme low water, and 1,000 feet wide; the material being clay, sand, and stones. She continued working in the North channel until July 28.

On July 28, *No. 8* came over to the south channel and was laid out at St. Thomas bank to clean up some filling that had taken place there. She remained there until August 6.

The unsettled condition created by the declaration of war, and the fact that the *Bellechasse* was turned over to the Naval Service, leaving only one tug to look after the dredges, made it unsatisfactory to operate the two dredges below Quebec so far apart, so on August 6 the *Beaujeu* was brought back to the north channel and continued working there until November 25; on this date she came into Quebec, was coaled and proceeded to Sorel where she arrived on November 28, and went into winter quarters.

Dredge *No. 8* lost some time throughout the season owing to repairs that were necessitated on account of breakages and for wind.

In a total of 145 days during which this dredge was at work, her machinery was in actual operation 75 per cent of the full working time.

The total number of cubic yards removed was 1,170,200 at a cost of $103,774.84, or 8·87 cents per cubic yard.

Suction Hopper Dredge No. 9 (Galveston).—Steel hull, twin screw.

During the winter of 1913-14 the compartments opposite hoppers were cleaned and painted, fenders repaired, deck over forecastle strengthened and caulked, a new dynamo was installed, three 30-inch gate valves were fitted to discharge pipe and the pipe renewed, main engines, boilers, and winches were overhauled and repaired.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 9* left Sorel May 6, arrived at Quebec on May 7, and went into dry dock the same day for repairs to tail-end shafts, bulkhead, and for scraping and painting. When replacing the propellers, one of them was broken. She left dry dock on May 19, but had to wait until May 29 before a new propeller could be cast and fitted. She began work in the north channel below Quebec on May 30, dredging to

35 feet at extreme low water, 1,000 feet wide, the material being clay, sand, and stones; and continued working there until November 24, when she was brought to Quebec to go into dry dock for the winter.

This dredge was delayed to some extent owing to breakages and wind, but was retarded less than usual this season from these causes.

The working time of dredge *No. 9* was 153 days. She was in actual operation 74 per cent of the full working time.

The total number of cubic yards removed amounted to 740,300 at a cost of $73,-206.98, or 9·89 cents per cubic yard.

Dipper Drdege No. 10.—Steel hull. This dredge was constructed at the government shipyard at Sorel, Que., and completed in 1910.

During the winter of 1913-14 all necessary repairs were made to dredge *No. 10* at Sorel, Que., and certain important improvements made which delayed the placing of the dredge in commission as early as usual in the spring. *No. 10* commenced work on June 6, clearing up in front of the government wharves at Sorel.

On June 19 she was laid out to dredge on the new steamboat channel, by way of the Grand chenal to lake St. Peter, to a depth of 15 feet, at extreme low water of 1897, and a width of 400 feet. The dredge worked in this channel until July 1, the material removed being very soft clay.

No. 10 was then taken to Sorel to replace the short dipper arm for the longer one, for working in Montreal harbour. She was towed up to Montreal, reaching there on July 7, and was immediately laid out to work on the channel approach to the floating dock basin, dredging to 30 feet at E.L.W. Dredge *No. 10* continued working there until September 16, when she was laid out to widen the ship channel through Longueuil shoal, on the south side, the material being hard-pan and stones. *No. 10* worked here until the end of the season, and was taken down to Sorel to go into winter quarters on November 23.

During the season of 1914 the working time of dredge *No. 10* was 124 days. She was in actual operation 50 per cent of the full working time.

The number of cubic yards removed amounted to 155,650 at a cost of $61,352.85, or 39·42 cents per cubic yard.

Dipper Dredge No. 11.—This dredge was constructed at the Sorel shipyard and was completed in 1911. Steel hull.

During the winter of 1913-14 the hull and machinery of this dredge were given a general overhauling; a new dipper arm and buckets were supplied.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 11* left Sorel on May 9, and was taken up to Montreal harbour, arriving the same day. She was laid out at the approach of the floating dock on May 12, to dredge to a depth of 30 feet at low water of 1897; the material to be removed being hard-pan. She worked there throughout the season, and was brought into winter quarters at Sorel on November 27.

This dredge was retarded a good deal during the season owing to breakages. The most serious of these delays were as follows: from June 2 to 16, repairs to keeper of starboard anchor box; July 13 to 14, dipper door being repaired; August 19, 20, and 21, repairs to dipper; August 26 to September 1, repairs to dipper; November 9 to 12, repairs to dipper; November 13 to 16, fitting new main hoisting wire; November 17 to 21, repairs to dipper.

The working time of dredge *No. 11* was 145 days, the dredge being in actual operation 53 per cent of the full working time.

The total number of cubic yards removed amounted to 268,250 at a cost of $54,933.77 or 20·48 cents per cubic yard.

Elevator dredge No. 12.—This dredge was constructed at the Sorel shipyard, and was completed in 1912. Her hull is of steel. *No. 12* is fitted out with large cast-steel buckets for rock work, and can dredge to the depth of 52 feet. The breasting winches are similar to those in elevator dredge *No. 5*, using wire cables instead of chains.

During the winter of 1913-14 the dredge was given a general overhauling.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 12* was brought up to Pointe aux Trembles channel on May 7, and laid out to deepen the channel to 35 feet at low water of 1897, the material being shale rock and clay. She worked there until May 30. On the latter date she was taken down river, remaining a day at Sorel for repairs to one of the winches, and arrived at Cap à la Roche curve on June 2, where she was laid out to deepen the channel to 30 feet at low water of 1897, the material to be dredged being shale rock. She continued working at Cap à la Roche curve until November 18.

No. 12 left Cap à la Roche November 18, and was brought up to Ste. Anne Traverse and laid out November 19, to deepen the channel to 35 feet at low water of 1897; the material being clay. Very little work was done there as the dredge was greatly delayed by snow and wind. She was brought into winter quarters at Sorel, November 24.

The working time of dredge *No. 12* was 166 days, the dredge being in actual operation 50 per cent of the full working time.

The total number of cubic yards removed amounted to 177,366 at a cost of $65,512.15 or 36·94 cents per cubic yard.

Elevator Dredge No. 13.—This dredge was constructed at the Sorel shipyard, and was completed in 1913. Her hull is of steel. *No. 13* is fitted out with large cast-steel buckets for rock work, and can dig to a depth of 52 feet. The breasting winches are similar to those on elevator dredge *No. 5*, using wire cables instead of chains.

During the winter of 1913-14, *No. 13* received only light overhauling as she was new, only having been put in commission in the spring of 1913.

The details of the operations of this dredge for the fiscal year beginning April 1, 1914, were as follows:—

Dredge *No. 13* was brought up from Sorel to Pointe aux Trembles channel on May 5, and laid out to deepen to 35 feet at low water of 1897; the material to be removed being sand, rock, and clay. She worked there until June 8. On this date *No. 13* was removed to Grondines, beginning operations there on June 10. She was employed at Grondines from June 10 until October 17, widening and deepening the channel to 30 feet at low water of 1897; the material dredged was clay, stones, and boulders.

No. 13 left Grondines, October 17, and was taken up and laid out at Pointe aux Trembles channel on October 19, where she continued working until the end of the season.

On November 17 one of her dumping scows was sunk, and the crew was employed from that date until November 21 moving this scow from the edge of the channel to a position of safety on the south bank, where it could easily be lifted in the spring. *No. 13* was then taken to Sorel to go into winter quarters.

The working time of dredge *No. 13* was 166 days, the dredge being in actual operation 60 per cent of the full working time.

The total number of cubic yards removed amounted to 275,182, at a cost of $67,928.80, or 24·68 cents per cubic yard.

Self-Propelling Elevator Dredge No. 14.—Steel hull, single screw; length between perpendiculars, 215 feet 0 inch; breadth moulded, 37 feet 5 inches; depth moulded, 14 feet 0 inch; mean draught, 9 feet 8 inches; speed, 8 knots; greatest working depth,

55 feet; built by the Collingwood Shipbuilding Company in 1914; steel buckets, 1 cubic yard capacity; working capacity per hour in clay, 800 cubic yards.

Dredge *No. 14* arrived at Sorel under her own steam from Collingwood on May 19, 1914. Several details as agreed with the builders had to be completed at the government shop at Sorel, also several necessary adjustments had to be made to suit the work in which the dredge was to be immediately engaged. After this was finished, dredge *No. 14* was taken out and laid out near Ile Ste. Ignace, opposite Sorel, and was operated for some time until the dredge's machinery was working satisfactorily. On August 3, *No. 14* was taken up and placed to begin operations at the foot of St. Ours traverse (Contrecœur channel) deepening the channel to 35 feet at extreme low water, the material dredged being clay and some stones.

The dredge worked only during the day while the crew was being broken to the work. On September 14 the dredge began working day and night shifts. Much time was lost owing to trouble with the dumping scows.

On October 14, *No. 14* was taken down to Sorel to have repairs made to the lower tumbler, and returned to work again on the 20th.

On November 23, dredge *No. 14* was taken down to Sorel to go into winter quarters.

The working time of *No. 14* was 89 days, the dredge being in actual operation 62 per cent of the full working time. The total number of cubic yards removed amounted to 213,200, at a cost of $52,552.50, or 24·65 cents per cubic yard.

Self-propelling Elevator Dredge No. 15.—Steel hull, single screw; length between perpendiculars, 215 feet 0 inches; breadth moulded, 37 feet 5 inches; depth moulded, 14 feet 0 inches; mean draught, 9 feet 8 inches; speed, 8 knots; greatest working depth, 55 feet; built by the Collingwood Shipbuilding Company in 1914; steel buckets, 1 cubic yard capacity; working capacity per hour in clay, 800 cubic yards.

Dredge *No. 15* arrived at Sorel under her own steam from Collingwood on May 19, 1914. Several details as agreed with the builders had to be completed at the Government Shipyard at Sorel, also several adjustments had to be made to suit the work in which the dredge was to be immediately engaged. As soon as this was completed, dredge *No. 15* was laid out near Ile St. Ignace, opposite Sorel, Que., and was operated for some time to test the different parts until the machinery was working satisfactorily. On August 11, she left Ile Ste. Ignace and went up to St. Ours traverse (Contrecœur channel), where she was laid out to work to deepen the channel to 35 feet at extreme low water. The dredged material was clay and some stones.

No. 15 was operated during the day only, while the crew was being trained. On September 14 she began working day and night. Much time was lost by this dredge owing to the dumping scows giving trouble.

On October 14, *No. 15* went down to the shipyard at Sorel to have repairs made to her lower tumbler; after these were completed, she returned to St. Ours traverse on October 16.

Dredge *No. 15* continued working at St. Ours traverse until November 23, when she picked up anchors and left for Sorel to go into winter quarters.

The working time of *No. 15* was 84 days, the dredge being in actual operation 58 per cent of the full working time.

The total number of cubic yards removed amounted to 287,600 at a cost of $50,780·15 or 17·66 cents per cubic yard.

The total number of cubic yards removed by the dredging fleet in the ship channel between Montreal and Quebec, during the fiscal year ending March 31, 1915, amounted to 4,314,643 at a total cost of $859,864.83, or 19·93 cents per cubic yard.

The total number of cubic yards removed by dredges *No. 8* (*Beaujeu*) and *No. 9* (*Galveston*) in the ship channel below Quebec during the fiscal year ending March 31, 1915, amounted to 1,910,500, at a total cost of $176,981.82, or 9·26 cents per cubic yard.

The total number of cubic yards removed by the whole of the dredging fleet during the fiscal year ending March 31, 1915, amounted to 6,225,143, at a total cost of $1,036,846.65 or 16·66 cents per cubic yard.

DREDGING FLEET.

The following is a description of the dredging plant at the end of the season 1914, owned and operated by the Department of Marine in connection with the River St. Lawrence ship channel between Montreal and Father Point:—

Dredges.

The elevator dredge "Laval" (No. 1).—Wooden hull; length over all, 150 feet; breadth of beam, 30 feet; depth of hold, 14 feet; average draught, 11 feet; greatest working depth, 42 feet; hull built at Ottawa, in 1894; steel buckets; working capacity per day in hard material, 1,000 to 2,000 cubic yards.

The Elevator Dredge "Laurier" (No. 2).—Wooden hull; length over all, 163 feet; breadth of beam, 32 feet; depth of hold, 14 feet; average draught, 10 feet; greatest working depth, 45 feet; built at Sorel shipyard in 1897; steel buckets, working capacity per day in hard material, 1,000 to 2,000 cubic yards.

The elevator dredge "Lady Aberdeen" (No. 3).—Steel hull; length over all, 148 feet; breadth of beam, 32 feet; depth of hold, 13 feet; average draught, 8·5 feet; greatest working depth, 42·5 feet; built at Sorel shipyard in 1900; steel buckets; greatest working capacity per day in hard material, 1,000 to 2,000 cubic yards.

The elevator dredge "Baldwin" (No. 6).—Wooden hull; length over all, 165 feet; breadth of beam, 32 feet; depth of hold, 13 feet; average draught, 8·5 feet; greatest working depth, 42·5 feet; built at Sorel shipyard in 1900; steel buckets; working capacity per day in hard material, 1,000 to 2,000 cubic yards.

The elevator dredge "Lafontaine" (No. 5).—Wooden hul; length over all, 168 feet; breadth of beam, 32 feet; depth of hold, 14 feet; average draught, 9 feet; greatest working depth, 45 feet; built at Sorel shipyard in 1901; steel buckets; working capacity per day in hard material, 1,000 to 2,000 cubic yards.

The elevator dredge "Baldwin" (No. 6).—Wooden hull; length over all, 165 feet; breadth of beam, 34 feet; depth of hold, 14 feet; average draught, 8 feet; greatest working depth, 42 feet; built at Sorel shipyard in 1902; one-cubic-yard buckets strengthened for fairly hard material; working capacity per day in medium material, 2,500 to 3,500 cubic yards.

The hydraulic dredge "J. Israel Tarte" (No. 7).—Steel hull; length over all, 160 feet; breadth of beam, 42 feet; depth of hold, 12·5 feet; average draught, 6 feet; length of suction pipe, 80 feet; greatest working depth, 47 feet; built at Polson Iron Works, Toronto, 1902; working capacity per day in soft material, 12,000 to 20,000 cubic yards.

Discharge Pipe and Pontoons of Dredge "J. I. Tarte" (No. 7).—Twenty-seven lengths of pipe, 36 inches diameter by 100 feet long; one length of pipe 36 inches diameter by 35 feet long; twenty-seven pairs of pontoons for floating pipes, 42 inches diameter by 90 feet long.

Scow No. 24, Pontoon Anchor Scow for Dredge "No. 7."—Wooden hull; length over all, 63 feet; breadth of beam, 27 feet; depth of hold, 8 feet; built at Sorel shipyard in 1909.

Scow No. 27, for Dredge "J. I. Tarte, No. 7."—Wooden hull; length over all, 60 feet; breadth of beam, 18 feet; depth of hold, 6 feet; built at Sorel shipyard in 1902.

The Sea-going Suction Hopper Dredge "Beaujeu" (No. 8).—Steel hull; twin screw; length between perpendiculars, 264 feet; breadth of beam, 45 feet; depth of hold, 20 feet; capacity of hoppers, 2,000 cubic yards in forty-five minutes; greatest working depth, 65 feet; draught, when loaded, 15 feet; ordinary speed, 9 statute miles; built in Sorel shipyard in 1907.

The Suction Hopper Dredge "Galveston" (No. 9).—Steel hull; twin screw; length over all, 233 feet; breadth of beam, 39 feet; depth of hold, 15·5 feet; draught when loaded with 1,800 tons, 14 feet 9 inches aft, and 13 feet 1 inch forward; greatest working depth, 55 feet; built in Germany, 1904; two suction pumps, Dutch type, 8·5 feet outside diameter, working capacity, 1,350 cubic yards in 45 minutes; hopper capacity, 1,500 cubic yards.

Dipper Dredge "No. 10."—Steel hull; length moulded, 132·5 feet; breadth moulded, 42 feet; depth at bow, 11·5 feet; depth at stern, 9·7 feet; length of spuds, 74 feet; bucket capacity, one 11-yard for soft material, one 9-yard for hard material; capable of dredging to 50 feet; built at Sorel shipyard in 1910.

The Dipper Dredge "No. 11."—Steel hull; length moulded, 132·5 feet; breadth moulded, 42 feet; depth at bow, 11·8 feet; depth at stern 13·5 feet; length of spuds, 74 feet; bucket capacity, one 11-yard for soft material, one 9-yard for hard material; capable of dredging to 50 feet; built at Sorel shipyard in 1911.

The Elevator Dredge "No. 12."—Steel hull; length over all, 180 feet; breadth of beam, 40 feet; depth of hold, 12·8 feet; average draught, 9 feet; greatest working depth, 52 feet; built at Sorel shipyard in 1912; steel buckets; working capacity per day in hard material, 2,000 to 4,000 cubic yards.

The Elevator Dredge "No. 13."—Steel hull; length over all, 180 feet; breadth of beam, 40 feet; depth of hold, 12·8 feet; average draught, 9 feet; greatest dorking depth, 52 feet; built at Sorel shipyard in 1913; steel buckets; working capacity per day in hard material 2,000 to 4,000 cubic yards.

Self-propelling Elevator Dredge "No. 14."—Steel hull; single screw; length between perpendiculars, 215 feet 0 inches; breadth moulded, 37 feet 5 inches; depth moulded, 14 feet 0 inches; mean draught, 9 feet 8 inches; speed, 8 knots; greatest working depth, 55 feet; built by the Collingwood Shipbuilding Company in 1914; steel buckets, 1 cubic yard capacity; Manganese steel lip; working capacity per hour in clay, 800 cubic yards; Lloyds' 100 A. 1. dredger class.

Self-propelling Elevator Dredge "No. 15."—Steel hull; single screw; length between perpendiculars, 215 feet 0 inches; breadth moulded, 37 feet 5 inches; depth moulded, 14 feet 0 inches; mean draught, 9 feet 8 inches; speed, 8 knots; greatest working depth, 55 feet; built by the Collingwood Shipbuilding Company in 1914; steel buckets 1 yard capacity, Manganese steel lip; working capacity per hour in clay 800 cubic yards; Lloyds' A. 1. dredger class.

Tugs.

The Ice-breaking and Emergency Tug "Lady Grey."—Steel hull; twin screw; length between perpendiculars, 172 feet; length over all, 183 feet 6 inches; breadth moulded, 32 feet; breadth extreme, 32 feet 3 inches; depth moulded, 18 feet; draught mean to bottom of flat plate keel (normal) 12 feet; draught when ice-breaking, about 13 feet; displacement in tons at 12-foot draught, 1,070; mean speed, at 12-foot draught on six runs over measured mile base, 14 knots; built by Vickers Sons & Maxim, Ltd., Barrow-in-Furness, England, 1906.

The *Tug 'Bellechasse.*"—Steel hull; twin screw; length between perpendiculars, 130 feet; breadth moulded, 27 feet; draught aft, 10 feet 3 inches; draught forward, 8 feet 9 inches; indicated horse-power, 1,000; built by the Kingston Shipbuilding Co., Kingston, Ont., in 1913.

The Tug "Frontenac."—Composite hull; twin screw; length over all, 113 feet; breadth of beam, 23 feet; depth of hold, 10 feet; average draught, 9 feet; built at Sorel shipyard in 1902.

The tug "De Levis,"—Wooden hull; twin screw; length over all, 104 feet; breadth of beam, 20 feet; depth of hold, 10 feet; average draught, 8 feet; built at Sorel shipyard in 1902.

The Tug "James Howden,"—Wooden hull; twin screw; length over all, 100 feet; breadth of beam, 21 feet; depth of hold, 10 feet; average draught, 7·5 feet; built at Sorel shipyard in 1903.

The Tug "Iberville."—Steel hull; single screw; length over all, 90 feet; breadth of beam, 18 feet; depth of hold, 12 feet; average draught, 10 feet; built at Sorel shipyard in 1897.

The Tug "Lac St. Pierre."—Wooden hull; twin screw; length over all, 100 feet; breadth of beam, 21 feet, depth of hold, 10 feet; average draught, 7·6 feet; built at Sorel shipyard in 1901.

The Tug "Portneuf."—Wooden hull; single screw; length over all, 85 feet; breadth of beam, 17·3 feet; depth of hold, 9·8 feet; average draught, 8 feet; built at Sorel shipyard in 1905.

The Tug "Chambly."—Wooden hull; single screw; length over all, 84 feet; breadth of beam, 18 feet; depth of hold, 9·5 feet; average draught, 9 feet; built at Sorel shipyard in 1893.

The Tug "Emilia."—Wooden hull; single screw; length over all, 84 feet; breadth of beam, 17 feet; depth of hold, 9 feet; average draught, 8 feet; built at Sorel shipyard in 1898.

The Tug "Lanoraie."—Wooden hull; single screw; length over all, 84 feet; breadth of beam, 17 feet; depth of hold, 9 feet; average draught, 8 feet; built at Sorel shipyard in 1901.

The Tug "Jessie Hume."—Wooden hull; single screw; length over all, 72 feet; breadth of beam, 17·2 feet; depth of hold, 10 feet; average draught, 8·5 feet; built at St. Catharines, Ont,, in 1876.

The Tug "Lotbinière."—Wooden hull; twin screw; length over all, 80 feet; breadth of beam, 23 feet; depth of hold, 8 feet; average draught, 7 feet; built at Sorel shipyard in 1903.

The Tug "Carmelia."—Wooden hull; single screw; length over all, 84 feet; breadth of beam, 17 feet; depth of hold, 9 feet; average draught, 8 feet; purchased in 1904.

The Tug "Contrecœur."—Wooden hull; twin screw; length over all, 90 feet; breadth of beam, 22·7 feet; depth of hold, 9 feet; average draught, 7 feet; built at Sorel shipyard in 1910.

The Tug "Varennes."—Wooden hull; twin screw; length over all, 96 feet; breadth of beam, 22 feet; depth of hold, 9 feet; average draught, 7 feet; built at Sorel shipyard in 1911.

The Tug "Laviolette."—Steel hull; twin screw; length over all, 92 feet; breadth of beam, 22 feet; depth of hold, 9·3 feet; average draught, 7 feet; built at Sorel shipyard in 1912.

The Tug "Lavaltrie."—Steel hull; twin screw; length over all, 92 feet; breadth moulded, 22 feet; depth moulded, 10 feet; average draught, 6 feet 6 inches; built at Sorel shipyard in 1913.

The Tug "Becancour."—Steel hull; twin screw; length over all, 100 feet; breadth moulded, 22 feet 6 inches; depth moulded, 10 feet; depth of hold, 9 feet; average draught, 7 feet; capacity of fire pumps, 1,200 gallons (U.S.) per minute; built at Sorel shipyard in 1914.

The Tug "Deschaillons."—Steel hull; twin screw; length over all, 100 feet; breadth moulded, 22 feet 6 inches; depth moulded, 10 feet; depth of hold, 9 feet; average draught, 7 feet; fire pumps similar to those on *Becancour* to be installed; built at Sorel shipyard in 1914.

Coal Barges, Etc.

Coal Barge "No. 1."—Wooden hull; length over all, 120 feet; breadth of beam, 24 feet; depth of hold, 10 feet; built at Sorel shipyard in 1898.

Coal Barge "No. 2."—Wooden hull; length over all, 125 feet; breadth of beam, 25 feet; depth of hold, 11 feet; built at Sorel shipyard in 1900.

Coal Barge "No. 3."—Wooden hull; length over all, 98 feet; breadth of beam, 28 feet; depth of hold, 12 feet; built at Sorel shipyard in 1902.

Coal Barge "No. 4."—Wooden hull; length over all, 98 feet; breadth of beam, 28 feet; depth of hold, 12 feet; built at Sorel shipyard in 1903.

Coal Barge "No. 5."—Steel hull; length over all, 127 feet; breadth of beam, 32 feet; depth of hold, 10 feet; built at Sorel shipyard in 1911.

Stone Lifter "No. 3."—Wooden hull; length over all, 108 feet; breadth of beam, 34 feet; depth of hold, 14 feet; built at Sorel shipyard in 1903.

Stone Lifter "No. 4."—Steel hull; length over all, 100 feet; breadth of beam, 32 feet; depth of hold, 12 feet; built at Sorel shipyard in 1910.

Stone Lifter "No. 5."—Steel hull; length over all, 100 feet; breadth moulded, 36 feet; depth moulded, 9 feet 10 inches; depth of hold, 8 feet 7 inches; lifting capacity, 60 tons; built at Sorel shipyard in 1914.

Rock Cutter "No. 1."—Steel hull; length over all, 100 feet; breadth of beam, 36 feet; depth of hold, 9·3 feet; weight of ram, 25 tons; hull and machinery built by the Lobnitz & Co., Renfrew, Scotland, and re-erected at Sorel shipyard in 1912.

The Self-propelling Hopper Barge "No. 1."—Steel hull; single screw; length between perpendiculars, 180 feet; breadth moulded, 32 feet; depth moulded, 14 feet 6 inches; average draught, 12 feet; deadweight on above draft, 785 tons; indicated horse-power, 500; net capacity of hopper, 530 cubic yards; built by Messrs. Geo. T. Davie & Sons, Lévis Que., in 1913.

Sounding Scow "No. 1."—Wooden hull; length over all, 60 feet; breadth of beam, 25 feet; depth of hold, 6 feet; built at Sorel shipyard in 1898.

Sounding Scow "No. 2."—Wooden hull; length over all, 75 feet; breadth of beam, 38 feet; depth of hold, 5 feet; transferred from Prescott Agency in 1909, re-modelled and improved in Sorel shipyard..

Sounding Scow "No. 3."—Wooden hull; length over all, 76 feet; breadth of beam, 32 feet; depth moulded, 7 feet 4½ inches; built at Sorel shipyard in 1913.

Floating Shop.—Wooden hull; length over all, 90·3 feet; breadth of beam, 25 feet; depth of hold, 9 feet; one forge, one scraper, one emery wheel, one drill, one lathe, one 6-horse-power Foss gasoline engine; living quarters for four men; built at Sorel shipyard in 1908.

Winch Scows.

Scow "No. 28."—Winch scow used for fleet in general; length over all, 60 feet; breadth of beam, 18 feet; depth of hold, 7 feet; built at Sorel shipyard in 1908.

Scow "No. 21."—Winch scow used for fleet in general; length over all, 40 feet; breadth of beam, 20 feet; depth of hold, 6 feet; built at Sorel shipyard in 1908.

Hopper Dumping Scows with Hydraulic Power for Closing Gates.

No. 1 and No. 2.—Wooden hulls; with hydraulic power for closing gates; length over all, 97 feet; breadth of beam, 24·5 feet; depth of hold, 9 feet; capacity, 200 cubic yards, built at Sorel shipyard in 1897.

No. 3 and No. 4.—Wooden hulls; with hydraulic power for closing gates; length over all, 90 feet; breadth of beam, 18 feet; depth of hold, 7 feet; capacity, 150 cubic yards; built at Sorel Shipyard in 1898.

No. 5, No. 6, No. 7 and No. 8.—Wooden hulls; with hydraulic power for closing gates; length over all, 97 feet; breadth of beam, 24 feet; depth of hold, 9 feet; capacity, 200 cubic yards; built at Sorel shipyard in 1899 and 1901.

No. 9, No. 10, No. 11, No. 12, and No. 13.—Wooden hulls; with hydraulic power for closing gates; length over all, 98 feet; breadth of beam, 24 feet; depth of hold, 9·5 feet; capacity, 300 cubic yards; built at Sorel shipyard, two in 1901 and three in 1902.

No. 14 and No. 15.—Wooden hulls; with hydraulic power for closing gates; length over all, 97 feet; breadth of beam, 24·5 feet; depth of hold, 9 feet; capacity, 300 cubic yards; built at Sorel shipyard in 1904 and 1905.

No. 16 and No. 17.—Wooden hulls; with hydraulic power for closing gates; length over all, 93 feet; breadth of beam, 24·5 feet; depth of hold, 8 feet; capacity, 250 cubic yards; built at Sorel shipyard in 1909.

No. 18 and No. 19.—Wooden hulls; with hydraulic power for closing gates; length over all, 93 feet; breadth of beam, 24·5 feet; depth of hold, 8 feet; capacity, 250 cubic yards; built at Sorel shipyard in 1911.

Two Dumping Scows.—Wooden hulls; with hydraulic power for closing gates; length over all, 93 feet; breadth of beam, 26·5 feet; depth o fhold, 8·5 feet; capacity, 250 cubic yards; built at Sorel shipyard in 1912.

No. 22 and No. 23.—Wooden hulls; with hydraulic power for closing gates; length over all, 93 feet; breadth of beam, 26·5 feet; depth of hold, 8·5 feet; capacity, 200 cubic yards; built at Sorel shipyard in 1913.

No. 25 and No. 26.—Steel hulls; with hydraulic power for closing gates; length over all, 100 feet; breadth of beam, 29 feet; depth moulded, 9 feet 3 inches; capacity, 235 cubic yards; built at Sorel shipyard in 1913.

Four Dumping Scows for Dredges "Nos. 14 and 15."—Steel hulls, with hydraulic power for closing gates; length over all, 140 feet; breadth moulded, 30 feet; depth moulded, 11 feet 9 inches; depth of hold, 10 feet 11 inches; capacity, 450 cubic yards; built at Sorel shipyard in 1914.

Sand Scow.—Steel hull; with hydraulic power for closing gates; length over all, 106·5 feet; breadth of beam, 21 feet; depth of hold, 10 feet; capacity, 200 cubic yards; built at Sorel shipyard in 1912.

Derrick Scow.—Used at Sorel shipyard in connection with construction and repairs to dredging fleet; length over all, 40 feet; breadth of beam, 20 feet; depth of hold, 5 feet; equipped with derrick of 5-tons lifting capacity.

Summary.

APPENDIX No. 4.

SOREL SHIPYARD.

SOREL, June 14, 1915.

SIR,—I have the honour to submit the following report of work done at Sorel shipyard during the fiscal year ending 31st March, 1915.

At the beginning of the year, the finish up of repairs and the outfitting of all the vessels of the fleet were completed, and vessels made ready for the summer season's operations.

During April, the crews were taken on and all the necessary supplies put on board.

The Richelieu river was clear of ice on the 12th April, and the St. Lawrence, so far as we are concerned, on the 25th April.

The first of the fleet left Sorel 4th May, 1914, to be placed at work on the ship channel.

During the season, the vessels were all maintained in good condition and had the necessary operating repairs carried out.

The principal repairs to the vessels during the fiscal year were as follows:—

DREDGES.

No. 1—

Summer Repairs.—This vessel had general operating repairs carried out during the season, to hull and machinery.

Winter Repairs.—Had repairs to the sheathing of the well, to rails, stanchions, and deck-houses. Cotton canvas awnings were replaced by wooden panels; also general repairs made to bucket frame and chute. Hull and deck work outside and inside were painted, and sundry repairs carried out.

Machinery.—Readjustment of large wheel of main engine; general overhauling of main engine, breasting, bow, and stern winches, and sundry other repairs were effected.

Boiler.—Repairs were made to smokestack, a few boiler tubes were renewed, and a new set of grate bars supplied, seams caulked.

No. 2—

Summer.—Had ordinary operating repairs to hull and machinery carried out.

Winter.—One new upper tumbler, and one new lower tumbler shaft and bush, and two new rollers on ladder frame were supplied; the bottom of chute was renewed, general repairs to deck and deck-houses made, hull and deck work outside and inside were painted, and sundry repairs carried out.

Machinery.—The main engine and deck winches were overhauled, a few piston-rings renewed, and brasses adjusted. General overhauling of dynamo and electric installation done.

Boiler.—A few boiler tubes were caulked, and one stay rod repaired.

No. 3—

Summer Repairs.—Ordinary operating repairs to hull and machinery were carried out.

Winter.—Upper deck was repaired and canvas renewed, one new upper tumbler, bottom of chutes renewed, bucket frame overhauled, rivets renewed, hull and deck work outside and inside repainted, repairs to fenders and sundry repairs made.

Machinery.—Repairs and overhauling of main engine, breasting, bow, and stern winches, and bucket frame winch were made; one new bush fitted in cylinder of feed pump, and general overhauling of dynamo and electric installation effected.

Boiler.—Tubes of starboard boiler were repaired, two new smokestacks made and installed, four O'Neil's patent boiler furnace doors fitted.

No. 4—

Summer.—Ordinary operating repairs were carried out during the season.

Winter.—Repairs to fenders, bulwark, and forecastle were made, the bottom of chute was renewed, one new top tumbler supplied, and bucket frame overhauled, with sundry repairs. Dynamo was repaired and wiring overhauled, hull made watertight and all repainted. Four O'Neil's patent boiler furnace doors were fitted.

Machinery.—General overhauling of main engine, winches, dynamo, pumps, and caulking of boiler and sundry other repairs were done.

No. 5—

Summer.—General operating repairs were made to hull and machinery during the season.

Winter.—Repairs were made to hull above water line, the main deck was partly repaired and caulked, repairs to stern post, to chute and upper deck made, cotton canvas awnings partly renewed, bucket frame overhauled, eight rollers were renewed on bucket frame, lower and upper tumbler bushes renewed, dynamo armature and electric wiring overhauled and repaired, and sundry repairs made.

Machinery.—Had repairs made to bearings of main engine, and overhauling of winches, pumps, capstan engine; also repairs to armature of dynamo, hull and deck work outside and inside repainted; cleaning of boiler, caulking of seams in couple of places; one new tumbler bush and one tumbler shaft supplied and fitted, and sundry repairs made.

No. 6—

Summer.—General operating repairs to hull and machinery were made during the season.

Winter.—The hull was repaired near stern post, repairs to main and upper decks, bulwarks, etc. Tenders were renewed, ten bucket frame rollers, rivets in bucket frame overhauled, and one plate in chute renewed; hull and deck work outside and inside were repainted, and sundry repairs made.

Machinery.—Main engine pumps and auxiliaries were overhauled. Bottom plate of boiler on starboard side was renewed. Port side boiler had several tubes renewed, and steam piping of both boilers was overhauled and repaired. One complete set of New England roller grates was installed on board, and sundry repairs made.

No. 7—

Summer.—General operating repairs to hull and machinery were made during the season.

Winter.—Fenders were put in good order, upper deck canvas was renewed. Outside of wheel house was repaired, and floor in forecastle renewed. One bucket frame depth indicator was installed, cotton canvas awning discarded and wood awnings over lever house. Hull and deck work outside and inside was repainted.

Machinery.—Overhauling and repairs to main hoisting winch were made, breasting and bow winches, cutter head engine, and inside sheathing and cover of main centrifugal pump renewed. Alteration of the piping of the forced-draught fans, repairs and electric welding on furnaces of boilers; repairs to smoke boxes, and installation of one new smokestack effected. General overhauling of electric wires and dynamo done, and syphons overhauled and increased in number. The question of new boilers for this vessel will require to be very carefully considered next year.

The pontoon scow No. 24, belonging to this dredge, had a new smokestack supplied, her donkey boiler overhauled, feed pump repaired and winch overhauled.

No. 8—

Summer.—General operating repairs to hull and machinery were made during the season.

Winter.—Wooden fenders on ship side were partially renewed, upper deck repaired and caulked, inside of hull scraped and painted and hull and deck work outside and inside repainted, and sundry repairs.

Machinery.—The large gear wheel of windlass was renewed. Turbine shell plates inside, welded by electricity, turbine shaft, leg bush, thrust collars, and turbine suction pipe were all overhauled and repaired. One new butter head shaft was supplied, and new plates fitted to cutter head. Alteration of operating levers of gate valves. Centre furnace of both boilers were repaired and welded, stay bolts and combustion chamber made water-tight, a few tubes packed. Also air, feed, and hydraulic pumps repaired. General overhauling of auxiliaries and of electric wiring and dynamo.

No. 9—

Summer.—One new dynamo was installed, ten sets of turbine plates, one shaft and one pump wheel were supplied, together with the ordinary repairs.

Winter.—This dredge wintered at Davies dock at Lévis, where repairs were made, but the following articles were supplied by the Sorel shipyard: New tail shafts fitted, new bushes, turbine wheels, made with blades cast solid, front and cover of condenser 4-foot diameter renewed, and eccentric shafts of main engine re-babitted with metal supplied by the shipyard. Two intermediate slide valves and seats were renewed, and one new cast-iron left hand propeller supplied.

No. 10—

Summer.—The eight yard buckets were brought several times to the shipyard to be repaired with their bucket braces, besides the ordinary operating repairs to hull and machinery.

Winter.—During winter the fenders of hull, the boiler tubes, and doors were repaired; one new smokestack was installed; one set of United States metallic packing was renewed, for the first time since the construction of this vessel. Repairs to piston rods and links of main engine were made, new plates with fibre for compression-box of dipper arm; all other auxiliaries, such as capstan, engine, swinging engine, etc., were overhauled and repaired. Hull and deck work outside and inside repainted, and sundry repair work done.

No. 11—

Summer.—The buckets with their braces were brought to the shipyard several times to be put in good order, besides the usual ordinary operating repairs during the season to hull and machinery.

Winter.—Main hoisting, swinging, and capstan winch, main friction and hand brake, bands on hoisting drum, were repaired, all valves and pistons readjusted, upper arm re-rivetted, and a ventilator fitted over the galley.

Two new high-pressure pistons were renewed, condensers had six tubes removed and plugged, main stop valve on boiler repaired. General overhauling of auxiliaries, engine, boiler, and electric wiring and repairs to hull, fenders, etc., one new Verchères boat supplied; and the hull and deck outside and inside repainted.

No. 12—

Summer.—This dredge had ordinary operating repairs to hull and machinery, and was supplied with two 24-barrel rafts in connection with the dredging work.

Winter.—The bottom of the chute was sheathed with cast-steel slabs. The awning over upper deck at stern was replaced by wooden panels, railings and derrick were repaired and one new Verchères boat supplied.

Machinery.—Repairs to tumbler shaft and general overhauling of main engine and winches were made; hull and deck work outside and inside repainted, and sundry other repairs carried out.

No. 13—

Summer.—The doubling plates of the chute were renewed during the season, and twenty bucket teeth, besides the ordinary operating repairs to hull and machinery.

Winter.—Ladder frame mud guards were repaired. Top plates of frame under rollers were cut with electric machine; rooms aft were repaired and put in good order; cotton duck awning on upper deck replaced by wooden panels.

Machinery.—Main engine.—The three valves of reversing engines were repaired, and tightening of main gear shell; one broken gear was renewed in bow winch, the bucket frame winch had a wheel renewed, and all auxiliary machines were overhauled.

Boiler.—Butt straps were caulked, doors repaired, the four cross-bars renewed; derrick on main deck was repaired, hull and deck work outside and inside repainted, and sundry repair work carried out.

No. 14—

Summer.—One 24-barrel raft was supplied to this dredge in connection with her dredging work.

The bridge deck in front of well was cut to give clearance to the buckets when revolving over the upper tumbler. The telegraph post was shifted for the same reason.

The back plate of the chute was strengthened with stays; electric wires were overhauled, and boilers caulked.

Winter.—The three life-boats on main deck were removed and installed, with their davits, etc., on main deck. The bucket frame had holes cut in the plates under the rollers to clear them from jamming these rollers.

One of the chutes was strengthened by doubling plates and channels.

The upper deck, aft, was caulked all over. The lower tumbler-bush was repaired and put in good order.

Machinery.—The main throttle-valve and the thrust of bucket-frame winch were repaired. New frictions to bow breasting-winch, both bilge pumps repaired, valve seat and rings renewed, new brasses to lower tumbler were supplied.

One large skylight was made on each side of engine-room casing. Alterations to heating system in bath-room and officers' quarters were made. General overhauling of piping and drains and of other auxiliaries. The hull and deck-work was repainted, and sundry repairs carried out.

Six rollers were renewed on the bucket frame.

Boiler.—Rivets were renewed and some caulking done on the boiler, and the hull and deck were repainted, and sundry repairs carried out.

No. 15—

Summer.—Had practically the same repairs during the summer as No. 14. Also one 24-barrel raft was supplied. Chute plates were stiffened, and boiler repaired.

Winter.—New breasting rollers with flanges; life-boats transferred from main deck to upper deck. Cutting of bridge deck opposite wheel-house, and shifting of telegraph to give clearance to the buckets. One large skylight was installed on each side of engine-room casing.

Machinery.—Strengthening of thrust of ladder-frame winch, bearing of upper main shaft repaired; one breasting winch frame repaired, and general overhauling of dynamo engine, and repairs to armature. New brass rings to feed pump pistons; renewal of glands of rods, piston rods of main engine.

Alteration to heating system in bath-room and officers' quarters. General overhauling of piping and drains and of other auxiliaries. The hull and deck work was repainted, and sundry repairs carried out.

TUGS.

"Becancour"—

Summer.—Had no repairs during the season.

Winter.—A fire-pump was installed on board, and steam was kept up during the whole winter as a protection for the fleet and the shipyard in case of fire. Vessel cleaned and painted all over, and sundry repairs carried out. Two O'Neil's patent boiler furnace doors fitted.

"Carmelia"—

Summer.—Had ordinary operating repairs. Was hauled out on 2nd December for winter.

Winter.—Repairs to stem, bulwark, rails, tow post, and to hull under the water line, after deck lowered and deck-houses lengthened; new stove supplied.

Machinery.—New bushes in stern tube, general overhauling and repairs to main engine, windlass and steering gear; also repairs to sanitary and feed pumps.

Vessel cleaned and painted all over, and sundry repairs carried out.

"Chambly"—

Summer.—Had ordinary repairs.

Winter.—Deck-houses partly renewed; coamings, deck and deck-houses repaired; one new refrigerator was installed on board.

Machinery.—Repairs to air pump, eccentrics, thrust shaft and reversing engine; also bushes fitted on rocking shaft and brasses of connecting rod renewed.

Boiler.—Caulking of a few stay bolts.

Vessel cleaned and painted all over, and sundry repairs carried out.

"Contrecœur"—

Summer.—Repairs to fenders, rail, bulwark, and iron sheathing of hull.

Machinery.—General overhauling of main engine, feed pump, high and low-pressure pistons and link motion. Also one new ash-ejector pipe was supplied.

Boiler.—Caulking of seams, and a few rivets.

Vessel cleaned and painted all over and sundry repairs made.

Installation of a speaking-tube from wheel-house to engine-room, and one new smokestack installed, besides general operating repairs.

This vessel was hauled on the ways on April 30 to repair the rudder and renew the propeller key and propeller shaft. Was hauled out again on May 13, to place one new propeller, and on July 16, for another new propeller. Was again put on the ways on August 7, to repair her stem.

One 24-barrel raft was made during the summer and supplied to this tug in connection with dredging operations. Two O'Neil's patent boiler furnace doors fitted.

"Deschaillons"—

Summer.—General operating repairs. Was hauled on the ways October 5, 1914, to renew starboard propeller.

Winter.—Was supplied with one new locker in galley, and one in forecastle.

Machinery.—This boat was under steam all winter for protection for the fleet and the shipyard in case of fire.

Few minor repairs only were made on board, such as fitting of brasses, new keys on eccentrics. The fire-hold deck plates were repaired and a few tubes and rivets caulked in boiler. Vessel cleaned and painted all over and sundry repairs made. Two O'Neil's patent boiler furnace doors fitted.

"Emilia"—

Summer.—Was hauled on the ways on May 16 to repair her propeller key ways. Was put on the ways again on 23rd November, for one new propeller and repairs to hull and caulking.

During the season, this vessel had the ordinary operating repairs.

Winter.—The hull was repaired, main deck rails and wheel-house floor were also put in good order.

Machinery.—Repairs to high and low-pressure cylinder pistons and lining of shaft. Four new brasses for link motion and two new bushes for steam chest were supplied and fitted. Repairs to injector and steam pump overhauled and partly renewed.

Boiler.—Was caulked in the bottom part.

Vessel cleaned and painted all over, and sundry repairs carried out.

Two O'Neil's patent boiler furnace doors fitted.

"Iberville"—

This vessel was hauled out on the 24th August, to repair her propeller wheel; and had, during the season, general operating repairs. A coat of paint was given, while on the ways, to the hull under the water line.

Winter.—Fenders, bulwarks, rails, awnings, and W.C. were repaired. the steering arrangement was overhauled.

Machinery.—Air-pump pistons repaired; one new check valve for injector feed-pipe, and overhauling of engine steering gear and windlass.

Vessel cleaned and painted all over and sundry repairs carried out. Two O'Neil's patent boiler furnace doors fitted.

"Jessie Hume"—

Summer.—Repairs to boiler, seams were caulked in furnace; half dozen tubes had to be renewed, besides the ordinary operating repairs during the season.

Winter.—Repairs to the stem and deck-houses.

Machinery.—New brasses, crank pins, cross-head, and eccentrics were made and renewed where required.

The boiler had a good overhauling, and a new set of grate bars supplied. Vessel painted and cleaned all over, and sundry repairs made.

" Lac St. Pierre "—

Summer.—Stay bolt in boiler renewed. Was hauled out on September 12 to repair her propeller shaft and bush; had also ordinary repairs.

Winter.—The hull had to be repaired above the water line, and also the deck of forecastle and crew quarters. A good caulking of the shell was also applied all over.

Machinery.—The main engine had the cross-heads and eccentries repaired. The steering gear and windlass were also overhauled and repaired. The boiler was caulked in the bottom part. The smoke box and doors also repaired; one new smokestack casing installed.

Vessel cleaned and painted all over and sundry repairs made. Two O'Neil's patent boiler furnace doors fitted.

" Lanoraie "—

Summer.—Was hauled on the ways on the 30th November to repair her rudder stock. Also had ordinary repairs during the season.

Winter.—Deck, rails, stem, and fenders were repaired and put in good order.

Machinery.—Repairs were made to link motion, high-pressure cylinder, thrust shaft of main engine; the pumps, steering gear, and windlass were overhauled, and the vessel cleaned and painted all over, and sundry repairs made.

" Laviolette "—

Summer.—This vessel was hauled out on the 8th May to renew one propeller, and on the 18th August to renew the other propeller. Also had ordinary operating repairs.

Winter.—The deck and fenders were put in good order.

Machinery.—Main engine: New keys fitted, new ring to high-pressure piston and repairs to low-pressure cylinder valve. The steering gear had new pins for cross-heads; the guides were rebabbitted.

The boiler had two stays renewed and the steam pipes of the water column were also renewed, and the vessel cleaned and painted all over, and sundry repairs made.

" Lotbinière "—

Summer.—Had only operating repairs during the season. Was hauled out on the ways on 27th April to repair the propeller shaft and rudder.

Winter.—The hull and decks were repaired and caulked, upper deck re-canvassed.

Machinery.—Bearings of main engine and eccentric pins were renewed. Pumps were overhauled, and furnace of boiler repaired and caulked. Two new pins on cross-heads of steering gear. Drain pipes of main engine renewed.

Vessel cleaned and painted all over and sundry repairs made. Two O'Neil's patent boiler furnace doors fitted.

" Lavaltrie "—

Summer.—Was hauled out on June 5 for one new propeller wheel, and on the 5th December to fit key to propeller shaft. Also had ordinary operating repairs.

Winter.—Had very little repairs to hull. Few deck-house planks renewed and caulked.

Machinery.—New piston rings to high-pressure piston, and repairs to circulating pump, and overhauling of winches.

Vessel cleaned and painted throughout and sundry repairs made.

" Portneuf "—

Summer.—Was hauled out on 23rd August, for a new propeller, and had the ordinary operating repairs during the season.

Winter.—Repairs to deck rails, cotton duck on upper deck, and coamings of deck-houses.

Machinery.—Main engine: Two brasses were renewed, new piston rings on high and low-pressure pistons. The steering gear had new leading sheaves.

Boiler.—Seams in furnace were caulked.

Vessel cleaned and painted all over, and sundry repairs done. Two O'Neil's patent boiler furnace doors fitted.

"Varennes"—

Summer.—Was hauled out on May 16 to renew a propeller wheel. Had general operating repairs during the season.

Winter.—Fenders were repaired. One ash-ejector was installed. Had repairs to deck and deck-houses, and stem of vessel in its upper part.

Machinery.—Rings of high-pressure valves of main engine were renewed, brasses and bushings were also repaired or renewed. The windlass, steering gear, and pumps were overhauled, also the heating system and boiler.

Vessel cleaned and painted throughout, and sundry repairs executed.

Two O'Neil's patent boiler furnace doors fitted.

"De Lévis"—

Summer.—Had practically no repairs, but was supplied with chain slings and surveying poles.

Winter.—Caulking of main deck all over. Repairs to cotton duck on upper deck. Vessel and machinery cleaned and painted all over, and sundry repairs made.

Machinery.—General overhauling of main engine. Repairs to piston valve rings, stop valves of steering gear, and overhauling of windlass.

Boiler.—Caulking of seams in lower part of boiler; one new set of grate bars supplied.

"James Howden"—

Summer.—Was hauled out on 30th April to repair propeller shaft and bush. Hauled out again on December 3, for winter, to repair the hull, and a few planks in the bottom were removed to clean the bilges. A couple of cross-beams were added inside of hull between engine and boiler. Mess and galley floors were repaired and caulked. Upper deck was shored up and put in good order, and cotton duck partly renewed.

Machinery.—Main engine low-pressure valve repaired, and bushes renewed. Steering gear had two brass pipes fitted; two cross-heads also repaired, and new rings in pistons. The pumps were overhauled. The boiler was examined and put in good order; a new smokestack casing was supplied and installed on board, and the vessel cleaned and painted all over, and sundry repairs executed.

COAL BARGES.

No. 1—

Was hauled out for the winter on December 3. Had no repairs during summer.

Winter.—Had one new funnel, smokestack, and rudder repaired. Overhauling of winch and boiler. The hauling out for winter was for repairs to stem and steel sheathing of hull.

No. 2—

Ordinary operating repairs during the season.

Winter.—Renewal of boiler tubes and caulking of seams; also repairs to side fenders, decks, and outside planking.

No. 3—

Hauled out for caulking and repairs to hull.

Summer.—Operating repairs.

Winter.—Fenders and deck were repaired, and winch and boiler overhauled.

No. 4—

Summer.—Operating repairs.

Winter.—Had a new funnel installed, repairs to deck, and fenders and the winch overhauled.

No. 5—

Summer.—No repairs during the season.

Winter.—A new wheel-house was built on upper deck, and fenders repaired. Overhauling of main hoisting winch, windlass, and steering gear. Vessel scaled inside and cleaned and painted, and sundry repairs done.

FLOATING SHOP.

Six crews' beds installed and usual sundry repairs to hull and machinery, and vessel repainted throughout.

SOUNDING SCOWS.

Nos. 1, 2, and 3—

Hauled out as required to repair the hulls during the season.

DUMPING SCOWS.

The twenty-eight dumping scows during the season were kept in good working order, and repairs to hull and hydraulic cylinders had to be made pretty often.

The following scows were hauled out as required during the season for repairs to hull and hopper doors:—

Scow No. 1, July 31.
" 4, November 5.
" 5, September 5.
" 6, May 12.
" 7, June 16.
" 8, October 12.
" 9, June 19.
" 16, September 26.
" 17, June 19.
Scow No. 18, September 14.
" 19, August 6 and October 24.
" 20, September 18.
" 22, October 17.
" 23, October 22.
" 25, June 30.
" 26, October 20.
" 27, December 1.

Winter repairs.—The hulls and machinery were overhauled and repaired during winter.

ROCK CUTTERS.

No. 1—

Summer.—Had operating repairs.

Winter.—Had four rollers for breasting winch; friction bands repaired; main winch drum renewed. General overhauling of sanitary pump. Repairs to stem and exhaust pipes, and general overhauling of hoisting system.

STONE LIFTERS.

Nos. 3, 4, and 5—

Had small usual repairs during the season.

DERRICK SCOW.

No. 1—

A new 10-ton steel derrick was installed on the flat scow built last year for this purpose for use on the Richelieu river for shipyard and fleet work. The old boiler and winch were put in order and reinstalled.

WINCH SCOW AND PILE DRIVER.

Were hauled on the ways twice during the season to repair the hulls under the water line.

REPAIRS TO VESSELS OF THE DEPARTMENT OF PUBLIC WORKS.

Tug "Montmorency"—

Was hauled out on 16th September to receive a new propeller.

Tug "Ottawa"—

Hauled out on 4th August for repairs.

REPAIRS TO VESSELS OF CONSTRUCTION OF LIGHT DEPARTMENT.

All kinds of repairs and equipment were made and supplied for the construction plants of this department, such as cleats, bolts, chisels, fairleads, deck plugs, brass plugs, buoy forgings, steel rings, surveyor rods. Also repairs to electric wiring of their shops at Sorel wharf, preparation of timber for their works, etc.

On the 27th August, barge *Sarah* was hauled out for caulking her hull and repairs to steel sheathing.

One new smokestack supplied to scow *Quebec*.

LIGHTSHIPS.

Nos. 1, 2 and 3—

Summer.—These vessels were thoroughly overhauled and repaired; plates on steel deck were renewed. The bulwark rail angles removed, straightened up, and refitted. The gas tanks inside of hull were removed to have bottom of vessels cleaned and painted. The woodwork was also repaired and put in good order.

These three vessels were hauled out to have their hulls scraped and painted under the water line.

Barge "Acetylene"—

Had ordinary operating repairs during the season.

Tug "Hosanna"—

Summer.—This vessel came to the shipyard several times during the season to have her engines repaired. Was hauled out on 9th May for repairs to rudder; hauled again on 28th May, to repair propeller key-ways, and tightening of nut, and again on September 10, she was put on the ways for repairs to stern, which was leaking badly.

A few planks of outside sheathing were renewed, and the hull was caulked.

Winter.—Had no repairs during winter, instructions from the department being given that the boat was not to be put in commission the next season. The vessel was pumped regularly so as to keep her afloat.

"Shamrock"—

Summer.—This vessel came very often to the shipyard during the season for light repairs to engine, winches, steering gear, hull, and deck-houses.

Winter.—The stern part of bulwark was renewed. One hawse pipe was also renewed. One extra room was built in the officers' quarters, and deck-houses were repaired.

Machinery.—The main engines and winches had a thorough overhauling. The boom in the mast was repaired and lengthened 5 feet. The boiler had to be raised for repairs; and the vessel cleaned and painted throughout.

Str. "Verchères"—

Summer.—Was hauled on the ways on September 14 to repair her rudder, and on 14th to renew one propeller. Also had general operating repairs during the season.

Winter.—Repairs were made to stem, fenders, bulwark, and deck-houses.

Machinery.—The engines and auxiliaries were overhauled; the boiler was taken ashore to the boiler shop. The tubes were renewed. The shell was cut for a length of 4 inches, and the back head re-rivetted. A new smokestack was made. The top of the deck-houses had to be removed to take out this boiler, which necessitated important work for the joiners to rebuild this part of the deck-houses. Vessel cleaned and painted throughout.

BUOY SERVICE.

This department was supplied with fittings and material, such as concrete, anchors, etc.

REPAIRS TO DOMINION STEAMERS.

C.G.S. "Dollard"—

Summer.—Had repairs to her main hoisting winch, and was supplied with chain slings, some fenders, a rack for manila rope, deck fire buckets, one reel for 1¼-inch hose, one steam syphon, and a good many steel rings and shackles.

A new system of oil fuel (system "Crosby") was installed on board, work partly done by shipyard.

Winter repairs.—Painting of all cabins and forecastle, repairs to steering chains and sheaves. Galley stove renewed, and repairs to engine-room telegraph; also extensive alteration to derricks.

Machinery.—One drum added to the main hoisting winch, with friction and clutches. Repairs to steering gears, and general overhauling of all auxiliaries.

C.G.S. "Bellechasse"—

During summer, refrigerators were made and installed on the deck of the vessel, which had also other light repairs to her equipment, painting, etc.

C.G.S. "Frontenac"—

Summer.—Light repairs during the season.

Winter.—The stem was repaired. The main deck caulked, cotton duck of upper deck partly renewed. Signal bell wiring was overhauled and renewed. Two cupboards were made in the galley. Two life-boats were repaired, and the refrigerator was put in good order.

Machinery.—The main engine had its link motion eccentric brasses repaired, and the windlass and pumps overhauled. The ash-ejector discharge pipe was renewed. The boiler received one new set of grate bars. Vessel cleaned and painted throughout, and sundry repairs executed.

C.G.S. "Lady Grey"—

Summer.—Had a good and thorough overhauling, painting, and repairs of the hull and machinery and electric wiring.

Most of the work on this vessel is done during the summer because in winter she is employed as ice-breaker.

MAINTENANCE AND IMPROVEMENTS TO BUILDINGS AND PLANT OF THE SHIPYARD.

Building No. 1 (Proposed new offices).—Left in abeyance.

No. 2 (Boiler shop).—The roof and outside of building repainted. Two new funnels were installed over the bending slab furnaces. Installation of one combined bending and punching machine. Whitewashing of inside of building; ordinary repairs to machinery, which was kept in first-class running order.

No. 3 (Pipe shop and old boiler shop).—Had light repairs to woodwork and roof.

No. 4 (General offices, stores and iron racks).—Repairs to roof and foundations of building. One pipe was installed to drain the cellar. A good many racks and shelves were made in store, and the roof and inside of building was painted.

No. 5 (Machine shop).—The electric department was removed from second story of this building. Building was whitewashed inside, foreman's office painted, floors and foundations were repaired. Outside of building was painted. An inclined plane was installed from the coal pile to the fire-hold to save handling of coal.

No. 6 (Blacksmith shop).—Had repairs to Fairbanks power hammer and dynamo and overhauling of steam hammer. Building whitewashed inside.

No. 7 (Waste shed).—The doors were repaired; installation of a compartment with solid foundations for storing heavy goods, such as rivets in kegs, bolts, boiler tubes, etc.

No. 8 (Stables).—Only absolutely necessary repairs were made on this building, as it is intended to be replaced by a new one.

No. 9 (Carpentry shed).—One coat of paint was applied to outside of this building.

No. 10 (Ice-house).—Was painted outside.

Nos. 11, 12, 13, 14, 15 (Store sheds).—Were only painted.

No. 16 (Power-house).—This steel frame and brick building was lengthened 80 feet to include electric fire pumps, large compressors, and other machinery which were installed outside of old building under temporary covers.

No. 17—(Saw-mill).—Removal of machines from cabinet department to larger quarters, and space formerly occupied by the cabinet department arranged for a store for dry lumber and expensive timber. The outside of building was painted all over.

A new galvanized iron refuse pipe was installed to carry sawdust to fire-hold. This pipe is to replace the old wooden one built ten years ago.

No. 18 (Paint shop, electric shop, and moulding loft).—Light repairs to this building. One coat of paint was given to the outside.

No. 19 (Shed for patterns).—Light repairs to roof. Did not need painting.

No. 20 (Dry lumber shed).—The exterior of this building was painted.

No. 21 (Fire-hold No. 2).—Had one new smokestack installed. The building was whitewashed inside and outside.

Buildings Nos. 22 and 23 (Sheds for castings).—Had no repairs.

No. 24 (Shed for machinery).—Was painted outside.

No. 25.—Was demolished.

No. 26 (Main gate house).—A heating system was installed and connected to the boiler-shop system with adjacent building.

No. 28 (Oil shed).—Installation of electric light, and of a sewer system to drain the cellar.

No. 29 (New cabinet shop).—Construction of a new cabinet shop, all old machinery was installed, also motors and electric light, etc.

Building No. 30 (Fleet stores).—This is a new building which was erected to store equipment of the fleet during winter. The interior was divided into compartments to provide accommodation for equipment of different new vessels built during the last three years.

NEW CONSTRUCTIONS.

Nos. 45 and 46.—Named respectively, *Bécancour* and *Deschaillons*, are two steel twin-screw tugs and fire-boats combined, of the following dimensions:—

Length B.P.	93′ 0″
" O.A.	100′ 0″
Breadth moulded	22′ 6″
Depth	10′ 0″
Draught, mean	7′ 0″
I.H.P.	450

The machinery consists of twin-screw compound jet condensing engines, having cylinders 12 inches and 24 inches diameter by 18-inch stroke, supplied with steam from a Scotch boiler 13 feet 6 inches diameter by 10 feet 6 inches long, with a working pressure of 130 pounds per square inch. The engines in the *Bécancour* were built by the Pontbriand Company, Limited, of Sorel; those for the *Deschaillons* being built in the shipyard.

The boilers were purchased in Lévis. The *Bécancour* was launched on June 8, 1914, ran a satisfactory trial trip on July 9, and commenced work on July 13.

The *Deschaillons* was launched on June 25, 1914, tried on August 17, and commenced work on August 20.

The *Bécancour* has been fitted with a Waterous fire engine pump of 1,200 gallons per minute capacity. A Merryweather fire pump of the same capacity is on order and will be installed in time for next winter's use on board the *Deschaillons*.

This past winter, these two fire-boats were placed in such a position that the whole of the fleet and a considerable portion of the shipyard could be reached by their hose, and steam was kept up all the winter.

The *Deschaillons* used her general-service pump as a temporary arrangement. The men forming the shipyard fire brigade were exercised frequently during the winter, and everything was kept ready for instant use. A fire did occur on board the dredge *Tarte*, which could easily have been a very serious matter only for the fire-boat appliance, which subdued the fire in a very short time.

Nos. 47 to 50.—Constructions *Nos. 47 to 50* are four steel dumping scows of the following dimensions:—

Length	140′ 0″
Breadth moulded	30′ 0″
Depth	11′ 9″
Capacity	450 cub. yds.

These scows are each fitted with two sets of hydraulic machines for working the doors, the whole being under deck; each set has two cylinders 12 inches diameter which are worked from the accompanying tug pumps.

They were launched in May, 1914, and worked very successfully with the new dredges *Nos. 14 and 15.*

No. 54.—This construction is a twin-screw wood-sheathed fisheries patrol steamer for lake Winnipeg, of the following dimensions:—

Length B.P.	151′ 0″
" O.A.	160′ 6″
Breadth moulded	26′ 6″
Depth	13′ 6″
Draught	7′ 6″
I.H.P.	900

Work was continued on this vessel and the steel work of the hull was completed in June, 1914. The vessel was dismantled and shipped by train to Selkirk, Man., where it is being completed, and will be launched in May, 1915.

The boilers, two in number, of the Scotch marine type, were constructed in the shipyard and shipped to Selkirk with funnel, etc., in September, 1914. The dimensions of the boilers are 11 feet 0 inches diameter by 11 feet 6 inches long, and having a working pressure of 150 pounds per square inch. They are fitted with Howden's forced draught.

The engines are twin-screw triple expansion jet condensing, having cylinders 11 inches, 18 inches, and 30 inches diameter by 20-inch stroke, and have been built by Polson Iron Works, of Toronto.

The vessel is fitted with a gasolene launch and a life-boat built in the shipyard, also a life-raft. It is expected that this vessel will be completed by July, 1915. The vessel has been named the *Bradbury.*

No. 57.—This construction is a steel twin-screw testing steamer for the St. Lawrence ship channel.

Length B.P.	140′ 0″
" O.A.	147′ 0″
Breadth moulded	35′ 0″
Depth moulded	15′ 0″
Draught loaded	10′ 0″

The vessel is being fitted with twin-screw compound surface-condensing engines made by the New Burrell Johnson Co., of Yarmouth, N.S., having cylinders 14 inches by 28 inches by 21-inch stroke.

The boiler, which is Scotch marine, has been built in the shipyard, and is 11 feet 0 inches by 15 feet 0 inches diameter, with a working pressure of 130 pounds per square inch.

The vessel will be equipped with a testing bar 40 feet long, and fitted with a specially designed winch, made at the shipyard, for handling the gear, and is arranged for testing to a depth of 55 feet.

The steel work was all completed early in the winter, and the vessel will be ready for launching in May, 1915, and should be in commission by the end of July. The vessel will be fitted with a gasolene launch, life-boat, and dinghy, and a life-hoisting winch will be supplied for quick handling of the boats. Good living accommodation has been provided for the staff, officers, and crew.

This vessel has been named *Detector.*

No. 59.—Construction *No. 59* is a steel twin-screw tug for service below Quebec, of the following dimensions:—

Length B.P.	120′ 0″
" O.A.	130′ 0″
Breadth moulded	24′ 0″
Depth	12′ 0″
Draught, about	8′ 0″

The vessel has been arranged with good accommodation for the staff engineers; also for the officers and crew.

The machinery consists of twin-screw compound surface-condensing engines having cylinders 14 inches and 28 inches diameter by 21-inch stroke, built by the New Burrell Johnson Co., of Yarmouth, N.S. Steam will be supplied from a Scotch marine boiler 15 feet 0 inches diameter by 11 feet 0 inches long, 130 pounds per square inch working pressure. The boiler has been built in the shipyard.

Owing to the war, there was considerable delay in delivering the material; in consequence, the keel was not laid during the fiscal year, but is so at the time of writing this report. Part of the steel was supplied by the Nova Scotia Steel and Coal Company. It is hoped to launch this vessel, which has been named *Berthier*, by the end of the present summer.

No. 60.—This construction is a single-screw steamer for buoy service on the Ottawa river, and will be composite, built of the following dimensions:—

Length O.A.	100′ 0″
Breadth moulded	21′ 0″
Depth	9′ 0″

The machinery consists of one set compound jet condensing engines supplied by Polson Iron Works, Toronto, having cylinders 10 inches and 20 inches diameter by 14-inch stroke, supplied with steam from a Scotch marine boiler 9 feet 6 inches per square inch, which will be built in the shipyard. This vessel will be commenced during the summer of 1915.

Nos. 61 and 62.—Constructions *Nos. 61 and 62* are two single-screw hopper barges. (This work is in abeyance.)

No. 63.—This is a steel single-screw propelled coal barge of the following dimensions:—

Length L.W.L.	165′ 0″
" O.A.	172′ 0″
Breadth moulded	43′ 0″
Depth	13′ 0″
Draught loaded	10′ 6″
Capacity	700 tons

The vessel has been designed with five watertight bulkheads and double bottom for water ballast in the engine room and trimming tank forward.

There are two holds and two exceptionally large hatches, a revolving steam crane with a clam to lift 1½ ton will be fitted between the hatches for the quick coaling of the dredges; the crane will also be so arranged that the vessel can be used to assist the buoy service in the spring if necessary.

The steel construction work is well advanced, and the vessel will be launched during the summer.

The machinery consists of one set of compound surface-condensing engines built by the Pontbriand Co., Sorel, having cylinders 20 inches and 42 inches diameter by 24-inch stroke, supplied with steam from a Scotch marine boiler 15 feet 0 inches diameter by 11 feet 0 inches long being built in the shipyard.

Nos. 64 to 67.—These constructions are four steel dumping scows of the following dimensions:—

Length	100′ 0″
Breadth moulded	29′ 3″
Depth	10′ 3″
Capacity	250 cub. yds.

They are fitted with hydraulic machinery similar to the other steel scows. The steel work is well advanced and all four will be launched during the summer.

The work on new constructions has been kept back during the last fiscal year through delays in obtaining steel material, partly owing to the war.

The steel for *Nos. 63 and 64 to 67* was ordered in July, 1914, from Europe, and was cancelled when war broke out; finally, as much as possible was placed with the Nova Scotia Steel and Coal Company, the balance coming from the United States. The order for steel material for *No. 59* was also placed with this firm. This is the first steel shipbuilding material we have obtained in Canada, and it compares very favourably with that received from the States and from Europe.

A plan has been prepared and is incorporated in this report, showing the shipyard with all buildings, etc.; also location of the Dominion Government vessels which wintered in Sorel during the winter 1914-15.

GENERAL.

Shipyard Pile Driver.—Was hauled out on the 4th May, to make repairs to hull.

A new beam, bending and punching machine was installed for the shipbuilding department, and a wooden shelter built over it.

An inclined plane was built for fire-hold No. 1 for coaling purposes, to save handling coal.

The shipyard launches *Margot*, *Buffalo*, and *Bronk* were maintained in good order, and painted. The *Margot* has been employed by the Light Department all season.

All fences were repaired where required, and whitewashed during the season.

The shipyard ways and wharves were repaired and kept in good condition.

The force employed during the fiscal year varied from 676, in September, to 1,059 in March, and averaged 852 daily.

The financial statement shows the total amount expended at the shipyard and ship channel to have been $1,579,115.48.

I have the honour to be, sir,

Yours faithfully,

W. S. JACKSON,

Superintendent of Shipyard.

SOREL SHIPYARD—STATEMENT OF EXPENDITURE.

STATEMENT OF REVENUE AND EXPENDITURE FOR THE FISCAL YEAR 1914-15.

APPENDIX No. 6.

METEOROLOGICAL SERVICE.

A. JOHNSTON, Esq.,
Deputy Minister of Marine.

TORONTO. June, 1915.

SIR,—I have the honour to submit the forty-fourth annual report of the Meteorological Service for the fiscal year ended March 31, 1915, with Appendices A, B, and C, reports of the observatories at Quebec city, Que.; St. John, N.B.; and Victoria, B.C.

Reports have been received at the central office from 532 stations, including telegraph reporting stations, climatological and storm signal stations. For various duties in connection with the service, 363 persons, chiefly observers, have been in receipt of remuneration, and of this number 35 were employed in the central office.

The work performed in the central office continues to increase steadily owing to various causes, among which are the following:—

The number of reporting stations in the Dominion has been much augmented by the addition of stations opened at the demonstration farms of the Department of Agriculture, and rainfall stations opened to provide data for the many industrial and engineering companies interested in the flow of streams and water-power generally.

The increase in stations means a corresponding increase in the size of monthly reviews and annual reports, and as nearly all computations of mean values are performed in the central office, it follows naturally that the office work is continually increasing. Then, again, the number of daily maps sent out has increased to 328, and the more general dissemination of forecasts in all the provinces calls for additional work in connection therewith.

THE METEOROLOGICAL STAFF.

During the greater part of the year the forecast branch of the office has been undermanned, owing to the fact that about the middle of August, 1914, Major W. D. Allen of this branch, left on active service with the overseas contingent, and in November, Mr. P. F. Morley of the same branch resigned to accept a more remunerative position in the United States. The departure of these two officials has rendered it necessary for the director and assistant director to resume full forecast duties, as there is now but one other trained official available for this work.

FORECASTS AND STORM WARNINGS.

Bi-daily synchronous weather charts have been compiled on every day throughout the year, Sundays and holidays included, based on telegraphic reports from thirty-eight stations in Canada, 100 in the United States, four in Newfoundland, and one in Bermuda. Three of our most useful stations, Sable island and Belle isle in the Atlantic, and Triangle island in the Pacific, ceased reporting by wireless at the outbreak of the war. These charts have formed the basis of the forecasts and storm warnings which have been issued from Toronto for all the provinces, exclusive of British Colum-

bia, where at Victoria a somewhat less comprehensive chart is prepared for forecasting in that province. The daily weather chart showing the meteorological conditions over the northern hemisphere was discontinued on the outbreak of the war, and its loss is to be greatly deplored, as it was undoubtedly a very great assistance in forecasting the paths of storms.

Storm warnings have been issued to 112 display stations in Canada, and of 2,037 warnings issued, 88 per cent were verified by subsequent winds; 323 warnings were received late, 204 owing to issue, and 119 owing to telegraphic delays. Forecasts have been telegraphed twice daily to Newfoundland, and warnings of expected storms were issued on thirty-four occasions.

Forecasts have also been telephoned twice daily to the radiotelegraph station at Toronto island, whence they are transmitted to the various wireless stations on the Great Lakes. Forecasts and storm warnings have also been telegraphed to the radiotelegraph stations at Montreal, Fame point and Halifax, and to the Superintendent of the Signal Service, Quebec, and from these points have been disseminated broadcast to all vessels equipped with wireless apparatus. Arrangements have also been made within the year whereby copies of the daily bulletin supplied to most of the larger towns and villages in Ontario are handed to the Central Telephone exchange office, the Bell Telephone having agreed to furnish the same to any of their subscribers who may ask for them.

PHENOLOGICAL OBSERVATIONS.

A valuable work performed at the central office has been the collection of phenological statistics by observers and others connected with the meteorological service, and this has been done under the supervision of Mr. F. F. Payne.

OUTSIDE STATIONS.

At first-order stations in the Dominion there have been no new appointments, but at Edmonton, both Observer Holmden and his assistant, Clarke, have left on active service, and the work is being carried on by a relieving officer, Mr. W. H. Owen; this has, of course, meant the curtailment of some of the station work. Also at Victoria, the absence of Assistant Langton on militia service for six months has caused some little inconvenience.

The new observatories at St. John and Victoria were completed within the year, and the reports of the local superintendents are contained in Appendices B and C. Storm signal stations have been opened at Entrance island, British Columbia, Long point, Lake Erie, and Port McNicoll, Ontario, and the following climatological stations have been opened:—

Station.	Class.	Agent.
Gatewav, B.C	11	A. H. Roberts.

INSPECTION DIVISION.

Officers of the Inspection division visited the following places during the fiscal year, giving instructions, adjusting instruments, selecting sites, and performing such work as comes under the heading of "inspection": Woodstock, Southampton, Bermuda, Kingston, Prinyer, Deseronto, Cobourg, Port Hope, Port Dover, Long Point (Lake Erie), St. Catharines, Welland, Port Colborne, Brandon, Calgary, Entrance Island, Fort William, Kamloops, Medicine Hat, Minnedosa, Moosejaw, Nanaimo, Port Arthur, Prince Albert, Qu'Appelle, Swift Current, The Pas, Vancouver, Victoria, Winnipeg, White River, Dawson, Atlin, Carcross, Prince Rupert, Portage la Prairie, Yorkton, Saskatoon, Edmonton, Grouard, Stonecliffe, Cochrane, Montreal, Dalhousie, Bonaventure River, Paspebiac, St. Godfroy, Pt. Daniel, l'Anse aux Gasçons, Newport Point, St. Adelaide de Pabos, Grand River, Cape Cove, l'Anse au Beaufils, Gaspé, Perce, Cornerfo the Beach Southwest Pt. Anticosti, Mont Louis, Fox River, Father Point, Chatham, Pt. Escuminac, Charlottetown, Pictou, Halifax, Carlton Point, Athabaska, Landing, Fort McMurray, Fort Chipewyan, Fort Smith, Fort Resolution, Hay River, Fort Simpson, Fort Normana, Fort Good Hope, Fort McPherson, Fort Rae, Barrie, Midland, Port McNicoll, and Coldwater.

TIME SERVICE.

During the year ended March 31, 1915, fifty-six determinations for time were made by transit of stars in the meridian with the 3-inch Troughton and Simms transit instrument. The position of the stars were those given in the American Ephemeris. The usual methods for determining the collimation error of the transit instrument by reversal on Polaris and by transits in reverse positions of the axis were followed. The stability and condition of the instrument continues very satisfactory.

The sidereal and mean-time clocks are also performing well and keeping very good uniform rates.

Owing to the war and the uncertain conditions of ocean navigation resulting therefrom the delivery of the "Magneta Clock" from Zurich, Switzerland, was delayed until March, 1915, when immediate steps were taken to put it in position and install the synchronizing mechanism.

The usual time exchanges between Toronto and Quebec, Montreal and St. John, N.B., have been made, being recorded on the chronographs at Toronto, Montreal and St. John. The errors of the clocks have been computed from the latest observations.

The 11.55 a.m. signals have been given over the fire alarm system.

Time has been given weekly to the magnetic observatory at Agincourt, and daily to the Canadian Northern railway, running out of Toronto.

Numerous chronometers and watches have been rated, and also private inquiries for time have begun to assume large proportions.

The following table will show the differences between the times at the several observatories and that at Toronto. The sign + indicates slow of Toronto.

Date.	Montreal.	Quebec.	St. John.

SOLAR OBSERVATIONS.

During the year April 1, 1914, to March 31, 1915, the sun was observed on 123 days. On eighty-three of these, maps were made showing the position of the spots then seen. As in former years, the NSE. and W. points were marked, the sun's axis and solar equator plotted from the positions tabulated in the American ephemeris. On April 3 a rather large disturbed area was observed north of the equator. This same group was also seen on the 6th, considerably developed, and again on the 9th, near the NW. limb. A group of small spots was seen in the SE. quadrant which developed into a beautiful display of penumbral spots of moderate size. On August 17 and following days a very large round penumbral spot was observed, and proved one of the largest single spots seen for years. It was again seen on September 10. On January 4, 1915, a fairly large group was seen north of the equator, and it disappeared over the NW. limb January 12. This group presented a beautiful appearance. On March 1 a trail of fairly large penumbral spots stretched across the sun south of the equator and parallel with it. At the end of the year March 31, 1915, a very large spot followed by a disturbed area of smaller spots and faculae appeared over the NE. limb. Photographs were taken of the principal large spots and groups on June 17, August 21, September 10, 12, 14, 15, 16, February 12 and March 31. The sun was observed to be free of spots on April 14, May 6, 8, 9, 14, 18, 20, 28, 30, June 1, 5, 23, 26, July 15, 21, 29, 30, August 1, 5, 6, 8, 12, 26, 29, 31, October 2, 5, 7, 8, 9, November 5, 16, January 26, 27.

MAGNETIC OBSERVATIONS.

The photographic magnetic instruments at Agincourt have been kept in continuous operation throughout the year. In August, 1914, a photographic vertical force instrument was added to the equipment, so that now we have a complete record of all the magnetic elements. The zeros of these recording instruments are determined by absolute observations, taken bi-weekly for declination and vertical force, and bi-monthly for horizontal force.

The westerly declination has changed from 6° 22·4 in March, 1914, to 6° 27·2 in March, 1915, an increase of 4′·8. The horizontal force has decreased from 0.161007

dynes to 0.160387, and the inclination has increased from 74° 41′·7 to 74° 43′·3. In March, 1915, the vertical force was 0.586729 dynes.

Magnetic disturbances were of infrequent occurrence during the early part of the year, but commencing in June there were very few days in which some disturbing forces were not in operation. The greatest variation in declination occurred during the magnetic storm of the 20th and 21st of March, 1915, amounting to 53·4. In horizontal force, however, the greatest range occurred during the storm of the 27th and 28th of September, 1914, the variation amounting to 0.00340 dynes.

The mean diurnal range from the hourly ordinates of declination varied from a maximum of 13′ 2 in August, 1914, to a minimum of 5′·3 in November, 1914, whilst that of horizontal force varied from a maximum of 0.00042 dynes in August, 1914, to a minimum of 0.00020 dynes in February, 1915. The ranges in vertical force for January, February and March, 1915, have been 0.00007 dynes, 0.00008 dynes, and 0.00014 dynes.

During the year, the compass attachments to 191 surveyors transits were adjusted and compared with the Agincourt standard declinometer, and the index corrections were determined and supplied to the Surveyor General. Assistance was given to Mr. Purser and Mr. Wight of the Department of the Interior in standardizing their magnetic instruments both before and after their field work.

Assistance was also given to Mr. French of the Dominion Observatory in comparing his instruments with the Agincourt standards, both before and after his field work.

The computing and compiling of magnetic data from the observatory records since 1872 is being carried on by Mr. W. E. W. Jackson.

PHYSICS BRANCH.

The exploration of the upper atmosphere has not been carried on with the same regularity as during the previous three years, as from the outbreak of the war it was found impossible to obtain the necessary balloons from Europe. Since February, however, the Sterling Rubber Company, of Guelph, has been manufacturing balloons which are proving most satisfactory, and we are now in a position to carry on the investigation at regular intervals.

In all, eighteen balloons were sent up in 1914, and thirteen were recovered. In 1915, to date, six have been sent up and four have been recovered. The following tables gives a summary of records not published in the last report:—

Date.	A	B	C	D	E	F	G
1914.							
Feb. 1	5·3†	−60·7	9·4	−68·8	E.	143	S.84 E.
Feb. 4	5·1	−65·9	6·6	−55·3	E.	184	N.70 E.
March 4	6 3	−75·1	9·1	−71·5	E.	152	S.82 E.
March 5	6·2	−78·7	8·5	−63·4	W.	87	N.35 E.
May 7	6·2	−72·4	8·3	−68·8	W.	47	N.67 E.
June 4	8·7	−88·8	9·6	−79·6	SW.	239	S 66 E.
July 1	—*	—	7·2	−66·1	N.	134	N.87 E.
Aug. 5	9·7	−74·2	10·8	−65·2	W.	20	S.75 E.
1915.							
January 27	5 6	−68·0	6·7	−57.1	E.	104	N.48 E.
January 28	—*	—	4·5	−47·2	S.	78	N 88 E.
March 11	5·3	−6 03	8·3	−59 8	SW.	105	S.38 E.
April 10	6·9	−73 3	11 3	−69·7	SE.	140	N.53 E.

At a meeting of the International Meteorological Commission, held in 1913, it was decided to carry on a systematic survey of the atmosphere over the polar regions during the years that Captain Amundsen was attempting to reach the North Pole, and the Stefansson expedition was likewise in the arctic regions. During last summer Mr. J. Patterson, of the central office, was assigned the duty of instructing certain observers in the Far North in taking the observations which this survey would entail and which was to consist of sending off small balloons and following and measuring their flight by means of theodolites. Mr. Patterson, during his journey to the mouth of the Mackenzie and return, instructed the various observers chosen for this special work, and also inspected the many meteorological stations lying between Edmonton and the Arctic sea. It is to be regretted that the war will probably lead to a lack of that international co-operation which alone could make this investigation effective.

SEISMOLOGY.

The Milne seismographs at Toronto and Victoria have continued in operation throughout the year.

On April 30, 1914, the Victoria instrument was removed to the basement of the new observatory, the boom being now approximately 222 feet above sea-level. The number of earth tremors recorded at both stations during the year was one-third greater than is usually recorded, Toronto showing 108 and Victoria 110.

Five of the movements were comparatively large, and occurred on April 11, August 4, October 1, November 24 and January 13, the last-named being caused by the disastrous Italian earthquake of that date. The preliminary tremors were recorded in Toronto at 7h 12m 12s G.M.T. and continued for one and twenty-two minutes. The first waves reached Victoria at 7h 15m 48s; the duration of the disturbance was one hour and forty-two minutes. The largest range of motion was 2.8 millimetres at Toronto and 2.0 millimetres at Victoria. The director of the Rome Observatory, Italy, gives the beginning of this earthquake, recorded at Rome, as 6h 52m 55s.

We continue to send duplicates for all our seismological tabulations to a number of central seismological institutions throughout the world, this data being used conjointly with that from other countries for the purpose of seismic investigation.

Early in the year the seismological equipment of the new observatory at Victoria was augmented by the following instruments:—

Two Bosch-Omori seismographs registering on smoked paper both N-S and E-W components.

Two Bosch photographic seismographs registering N-S and E-W components.

One Vertical seismograph, Wiechert type, smoked paper registration, and made by Spindler & Hoyer, Gottingen.

The results obtained with such a complete equipment should prove of great value.

More recently a small observatory for meteorological work and a time service was completed and occupied in St. John, N.B., and here again the work will in future be carried on under most favourable conditions.

AGRICULTURAL METEOROLOGY.

Work in the section devoted to agricultural meteorology began in February, 1914. An answer to the question, "what has already been accomplished in this new science?" was first sought. The literature of the subject was investigated; a reference library has been started, and a bibliography on cards prepared as an index to useful reading

matter. Letters were written to men engaged in investigating "weather and crops," and helpful suggestions received from them. The Ontario Agricultural College and the Central Experimental Farm were visited in order to get in touch with phases of the subject in Canada.

Several methods of attack on the problem were tested; for example, climatic maps, mathematical correlations between crop yields and meteorological averages, and detailed chart studies from weather data and crop notes.

The need of more detailed crop notes was continuously felt. Accordingly, through the courteous co-operation of the Dominion Experimental Farms system, an experiment with field plots of spring wheat was started at fourteen stations well distributed over Canada. In March, 1915, forms based on Russian and United States models were sent to the experimental farms, so that accurate crop notes may be kept. At the close of the season these will be studied in conjunction with the figures of precipitation, sunshine and temperature for each station. It is hoped to get at facts which may yield practical results, and as the experiment proves its value, plans and equipment may be extended and perfected from year to year.

Respectfully submitted,

R. F. STUPART,

Director.

APPENDIX A.

QUEBEC, May 14, 1915.

The Director, Meteorological Service,
Toronto.

SIR,—I beg to submit my annual report for the year ended March 31, 1915.

The observations taken at the Quebec Observatory during the past year were the same as in previous years, including the records of self-registering instruments furnished to this observatory in 1914.

Two new instruments—a solar and a terrestrial thermometer—have been supplied to this station since my last report.

Navigation opened last year on April 25, and the time-ball has been working in a satisfactory manner until December 31, end of the navigation season. Certain repairs to the time-ball apparatus were then found necessary, and were performed during the course of this spring.

As mentioned in previous reports, the observatory buildings are not in good order, and would require some temporary repairs, pending decision about the erection of a new building.

I have the honour to be, sir,

Your obedient servant,

ARTHUR SMITH,
Director.

APPENDIX B.

METEOROLOGICAL SERVICE, ST. JOHN OBSERVATORY,
ST. JOHN, N.B., July, 1915.

R. F. STUPART, Esq., F.R.S.C.,
Director, Meteorological Service,
Toronto, Ont.

SIR,—I have the honour to present the annual report on the Observatory at St. John for the fiscal year ending March 31, 1915.

METEOROLOGICAL SERVICE.

The new observatory building on Douglas avenue was finally occupied at the close of last October. The grounds and building are proving admirably adapted for the requirements of the service, giving an unexcelled exposure for the outside instruments on the spacious lawn, where are exposed the wet and dry bulb, maximum and minimum thermometers and rain gauge, also the automatic recording thermograph, hygrograph and rain gauge. Provision is also being made for an instrument plot for the solar and terrestrial radiation instruments and sunshine recorder. The anemometer and wind vane have been given a free and unobstructed exposure on an iron framework some twenty feet above the tower and over twenty-five feet above the highest point of the main roof. The routine observation and record of the various meteorological elements were continued throughout the year without a break. During the period, moving observations were made at both the old and new sites. The anemograph records from the wind station at Point Lepreau continue to be sent here weekly, where they are tabulated and the analysis made. This station gives most useful and satisfactory results.

WEATHER BULLETIN.

The daily bulletin was promptly issued each weekday after receipt of the telegraphic message from the central office at Toronto. The prevailing conditions at coast and inland stations, synopses and forecasts, have been, as in the past, of great value to shippers, mariners, contractors, and interests depending upon the information given in the bulletin. It is distributed through the post, published in the afternoon papers and displayed in public places as heretofore reported. By courtesy of the New Brunswick Telephone Company, forecasts from Toronto are telephoned throughout the province and displayed on forms provided by the Meteorological service, greatly to the advantage of the public in localities not connected by telegraphic service. Local and outside shipping, contracting and commercial houses, transportation companies and others make frequent requests for statistical and other information from this office. In many cases settlement of claims wholly depends upon the records of our observations. The press obtain information when important storms occur, during periods of extremes, and items of interest to the public.

DISPLAY OF STORM SIGNALS.

In addition to the display of storm signals from the signal mast on the Customs building here, messages are telephoned to the signal stations at Quaco lighthouse and Point Lepreau upon receipt of advice from the central office at Toronto.

TIME SERVICE OF THE MARITIME PROVINCES.

All the instruments and apparatus connected with this service have been installed in the new building. The pier for the meridian telescope is substantially mounted on solid concrete with its base some six feet below the surface rock. The instrument is now decidedly stable in level and azimuth and not subject to the disturbances of the old site. The clocks are also mounted on solid piers free from the building and show much improvement in the steadiness of their rates. The Standard Sidereal is mounted in the constant temperature clock room practically under ground. A well was cut in the rock six feet below the basement (ten feet below the ground level), drained with field tile and walled with concrete to under side of clock room floor. This well was then lined with sheet lead and the pier for clock built inside, having a three by three feet base supporting the small pier carried above the floor. To this small pier the clock is firmly bolted. The room is double walled, having an air space of twenty inches on all sides and at the top. Naturally the clock room has very even and constant temperature, but arrangements to take care of the small temperature changes consist of a thermostat in the inner vault, connected by wire with an automatic gas regulator between the outer and inner walls. Since the clock was sealed and the air pressure inside its case reduced to 650 millimeters, not one stroke of the pump has been necessary. It now shows a wonderfully constant correction, greatly surpassing its excellent performance of former years. The Kulberg sideral clock for the present is mounted in the time room along with the mean time master and transmitting clocks, chronograph and electric apparatus connected with the time service.

Wires from the observatory on Douglas avenue connect through the Western Union office with the time ball apparatus on the custom house. At 1 p.m. each week-day the circuit is automatically closed by our transmitting clock and the time ball dropped through the electrical apparatus installed in the time ball tower. The loop line from the observatory to the Western Union office is also used for sending the daily time signals, where special arrangements have been made to transmit this signal to all points covered by them in the Maritime Provinces. When not in use for other purposes the loop line synchronizes a clock in their public office here.

The electric clock in Halifax has been daily sent a synchronizing signal at 10 a.m. If, through wire trouble, it fails them at that hour, the signal is repeated at following hours until satisfactorily received. This clock electrically releases the time ball on the citadel at 1 p.m. each week day. Chronometer and watch adjusters in Halifax have sounders on their premises to receive our 10 a.m. time signals. Some installations of electric clocks there use the signal to synchronize their master clocks.

Additions have been made to the list of electric clocks in different parts of the city, which are hourly corrected by our master clock. The wire service is well taken care of by the local telephone company, who, for a nominal sum lease a wire for this purpose. This system of hourly synchronizing clocks has proved to be most satisfactory and useful.

The tower clock was installed in March. It is entirely electric. The tower movement is governed by a special master clock in a room below. The tower movement has a heavy pendulum, the function of which is not to keep time, but to drive a large ratchet wheel, which in turn drives the hands around the dial. The heavy pendulum is re-energized by an electro-magnet when its oscillations fall below a predetermined value. The driving pendulum is of such length that the long hand is driven through a half-minute space in approximately twenty-seven seconds, the pawl is then automatically lifted so that although the pendulum motor still continues to vibrate the hands remain stationary until a current from the master clock dead on the half minute, releases the pawl and the hands are driven forward for another half minute on the dial.

I have the honour to be, sir,

Your most obedient servant,

D. L. HUTCHINSON,

Director, St. John Observatory.

APPENDIX C.

VICTORIA, B.C., OBSERVATORY, May 27, 1915.

The Director, Meteorological Service,
Toronto, Ont.

SIR,—I have the honour to submit the following report upon this observatory and the work performed here, for the fiscal year ending March 31, 1915.

This building was completed in April, 1914. It is situated upon Gonzales heights, which, being 215 feet above the sea, commands an unobstructed and magnificent view from all directions, while its distance from the centre of the city is only two miles.

The building is of reinforced concrete, two storeys in height, and though only 42 feet square, it presents a conspicuous object for miles, both from land and sea, as the exterior is coated with a special white paint.

On the main floor are two small offices, hall, large general office, fireproof vault, observer's bed-room, clock and chronometer room, transit room, where is mounted the 3-inch transit telescope.

On the roof level there is mounted on a special concrete pier, which rises from the rock, my 5-inch equatorial telescope. This is well housed under a 14-foot dome which revolves.

A walk is also provided on the roof for observational purposes and for the benefit of visitors.

The stair leading to the ground floor is specially cushioned on the concrete floor, and the latter is also laid on 18 inches of sand and gravel and insulated from the walls to prevent the vibration of walking from being transmitted to the delicate instruments installed nearby. This floor contains three rooms for seismographs in which four instruments are now mounted, and piers are provided for other delicate instruments which have not yet arrived.

A photograph room, furnace room, laboratory, spare room, store room and lavatory are also on this floor. Owing to the elevation of the building the water supply is pumped automatically to a reservoir on the roof.

On the 22nd of April, 1914, the observations were started at this building, and during the year this has proved a far superior site to the old one situated in the centre of the city. The wind exposure is excellent from all quarters, and no smoke or dust reduces the amount of bright sunshine to be recorded.

The regular tri-daily meteorological observations are taken: those at 5 a.m. and 5 p.m. are telegraphed to Toronto, Winnipeg and Portland, Oregon.

The weather forecasts derived from the synoptic weather charts are made out here twice each day except on Sundays. These are published in the morning and evening papers, both here and on the lower mainland, and each morning at 9 o'clock a weather bulletin is printed here and over thirty of them are quickly distributed in the city. The C.P.R. Telegraph Company also post these bulletins at all their offices here, at Vancouver and New Westminster.

A weekly summary of the weather throughout this province is also printed and mailed to the press of the province; also a monthly report is issued.

Storm warnings have been issued during the year both for this district, Nanaimo, and Vancouver, and numerous inquiries from mariners have been answered. These warnings have been of particular value to fishermen and small craft.

During the past summer this office has been of considerable service to the Provincial Forestry Department by furnishing special forecasts respecting the advent of great heat or hot, dry winds in the interior of the province. These decrease the forest-fire risks and permit of extra assistance to be sent to the danger zones. Better results are even looked for during the coming summer on account of the extra telegraph reporting stations you have started in connection with this service.

During the early summer months of last year large numbers of visitors, were shown over this building, and all were delighted with the unexcelled view obtained from the roof, and interested in the instruments that were personally explained to them.

During the fine evenings parties were allowed to look through the equatorial telecope, and informal addresses were given in the large room. Over one thousand visitors were registered here in three months. With the beginning of the war the building and grounds were closed to the public for certain military reasons.

During the winter months I have given a course of popular scientific lectures in the city in aid of certain patriotic funds, and altogether had an attendance of over 3,000.

The seismographs now in use are the Milne type with east-west component, which was moved from the old site, where it had been in continuous operation since 1898.

A north-south Milne type constructed by me, a Ewing type which records on smoked glass, and one to record on revolving smoked paper the actual vertical movements of the earth during the passage of earthquakes.

The following table gives the monthly and yearly number of earthquakes recorded here on the Milne type which shows a total of 112. This large number of recorded quakes may be due to the fine rock foundation obtained here.

During the winter months "microseisms" were frequently well recorded. They appear to be most pronounced preceding certain types of storms. These, when the time will permit, will be more closely studied in conjunction with my hydro-aerograph

records and our synoptic weather charts, for it is possible certain minute earth vibrations may reach our delicate instruments on this coast in advance of some great ocean storms.

The daily vertical movements of the earth have also been measured for the past year; these, in conjunction with similar observations already measured for the past sixteen years, form a long series of pendulum movements, which it is hoped may be published in full, as the results appear to have some practical bearing upon the causes of certain terrestrial phenomena, such as earthquakes, colliery gas explosions and some meteorological conditions.

As the observatory is properly isolated from other buildings, and as my almost constant attendance is necessary here both night and day, I respectfully urge that a residence be allowed me on the observatory property.

I have the honour to be, sir,

Your obedient servant,

F. NAPIER DENISON,

Superintendent.

APPENDIX No. 7.

ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT OF THE MARINE HOSPITAL SERVICE, FOR THE FISCAL YEAR 1914-15.

A. JOHNSTON, Esq.,
Deputy Minister of Marine and Fisheries,
Ottawa, Ont.

SIR,—I have the honour to submit the annual report of the transactions of the Marine Hospital Service, for the fiscal year ended March 31, 1915.

I have the honour to be, sir,

Your obedient servant,

C. H. GODIN, M.D.,
Medical Superintendent, Marine Hospitals Service.

During the year 1914-15 the number of letters sent by this office was 1,582; memoranda, 461.

Number of vessels which have paid "Sick Mariners' Dues" during the year 1914-15 was 3,148; membership of crews, 65,221.

C. H. GODIN, M.D.

APPENDIX No. 8.

REPORT OF WRECK COMMISSIONER.

OTTAWA, June 9, 1915.

A. JOHNSTON, Esq.,
Deputy Minister of Marine and Fisheries.
Ottawa.

SIR,—I have the honour to submit my annual report of investigations and inquiries held during the fiscal year 1914-15 into the causes of wrecks and casualties, as well as statements of wrecks and casualties reported as having occurred to British, Canadian, and foreign vessels in Canadian waters, and to Canadian vessels in other waters, from January 1, 1914, to December 31, 1914, and of those reported as having occurred in inland waters during the same period.

Formal investigations during the year	26
Preliminary inquiries during the year	10
Departmental inquiries during the year	1
Total	37

During the calendar year 1914, there were 257 casualties reported to the department, the tonnage of same being 212,842·85, and the damage is approximately estimated at $5,211,700, while 1,114 lives were lost.

Of this total number of casualties, 212 were to coasting and sea-going vessels, the tonnage of same being 181,055·85, and the damage to which is approximately estimated at $5,083,765, and 1,113 lives were lost, while forty-five of the casualties were to inland vessels, the tonnage of which was 31,787, and the damage to same is estimated at $127,935, and one life was lost.

In 104 cases of casualties to coasting and sea-going vessels, and twenty-seven cases of casualties to inland vessels, the amount of damage is not stated.

Seventy-two of the casualties to coasting and sea-going vessels, made up of thirty-one steam vessels and forty-one sailing vessels, resulted in total losses, and of this number fifty-two were Canadian, six British, and fourteen foreign vessels.

Five of the casualties to inland vessels resulted in total losses, all of which were to Canadian vessels, consisting of four steam and one sailing vessel.

I am, sir,

Your obedient servant,

L. A. DEMERS,
Dominion Wreck Commissioner.

STATEMENT of Investigations held in Canada into Wrecks and Casaulties which occurred to Canadian, British and Foreign Vessels in Canadian Waters during the fiscal year 1914-1915.

Name of Ship.	Registered Port and Official No.	Remarks.
"Assiniboia".	Montreal, 125984..	On July 2, stranded on Bad Neighbour shoal, Georgian bay. Formal investigation was held at Toronto, on February 4, before Captain Demers. *Finding.*—Master exonerated. Lighthouse keeper at Cove island blamed for not operating fog-horn.
"Anglo-Brazilian" ...	London, 135294..	On August 26, stranded in Montreal harbour. Formal investigation was held at Montreal, on September 8 and 9, before Captain Demers. *Finding.*—No one to blame. Stranding due to parting of tow rope at a critical moment.
"Batiscan" and ..... "Muriel".....	Liverpool, 13314..... Quebec, 116709.	On October 16, collided off Madam island, St. Lawrence river. Formal investigation was held at Quebec, on November 12, before Captain Demers. *Finding.*—*Muriel* alone to blame for collision; but master's certificate not dealt with, as he left instructions to be summoned to deck if needed.
"Canada".	Quebec, 117146.....	On July 12, stranded at cape Chatte, gulf of St. Lawrence. Formal investigation was held at Montreal, on August 6, before Captain Demers. *Finding.*—Master was reprimanded for employing incompetent wheelman and for not issuing written instructions. Mate's certificate was suspended for three months for not complying with verbal instructions and for lack of judgment in not stopping ship when fog shut in.
"Cienfuegos"..	Norwegian.....	On July 19, stranded on Scatarie island, N.S. Preliminary inquiry was held at Sydney, on July 30, before Mr. V. Mullins. After hearing evidence, formal investigation was found unnecessary.
"Cacouna".....	Montreal, 87993...	On September 26, stranded and subsequently lost at Ferry island point, Newfoundland. Preliminary inquiry was held at Sydney, on September 28, before Mr. V. Mullins, and a formal investigation ensued, being held at Sydney on October 26, before Captain Demers. *Finding.*—Stranding was due to an error of judgment on part of master, whose certificate was suspended for three months.
"Chebucto" and..... "Minia".....	Halifax, 108683..... London, 56762.	On August 29, collided in Halifax harbour. Formal investigation was held at Halifax, on October 23, before Captain Demers. *Finding.*—Master of *Chebucto* to blame for not adopting the proper measures of prudence in navigating his vessel in fog. His certificate was suspended for one month.
"Canada" and..... . "Cape Breton". ...	Quebec, 117146.... . .. Montreal, 97808.....	On October 7, collided near Lachine canal. Formal investigation was held at Montreal on November 10 and 11, before Captain Demers. *Finding.*—Collision was due to lack of judgment on part of master of *Canada*, who was severely censured and condemned to pay all costs of inquiry.
"Chebucto" and.. ..... "Morwenna".....	Halifax, 108683..... Great Britain, 118108.	On January 30, collided in Halifax harbour. Formal investigation was held at Halifax, on February 11 and 12, before Captain Demers. *Finding.*—*Morwenna* solely responsible for collision. Master's certificate was suspended for six months. Certicate of master of *Chebucto* was suspended for one month, for permitting a passenger entering wheelhouse, which is a violation of marine laws.
"Dominion" (tug) and . "St. Lawrence".....	Victoria, 116414..... ... St. Johns, Nfld., 117295.	On June 20, collided in Victoria harbour. Preliminary inquiry was held at Victoria, on July 15, before Captain MacPherson. *Decision.*—Collision was caused solely by wrongful act of master of *Dominion*.

SESSIONAL PAPER No. 21

STATEMENT of Investigations held in Canada into Wrecks and Casualties which occurred to Canadian, British and Foreign Vessels in Canadian Waters during the fiscal year 1914-1915—*Continued.*

Name of Ship.	Registered Port and No.	Remarks.
"Doncella" and "West Vancouver No. 5."	Vancouver, 131034... Vancouver, 134086.	On July 4, collided in Vancouver harbour. Formal investigation was held at Vancouver, on August 6 and 7, before Captain MacPherson *Finding.*—Collision was caused solely by carelessness of Master of *West Vancouver No. 5*, disregarding the rules of the road. His certificate was suspended for three months. Master of *Doncella* is censured for not having reduced speed of his vessel earlier, but he is not to be blamed for accident.
"Empress of Ireland" and "Storstad."	Liverpool, 123972. Norwegian.	On May 29, collided off Cock Point buoy, St. Lawrence river. The *Empress of Ireland* was sunk, and 1,042 lives were lost. Preliminary inquiry was held at Montreal and Quebec, from May 31 to June 5, before Commander Lindsay, and a formal investigation ensued, being held at Quebec from June 6 to June 27, before Lord Mersey, Judge E. C. McLeod, and Sir A. A. Routhier. *Finding.*—The Captain of *Empress of Ireland* would have been better advised if he had given the *Storstad* a wider berth and navigated his ship to pass her at a greater distance on his beam than he originally intended. His failure to do this is not considered the contributory cause of disaster, nor was stopping of his engines an unseamanlike act. First officer of *Storstad* was found culpable of negligence in omitting to call captain when fog came on, and in altering his course in fog and keeping navigating of vessel in his own hands.
"Floriston".	Newcastle, 110335.	On August 29, stranded in Newfoundland. Formal investigation was held at Quebec, on September 13, before Captain Demers. *Finding.*—Master was severely reprimanded for his negligence in not supplying ship with proper charts, and for his lack of seamanship in beaching his vessel on a rocky bottom. Second officer was cautioned.
"Floriston".	Newcastle, 110335.	On October 13, stranded and subsequently lost near Guiou island, N.S. Formal investigation was held at Louisburg, on October 27, before Captain Demers. *Finding.*—Master to blame for reckless navigation. His certificate is suspended for a year.
"Glendene"	Whitby, 131839.	On November 26, stranded near Cap à la Madeleine, St. Lawrence river. Preliminary inquiry was held at Montreal, on November 30, before Commander Lindsay. *Decision.*—Accident was due to slight error of judgment on part of pilot, caused by the climatic conditions prevailing at the time. Formal investigation was found unnecessary.
"Handon Hall"	West Hartlepool, 112433.	On November 20, stranded at Trinity bay, Gulf of St. Lawrence. Preliminary inquiry was held at Quebec on November 28, before Mr. T. Beland, and as crew had left for England a formal investigation could not be held.
"J. H. Plummer"	Newcastle, 14447	On May 10, stranded in Montreal harbour. Formal investigation was held at Montreal, on May 15, before Commander Lindsay. *Finding.*—No one to blame. Stranding caused by reason of attempting to move vessel without the assistance of a tug, a strong breeze blowing at the time.
"King Malcolm"	Italian	On July 18, stranded near Yarmouth, N.S. Preliminary inquiry was held at Yarmouth, on July 28, before Captain Murphy. Formal investigation was found unnecessary.

STATEMENT of Investigations held in Canada into Wrecks and Casualties which occurred to Canadian, British and Foreign Vessels in Canadian Waters during the fiscal year 1914-1915—*Continued.*

Name of Ship.	Registered Port and Official No.	Remarks.
"Montfort"	Liverpool, 110568.	On April 28, stranded at Beauport shoal, St. Lawrence river. Formal investigation was held at Montreal, on May 5, before Commander Lindsay. *Finding.*—Stranding was caused entirely by want of skill and by poor judgment of pilot, who did not know the position of vessel after entering fog. His certificate was suspended for three months. Case was re-heard at Quebec, on November 18, by Captain Demers. *Finding.*—Accident was due to grave error of judgment on part of pilot, who is severely censured and fined $100, which, owing to previous suspension, was not enforced.
"Monkshaven"	Whitby, 131333.	On August 23, stranded at Ste. Felicité, St. Lawrence river. Formal investigation was held at Quebec, on September 11, before Captain Demers. *Finding.*—Master was censured for not employing reliable methods of ascertaining the exact position of vessel. Chief officer was reprimanded and severely censured for not having exercised due precaution.
"Montmagny" and "Lingan"	Sorel, 126457. Hartlepool, 132810.	On September 18, collided near Crane island, St. Lawrence river. The *Montmagny* was sunk and fourteen lives were lost. Preliminary inquiry was held at Quebec, on September 19, before Mr. A. de B. Tremain, and a formal investigation ensued being held at Quebec, on October 6, 7, 8, 9, 14, and 15, before Captain Demers. *Finding.*—Collision was entirely due to faulty navigation on part of pilot and crew of *Lingan*. Master was reprimanded for having left bridge while ship was navigating in narrow waters. Pilot's license was suspended for balance of season, and he was fined $200. Chief officer's certificate was suspended for ten months.
"Montcalm" and "Lauzon"	Ottawa, 117069. Quebec, 126843.	On November 10, collided in Quebec harbour. Formal investigation was held at Quebec, on November 20, before Captain Demers. *Finding.*—Collision was due entirely to error of judgment on part of master of *Lauzon*, who was reprimanded.
"Navarra"	Glasgow, 128283.	On December 29, stranded near Holmes island, Nova Scotia. Formal investigation was held at Yarmouth, on January 7 and 8, before Captain Demers. *Finding.*—Master, first and second officers were found guilty of negligence in navigating ship. Master's certificate was suspended for ten months, second officer for six months, and chief officer for three months.
"Princess Victoria" and "Admiral Simpson"	London, 115953. American.	On August 26, collided in Puget sound, near Seattle, Wash. Formal investigation was held at Victoria, on September 18 and 19, before Captain MacPherson. *Finding.*—Collision was caused by those in charge of *Admiral Simpson* improperly porting their helm a few minutes before accident. Master or officers of *Princess Victoria* not to be blamed.
"Prince Albert"	Prince Rupert, 99584.	On August 18, stranded on Tree Knob group, British Columbia. Formal investigation was held at Victoria, on September 4 and 5, before Captain MacPherson. *Finding.*—Stranding was due solely to fault of officer in charge. Master was severely reprimanded for not having left definite instructions to be called, if necessary; but, on account of his long and good record, his certificate was not dealt with.

SESSIONAL PAPER No. 21

STATEMENT of Investigations held in Canada into Wrecks and Casualties which occurred to Canadian, British and Foreign Vessels in Canadian Waters during the fiscal year 1914-15—*Concluded.*

Name of Ship.	Registered Port and Official No.	Remarks.
"Princess Royal"	Victoria, 121988	On October 27, stranded in Sabine channel, British Columbia. Formal investigation was held at Victoria, on November 19, before Captain MacPherson. *Finding.*—Accident was due to steering for a narrow and intricate channel, in foggy weather, when there is an alternative of a wide and safe one. Master was severely censured.
"Princess Patricia" and "Venture"	Victoria, 115685. Victoria, 129475.	On December 18, collided in Vancouver harbour. Formal investigation was held at Vancouver, on January 15, before Captain MacPherson. *Finding.—Princess Patricia* was solely at fault; but accident was almost inevitable owing to limited space in which vessels had to manoeuvre.
"Ragnar"	Norwegian	On July 19, stranded near Baleine, Cape Breton. Preliminary inquiry was held at Sydney, on July 30, before Mr. V. Mullins. Formal investigation was found unnecessary.
"Robert R. Rhodes" and "Kenora"	Montreal, 131109. Toronto, 103680.	On August 4, collided in Cornwall canal. Formal investigation was held at Montreal, on October 30, before Captain Demers. *Finding.—Kenora* was at fault for undertaking dangerous and reckless manoeuvre in passing *Robert R. Rhodes* so close at place of accident. Master was severely reprimanded and cautioned to be more careful in future.
"Saturnia"	Glasgow, 129489	On April 28, grounded at Lower Traverse, St. Lawrence river. Formal investigation was held at Montreal, on May 4 and 5, before Commander Lindsay. *Finding:* Stranding was caused by action of pilot, inasmuch as he appeared to have had no confidence in himself as to the manner of navigating his vessel through the channel. His certificate was suspended for three months. Captain was censured. Case was reheard at Quebec, on November 18, before Captain Demers. *Finding:* Stranding was due to error of judgment on part of pilot, who is severely reprimanded.
"Saskatoon"	Sunderland, 123965	On July 25, stranded opposite Portneuf, St. Lawrence river. Formal investigation was held at Montreal, on July 31 and August 1, before Captain Demers. *Finding:* Pilot was found at fault for having mistaken black buoy for red one. His license was cancelled. Master's certificate was suspended for one month, for lack of interest with regard to his responsibilities as master. One of the assessors dissented from finding *re* suspending master's certificate.
"Shenandoah"	Liverpool, 102111	On September 3, stranded off Little Musquash, N B. Formal investigation was held at St. John, on September 22, before Captain Demers. *Finding:* Master to blame for not having ascertained exact position of vessel by more frequent soundings. He is reprimanded.
"Zealand"	Liverpool, 124004	On November 13, stranded at Isle aux Raisins, St. Lawrence river. Preliminary inquiry was held at Montreal, on November 20, before Commander Lindsay. *Finding:* No one to blame. Accident was unavoidable owing to very limited space in channel for vessel to anchor, and the heavy snow and strong wind prevailing at the time.

STATEMENT OF WRECKS AND CASUALTIES reported as having occurred to British, Canadian, and Foreign Vessels in Canadian Waters, and to Canadian Vessels in other Waters, from January 1 to December 31, 1914.

APPENDIX No. 9.

ANNUAL REPORT OF THE MASTERS AND SEAMEN AND PILOTAGE BRANCH.

To the Deputy Minister of Marine and Fisheries,
Ottawa.

SIR,—I have the honour to submit the 1914-15 annual report of this branch.

GOVERNMENT NAVIGATION SCHOOLS.

During the twelve months ended March 31, 1915, navigation schools were in operation for longer or shorter periods at Carleton, New Richmond, and Quebec, Que.; Halifax, North Sydney, and Yarmouth, N.S.; St. John, N.B.; Collingwood and Kingston, Ont.; and at Vancouver, B.C.

At Carleton, Capt. A. Landry, instructor, 96 sessions were held; average attendance 4, maximum attendance 6.

At New Richmond, Capt. A. Landry, instructor, 27 sessions were held; average attendance 2, maximum attendance 3.

At Quebec, Capt. P. L. Lachance, instructor, 244 sessions were held; average attendance 6, maximum attendance 21.

At Halifax, Capt. Simmons, instructor, 305 sessions were held; the maximum attendance was 11.

At North Sydney, Capt. Jas. Sutherland, instructor, 86 sessions were held; average attendance 1, maximum attendance 3.

At Yarmouth, N.S., Capt. J. E. Murphy, instructor, 32 sessions were held; average attendance 4, maximum attendance 7.

At St. John, Capt. Rufus C. Cole, instructor, 313 sessions were held; average attendance 5, maximum attendance 9.

At Collingwood, Capt. Geo. C. Coles, instructor, 34 sessions were held; average attendance, 11, maximum attendance 22.

At Kingston, Capt. H. N. McMaster, instructor, the school started late in the season and closed when navigation opened. Ten of the pupils at this school passed for certificates.

At Vancouver, Capt. Chas. Eddie, instructor, 24 sessions were held; average attendance 25, maximum attendance 33.

The total expenditure on account of navigation schools during the above period was $4,216.95.

MASTERS AND MATES.

Eastern Division.

At Halifax, N.S., Capt. F. N. Malcolm, examiner, 52 candidates were examined: 1 for master, 7 for mate, and 9 for second mate, sea-going; 18 for master and 16 for mate, coasting; and 1 for mate, inland waters. One candidate failed for master, coasting. Five persons underwent the sight tests, two of whom failed.

At Yarmouth, N.S., Capt. J. E. Murphy, examiner, 31 candidates were examined: 9 for master, 4 for mate, and 3 for second mate, sea-going; 9 for master and 6 for mate, coasting. One candidate failed for master, coasting.

At North Sydney, N.S., Capt. Jas. Sutherland, examiner, 7 candidates were examined: 1 for second mate, sea-going; and 4 for master and 2 for mate, coasting. One candidate failed for second mate, sea-going. One person underwent the sight tests and failed.

At St. John, N.B., Capt. W. R. Bennett, examiner, 28 candidates were examined: 1 for master, sea-going; 9 for master, and 3 for mate, coasting; 14 for master, minor waters; and 1 for a master's temporary certificate. One candidate failed for master, coasting. Two persons underwent the sight tests, one of whom failed.

At Charlottetown, P.E.I., Capt. Alex. Cameron, examiner, 4 candidates were examined: 1 for master and 3 for mate, coasting. One person underwent the sight test.

At Quebec, Que., Capt. P. L. Lachance, examiner, 64 candidates were examined: 1 for master and 1 for second mate, sea-going; 14 for mate, coasting; 4 for master and 4 for mate, inland waters; 31 for master and 5 for mate, minor waters; 2 for master's temporary certificates; and 2 for service certificates, master, minor waters. Nine candidates failed: 3 for mate coasting; 1 for mate, inland waters; and 5 for master, minor waters. Fifteen persons underwent the sight tests, 6 of whom failed.

Western Division.

At Vancouver, B.C., Capt. Chas. Eddie, examiner, 69 candidates were examined: 2 for master, 6 for mate, and 3 for second mate, sea-going; 35 for master, and 20 for mate, coasting; and 1 for master and 2 for mate, minor waters. Three candidates failed: 2 for master, and 1 for mate, coasting. One person underwent the sight test.

At Victoria, B.C., Capt. J. D. Macpherson, examiner, 26 candidates were examined: 1 for mate, and 2 for second mate, sea-going; 13 for master and 7 for mate, coasting; and 1 for master, and 2 for mate, minor waters. Two candidates failed: 1 for second mate, sea-going; and 1 for master, coasting.

At Nelson, B.C., Lieut. Gordon Hallett, examiner, 3 candidates were examined for master, minor waters.

At Edmonton, Alta., Capt. A. D. Grant, examiner, no candidates were examined.

Inland Waters Division.

At Toronto, Ont., Capt. H. W. King, examiner, 103 candidates were examined: 1 for master, coasting; 25 for master, and 39 for mate, inland waters; 8 for master and 10 for mate, minor waters; 19 for master's temporary certificates; and 1 for master's service certificate, inland waters. Ten candidates failed: 2 for master and 3 for mate, inland waters; 2 for master, and 2 for mate, minor waters; and 1 for a master's temporary certificate. Six persons underwent the sight tests, 5 of whom failed.

At Collingwood, Ont., Capt. Geo. C. Coles, examiner, 23 candidates were examined: 1 for mate, coasting; 7 for master, and 10 for mate, inland waters; 2 for mate, minor waters; and 3 for master's temporary certificates. Four candidates failed: 3 for master, inland waters; and 1 for mate, minor waters.

At Kenora, Ont., Capt. Geo. P. Phillips, examiner, 8 candidates were examined for master's temporary certificates.

At West Selkirk, Man., Capt. M. Thordarson, examiner, 12 candidates were examined: 1 for master and 2 for mate, inland waters; and 1 for master, and 8 for mate, minor waters. One candidate failed for mate, minor waters.

CERTIFICATES ISSUED.

During the year the following numbers and grades of certificates have been issued to masters and mates: 14 masters', 18 mates', and 17 second mates' sea-going

certificates of competency; 84 masters', and 68 mates' coasting certificates of competency; 1 masters' inland waters certificaee of service; 32 masters', and 52 mates' inland waters certificates of competency; 2 masters' minor waters certificates of service; 52 masters', and 25 mates' minor waters certificates of competency; and 32 masters' temporary certificates. A complete list of masters' and mates' certificates issued during the year follows.

RECEIPTS AND EXPENDITURE.

The total amount collected in the way of examination fees for certificates during the twelve months ended March 31, 1915, was $4,561, and the amount expended on account of this service was $12,723.17, an excess of expenditure over receipts of $8,162.17.

The following statement shows the total receipts and expenditures on account of masters and mates during the last ten years:—

	Expenditure.	Receipts.
	$ cts.	$ cts.
For the fiscal year ended June 30, 1906	7,068 15	5,526 00
" " March 31, 1907 (nine months)	5,934 16	2,294 50

Receipts	42,808 97	
Excess of expenditure over receipts	45,625 83	

PILOTAGE.

The Minister of Marine and Fisheries is the Pilotage Authority in the pilotage districts of Montreal and Quebec, and all matters of pilotage in those districts are controlled by him through a general superintendent at Quebec.

In both the Montreal and Quebec districts there is a Decayed Pilots' Fund. In the Montreal district the pilots contribute 5 per cent of their earnings to the Decayed Pilots' Fund of that district, which, on December 31, 1914, showed a balance to its credit of $58,726.93. In the Quebec district the pilots contribute 7 per cent of their earnings to the Decayed Pilot' Fund of that district, which, on December 31, 1914, showed a balance to its credit of $102,493.57. The Montreal Decayed Pilots' Fund is administered by the Dominion Government and disbursed through the Department of Finance. The Quebec Decayed Pilots Fund is managed by the Quebec Pilots Corporation at Quebec.

The earnings of the Montreal pilots during the calendar year 1914, amounted to $114,388.84. And the earnings of the Quebec pilots amounted to $157,150.05.

All pilotage earnings in the said districts, with the exception of the commissions for the Decayed Pilots Funds, are paid to the pilots.

All expenses in connection with the administration of pilotage in the Montreal and Quebec districts are paid out of consolidated revenue. The total expenditure during the calendar year 1914, including payments to retired pilots, amounted to $46,433.07, made up as follows: salaries, $17,935.07; maintenance, $22,143.97; and payments to retired pilots, $6,354.03.

Extracts from the Annual (1914) Returns of the General Superintendent, form an appendix to this report.

Of the thirty-nine other Pilotage Authorities constituted under the authority of the Governor in Council in pursuance of the provisions of the Canada Shipping Act, twenty-nine have sent in returns for 1914, extracts from which form also an appendix to this report.

I have the honour to be, sir,

Your obedient servant,

B. F. BURNETT,
Officer in Charge
Masters and Seamen Branch.

PILOTAGE RATES.

For vessels entering into or clearing from the ports of Vancouver and Howe sound, the rates of pilotage are as follows:—

(a) For vessels under sail, $2 per foot draught of water and 1 cent per net registered ton.

(b) For vessels in tow of a steamer, $1 per foot draught of water and 1 cent per net registered ton.

(c) For steamers, $1 per foot draught of water, and 1 cent per net registered ton.

The pilotage from Cape Flattery or Royal Roads to a line drawn from Point Atkinson to the nun buoy on Spanish bank, or to the limits of Howe sound and vice versa, is not compulsory, but if the services of a pilot are required, he shall be paid the following rates, viz.—

From Cape Flattery	$6 00 per foot.
" Callum Bay	5 00 "
" Beechy Head	4 00 "
" Race Rocks or Royal Roads	3 00 "

And for vessels under steam or in tow of a steamer, the following rates shall be paid:—

From Cape Flattery	$3 00	per foot.
" Callum Bay	2 50	"
" Beechy Head	2 00	"
" Race Rocks or Royal roads (vessels under steam)	1 00	"
" Race Rocks or Royal Roads (vessels in tow of a steamer	1 50	"

The payment of pilotage dues is compulsory in the pilotage district of Vancouver.

R. H. ALEXANDER,

Chairman.

PILOTAGE RATES.

Vessels bound to other ports and coming to an anchor in Royal Roads, the pilotage shall be free, except the services of a pilot are employed, when pilotage according to the following graduated scale shall be payable:—Inside or north of Race:—

Rocks to Royal Bay	$0 75	per foot.
Beechy Head to Royal Bay	1 50	"
Pillar Point to Royal Bay	3 00	"
Cape Flattery to Royal Bay	6 00	"

For vessels entering into or clearing from the undermentioned ports, the rates shall be as follows:—

Esquimalt Harbour:		
Vessels under sail	$3 00	per foot.
Vessels under steam or in tow	2 00	"
Steamers	1 50	"
Victoria Harbour:		
Sailing vessels under sail	3 00	"
Sailing vessels in tow	2 00	"
Steamers	1 50	"

Vessels spoken by a pilot in keeping with the Act and by-laws and not accepting his services, shall only pay half the above rates.

Vessels proceeding from Victoria to Esquimalt, and vice versa, and having discharged or received a portion of their cargo in either harbour, and having paid full pilotage into either harbour, if proceeding with the assistance of steam, shall pay $1.50 per foot.

Any fraction of a foot not exceeding 6 inches shall be paid for as half a foot, and any fraction of a foot exceeding 6 inches shall be paid for as a foot.

Removal from one part of either harbour to another part of the same harbour, $10.

The payment of pilotage dues is compulsory in the pilotage district of Victoria and Esquimalt, B.C.

" 350 to 400 "	12 00	11 00

And for every additional 50 tons or fractional part thereof, $1; for vessels 800 tons and upwards, $1 for every additional 100 tons or fractional part thereof. Outward pilotage shall be the same as inward. Vessels upon being hailed by a licensed pilot outside the limits of the port, but within the pilotage district of Sydney, and refusing to, or not taking such pilot, shall pay half pilotage inwards; and upon being offered the services of a licensed pilot before being ready for sea and refusing the services of such pilot, shall be liable to half pilotage outward. Should the services of a pilot so offering be accepted by the master and afterwards declined, then the vessel shall be liable for full pilotage rates; and any pilot placed in charge of a vessel by the master shall be entitled to receive in addition to full pilotage rates, the sum of two dollars per diem for each day the vessel may be detained while he is waiting on her, through stress of weather or otherwise. And in case a pilot is taken to sea, the ship shall be responsible for his expenses, unless returned to the port of Sydney. Vessels spoken by a pilot outside of harbour limits or changing ports between Sydney and the ports of Lingan, Glace Bay, and Cow Bay, shall only be liable for inward pilotage at the loading port, unless a pilot be employed in changing ports, in which case full tariff rates will be charged. Pilots delivering orders outside of port limits to vessels to proceed elsewhere shall be entitled to receive full inward pilotage only for such vessels and pilots prevented from delivering orders after being received by them, by reason of the orders being signalled from light stations, shall be entitled to receive full inward pilotage; and if, in any case, another regular pilot belonging to the same port be found in charge, the amount of pilotage collected shall be equally divided between the pilot in charge and the pilot delivering orders. Vessels arriving from sea without being spoken inwards by a pilot shall be subject to half pilotage outward unless a pilot be employed, in which case full outward pilotage will be charged, the half pilotage in this case to be paid into the pilotage fund. Vessels calling for orders and remaining outside of harbour limits shall be exempt from outward pilotage unless a pilot be employed.

The payment of pilotage dues is compulsory in the pilotage district of Sydney and North Sydney.

PILOTAGE RATES.

When inward bound, $2.25 per foot.

And in addition to the above for all vessels propelled wholly or in part by steam, 2 cents per registered ton.

When outward bound, $2 per foot.

And in addition to the above for all vessels propelled wholly or in part by steam, 2 cents per registered ton.

For the removal and mooring of vessels of over 300 tons register, $4.

And where the distance of removal exceeds four miles 50 per cent additional on the above rate.

Removals within a distance of one mile are not compulsory; but when pilots are requested to perform this service the charge is $4.

Steam tug-boats towing one or more barges with cargo, inward, may depart outward after having paid full pilotage for the tug and barges, inward, without paying any outward pilotage except on the tug.

Compulsory pilotage on all vessels over 119 registered tons.

The payment of pilotage dues is compulsory in the pilotage district of Miramichi.

B. N. CALL,
Secretary.

PILOTAGE RATES.

For every foot of water any ship or vessels shall draw at the time, inward or outward bound, in the port of Dalhousie, Benjamin, Beaver point, Nash creek, Jacquet's river, or any loading station east of Dalhousie on the bay of Chaleur, $1.50; port of Campbelltown, $2; Oak bay or any loading station east of same, west of Dalhousie, $2, when ships proceed direct from sea.

Ships bound for Dalhousie, Benjamin, Beaver point, Nash creek, Jacquet river or any loading station east of Dalhousie, calling at any of the said harbours for orders or to discharge ballast cargo or otherwise on ship's account, $1.50; and thence to the said port of loading stations on the bay of Chaleur, 75 cents per foot draught of such ships at the time.

Ships bound for Campbellton, Oak bay or any loading station east of Oak bay and west of Dalhousie, waiting at Dalhousie or any of the outer bay ports to discharge ballast or otherwise on ship's account, $1.50; and thence to the said port of Campbellton, 75 cents; Oak bay or any loading station east of Oak bay, and west of Dalhousie, 75 cents per foot draught of such ship at the time and vice versa.

For removal of any ship, including the properly securing and mooring such ship, the following rates, viz.:—The sum of $1.50 for ships not exceeding one hundred and twenty tons; the sum of $2 for ships over 120 tons and not exceeding 300 tons; the sum of $4 for ships over 300 tons and not exceeding 600 tons; and the sum of $5 for all ships over 600 tons; and when the distance of removal extends four miles, fifty per cent additional to above rates. In addition to above rates all vessels propelled wholly or in part by steam shall pay one cent inwards and one cent outwards per net registered tonnage.

The payment of pilotage dues is compulsory in the pilotage district of Restigouche, N.B.

APPENDIX No. 11.

SABLE ISLAND.

SABLE ISLAND, January 22, 1915.

Agent, Marine and Fisheries,
Halifax, N.S.

SIR,—I beg to submit the following report for the year ending December 31, 1914:—

REPAIRS MADE.

Main Station.—Shingled one side of warehouse roof and made a number of minor repairs, such as renewing doors, etc., to barns and other buildings.
East Light.—Repaired dwelling and barn.
No. 4 Station.—Repaired cow barn.
No. 3 Station.—Repaired cow barn and made storm sashes and doors for dwelling.
No. 13 Station.—Repaired dwelling.

PAINTED.

East lighthouse.
No. 4 dwelling.
No. 3 dwelling.
No. 13 dwelling, two coats each outside.
Superintendent's dwelling inside.
Men's dwelling at Main Station, inside.

BOATS ON HAND.

Main Station.—One (1) life-boat; two (2) surf boats; two (2) dories.
No. 3 Station.—One (1) life-boat; one (1) surf boat.
No. 4 Station.—Two (2) life-boats; one (1) surf boat (new); one (1) dory.
All the above boats are in fairly good condition. Returned old surf boat to Halifax, September 7, 1914, by C.G.S. *Lady Laurier*.

FARMING.

Farming carried on with the usual success: stock killed: three (3) oxen weighing 1,750 pounds; twenty (20) hogs weighing 2,700 pounds.
Stock on hand: 65 horned cattle, 40 trained horses, 4 colts, 6 hogs.

POPULATION.

Main Station:	Superintendent Blakeney and family	5
	Carpenter G. Warnell, cook W. Gill, boatmen W. Mott, M. Mckenzie, C. Cleary, [illegible]. Cleary, C. Blakeney	7
		12

No. 2 Station: Keeper, Coxswain D. Henneberry and family ..		5
No. 3. Station: Keeper, S. Glazebrook and family	4	
Asst. J. Murray	1	
		5
No. 4 Station: Keeper J. Ritcey and family	5	
Asst. E. McGrath, Asst. F. Savage	2	
		7
No. 13 Station: Keeper, A. Northup and family		5
East Side: Keeper, J. Gregoire and family	8	
Asst. L. DeYoung	1	
		9
West Light: Keeper, J. Edwards and family	6	
Asst. J. Edwards, jr.	1	
		7
Total		50

Patrolled for thick weather:—A.M., 38; P.M.,10; total 48 times.

This has been an exceedingly quiet and uneventful season on this island. No known wrecks around it; a few casks of oil and barrels of flour have been picked up along the beach, which marks have proved the most of them drifted from the *City of Sydney,* wrecked off Sambro last March.

During the early part of the haymaking season last summer, we broke the mowing machine, rendering it entirely useless; and would here make an application for a new one.

J. E. BLAKENEY,

Supt. Sable Island.

APPENDIX No. 12.

BOARD OF STEAMBOAT INSPECTION, CHAIRMAN'S REPORT.

OTTAWA, August 26, 1915.

To the Deputy Minister of
Marine and Fisheries,
Ottawa.

SIR,—I have the honour to submit, as follows, the annual report of the Steamboat Inspection Service, for the fiscal year ending March 31, 1915.

STAFF.

I regret to report the death of Mr. William Laurie, inspector of boilers and machinery at Montreal, which took place on November 12, 1914. Mr. Laurie was the oldest of the inspectors of boilers and machinery attached to the department and his services were considered very valuable, he having at various times filled the position of deputy chairman of the board.

Owing to the growth of steamship traffic in the North Western provinces and the inconvenience to the public arising from the fact that the inspector for this district was stationed at Kenora, it was decided to appoint another inspector with headquarters at Edmonton to take charge of the inspection work in the provinces of Alberta and Saskatchewan and the Northwest Territories west of Hudson bay and north of the 60th parallel of north latitude. Mr. John T. Mathews of St. John, N.B., was appointed to this position on October 24, 1914, and after assisting the inspectors at St. John with the winter's work proceeded to Edmonton in February of this year to take up his duties.

Further progress was made with the revision of the rules for life-saving appliances for ships, and after the views of shipowners and inspectors had received consideration a final set of rules known as the "Rules for Life-Saving Appliances for Steamships" was approved by Order in Council, dated November 6, 1914, to come into force April 1, 1915.

Some further consideration was also given to the revision of Parts VII and IX of the Canada Shipping Act, as embodied in Bill 105.

BOARD MEETINGS.

During the year, board meetings have been held to consider questions arising out of the regular work of the steamboat inspection service and also for the consideration of the life saving appliances rules above mentioned.

CASUALTIES.

The following are the casualties reported from the several divisions during the year ending March 31, 1915.

NOVA SCOTIA DIVISION.

On August 19, 1914, the ss. *Miner* was sunk by striking a submerged rock off Scatterie, C.B., and became a total loss. No lives lost.

On September 21, 1914, the ss. *La Have* was burnt to the water's edge off Devil's island, Halifax, and became a total loss. No lives lost.

On September 26, 1914, the ss. *Caxuna,* whilst on a voyage from St. Johns, Newfoundland, to Sydney, C.B., sank off Ferry land, cape Race. No lives lost.

On October 20, 1914, the ss. *Boston* (Norwegian registry), whilst on a voyage to Havre, France, was lost in the North sea by striking a floating mine. No lives lost.

On November 10, 1914, the ss. *Sharon* left Sydney, C.B., for France with a cargo of rails and failed to report. It is supposed that this vessel struck a floating mine. The crew, numbering about 20, were lost.

On December 14, 1914, the ss. *Anita* (Norwegian registry), whilst on a voyage from Halifax to the West Indies with a general cargo was wrecked during a fog on North Caicos island, Turks island. No lives lost.

On January 9, 1915, the ss. *Kilkeel* was sunk by striking Bauld rock off Canso, N.S., becoming a total loss. No lives lost.

NEW BRUNSWICK DIVISION.

Nil.

QUEBEC DIVISION.

On July 12, 1914, the ss. *Canada,* while on a voyage from Campbellton to Montreal stranded at cap Chatte. The vessel was floated on the 22nd and taken to Montreal for repairs.

On September 18, 1914, the C.G.S. *Montmagny,* while on a voyage from Quebec to the gulf of St. Lawrence, collided with the steamer *Lingan* near Grant island and was sunk. Fourteen persons were drowned.

On October 16, 1914, the ss. *Muriel,* while on a voyage from Quebec to Rimouski with a barge in tow collided with the ss. *Batiscan* and sank, becoming a total loss. One man was drowned.

SOREL DIVISION.

On May 24, 1914, the ss. *Berthier* caught fire from some unknown cause and became a total loss. No lives lost.

MONTREAL DIVISION.

On June 13, 1914, the ss. *Rhoda,* while on a voyage from Laprairie to Montreal ran on a shoal and was subsequently dismantled. No lives lost.

On August 5, 1914, the ss. *Aid,* while lying at the wharf at Rockland was burnt to the water's edge, the cause of the fire being unknown. No lives lost.

On October 23, 1914, the ss. *Abitibi,* while running on lake Abitibi struck a rock and sank. No lives lost.

On November 6, 1914, the ss. *Ida E.,* while tied up at the wharf at isle Perrault sprang a leak and sank. One woman, a member of the crew, who failed to take advantage of the warning given was drowned. The boat has since been raised and placed in commission.

KINGSTON DIVISION.

On October 15, 1914, the ss. *Miss Vandenburg,* while lying at her dock at Prescott was severely damaged by fire. The steamer was immediately repaired and replaced in commission. No lives lost.

On November 24, 1914, the tug *Shanley,* while lying at her dock at Kingston was partly destroyed by fire from some unknown cause. No lives lost.

On December 1, 1914, the ss. *Navajo* with a cargo of damaged wheat from the stranded barge *Quebec* went ashore on Main Duck island, lake Ontario, and during the winter became a total wreck. No lives lost.

TORONTO DIVISION.

On June 15, 1914, the dredge *Delver* foundered outside Port Dalhousie, Ont., one of the crew being drowned. The dredge was raised and is now in commission.

On August 6, 1914, the steam yacht *Wanda II* was totally destroyed by fire at Windermere, Muskoka lakes, Ont.

On September 24, 1914, the dredge *Essex* was totally destroyed by fire at Pelee island, Ont.

On November 10, 1914, the steam yachts *Rulo* and *Phœbe* were totally destroyed by fire which originated on the wharf to which they were moored at Gravenhurst, Ont.

COLLINGWOOD DIVISION.

On August 19, 1914, the ss. *Rambler* was burnt at Warner bay, lake Huron. No lives lost.

On August 25, 1914, the ss. *Alva D.* was burnt at the North channel of Huron. No lives lost.

On September 2, 1914, the ss. *Thomas R. Scott* foundered off Lonely island, Georgian bay. No lives lost.

On October 29, 1914, the ss. *Glynn* was burnt in the North channel of lake Huron. No lives lost.

On January 26, 1915, the ss. *City of Midland* took fire while lying at the dock at Collingwood, the steamer is now being repaired. No casualties.

PORT ARTHUR DIVISION.

Nil.

MANITOBA AND NORTHWEST TERRITORIES DIVISION.

On September 9, 1914, the ss. *Mont Cashel* while at her dock at Winnipeg was severely damaged by fire. No lives lost.

On September 12, 1914, the ss. *Grenfell* was totally destroyed by fire at Dunvegan on the Peace river. No casualties.

VANCOUVER DIVISION.

On June 13, 1914, the ss. *Vedder* caught fire when on the Stikine river about 20 miles from Wrangell, Alaska. The fire originated on the upper deck and the vessel burned to the water's edge and sank. No lives lost.

On August 19, 1914, the ss. *Prince Albert,* en route from Massett inlet, Queen Charlotte islands to Prince Rupert, stranded on rocks in Hecate straits. The passengers and crew were saved by the lifeboats but one child died from exposure while in a lifeboat. The vessel was afterwards salved and taken to Vancouver for repairs.

On February 15, 1915, the gasoline launch *B.B.* while being overhauled caught fire and was extensively damaged the interior of the vessel being completely gutted. No lives were lost. The vessel is now undergoing repairs.

On March 12, 1915, the ss. *Sea Lion* stranded on a flat reef in the south entrance of Active pass. The vessel was hauled off on March 21 and taken to Vancouver and docked, where it was found that the keel was badly broken and the hull strained. No lives were lost.

On March 18, 1915, the tug *Alberni,* while assisting the stranded steamer *Sea Lion,* fouled a wire cable which was fast from the *Sea Lion* to the shore, and not being able to disengage quickly the *Alberni* heeled over until she filled, settled quickly by the stern and sank in 20 fathoms of water. No lives were lost.

VICTORIA DIVISION.

On May 23, 1914, the ss. *Princess Maquinna,* while on a voyage from Holberg to Victoria struck the ground in Kyuquot sound, damaging stem and bow plating slightly. The vessel continued her voyage and was hauled out and repaired on her arrival in Victoria.

One June 20, 1914, the tug *Dominion* while manœuvring a vessel in Victoria harbour collided with the ss. *St. Lawrence* cutting into the starboard side below the water line. The vessel was beached to avoid foundering and finally salved and repaired. No damage was done to the St. Lawrence.

On July 19, 1914, the ss. *Princess Patricia,* while leaving Vancouver for Nanaimo collided with a boom of logs in tow of the tug *Freno* damaging her stem and bow plating. She continued her voyage to Nanaimo and proceeded to Victoria where the vessel was docked and repaired.

On August 21, 1914, an oil explosion occurred in the furnace of the boiler of the ss. *Gunhild,* doing irreparable damage to the casing, the explosion being due to non-efficient atomizing of the fuel oil at the burner. No one was injured. The boiler casing has since been renewed.

On August 26, 1914, the ss. *Princess Victoria* proceeding from Vancouver to Seattle, when approaching Point-no-Point, Puget sound, collided with the ss. *Admiral Sampson* outward bound from Seattle, cutting into the port side abreast of after hatch. The engines of the *Princess Victoria* were put slow ahead after striking thus filling the rent and enabling a number of persons aboard the *Admiral Sampson* to save themselves by climbing from ship to ship. Lifeboats and life rafts from the *Princess Victoria* were instrumental in saving 114 lives, 11 persons being lost. The *Princess Victoria* was able to proceed to Seattle and thence to Victoria where she was docked and repaired.

On August 30, 1914, the tug *Lorne* proceeding from Port Hammond to Vancouver stranded on San Juan island, Haro strait. Salvage operations proceeded and the vessel was floated and towed to Victoria in an extensively damaged condition where she is now laid up pending decision as to repairs or disposal.

On September 7, 1914, the ss. *Otter,* lying alongside the C.P.R. wharf at Victoria caught fire and was extensively damaged. Repairs have since been effected and the vessel made ready for service.

On October 27, 1914, the ss. *Princess Royal* on a voyage from Granby bay to Vancouver and proceeding through Sabine channel, struck the shore of Jedediah island, damaging her forefoot and remaining aground for 3 hours when she backed off and proceeded to Vancouver and Victoria. The vessel was repaired at the latter place and replaced in commission.

On November 12, 1914, whilst on a voyage from Port Alberni to Victoria the ss. *Tees* struck in Alberni canal, damaging stem and bow plating. The vessel proceeded to Victoria with water in the fore-peak, the necessary repairs effected and the vessel replaced in commission.

On December 18, 1914, the ss. *Venture* whilst approaching the wharf at Vancouver was run into by the *Princess Patricia* and slightly damaged on the starboard side above the water line. Temporary repairs were effected and the vessel resumed service until the end of the season when permanent repairs were carried out. The *Princess Patricia* sustained slight damage only.

The following is a statement showing the total number of inspections made, fees collected, during the period covered by this report:—

TABLE showing the Number of Inspections made, Fees collected, etc., during the Year ending March 31, 1915.

Division.	Number of Inspections Made with Gross Tonnage of Vessels Inspected.				Number of Vessels not Inspected with Gross Tonnage. It has been found desirable in preparing the appendix to this report to re-arrange the tables so that the information contained therein may be more readily available. Tables will be found arranged as follows:—

(1) Steamships inspected throughout Canada, arranged alphabetically.

(2) Dredges, drill boats, grain elevators, etc., inspected, arranged according to districts.

(3) Passenger barges towed, which, having no machinery aboard, are inspected by Hull inspectors only.

(4) Steamships not inspected.

(5) Steamships added to the Dominion.

(6) Steamships lost, broken up, etc.

(7) Inspection of ships' tackle, summary only.

(8) Certificates of competency granted to engineers, with grade of certificates issued.

(9) Temporary engineer certificates.

The appendix to this report will be printed separately as a supplement.

I have the honour to be, sir,

Your obedient servant,

T. R. FERGUSON,

Chairman.

APPENDIX No. 13.

HARBOUR COMMISSIONERS REPORT OF MONTREAL, QUEBEC, TORONTO, THREE RIVERS, VANCOUVER, PICTOU, AND BELLEVILLE.

REPORT OF THE HARBOUR COMMISSIONERS OF MONTREAL FOR THE YEAR 1914.

MONTREAL, February 15, 1915.

To Hon. J. D. HAZEN, K.C., M.P.,
Minister of Marine and Fisheries,
Ottawa, Ont.

SIR,—In compliance with section 51 of the Commissioners' Act, 57-8 Victoria, chapter 48, the Harbour Commissioners of Montreal herewith respectfully submit their annual report of operations for the year ended December 31, 1914, embracing a full account of all moneys by them received and disbursed and describing the improvements made and under way.

The year of 1914 will be remembered not only on account of the general feeling of uncertainty and extreme business conservatism, due to the financial depression that prevailed during the early months of the season, but particularly by the outbreak of hostilities in the Old World and the gigantic struggle still being waged on the battlefields of Europe.

Notwithstanding this, it is most gratifying to be able to place on record the steady progress made by the harbour of Montreal during the season which, from a constructive and financial point of view, has fulfilled the expectations of the commissioners.

NEW LOAN OF $9,000,000.

The money voted for the harbour improvements, outlined under the general scheme adopted in 1909, having been about expended in the fall of 1913, Parliament, early in the spring, voted the capital sum of $9,000,000, under the Act 4-5 George V, chapter 41, in order that no delay might be caused in the work of improvement of the terminal facilities of the harbour and to provide for the construction of such additional facilities as are necessary to properly equip the same.

The commissioners have devoted much time and thought to a careful study of the different epochs in the history of the harbour, learning therefrom the fact that in almost every case the schemes or projects for the development of the harbour, adopted at the various steps in its advancement, have been found, before completion, inadequate, and that further works were necessary to cope with the ever-increasing requirements of its commerce and the railway and commercial growth of the country, in order to preserve the prestige of handling Canadian business through the port.

INSPECTION OF HARBOUR OF MONTREAL BY H. R. H. THE DUKE OF CONNAUGHT.

A wish having been expressed by the Governor General to inspect the harbour, the commissioners on the 23rd April had the great honour of showing His Royal Highness over the works of improvement being carried out in the harbour, in all of which he manifested much interest.

SHIPPING.

The first vessel to arrive was the ss. *Corsican,* which steamed into the harbour on the 29th April, the commander, Captain Hall, being presented with the customary token.

In spite of the fact that upon the declaration of war many of the regular liners were requisitioned by the Dominion and Imperial Governments, and several lines automatically ceased their connection with the port, the season has nevertheless been a banner one, ninety-six more sea-going vessels arriving than last season, and the tonnage of ocean and inland vessels showing an increase of 650,455 tons.

To meet the withdrawing of the regular liners, many of the shipping companies chartered a large number of vessels, and diverted others from American ports to Montreal.

On the 21st August there were as many as 56 sea-going vessels in port, and for weeks after, following the outbreak of war, an average of forty vessels, caused by the difficulties of exchange and high rates of war risks. The situation, however, soon adjusted itself, through British command of the sea.

The usual statements are hereto appended, showing:—

1. The number and tonnage of all vessels.
2. Classification of transatlantic vessels.
3. Classification of vessels from the lower St. Lawrence and Maritime Provinces.
4. Number and tonnage of sea-going vessels and their different nationalities, also the number of men that manned the vessels.
5. The opening and closing of navigation, the first arrival and last departure of vessels and the greatest number in port at one time.

Included in the above statements are 224 tramp vessels, the arrival of which in the port has in a large measure been responsible for the record established. These vessels were employed as follows:—

3	vessels	took	complete cargoes of	flour.
2	"	"	"	transports
3	"	"	"	horses
4	"	"	"	hay
173	"	"	"	grain
39	vessels	took	mixed cargoes.	

With such an expansion or increase in tonnage as is shown in the following statement of the shipping of the port, it is hardly necessary to emphasize the necessity of building, with all vigour, additional berthing accommodation to keep pace with the continual increase of shipping demands:—

1895	2,013,103	tons
1900	3,000,000	"
1905	4,725,607	"
1910	6,561,021	"
1914	9,044,457	"

Every American port is getting ready to cope with the trade resulting from the natural growth of world commerce, consequent upon the normal increase of population and potentially from the large amount of entirely new business which inevitably will result from the opening of the Panama canal.

No sentiment is attached to the distribution of trade. If natural and artificial advantages are sufficient, if freight rates are favourable and suitable, if wharfage accommodation can be had, one port is absolutely as good as another in the eyes of the practical steamship manager. Montreal has the natural advantages, enjoys a very

substantial preferential inland water and railroad freight rate over most of her rivals, and only the lack of accommodation will prevent her from reaping a large reward in the growth of her trade.

NEW STEAMSHIP SERVICES.

At the beginning of the season the Hamburg-American Line leased shed No. 47, Tarte pier, established a fortnightly service between Montreal and Hamburg, which was discontinued upon the outbreak of war.

The Roth Line also inaugurated a fortnightly service between Montreal and Antwerp.

The C. P. R. liner *Missanabie* and Cunard liner *Alaunia* entered the St. Lawrence service in Montreal, and the steamship *Aurania*, now being completed by the Cunard Line for the Canadian trade, is expected upon the opening of navigation, 1915.

The Sincennes-McNaughton Co. also added to its fleet four tugs.

HARBOUR MASTER'S DEPARTMENT.

On the 8th of June, Capt. L. A. Demers resigned the position of harbour master, to accept that of Dominion Wreck Commissioner, and was succeeded by Capt. T. Bourassa, deputy harbour master. Capt. Frank J. Symons, R.N.R., was appointed deputy harbour master.

POLICE DEPARTMENT.

This department, now in its second year, regulates the traffic on the wharves, maintains order, and protects life and property within the limits of the harbour.

The appointment of a practical chief of police was accomplished by the engagement in March of Capt. James Coleman, under whose direction the department has been fully organized and increased.

Twenty constables were sworn in on the 15th April, upon which date was commenced the patrolling of that portion of the harbour between the entrance of the Lachine canal and the Sutherland pier, a distance of 3½ miles. On the declaration of war, the staff was increased to thirty-six, in addition to which Dominion police established a force of forty constables. Working in harmony with the harbour force, and aided by a large number of the city constables, a system was inaugurated whereby access to the wharves was prohibited except by special pass. Armed constables guarded every entrance, as well as the elevators and ships, every possible precaution being taken to ensure their safety, so as to permit of a continuance of exports to the Motherland.

During the season of navigation, the police attended the arrival and departure of every passenger vessel, and it is a pleasure to be able to state that not a single piece of baggage was reported to have been stolen from passengers, or from the different transfer agents, and not an assault or robbery with violence was reported to have been committed within the harbour.

As the primary object of the police is the prevention of crime and protection of life and property, the efforts of the constables have in that direction been very successful, as also in the regulating of traffic at the different entrances, with a view to avoiding accidents, not a single one having occurred on the railway tracks during the season, notwithstanding the free movement of trains at all hours.

In order to provide additional protection to life and minimize drowning accidents, a course of instruction in first aid was given to the officers and constables, all of whom are essentially first-class swimmers. One hundred and twenty-four persons were arrested and brought before magistrates and recorders for different minor offences during the season.

RAILWAY TRAFFIC DEPARTMENT.

Winter Operation.—During the winter season of 1913-14 but one of the high level sheds was used, the C. P. R., as in previous years, occupying shed No. 8, King Edward pier, as a distributing and sorting station for import freight from the winter ports. Sheds Nos. 10 and 11, used in the previous years by the Canadian Northern and Grand Trunk railways, respectively, owing to the general trade depression, were unoccupied, and the consequent diminution in railway traffic was manifested to a great extent, the winter season showing a decrease of 30 per cent.

Car Handling.—The regular traffic of the season of navigation began in the latter days of April, and the returns of cars handled for the year are most gratifying, the loss in the winter season, noted above, having been made up by the end of the year.

Following the outbreak of war, traffic conditions became deranged, the regular import and export business, in a large measure, giving way to the handling of horses, hay, wagons, and other war stores for the British and French Governments.

Passenger Traffic.—In connection with the mobilization of the first Canadian contingent, more than thirty passenger trains, with officers, men, and equipment, arriving in Montreal via the G.T.R., were transferred over the harbour terminals to section 46, and there delivered to the Canadian Northern for furtherance to the Valcartier camp. Not the slightest mishap or delay occurred in the operating of these trains, and during this period the suitability of the arrangements in the terminals for handling passenger business direct from cars to steamers, and vice versa, was also fully demonstrated.

Coal Transportation.—A new line of traffic was developed during the summer by this department in the transporting of coal from the coal towers at section 35 to the various industries situated along the harbour front, having direct rail connections with the harbour tracks. Fifteen 50-ton all-steel dump coal cars of the most improved type, made in Canada, were purchased for this service early in the summer, and proved very satisfactory, there having been conveyed no less than 40,000 tons. As an adjunct to this service, the commissioners had an up-to-date 150-ton railway track scale installed at section 48, over which nearly 2,000 cars were weighed. This scale has also filled a long-felt want in providing means of obtaining an accurate check of the carload shipments of materials used in the harbour works. Many favourable comments were received from the industries served with coal in the said manner, the operation having saved them considerable in cartage and handling.

Locomotive Repairs.—The general repairs to the locomotives were done at the engine-house during the winter in an efficient manner. The usefulness of these shops is increasing as the scope of the work carried on is being extended. All work on the motive power and rolling stock is now being done within these works at a lesser expense than when given out by contract.

Railway Traffic—New Sheds.—Before sheds Nos. 24 and 25 were completed they were taken over by the Department of Agriculture for the pressing of hay for the British Government, since which the railway traffic to these sheds has been exceedingly heavy, and ample opportunity furnished to prove the advantages of the sheds for railway work. The track layout, giving access to the sheds from both ends and on the river side, is an excellent feature.

During the season it has been shown that all railway traffic, irrespective of its nature, can be operated with despatch and efficiency, which in itself is the precursor of constant development in new lines of traffic, of which but the beginning was made this year.

Extension of Railway.—Late in the fall the extension of the railway embankment from the Racine pier eastwards was begun. As wharves are built between Longue Pointe and Pointe aux Trembles, thus extending the harbour front, the railway must follow, as a necessary integral part of the same. It is hardly necessary to call attention to what the building of the harbour railway means from a factory or industrial standpoint. An industry located on the line of the harbour railway not only enjoys the convenience of having direct connection with every avenue of transportation in and out of the city, but is also in an enviable position in so far as freight-rate competition is concerned. An industry located on the railway, miles from the city where the land is cheap, is in the same position, as far as the development of its business is concerned, as if it occupied a location on the river front, opposite the heart of the city. The development of the railway makes toward a reduction of the handling and distributing charges in the port, thus offering advantages to industries to locate along its lines, and assisting them in competing in the markets of the world.

HARBOUR BOUNDARY.

Early in the season, Mr. Jos. Rielle, Q.L.S., was instructed to prepare *procés verbaux,* defining and determining the boundary line between the harbour property and that of the adjoining proprietors of that portion of the harbour extending from Longue Pointe church to Bout de l'Isle, as enacted by 8-9 Edward VII, chapter 24, 1909. The *procés verbaux* have all been prepared and signed for and on behalf of the commission.

CONVENTION AT BALTIMORE.

On the 8th, 9th, and 10th September, the secretary, Major David Seath, represented the commissioners at the third annual convention of the National Association of Port Authorities of the United States, held at Baltimore, Maryland.

As the purpose of this association is to exchange information relative to port construction, maintenance, operation, organization, administration, and management, and to formulate recommendations for the standardization of port facilities, as also for the encouragement of waterborne commerce, much valuable data were gleaned from the twelve papers presented with regard to the systems employed at other ports.

The most important feature of the convention was the changing of the name of the association to that of the American Association of Port Authorities, in order to admit membership of those engaged in harbour work in Canada and Mexico.

MOFFAT'S ISLAND.

The commissioners have acquired, by authority of an Order in Council, Ile à la Pierre, commonly known as Moffat's island, near St. Lambert, from the Grand Trunk Railway Co. In order to lessen the St. Mary's current, and provide a channel between St. Helen's island and the south shore, the removal of part of Moffat's island is necessary for the purpose.

INSPECTION OF ST. JOHN HARBOUR.

In the latter part of December, on the invitation of the Minister of Marine and Fisheries, Commissioners Robertson and Labelle devoted two days to the inspection of the development being carried on in the harbour of St. John, N.B., the sudden illness of the president preventing him from accompanying his colleagues.

Every courtesy was accorded them to get first-hand knowledge of the existing equipment of the port, and to study the plans prepared for its future development, which will provide exceptional facilities to take care of the business which should be diverted to that port during the winter months, when navigation at Montreal ceases.

Trade captured by the port of Montreal during the summer should be handled through St. John or Halifax during the winter, and not be permitted, through lack of enterprise or facilities, to be diverted to American ports.

It is hoped that the visit will result in closer co-operation between the harbour of St. John and the harbour of Montreal in an endeavour to secure and retain Canadian trade for Canadian channels.

WAR CONDITIONS.

Immediately after the outbreak of the war, the commissioners devoted considerable time and attention to facilitating the forwarding of supplies to the Mother Country and the Allies, as well as the Belgian relief gifts. Fortunately, the new sheds Nos. 24 and 25 were approaching completion and were forthwith placed at the disposal of the Government for the pressing and shipping of hay, which was carried on day and night. A railway yard and special railway tracks were immediately installed to facilitate the quick despatch of the same.

During the season of navigation the hay was pressed and loaded directly into ships alongside the sheds; since the closing of navigation, the hay is taken as it comes from the farmers, pressed and loaded into cars on the other side of the sheds and shipped directly to the Canadian winter ports. At the present time, hay, compressed from the farmer's bale of 18 cubic feet to the shipping bale of 6 cubic feet, is being shipped to the seat of war, at the rate of twenty or thirty cars daily. The advantageous sale of this hay, the work of compressing, the switching in and the switching out, are all of great benefit to the Montreal community.

The immense gifts of flour from Canada, and foodstuffs from the various provinces, horses and other supplies were shipped through the sheds of the various steamship lines, taxing their capacity to the utmost.

These most important features of the season's record resulting from the changes due to the war, commencing at midsummer, caused no little congestion and anxiety. Harbour and trade conditions were suddenly changed. Shipping programmes were wiped out, and freight contracts upset. Until the silent but effective command of the seas was assured, business in the harbour was greatly disturbed. Fortunately, however, the measures taken to restore trade were so speedily effected and so successful that shipping immediately recommenced and, largely owing to the adaptive facilities in the port of Montreal, the required changes to meet new conditions of shipping and business were speedily made.

CANADIAN PATRIOTIC FUND.

A deserving record is desired to be made of the hearty response given by the officials and employees of the commission, who, by entirely voluntary subscription, contributed the munificent sum of $2,862.27 to the above fund.

CEDING OF MOREAU AND MARLBOROUGH STREETS.

In order to provide for the rapid increase in harbour business, and the addition of further railway facilities, the commissioners some time ago acquired the property situated between Notre Dame street and the harbour boundary, for a distance of about 1,290 feet, fronting on Notre Dame street, starting from Desery street west.

As it is no longer necessary to provide access to the harbour by way of Moreau and Marlborough streets, inasmuch as the purchase of the above property extends the harbour up to Notre Dame street, by deed of agreement executed on January 9, 1914, the city of Montreal ceded to the Harbour Commissioners that portion of Moreau and Marlborough streets between Notre Dame street and the harbour boundary, the commissioners undertaking to construct a subway at Aylwin street and to pave the same to the city line.

The following summary and comparison show what increased facilities have accomplished for the harbour of Montreal:—

	Tons.
Tonnage of Vessels—	
1895	2,013,103
1900	3,006,000
1905	4,725,607
1910	6,561,021
1914	9,044,457
Receipts on Revenue Account—	
1895	$ 275,453 75
1900	287,069 18
1905	377,492 41
1910	836,115 17
1913	1,361,964 06
1914	1,466,364 27
Traffic Department—Cars Handled—	
1907	70,856
1908	60,266
1909	75,636
1910	79,466
1911	93,859
1912	112,911
1913	114,531
1914	114,449
Grain Handled at Commissioners' Elevators—	Bushels.
1906	944,321
1907	1,078,289
1908	8,661,350
1909	11,691,071
1910	21,526,727
1911	21,007,164
1912	25,561,655
1913	43,349,291
1914	62,318,814

EXPORTS OF GRAIN, 1914.

It is to be noted in comparing the following figures that at Montreal the season of navigation is seven months, as against twelve months at the other ports:—

	Bushels.
Montreal	75,085,432
New York	64,532,190
Baltimore	45,000,000
Galveston	35,821,506
New Orleans	34,624,000
Philadelphia	23,294,252
Boston	16,555,340
Portland	9,500,000
St. John, N.B.	6,269,000
Newport News	2,326,620

PRINCIPAL EXPORTS OF PRODUCE FROM THE PORT OF MONTREAL.

	1913.	1914.
Wheat	33,706,089 bushels.	61,484,474 bushels.
Oats	7,297,570 "	8,536,589 "
Barley	5,218,390 "	4,552,273 "
Rye	210,804 "	335,030 "
Flaxseed	7,832,780 "	177,066 "
Flour	2,464,913 sacks.	2,762,139 sacks.
Meal	86,580 "	36,463 "
Eggs	.....	113,339 cases.
Butter	1,728 boxes.	7,228 boxes.
Cheese	1,571,502 "	1,482,958 "
Lard	579,739 bbls.	468,483 bbls.
Hams and bacons	9,893 pkgs.	4,180 pkgs.
Meats	112,725 lbs.	96,039 lbs.
Apples	209,926 bbls.	175,597 bbls.
Hay	261,719 bales.	495,966 bales.

Summarized Statement of Operations for the Year ended December 31, 1914.

Items.	Totals.	Grand Totals.
Receipts on Revenue Account.	$ cts.	$ cts.
Collector of Customs:		
Wharfage dues on imports	217,642 11	
Wharfage dues on exports	134,437 12

FINANCIAL OPERATIONS.

From the summarized statement of operations, hereto annexed, it will be seen that the total amount received on revenue account for the year 1914 was $1,466,364.77, being an increase of $104,400.21 over the previous year, the largest portion of which increase is attributable to the operation of grain elevators Nos. 1 and 2.

The disbursements on revenue account, in 1914, were $1,459,455.08, of which $785,642.97 was for interest, being an increase in disbursements of $133,818.72 over the previous year.

There was received from the Dominion Government on loan, $2,032,000 under the Act 1, Edward VII, chapter 9, and Act 2, George V, chapter 35, on account of expenditure on capital account, and also the sum of $200,000 to retire debentures, series "C," held by the public.

The disbursements on capital account, in 1914, were $1,758,368.83. The cost of the principal works of improvement carried out are as follows:—

Harbour dredging	$229.808 22
Real estate	39,469 10
Wharves, piers and basins	745,062 04
Plant	83,663 42
Shops and buildings	24 573 00
Railways	115,236 44
Permanent sheds	345,246 56
Electric hoists, etc	31,878 10
Grain elevators	143,431 95

The debenture debt of the corporation on December 31, 1914, was $23,554,000, of which $1,472,000 is to the public, and $22,082,000 to the Dominion Government. The average rate of interest on these debentures is 3·344 per cent.

ENGINEERING DEPARTMENT.

The Engineering Department of the Harbour Commissioners of Montreal is organized so as to have charge of the varied and important branches as follows: harbour construction, maintenance and operation.

The construction work is almost universally carried on departmentally. The steady growth of the harbour and the constant yearly effort to keep pace with the commerce has resulted in the commissioners having a splendid plant for the peculiar construction required. Dredging plant, tugs, derricks, and a shop for repairs, are all kept up-to-date, and the organization for construction is capable of dredging and placing in the works some two or three million cubic yards of excavated material; of building half a mile of cribwork and concrete quay walls of a height from the foundations to the cope of 60 feet; of building fifty thousand cubic yards of concrete, constructing railways, walls, sheds, culverts, and, in fact, almost every phase of port construction.

CONSTRUCTION PROGRAMME, 1914.

This department has, during the year, carried out the following works:—

The improvement and extension of harbour railway tracks.

The continuation of construction of new Victoria pier and Market basin.

The continuation of construction of bulkhead high-level wharves on the river front, eastwards from Victoria pier.

General dredging for widening and deepening of basins and berths.

Dredging of channels for the amelioration of St. Mary's current.

Paving and laying railway tracks on the wharves.

The continuation, almost to completion, of improvements resulting in the Floating Dock basin and site for shipbuilding and repair yard.

The construction and improvement of harbour facilities, such as hoists, flood gates, bridges, subways and freight yards.

Additions and improvements to Harbour Commissioners' construction plant.

The construction of an industrial wharf at Pointe-aux-Trembles.

The construction of addition to grain elevator No. 1.

The construction of a new subway to the harbour at Aylwin street.

The construction of two transit sheds, Nos. 24 and 25.

The maintenance of berths and channels, of wharves, sheds, buildings, roadways, water service, cleaning of wharves and general repairs.

The operating of floating crane, electric hoists, and the construction and maintenance of industrial connections with the harbour, were all carried on during the season with an even greater measure of success than usual.

The construction season resulted in economical work, the price of materials being lower than the average, and weather conditions were favourable, the low water being advantageous for construction work.

GRAIN ELEVATOR SYSTEM.

The facilities for the storage and handling of grain in the port of Montreal are not only one of the most important in connection with the harbour, but were most successful during the operating season.

In 1907, the capital expenditure by the commissioners, for the storage and handling of grain, amounted to $1,568,534.76. In that year, the total quantity of grain handled amounted to 1,078,289 bushels. The revenue did not pay the operating expenses and the maintenance and interest charges had to be made up from other sources.

During the season of 1914, when the capital expenditure on the harbour grain-handling facilities amounted to $5,380,000, the total quantity of grain handled to December 31 amounted to 62,318,814 bushels.

With this large tonnage for handling, and with the revenue derived from storage of grain, the total returns resulting from the Harbour Commissioner' plant for the storage and handling of grain during the season will be sufficient to pay for not only interest on the buildings and operation, but also for upkeep.

In connection with the elevator system, the difference between the failure of 1907 and the success in 1914 is one of the most successful lessons to be learned in port design. The elevator in 1907 had been completed for three or four years; it was considered the most up-to-date and efficient elevator possible to build, and it was located in the best part of Montreal harbour. Ocean ships requiring to take grain, however, were required to move from their berths to the elevator for their cargoes. This resulted in loss of time, in removing of all gangways and in expenditure for pilotage, towing, etc. As the margin between one method of grain handling and another on a large tonnage of grain is very slight, the grain trade did not appreciate the Harbour Commissioners' elevator up to that date.

The construction of the large system of transit sheds, with grain conveyors to each berth and the organization of a very efficient operating staff, has, in a few years, effected a great change, and the increase of the Harbour Commissioners' share in handling of the Canadian grain trade in 1914, to an amount sixty times greater than it was seven years ago, is a remarkable record.

The investigations made by the harbour officials in April, 1914, as to the conditions and cost of grain handling in European ports, as compared with Montreal, resulted in information very favourable to the Canadian port.

In the port of London it was found that all construction costs, both material and labour, in connection with elevators are lower than in Montreal. Operating costs.

such as wages and supplies, were cheaper in London than in Montreal. The only item cheaper in Montreal than in London was power.

A comparison of the tariffs regarding storage and handling of grain resulted as follows:—

Harbour Commissioners of Montreal—Working out (shovelling), elevating, weighing, storage for twenty days, weighing and delivery by conveyors into ocean ships, 8-10 cent per bushel.

Port of London Authority—Working out, receiving from ship, weighing at delivery and delivering within fourteen days, 4s. 4d. per ton, or 2⅘ cents per bushel.

In addition to the very great difference in favour of Montreal, regarding tariff charges, the storage period is longer in Montreal, and the advantage in having ocean vessels receive their cargoes at their ordinary berths is much more favourable to Montreal.

OPERATION OF GRAIN ELEVATOR SYSTEM.

Storage and handling of Grain, 1906 to 1914

The total quantity of grain handled by the Harbour Commissioners' elevator system, exclusive of the grain handled at the Grand Trunk and other local elevators, shows what improved facilities have accomplished:—

Year.	Total quantity of grain received or transferred. Bushels.
1906	944,321
1907	1,078,289
1908	8,661,350
1909	11,691,071
1910	21,526,727
1911	21,007,164
1912	25,561,655
1913	43,349,291
1914	62,318,814

This has been handled as follows:—

At Grain Elevator No. 1—	
1906	944,321
1907	1,078,289
1908	8,661,350
1909	11,691,071
Year.	
1910	14,906,569
1911	13,849,475
1912	16,179,503
1913	15,554,282
1914	28,477,151
At Grain Elevator No. 2—	
1912	2,346,930
1913	20,819,055
1914	29,400,308
By Floating Elevators—	
1910	6,620,158
1911	7,157,689
1912	7,035,217
1913	7,459,933
1914	4,441,355

The operation of the elevator system during the season of 1914 may be given as follows:—

Elevator No. 1—

Total storage capacity in bushels, 2,500,000.
First vessel unloaded, April 30, 1914.
Last vessel unloaded, November 21, 1914.
Total receipts, 28,477,151 bushels.
The above amount of grain was elevated from 96 barges and 398 steamers, a total of 494 vessels.

Delivery was made as follows:—
By conveyors, 27,635,810 bushels.
To cars, 94,488 bushels.
To teams, 47,344 bushels.
By bags, 46,637 bushels.
In store at end of season, 899,782 bushels.

Elevator No. 2—
Total storage capacity in bushels, 2,600,000.
First vessel unloaded, April 29, 1914.
Last vessel unloaded, December 7, 1914.
Total receipts, 29,400,308 bushels.
By water, 21,057,012 bushels, taken from 92 barges and 304 steamers, or 396 vessels.
By cars, 8,343,296 bushels, unloaded from 5,759 cars.

Delivery was made as follows:—
By conveyors, 25,184,357 bushels.
To cars, 1,521,934 bushels.
To teams, 1,051,771 bushels.
By bags, 1,498,879 bushels.
In store at end of season, 1,296,523 bushels.

Floating Grain Elevators—
Total amount grain transferred, 4,441,355 bushels.
Six floating elevators were operated during the season.

Grand Total grain handled in 1914, 62,318,814 bushels.
Total grain handled in 1913, 43,349,291 bushels.
Increase over 1913, 44 per cent.

Some of the features of note regarding the grain trade in Montreal harbour during 1914, were the receipt of a cargo of corn from the Argentine Republic, the shipment of Canadian wheat to New Zealand, and the receipt of Canadian grain to the amount of about 1,500,000 bushels, re-shipped from Buffalo elevators. The corn was unloaded by one of the marine legs at elevator No. 2, the first time these marine legs were ever used in an ocean ship. The wheat going to New Zealand was bagged before shipping. The grain coming from Buffalo, part of which had wintered in the Buffalo elevators, was re-shipped and sent for export through the port of Montreal, and may be taken as a distinct approval of Montreal harbour facilities.

The harbour elevators were seriously congested in May and June and again in November, and at one time about thirty vessels were waiting to unload, containing approximately 1,500,000 bushels.

Although this large amount of grain, amounting to between one million and a half and two million tons, was handled by the Harbour Commissioners' elevator system, it was not successfully accomplished and delivered on long lengths of conveyor belts, in the complicated manner of grain shipments, without great care on the part of the elevator staff and a heavy expenditure in wages and operating power.

The regular number of men employed at elevators Nos. 1 and 2, on the conveyors and on the floating elevators, not including shovellers, was 125. The maximum requirements of electric power for operating the elevator system amounted to 5,570 horse-power.

No serious accident occurred to the plant during the summer, although the wear and tear of working day and night for about thirty weeks will require a large amount of overhauling, repairs, and renewals during the winter.

At the close of the season, the elevators contained 2,196,305 bushels of grain, subject to storage or delivery, as required.

Grand Trunk Railway Elevator.—In addition to the Harbour Commissioners' elevator, the Grand Trunk Railway Company own and operate elevator "B" and annex, between Windmill point and Lachine canal basin. This elevator is built upon a site leased to the company for a period of forty years. The tariff of charges, which is the same as applies at the Harbour Commissioners elevators, before becoming effective, requires to be approved by the Harbour Commissioners.

The storage capacity of elevator "B" and annex is 2,150,000 bushels, and there were received during 1914, 20,538,460 bushels.

FURTHER STORAGE REQUIRED.

After completion of the addition to elevator No. 1, giving the Harbour Commissioners' elevators a storage capacity of 5,100,000 bushels, at a total cost, including working and storage elevators, marine tower, jetty, and marine towers, conveyor galleries and conveyor equipment, amounting to $5,380,000, it was expected that with the Grand Trunk elevator and its addition, also completed in 1913, the grain trade in the port of Montreal could be taken care of without undue congestion or serious delays.

In spite, however, of this increase in storage capacity, completed in 1913 to the amount of 45 per cent, the grain storage capacity in the port of Montreal was completely filled up fifteen days after the opening of navigation, and although unprecedented shipments were being made, the congestion referred to above amounted to from fifteen to thirty lake grain vessels waiting to unload during two months of the season of 1914.

The commissioners immediately considered the question of a further addition to the storage capacity of the Montreal elevators. The year was not favourable for expenditure on new work, but the trade was very insistent.

After careful study, it was decided to make a further addition to elevator No. 1, and the west extension was designed on lines similar to the addition completed a year ago, and to be, in fact, a continuation westwards of the same structure. It was designed as large as the space in this part of the harbour would permit, and according to the plans will have a capacity, when built, of 1,500,000 bushels, which will give this elevator a total capacity of 4,000,000 bushels.

Owing to the filled ground in connection with all Montreal harbour improvements, and the high elevation of the wharves at low water, the founding of elevators in Montreal harbour is an expensive proposition. This is, however, much more than made up for by the excellent situation in connection with the harbour distributing and conveyor system, and representations were made to the commissioners that they would be well advised to build all the additional storage room possible at this site.

Plans and specifications of this west extension have been completed, and the commissioners are making preparations for the early commencement of construction, so as to have this additional elevator capacity in the port of Montreal ready for operation as early in 1916 as possible.

THE IMPROVEMENT AND EXTENSION OF THE HARBOUR RAILWAY TRACKS.

To make the port of Montreal the best possible terminal connection between the transcontinental railways systems of Canada and the North Atlantic steamships, the shore area of the harbour has been designed as a convenient railway terminal. The railway tracks being operated directly by the commissioners, such supervision can be made of traffic as to permit of extensive shunting and to give convenient access for railway freight to all points on the wharves at all hours, day or night.

The Grand Trunk and the Intercolonial railways connect with the harbour front at its extreme upper or westerly end. The Canadian Pacific and the Canadian Northern railways reach the harbour towards the lower or eastern end.

The large harbour transit sheds, otherwise idle during winter, are very well adapted for the handling and delivery of steamship freight by rail from winter ports.

The railway terminals of the commissioners which are being developed for ocean railway traffic concurrently with the increased facilities being constructed for shipping, have been considerably extended during the season of 1914.

VICTORIA PIER AND MARKET BASIN.

In the scheme of harbour extensions, commenced in 1910, every consideration was given not only to the enlargement of steamship accommodation but also to give additional and convenient accommodation to the important fleet of river and ferry steamers.

It was recognized that the river steamers, which do a tremendous passenger and market traffic, should have a location in the harbour convenient to the centre of the city and to the Bonsecours market.

The construction of this large pier in the very centre of the congested harbour district is one of the most serious matters occupying the attention of the engineering department. Every effort is made to advance the work without undue cost and also not to interrupt the immense traffic which is carried on during the seven months of the navigation season.

Up to the close of 1913, the outer part of the old low level Victoria pier was still used, although the new work of construction had almost surrounded it, connection being made to the old part of the wharf by a bridge. At the close of navigation last year the bridge was removed, and on opening of navigation, 1914, the work of the removal of the balance of the old Victoria pier by dredging was commenced.

The construction programme was continued during the season, and 300 feet of high-level wall was completed, and 1,200 feet completed to low level.

Unusual difficulty was encountered in constructing this work owing to the depth of water and variability of currents.

PERMANENT TRANSIT SHEDS.

Sheds Nos. 24 and 25.—On the completion of the bulkhead wharf, below Victoria pier, from Beaudry street tunnel, eastwards, giving a bulkhead width of 250 feet, sheds Nos. 24 and 25 were designed.

These new sheds are of the Montreal Harbour standard steel frame and reinforced concrete slab type, with provision for the installation of a grain conveyor system on the river side of the shed.

Shed No. 24 at the head of the inclined ramp is suitable for vessels requiring partial shed accommodation, at the same time giving ample berth space for any size of ship.

The dimensions of these sheds are as follows:—

Shed No. 24, 264 feet by 105 feet.
Shed No. 25, 484 feet by 105 feet.
The clear head-room throughout is 14 feet.

The upper floor is designed to carry a superimposed or live load of 600 pounds per square foot.

Owing to the location of these sheds, the foundation was designed to withstand any unusual ice shove which might be possible in this locality.

The foundations of the sheds were practically completed in 1913, and the balance of the piers and the shed structures were completed during the season of 1914.

Railway tracks have been laid both in front and at the city side of the sheds, and fireproof offices for Customs, superintendents, clerical staff, etc., have been provided, and everything necessary installed to make these sheds the most complete in Montreal harbour.

Two thousand tons of structural steel were required in building these sheds, and almost as soon as the roof was on, the sheds were taken over by the Imperial Government, and have been used day and night since that day.

HIGH-LEVEL WHARVES, SECTIONS 24 TO 27.

Part of the old low-level quay wall, extending from the low-level Market basin at Berri street, eastward, was widened and strengthened and rebuilt on a 4 per cent grade, from elevation 107 up to elevation 119, standard high level. From the top of the grade the quay wall was continued eastward. The portion of this work, of which the concrete quay wall had been constructed to half level in 1913, was completed. A further extension of cribs was added during the season of 1914 and the concrete quay wall built up to half level. The refilling behind these walls was carried out to the full height and anchor blocks and tie rods completed.

DRY DOCK SITE.

The dry dock site in the eastern division of the Montreal harbour required the construction of about 2,500 feet of standard crib and concrete quay wall having a total height of about 60 feet. The docking basin, 500 feet long by 1,000 feet wide, was dredged to a depth of 30 feet at the quay walls, and to 50 feet in the portion required for sinking the floating dock.

The channel approach required the dredging of an entrance of about 1,000 feet wide.

Thirty acres of filled land were formed for the shipyard, and about 6 acres in addition for the harbour right of way for harbour tracks and roadways.

The total amount of filling required for this work was 1,850,000 cubic yards, measured in situ.

The work was commenced in the summer of 1910, and was practically completed during the season of 1914.

The recent visit of the president and harbour officials to Europe included the inspection of many of the large shipyards of the British and continental ports. Many of the great shipyards were larger, but the plant, as laid out and constructed by Messrs. Canadian Vickers, Limited, and now nearly completed in full working order, was found to be, though not by any means the largest, the most up-to-date and convenient in many essential features, viz:—

1. Location with regard to the harbour, shelter, and easy approach by water.
2. Design and layout of shops, buildings, launching berths, fitting-out berths, and docks.
3. Railway communication for material.
4. No public streets or railways intersecting the yard.
5. Proximity to labour market of Montreal.
6. Availability of cheap electric power.

During the season no less than twenty-two vessels were docked and repaired at these works, which are owned and operated by "Canadian Vickers, Limited."

INDUSTRIAL WHARF, POINTE-AUX-TREMBLES.

The plant of the Canada Cement Co., situated in the parish of Pointe-aux-Trembles, about three-quarters of a mile below Longue Pointe, has been enlarged until it is now the second largest if not the largest and most completely equipped cement plant in the world.

Its capacity is now 12,000 barrels per day. For transportation the plant is now connected by railway only, and all shipments by vessel have to be forwarded by railway lines. The coal consumed in the manufacture of cement is very considerable, and the company require at this plant an annual supply of 200,000 tons.

A wharf was finally designed to meet the requirements of the Canada Cement Company, and on the company guaranteeing sufficient revenue, the commissioners obtained the authority of the Government to construct a wharf for this industry.

The company owns the land directly to the harbour boundary line, and they propose to carry all shipments to and from the water front by their own railway lines.

The order for this wharf was given in September, 1913, and although most of the dredging required for the channel approach and 400 feet of the concrete wall to one-half level had been finished in 1913, the great portion of the work remained to be done in 1914. Filling was required to the extent of about 250,000 cubic yards, measured in place The cribwork and concrete quay wall has a length of 600 feet Most of the grading and leveling has been completed, and railway tracks are laid down to the wharf and to the site of the unloading plant and steel towers which the company proposes to erect.

DREDGING AND FILLING IN GENERAL.

The Harbour Commissioners' plant, consisting of four spoon dredges and one elevator dredge, together with a spoon dredge, formerly owned by the commissioners, was engaged on the usual work of dredging, consisting of maintenance of harbour berths, dredging to ameliorate the St. Mary's current, dredging for filling, and the usual dredging required for construction work and the crib seats for wharves.

The total amount of dredging done by the harbour dredges during the year amounted to nearly 1,500,000 cubic yards. Almost all the material excavated was of a hard character, ranging from compact gravel, clay and hard-pan to rock. None of the material in Montreal harbour is capable of being pumped, and the material when dredged and used for filling requires to be, to a great extent, handled by derricks and locomotive cranes.

One of the most important items of dredging, and which occupied the time of two of the commissioners' best dredges almost entirely throughout the season, was the construction of a channel 20 feet deep at low water, on the south-eastward side of St. Helen's insland. The extreme slope of the river from the Victoria bridge down to the lower end of the Guard pier causes the St. Mary's current, which has been long recognized as one of the features in Montreal harbour requiring amelioration

The design of the channel behind St. Helen's island has for a purpose a discharge of a portion of the river flow through the channel on a fixed slope giving uniform current. The work of 1913 and particularly of 1914 has shown considerable effect, estimated to amount to 15 per cent in ameliorating the St. Mary's current, even at extreme low water stage of 1914, when it would otherwise have been at its worst.

The two dredges working behind the island worked under conditions which would appear impossible. These dredges, however, worked continuously throughout the summer in rapids where the water was rushing over the bed of the river and falling into the dredged cut. Only plant of extraordinary stability, and dredging officers of great skill, could have undertaken this work, which would not have been attempted had not the results to be obtained warranted the effort.

The ground area dredged in 1914 amounted to about 8½ acres, all of which required the excavation of 20 feet of material consisting of cemented clay and sand with many embedded boulders. A length of 1,000 feet was dredged for a width of 335 feet, and before the work closed the dredging was in a fair way to approaching deeper water near the head of St. Helen's island.

Other important items of dredging consisted of dredging between St. Helen's island and the Guard pier, consisting almost entirely of large boulders Four hundred and seventeen large boulders were removed, many requiring to be blasted before dredging.

A channel was commenced on the city side of the Guard pier up to the Bickerdike pier, where the material is shale rock. The cut made was 500 feet long, by 120 feet wide, all being dredged to a total depth of 30 feet at low water.

The widening of the main harbour was proceeded with inside the Guard pier, and an additional width was obtained opposite Jacques Cartier and King Edward piers.

The entrance channel of the Dry Dock basin was also widened and deepened, and several portions of the ship channel opposite Longueuil and St. Helen's island were also done by dredges belonging to the Department of Marine and Fisheries.

The drilling and blasting boat was occupied throughout the year, doing excellent work. The number of holes drilled and blasted was 2,769, the average depth of holes being over 8 feet, and the quantity of dynamite used was 16,074 pounds, of 75 per cent.

The sweeping of the channels and berths was carried out at intervals during the season, and as usual whenever any obstructions were found dredging was carried on as soon as navigation conditions permitted.

The depth of water in the ship channel was unusually low in 1914. The dry weather in the early part of the season and the fact that the level of the lakes was lower than usual, and the absence of east wind, accounted for this extreme condition.

The following table gives the average monthly depth of water in the ship channel in the harbour during the season of 1914, as compared with the records of 1913, and also the monthly averages of the depth of water on the old No. 1 Lachine Canal lock sill:—

Month.	Depth on old Lock Sill Lachine Canal.				Depth in Harbour Channel.			
	Average 1912-13.		Average 1914.		Average 1913.		Average 1914.	
	Ft.	In.	Ft.	In.	Ft.	In.	Ft.	In.
May	20	6	17	10	35	8	33	3
June	19	3	16	4	33	3	31	9
July	17	0	15	5	31	8	30	10
August	15	10	14	5	30	9½	29	10
September	15	3	14	0	30	4	29	5
October	15	3	13	5	30	6	28	10
November	15	3	13	4	30	5	28	9

As an instance, the depth of water in lake Ontario for October was 0·70 foot lower than in 1913, and 2·22 feet lower than the average for the last ten years.

MISCELLANEOUS.

The following important items of construction work and materials used will give an idea of the extent of the commissioners' operations during the season:—

Cribwork built, 2,160 lin. ft.
Cribwork sunk, 1,820 lin. ft.
Quay walls completed, 2,518 lin. ft.
Quay walls completed to half height, 1,159 lin. ft.
Retaining and abutment walls completed, 1,228 lin. ft.
New track work, 4 miles.
Paving, 20,000 square yards.
Dredging: By Harbour Commissioners' dredges, 1,500,000 cubic yards.
By Marine and Fisheries' dredges, 500,000 cubic yards.
Refilling by derricks, 1,750,000 cubic yards.
Filling obtained from city contractors, 200,000 cubic yards.
Quantities of materials used were:—
Cement, 60,000 barrels.
Sand, 15,000 cubic yards.
Crushed stone, 25,000 tons.

Rubble stone, 20,000 tons.
Displacers, 500 tons.
Gravel, 8,000 tons.
Stone for macadamizing, 2,500 tons.
Timber used to amount of $215,000.

The average number of men employed on maintenance, harbour yard, timber boom, construction work, machine shop, shipyard, dredging fleet, elevators, and all other work in connection with maintenance and operation, was 1,400.

CASUALTIES

The casualties in the harbour, in spite of the low-water season, were very few, and reflect great credit on the skill and care of the Montreal pilots.

Only one accident of importance is to be noted, viz.: the grounding of the ss. *Anglo-Brazilian* opposite Laurier pier, in August.

The Harbour Commissioners' floating concrete mixer was struck, during the night of October 6, by a steamship and sunk at the Victoria pier. This vessel was lifted by the Commissioners' plant within fifteen days, and is now being repaired.

Fires in the harbour of Montreal were fortunately very few and unimportant during the season of 1914.

SEASON OF NAVIGATION.

The 1913 season of navigation in the harbour closed on January 1, 1914, when a trip was made down the river in the Harbour Commissioners' tug, *Sir Hugh Allan*. Navigation opened in 1914, on April 20. The last steamship left for sea on December 4, and on December 15 navigation closed, and the commissioners' dredges went into winter quarters.

ELECTRICAL BRANCH.

The following is information respecting the installation and operation of the electric power and lighting on the harbour.—

Power.—The amount of power that has been supplied through the sub-stations during the year 1914 is below:—

No. 1 Sub-Station. Feeding No. 1 Elevator and Conveyor Galleries—

	Watts.	H.P. Hrs.	Cost.
1914..	1,317,400,000	1,765,947	$11,779 22
		Fixed rate..	6,945 00
		Total..	$18,724 22

No. 2 Sub-Station. Feeding No. 2 Elevator, Shed 16 and Victoria Pier—

	Watts.	H.P. Hrs.	Cost.
1914..	1,000,600,000	1,341,284	$11,109 41
		Fixed rates..	9 765 00
		Total..	$20,874 41

No. 3 Sub-Station. Feeding Engine Shops and Harbour Yard—

	Watts.	H.P. Hrs.	Cost.
1914..	30,000,000	40,211	$ 354 94
		Fixed rates..	256 44
		Total..	$ 611 38

No. 1 sub-station was remodelled during construction of the addition to No. 1 elevator, and was in service day and night throughout the season. The machinery and electrical equipment have proved reliable, and in every case have operated the elevator and addition without any delays

A small sub-station was installed at sheds 24 and 25, to carry 300-400 horse-power, required for the compressing of hay for war supplies This station was put into service at short notice, owing to the urgent demand for hay, and will continue in operation for the duration of the war

FREIGHT HOISTS IN CONNECTION WITH TRANSIT SHEDS.

No. 1. SINGLE TEAM HOIST. SHEDS 11 AND 12.

Year.	Total teams carried.	Number days in operation.	Electric Power H.P. Hrs.	Commenced operation.	Shut down.
1911	11,997	205	43,162	April 20	Dec. 9.
1912	11,956	193	33,712	May 3	" 14.
1913	11,486	196	31,098	April 29	" 15.
1914	7,597	197	24,999	April 27	" 5.

No. 2. SINGLE TEAM HOIST. KING EDWARD PIER.

1911	4,795	84	27,497	Sept. 7	Dec. 12.
1912	12,935	198	55,430	May 3	" 21.
1913	11,274	192	45,575	April 28	" 10.
1914	13,549	199	55,979	March 16	" 3.

No. 3. DOUBLE TEAM HOIST. ALEXANDER PIER.

1914	17,269	193	14,806	May 1	Dec. 12.

No. 4. DOUBLE TEAM HOIST. JACQUES CARTIER PIER.

This hoist is similar to the one on Alexandra Pier and was installed during October and November, being tested on December 2, 1914.

No. 5. DOUBLE TEAM HOIST. SHEDS 24 AND 25.

This hoist is under constructilon, and will be ready for service for the season of 1915. It is of a similar capacity to No. 3 and No. 4 hoists and of the same construction.

HARBOUR LIGHTING.

During the navigation season, the Montreal Light, Heat & Power Co. operated, under contract, 176 series arc lamps.

The lighting of the Victoria Pier extension with forty lamps is being operated by the commissioners. Five new type lamp standards were erected in 1914. These standards are entirely of Harbour Commissioners' design and construction, and are of superior material, strength, and appearance. Provision has been made for the installation of the remaining lamps upon the completion of the high-level piers, the standards being completed and ready for erection.

At No. 1 elevator, six arc lamps were installed outside on brackets at various points, illuminating the railway tracks and wharf satisfactorily throughout the season.

In general, the electric equipment of the head office, dredging plant, transit sheds, and construction work, was maintained and improved during the season by the regular electrical staff

MACHINE SHOP AND SHIPYARD.

The machine shop and shipyard, situated on the Mackay pier, are fitted up specially for the construction and maintenance of the dredging and construction plant.

The shop is an old wooden structure, but well adapted with excellent tools and machinery. There is also an excellent smith shop and boiler shop, both equipped for building and repairing.

The shipyard is very conveniently located for the hauling out as well as the construction and repairing of vessels.

Since 1910, the entire machinery of two dredges has been built, as well as the hull and machinery of two floating derricks, two tugs and eleven large flat scows.

NEW CONSTRUCTION PLANT.

Three new flat scows of the standard type, dimensions 100 feet long, 30 feet beam, 9 feet depth, were commenced March 2, and were launched during May and June. These scows were numbered 51, 52, and 53.

A new derrick, hull dimensions 88 feet by 31 feet by 9 feet, was started May 23, and launched October 19, to be completed for the opening of navigation, 1915. The machinery of this derrick, under construction at the shop, will embody, in addition to the improvements made on derrick No. 7, the following:—

The steel boom will be of stronger construction and more rigid, the bottom connection of the steel A frame will be of pin type instead of rigid. A further improvement will be made in the turntable pivot casting to prevent rocking An entirely new type of friction for the hoist and trip drum has been designed, and the foundations of the spud operating machinery will be stronger

A new tug hull was laid down on the shipways, May 26, and launched November 21; dimensions, 77 feet by 18 feet by 10 feet, being nearly all of oak. The engines being constructed are of compound type, 13 inches and 26 inches by 22 inches, jet condensing. The boiler is of Scotch marine type, 10 feet diameter by 10 feet 1 inch long over all, having two furnaces 38 inches, I.D., and to carry a working pressure of 150 pounds.

The usual maintenance and repairs to the commissioners' fleet were well and economically carried out during the year.

DREDGING PLANT.

The following is a list of the Harbour Commissioners' dredging plant:—

Name of Vessel.	Length.	Breadth.	Depth.	When built.	Remarks.
	ft. in.	ft. in.	ft. in.		
Dredges—					
John Kennedy	90 0	36 0	10 3	1892	Wooden hull.
No. 4	90 0	36 0	10 9	1900	Steel hull.
No. 5	104 0	36 0	10 9	1910	"

Passe-Partout	49 1	11 3	5 7	1912	"
Testing boat	73 3	14 0	3 1	1897	2 wooden scows, braced 16 feet apart.

3 flat scows, 67½ yards capacity.
18 " 150 "
1 " 300 "
dump scows, 200 "
1 " 100 "
1 coal scow, 400 tons capacity.
1 floating air plant.
1 floating pile driver.

HARBOUR COMMISSIONERS' YARD.

During the year the staff employed in the shops and stores, averaging thirty men, was constantly engaged in handling the tools and equipment, and in keeping all the shore plant in repair.

WHARF REPAIRS AND MAINTENANCE.

The maintenance of the harbour, wharves, railways, roadways, buildings, and equipment is now becoming a very important item. Repairs are required everywhere, and the cleaning of the wharves and roadways is a work of considerable extent. The maintenance organization constantly employs a staff of repairers, pavers, ironwork men, painters, sweepers, and carpenters.

During the season, the wharves were kept in excellent condition, and the watering of the extensive areas of roadways gave general satisfaction.

LIFE-SAVING EQUIPMENT.

Every effort is made to maintain a complete life-saving equipment all along the wharves, consisting of life-buoys, ropes, and long gaffs, and railings have been constructed at important corners of the wharves, and lights have been maintained at places which have proved liable to accident.

SHED REPAIRS AND MAINTENANCE.

The maintenance and repairs to the Harbour Commissioners' extensive system of elevators and transit sheds were carried out during the season. Shed No. 2 and the conveyor gallery on shed No. 3 were painted, as well as the interior steelwork of both floors of sheds 3, 5 and 11.

FLOATING CRANE.

The Harbour Commissioners' floating crane was operated throughout the season as follows:—

Number of days working	131
Number of hours working	1,020½
Percentage of time in actual operation	77%

Total number of lifts—

Commercial	373
Commissioners' service	104

Average weight of lifts—

	Tons.
Commercial	8 134-2,240
Commissioners' service	18 29-2,240

Greatest lift—

Commercial	60
Commissioners'service	70

Greatest tonnage from single ship—

Ex-ss. *Pretorian*	303	472-2,240
Total weight lifted during season	5,020	1,477-2,240
Total weight lifted during 1913	6,771	1,098-2,240

SAW-MILL AND TIMBER BOOM.

The saw-mill was in operation 273 days.

The quantity sawn during the season was 4,401,748 feet of hard and soft wood at an average cost of $2.95 per M feet b.m.

The number of men operating the saw-mill and planing-mill was sixteen

The timber used during the year was as follows:—

593,072	lineal feet.
1,952,119	feet, b.m.
7,875	railway ties.
267	cords of slabs.
6	loads of slabs, hardwood.
7	boat sides.

AYLWIN STREET SUBWAY.

A new subway, the construction of which was urged by the city authorities, was built at Alywin street, under the existing railway yards of the Harbour Commissioners, and the yard was relaid to suit the new conditions.

The subway has a minimum head-room clearance of 13 feet, with a teamway 30 feet wide and a 5-foot footpath, the whole spanned with a seven-track plate girder and steel trough floor system bridge, the tracks being laid 13 feet centres, and the steelwork designed in accordance with the Canadian Government specification for railway bridges and viaducts, type heavy.

The concrete abutment walls and the paving of the subway were done by the Harbour Commissioners' departmental organization, while the steel superstructure, of a total weight of 234 tons, was let by contract and erected by the Dominion Bridge Co., Ltd.

FOOT-BRIDGE, ELEVATOR NO. 2.

A 50-foot span foot-bridge was erected between the wharf at grain elevator No. 2 and the marine tower jetty for the use of the elevator staff and the crews of the ships which are moored at the marine tower jetty.

PROPOSED WAREHOUSE AT MARKET BASIN.

Preliminary studies were made of a warehouse which is proposed to be erected on the high level at Beaudry street, the construction of which is under consideration by the commissioners.

The building is designed to be about 400 feet long and 100 feet wide, to have six storage floors, of which five can be used the year round, and one, 4 feet above the low-level wharf, will be available only the summer months when the river level is normal.

All floors will be designed to carry a live load of 300 pounds per square foot of floor, and the six floors will be connected with four high-speed electric cargo elevators.

Warehouses, in connection with the docks, is a feature of European ports. During the past years, American ports have adopted this system as an adjunct to their handling of import and export trade, with success. Many western houses have stated that they would carry larger stocks in Canada if there existed a warehouse on the wharf, economically situated for receipt, storage, and re-shipment. The Harbour Commissioners have been obliged to limit the time goods may remain in the transit sheds, and a convenient warehouse is therefore most necessary, and would figure out well as a convenience to the public and as a paying concern.

The warehouse is designed to be entirely fireproof, and provision will be made so that a portion of the building can be converted into a cold storage house if needed.

GENERAL.

Labour.—The following table shows the maximum and average number of workmen employed directly by the Harbour Commissioners during the season 1914:—

	Maximum.	Average.
Maintenance, cleaning, removing ice, etc.	134	87
Harbour yard, carpenters, blacksmith, etc.	32	30
Sawmill and timber boom, sawyers and handymen	34	30
Construction of wharves, elevators, etc.	816	517
Machine shop, machinists, blacksmiths	162	97
Shipyard, carpenters, labourers, etc.	111	104
Dredging fleet, crews dredges, tugs, etc.	300	300
Operation: Elevator No. 1	35	35
Elevator No. 2	49	49
Conveyors	40	40
Floating elevators	19	19
Traffic department	70	70
	1,802	1,378

Wharf Accommodation.—The extent of the wharves at the end of the season is as follows:—

	Lin. ft.	Miles.
For 30-ft. draught at O.L.W., and over	22,855	4.328
For 25 to 27½ feet	13,192	2.498
Total deep draught	36,047	6,826
For 20 ft. draught and under	3,005	0.569
Total wharfage end of 1914	39,052	7.395

Extent of Harbour Railway Tracks.—The extent of the Harbour Commissioners' railway tracks at the end of 1914 is as follows:—

	Lin. ft.	Miles.
1. South of Lachine canal, Bickerdike pier, Windmill Point wharf and west	26,189	4.960
Montreal and Southern Counties Railway	425	0.080
Total south of canal	26,614	5.040

DEPARTMENTAL STAFFS.

In terminating this report, the Commissioners desire to express their appreciation of the loyal services rendered by the staffs of the different departments during the past year.

W. G. ROSS, *President.*
FARQUHAR ROBERTSON,
A. E. LABELLE,
Harbour Commissioners.

REPORT OF THE HARBOUR COMMISSIONERS OF QUEBEC.

QUEBEC, April 17, 1915.

To the Honourable J. D. HAZEN, M.P., P.C.,
Minister of Marine and Fisheries,
Ottawa.

SIR,—In compliance with the requirements of the Act 62-63 Victoria, chapter 34, section 46 (The Quebec Harbour Commissioners' Act, 1899), I have the honour to submit the following report on the operations of the Quebec Harbour Commissioners for the year 1914.

CHIEF ENGINEER'S REPORT.

The annexed report from the chief engineer and general superintendent, Mr. St. George Boswell, conveys information regarding all matters coming under his care in connection with the harbour works in general, and the various additions, alterations, and reparations made to them, and the minor works executed during the year on the properties of the commissioners. It also gives details of the works of improvement executed during the year on approved estimates from your department.

WHARFINGER'S REPORT.

The annexed report from the wharfinger, Mr. P. Flynn, gives the usual information regarding the number of vessels using the Louise docks, the goods landed or shipped on the wharves, and the railway traffic over the Commissioners' property during the year 1914.

HARBOUR MASTER'S REPORT.

The annexed report from the harbour master, Captain James A. Murray, contains the usual data concerning the opening and closing of navigation, the formation of ice, and the routine work of his department.

OFFICE BUILDING.

The offices of the Quebec Harbour Commissioners have been located, since April, 1887, in the Examining Warehouse, where they have had suitable accommodation until recently. The first meeting held in those offices took place on April 19, 1887.

In 1913, when the commissioners entered into an active constructive period, they had to increase their staff. Owing to inadequate office room, the staff had to be divided, part of the engineering department being located in the custom-house, and the construction, purchasing and traffic departments had to be temporarily accommodated in an old building.

A convenient and modern building was completed during the year on the Point-à-Carey wharf, the foundation of the Great Northern elevator which had been destroyed by fire in October, 1910, being used for the purpose of this erection.

The first meeting of the commissioners held in their new office buiding took place on August 1, 1914. All the different departments were then in possession of their respective quarters.

The building is of cut-stone and constructed of fire-proof materials throughout, with the exception of the doors and windows, with an electric tower clock on the frontispiece. On the ground floor are located the general office, the construction, traffic, purchasing, and accounting department; on the second floor, the board room,

the commissioners' private offices, the office of the secretary-treasurer and his clerical staff, and the harbour master's office; on the third floor is the engineering department and draughtsmen's room. An electric passenger elevator is located in the centre of the building.

REVENUE AND EXPENDITURE.

During the year 1914, the revenue of the commissioners amounted to $287,194.39, or an increase over the preceding year of $54,859.66, and the expenditure chargeable to revenue was $267,835.54, leaving a surplus over the working expenditure for the year of $19,358.85.

Included in this revenue is a charge of $50,000 made against the Department of Public Works for the ground used by the immigration buildings on the Embankment, and the other facilities given to the Immigration Department.

HARBOUR FACILITIES.

The facilities offered in the harbour of Quebec for the accommodation of large vessels have been demonstrated in a decisive manner when the embarkation of the first Canadian overseas contingent took place in the latter part of September. Thirty-one steamships, ranging in tonnage from 4,686 tons to 18,564 tons have been accommodated at the Commissioners' deep-water docks and wharves for taking on board the men, horses, ammunitions and supplies of the first contingent. Several of these vessels were bunkered here, and were supplied with fresh water from the commissioners' waterworks, which are connected with the city waterworks.

The transports engaged in taking over the first Canadian contingent were:—

Name of Steamship.	Tonnage.	Line.
Saxonia	14,297	Cunard Line.
Ivernia	14,210	"
Lapland	18,564	Red Star Line.
Laurentic	14,892	White Star Line.
Sicilian	6,229	Allan Line.

Franconia	18,148	Cunard Line.
Royal Edward	11,117	G.N.R. SS. Lines.
Scotian	10,322	Allan Line.
Carribean	5,823	R. M. Steam Packet Co.
Arcadian	8,939	" "
Manhattan	8,004	National Steamship Co., Ltd.
Total tonnage	317,847	

BY-LAWS REVISED.

The revised by-laws of the Quebec Harbour Commissioners have been submitted to His Excellency the Governor General in Council for approval, when they were sanctioned by an Order in Council on the 9th March, 1914, and published in *The Canada Gazette*, according to law, on the 28th of March, 1914

The changes effected in the by-laws were only those required to place them in a more modern form, and to add to them those required for the operation of grain elevators, switching engines, floating crane, and wharf cranes.

EXPENDITURE ON CAPITAL ACCOUNT.

The expenditure on capital account during the year on approved estimates, and payable out of advances made to the commissioners under the "Quebec Harbour Advances Act, 1913" (3-4 George V, chapter 41), and the "Quebec Harbour Advances Act, 1914" (4-5 George V, chapter 47), has been $1,994,960.03, the details of which will be found in a tabulated statement attached to this report.

The general expenditure on capital account, out of the available moneys at the disposal of the commissioners, has been $17,341. A detailed statement of this expenditure is also attached to the report.

The total expenditure on capital account has, therefore, been of $2,012,301.03.

FREIGHT TERMINALS.

The accommodations completed last year for providing freight terminals for the Intercolonial railway and the Grand Trunk railway systems, have proved to be an advantageous undertaking for all concerned, and the increase of this traffic, both inward and outward, is substantial testimony that the facilities provided have developed considerable new business.

To show the importance of this new service, I might mention that 4,473 cars were handled during the year, being a substantial increase over the three months' operation during the preceding year.

CARS HANDLED.

The increase in the railway traffic over the commissioners' properties has necessitated the purchase of an additional switching locomotive.

During the year, 53,907 cars have been handled by the commissioners, namely:—

	Cars.
Loaded cars received	15,257
Loaded cars forwarded	18,678
Empty cars received	11,297
Empty cars forwarded	8,675
Total	53,907

Out of this number of cars, the car ferry has handled 18,485. The immigration and ocean passenger traffic has necessitated the use of 5,560 passenger and baggage cars.

ICE CUTTING.

During the winter of 1913-14, 99,950 blocks of ice have been cut for local use.

Care has been taken that all this ice cut for domestic purposes is perfectly pure, and taken in localities in the harbour that have been selected after an analysis of the ice had been made.

To this report are annexed the various statements conveying the information yearly forwarded to your department in connection with the harbour, and also a complete statement of the commissioners' accounts for the year.

I have the honour to be, sir,

Your most obedient servant,

ST. GEORGE BOSWELL,

Acting Secretary-Treasurer.

HARBOUR COMMISSIONERS OF QUEBEC,
ENGINEER'S OFFICE,
QUEBEC, January 2, 1915.

RAOUL RENAULT, Esq.,
Secretary-Treasurer, Harbour Commission.

SIR,—I have the honour to submit the following with reference to the various works in connection with the maintenance and improvement of the harbour accommodation carried out by this department during the past year.

PRINCESS LOUISE EMBANKMENT.

Bulkhead Wall.—The construction of this wall was carried on vigorously until the first week of August last, when 800 feet of substructure and 700 feet of superstructure (up to within 4 feet of coping level) had been completed; and also three of the substructure cribwork blocks to an average of one-half of their full height; after the above date no further work was done on the substructure, but an additional 500 feet of superstructure was constructed. Some 405,000 cubic yards of filling, taken from the dredged materials, were deposited behind this wall during the past season.

The dredge in connection with the construction of the bulkhead wall was continued during the whole season by the two dredges belonging to the commission, supplemented, during the early part of the summer, by a dredge working for the commission under contract with the Dominion Dredging Company. The total quantity of materials removed during the season amounted to 1,238,021 cubic yards

For procuring the stone required in connection with the construction of the bulkhead wall and the fly bank retaining wall, a stone quarry was purchased at Victoria cove; this quarry is very advantageously situated on the shore of the St. Lawrence, and has good berthing facilities for the scows used in the conveyance of the stone to site of works; 50,355 cubic yards of stone were taken from this quarry during the season.

The old quarry at St. Nicholas was not operated the past season, as all the readily available stone had been removed.

Grain Elevator.—The 1,000,000-bushel fireproof reinforced concrete grain elevator, referred to as being under construction in last year's annual report, was completed early in the summer, and was put into operation for the first time on June 9, when a barge containing oats was discharged at the marine tower. Since the elevator has been taken over by the commission, eight Kinnear steel folding doors, each 14 feet 6 inches by 22 feet, for closing the entrances to the railway track sheds have been installed.

A pneumatic grain discharging and loading apparatus has been placed on the wet dock quay, front of the cross-wall by Messrs. James Richardson & Sons, to be used in connection with the old grain elevator leased by them from the commission; this apparatus, however, has not as yet been put into active service.

The commissioners' water service has been extended down the western face of pier No. 1, to enable the vessels at this berth to obtain city water without having to make use of an excessive length of hose, and to provide additional fire protection.

The storage shed No. 22 has been removed some 20 feet to the north, in order to clear the space required for the railway lines serving the new grain elevator.

The main line on the embankment has been relaid with 80-pound rails, and is now in first-class condition.

The building on the cross-wall, formerly occupied as the construction office, has been converted into a garage.

The commissioners' new office building was completed and occupied by the commission on August 1 last; a new brick-paved roadway has been laid down to this building from Dalhousie street.

Indian Cove.—The construction of the cribwork blocks for the substructure of the bulkhead wall was continued the past year until the first week in August, when the work was discontinued for the balance of the season.

On June 22, a fire destroyed the old building situated on one of the blocks at Indian Cove, and known as the "salt store," but did no further damage.

Fly Bank.—The construction of the retaining dock wall, some 1,400 feet in length at this locality, referred to in the last annual report, has been proceeded with and is now completed; a large portion of the materials removed by the commissioners' dredges this season has been deposited behind this wall.

Borings have been taken during the past season over the fly bank, from the southern end of this retaining wall, for a distance of 2,000 feet, covering the ground lying between low-water mark and 40 feet below high water.

Plant.—Following is the list of the plant delivered to the commission during the past summer:—

Dump scows: Six steel dump scows, three of 500 cubic yards capacity, and three of 300 cubic yards capacity, constructed by the Polsons Iron Works and delivered on the opening of navigation.

Ten deck scows constructed departmentally during the winter of 1913-14, delivered on opening of navigation.

Six of these scows were built at Indian Cove.

Two at Lampson's Cove.

Two on Louise Embankment.

Tug *Aviso* purchased and delivered in the early summer.

Bucket ladder dredge arrived on June 12, and began work on July 13.

Service boat *Laval* arrived on August 8, and was put into commission on August 29.

This vessel is fitted with a salvage plant and powerful fire pump with a capacity of 2,000 gallons of water per minute.

One locomotive similar to the three purchased last year.

Two locomotive cranes for filling purposes, one furnished by the Brown Hoisting Machinery Company, and the other by the Industrial Works Company.

One 50-ton floating crane, constructed by the firm of Sir Wm. Arrol & Company, arrived in the Louise docks on the 26th of August, and was put into service for the first time on September 22, when it was used for handling guns and other heavy materials, shipped with the first Canadian contingent.

Floating grain transfer boat: This vessel arrived on the 23rd of October, but will not be ready for delivery to the commission before the opening of navigation next spring.

The commissioners' motor-boat, destroyed by fire last autumn, was rebuilt during the winter of 1913-14, and was put into service early in the summer.

The various properties of the commission have been kept in a good state of repair during the past season, with the exception of the river front of the old Point-à-Carey wharf, at present used as a landing berth by the Quebec and Levis Ferry Company's car ferries; this frontage requires extensive repairs which cannot be undertaken until the Ferry Company remove to their new landing berth.

The cross-wall drawbridge was operated for the first time the past season on April 16, and for the last time on December 7.

The water was retained in the wet dock for the first time for the season on April 29, and for the last time on November 30.

I am, sir, your obedient servant,

ST. GEORGE BOSWELL, *Chief Engineer.*

QUEBEC, January 12, 1915.

RAOUL RENAULT, Esq.,
Secretary-Treasurer.

SIR,—I have the honour to submit the following with reference to the traffic of the St. Charles docks and wharves, showing the number of vessels, their registered tonnage, amount and description of cargo landed and shipped from the docks during season 1914.

Inward, 387 vessels, 1,569,426 tons register: 54,252 tons general cargo, 7,031 tons salt, 1,549 tons drain pipe and earthenware, 2,599 tons cement, 819 tons whiting, 4,266 tons brick, 1,638 tons slag, 412 tons glass, 324,992 tons bituminous coal, 39,993 tons anthracite coal, 161 tons coke.

Outwards, 131 vessels, 692,649 tons register: 18,801 tons general cargo, 1,506 tons asbestos, 1,000 tons whiting, 13,320 tons P.S. lumber, 8,514 loads timber.

Lower port steamers: landed 2,095 tons general, shipped 3,492 tons general.

Grain landed at No. 2 elevator: oats, 531,815 bushels; wheat, 43,233 bushels; corn, 179,080 bushels; barley, 12,000 bushels; total, 766,128 bushels.

During past season the different mail steamers landed: first-class passengers, 7,819; second-class passengers, 35,407; third-class passengers, 55,608; total, 98,834.

The second and third-class passengers were forwarded to their future homes by the different railway companies.

VESSELS DAMAGED AND USING THE DOCKS.

SS. *Storstad,* having collided with the ss. *Empress of Ireland,* off Métis, came up to the Louise docks, discharged her cargo of coal, and went over to Lévis to get repaired.

SS. *Clendine,* having grounded below Father Point, came up to the Louise docks, landed her cargo of coal, and then went up to Montreal.

SS. *Monkshaven,* having grounded at Matane, came up to the Louise docks, landed her cargo of coal, and went over to Lévis for repairs.

SS. *Floristan,* having grounded at Newfoundland, came to the Louise docks, landed her grain into No. 1 elevator, and went over to Lévis to get a temporary repair; after being repaired, came back and reshipped her cargo of grain and went to sea.

SS. *Lingan,* having collided with the Government steamer ss. *Montmagny,* at Crane island, came up to the Louise docks, landed her cargo of coal, and went over to Lévis to get repaired.

The Dominion Coal Company have 10,000 tons coal stored on the space rented to them.

The Nova Scotia Steel and Coal Company have 20,700 tons coal stored on the space rented to them.

There are wintering on Louise docks: lumber, coal, etc.

There are stored in the different freight sheds: salt, cement, asbestos, etc.

The docks are occupied during the winter months by a large number of vessels of various tonnages, where they find safe quarters until the opening of navigation.

I have the honour to be, sir,

Your most obedient servant,

P. FLYNN, *Wharfinger.*

OFFICE OF THE HARBOUR MASTER,
QUEBEC, December 12, 1914.

RAOUL RENAULT, Esq.,
Secretary-Treasurer.

SIR,—I have the honour to submit the following report for the year 1914:—

The opening of the season commenced by the ss. *Savoy* leaving Quebec for Anticosti on April 2, and the ss. *Cascapedia* and *Aranmore* for gulf ports on the 6th and 10th, respectively.

April 17, government steamer *Druid* left port to place buoys in position down river.

The first Atlantic mail and passenger steamers arrived April 28, as follows: SS. *Corsican, Saturnia,* and *Ionian.*

The ss. *Englishman* and *Ruthenia* arrived on April 29, and the R.M.S. *Teutonic* the following day.

May 5, the new berth on the river St. Charles side of the breakwater was occupied for the first time by the liner *Carrigan Head,* and has since been used, as occasion necessitated, by several of the largest liners that come to the St. Lawrence.

This fine berth is 1,000 feet long, and has a minimum depth of 35 feet at low water.

The shed at this berth is 950 by 80 feet.

May 15, dredge *No. 1* for the Harbour Commission arrived from St. John, N.B.

May 28, R.M.S. *Empress of Ireland* sailed.

H.M.S. *Essex* arrived May 31 to act as guard ship to H.R.H. the Duke of Connaught, K.G., Governor General.

The magnificent Allan Line Q.T.R.M. ss. *Calgarian* and *Alsatian* for the Liverpool and Quebec service arrived in port on their maiden trips to the St. Lawrence on May 15 and 28, respectively.

June 12, the new Q.H.C. dredge *No. 2* arrived from the United Kingdom.

June 23, the ss. *Northmount* arrived from Fort William with the first cargo of grain for the new elevator.

H.R.H. the Duke of Connaught, K.G., paid an official visit, and inspected the docks and harbour works on June 27.

July 5, H.M.S. *Essex* left on a trip to Newfoundland with H.R.H. the Governor General, and returned July 30.

July 25, H.M.S. *Essex* left for sea.

August 8, the new powerful tug *Laval* for the Harbour Commission arrived from the United Kingdom.

August 14, the German barque *Bellas* was brought into port by the C.G.S. *Margaret,* and detained as a war prize.

August 15, the Austrian ss. *Ida* arrived (en route for Montreal) and was also detained as a war prize.

August 20, the ss. *Ida* was allowed to proceed.

August 18, the National Transcontinental Railway Company's train car ferry ss. *Leonard* arrived from the United Kingdom.

August 26, the new 50-ton floating crane for the Quebec Harbour Commission arrived from the United Kingdom.

The work of transporting the First Canadian expeditionary contingent commenced September 24, with the shipment of horses on the ss. *Montezuma* and *Lakonia;* the last vessels to sail were the ss. *Arcadian* and *Carribean,* on October 1. Thirty-one transports, with a gross tonnage of 314,847 tons, were requisitioned for this service, carrying a total number of 31,000 men, 7,620 horses, ammunition, guns, stores, wagons, etc.

Berths for the ships were always available, and the resources of the harbour were never taxed to their utmost capacity at any time, excepting that (owing to the large number of Quebec men who joined the contingent), there was a scarcity of labour at times.

On several occasions, there were eleven large vessels lying at the berths, aggregating over 118,000 tons gross.

October 15, the C.P.R. ss. *Missanabie,* 12,469 tons, arrived on her maiden trip to the St. Lawrence.

October 23, the new 30,000-bushel steam grain transporter arrived from Glasgow after a very lengthy passage of forty-two days, owing to boisterous weather.

The facilities of the harbour are such, that steamships of any size or class can berth at any time of tide, day or night. Heavy weights up to 50 tons can now be handled with despatch, and since the completion of the new 1,000,000-bushel grain elevator, and the arrival of the grain transporter, vessels berthed at the breakwater or in the tidal basin can be supplied with grain at short notice.

The shed space available for ocean steamers has a length of 5,000 feet, with an average width of 91 feet. Nos. 20, 25, and 26 sheds have railway tracks on the shore side and waterfront of the sheds.

All freight sheds are well supplied with working, passenger, and horse gangways to suit all requirements, and every facility offered to shippers to ensure quick despatch to their vessels.

The sheds are provided with patent fire extinguishers, also with life-saving appliances, which are hung in handy positions outside the sheds, where they can be readily obtained in case of emergency.

An efficient police patrol over the dock property has been maintained by the Harbour Commission constables, and since the declaration of war we have kept a guard on the new elevator and power-house, the Militia Department taking charge of the bridge at the entrance to the docks.

The commissioners' by-laws for 1914 were handed to the masters of all incoming vessels.

November 20, 7.45 p.m., high water, an extraordinary spring tide occurred.

The liner *Georgia* completed loading and left for sea December 3, the ss. *Bangor Head* being the last ocean liner to leave the port of Quebec on December 4.

The river kept clear of ice until December 9; the majority of the vessels were then in winter quarters.

I am, sir, your obedient servant,

JAS. A. MURRAY,

Secretary-Treasurer.

We hereby certify that we have examined the statement of assets and liabilities of the Quebec Harbour Commissioners, and we find the same in all particulars the true position of the trust to December 31, 1914, as per books and vouchers.

QUEBEC, February 11, 1915.

RAULIN AMY,
J. A. LARUE, } *Auditors.*

Report of the Harbour Commissioners of Three Rivers.

To Hon. J. D. Hazen,
Minister of Marine and Fisheries,
Ottawa.

Sir,—The commissioners have already had the honour of transmitting the list, the names, and the tonnage of steamers, ocean ships, and other vessels having unloaded and loaded cargoes in the port of Three Rivers during the year 1914, together with a statement of the receipts of the commission for the same period.

They think it well to add the following observations thereto:—

The surplus of receipts, amounting to $2,191.87, over the expenses during the year of 1914, shows marked progress, if one takes into account the confusion caused commerce by the war, as well as the obstacles in the way of navigation, arising from the same cause.

The exportation of sawn wood and pulp wood, which generally go to the United States, as well as the shipping of the same to other ports of Canada, was somewhat less, and must be attributed to the depression in real estate transactions and in construction work. We notice here that the smaller the demand for lumber the less sand is used for cement purposes (this being taken from the St. Maurice) and required for exportation.

We must, however, note that towards the end of the fall the lumber trade increased and the great companies engaged in that business gave contracts for log cutting in as great a quantity as in preceding years, which is a very favourable omen for next season.

The importation of cast-iron in our harbour has trebled, owing, no doubt, to the progress made in foundry work.

The same may be said of coal, the importation of which nearly doubled, this being a proof that our workshops in general have produced more.

We have every reason to believe that still a larger quantity of coal will enter our port, but we cannot help pointing out that wharves are lacking. The largest one, which is that at Windmill point, and which should have been ready for traffic two years ago, may not be ready next summer owing to some damage done and to the lack of suitable planking. The surface being of earth, the coal which is unloaded there cannot be reloaded without some of the earth getting mixed up with it, which causes its deterioration, affects its heating capacity and causes dissatisfaction in the workshops. This naturally reflects on our port and injures it as far as that kind of business is concerned.

During the course of the fall, the commissioners were consulted as regards the unloading on our wharves of rails, sulphur, and earth for making pottery, and this has given us hope for the future.

A matter of great importance to be noted is that the Grand Trunk landing at Ste. Angèle de Laval, in front of our town, cannot be used by steamers and other vessels owing to the lack of a sufficiently deep channel and of a deep-water wharf at that point. There is no doubt that if such a wharf existed there, the powerful Grand Trunk Company would use it for receiving cargoes and loading ocean boats. The exportation of products, as well as the imports of the whole south shore, which are very large and which take the Quebec-Montreal route, would go by this route, being quicker and less costly.

The port of Three Rivers should extend farther and should comprise all the wharves on both shores of the river from Rivière-du-Loup up to Grondines, in order to make Three Rivers the centre of distribution of the imports and exports of that region. There is no doubt that traffic would derive great benefits from this.

The dam being built from the St. Maurice to Grand Mère is nearing completion. As the level of that river will be raised by from 12 feet to 20 feet, boats ascending to La Tuque can be of larger tonnage, and it is quite probable that they will bring to our port an appreciable portion of the traffic of the Great Northern and of the Transcontinental trade.

The geographic site of Three Rivers certainly deserves the special attention of the Government, as it offers the greatest possibilities.

STATEMENT of number and tonnage of Steamers and other Vessels, reported Inward and Outward of the Port of Three Rivers, for the year 1914.

		$1,825 40

All of which is respectfully submitted.

I have the honour to be, sir,

Your obedient servant,

GEO. DULMAGE,
Harbour Master.

REPORT BY VANCOUVER HARBOUR COMMISSIONERS, MAY 16, 1913, TO MARCH 31, 1915.

The Hon. J. D. HAZEN, K.C.,
Minister of Marine and Fisheries,
Ottawa.

SIR,—The Harbour Commissioners herewith respectfully submit a report covering the period from May 16, 1913, to March 31, 1915, including (as requested by section 36, chapter 54, 3-4 George V) an account of all moneys received and disbursed.

Although the work accomplished by the commissioners has necessarily been, to a great extent, of a preliminary character, the importance of it has been fully realized and, with careful deliberation, the basis of a system has been laid for the proper organization and control of harbour affairs.

Following a survey of the harbour made by the Dominion Government in the years 1912 and 1913, plans have been completed on which established headlines, Crown grants, leases, and other features are shown; this involved much time and labour, but the permanent advantages of it are obvious.

Various other useful plans have been prepared and a mass of minute information has been collected which will greatly facilitate the work of the commissioners in the future.

The issuing of a Crown grant of 41 acres of tide flats at Granville street bridge in favour of the commissioners is a source of gratification, as it marks the completion of the first stage of a scheme to which much earnest effort has been given.

Among the chief hindrances in the way of the city of Vancouver's industrial development has been, the difficulty of obtaining suitable sites at economical rentals; and it was with a view to removing this serious obstacle that the idea of reclaiming these tide flats was originally conceived. The work will cost in the neighbourhood of $300,000.

It is proposed to subdivide this area when reclaimed into sites of various sizes for industries and warehouses, which, with a few exceptions, will have trackage and water-frontage with a navigable channel 20 feet deep at low water, and 350 feet wide. These sites will be leased for twenty-one years at moderate rentals, with an option of two renewals.

As already, at the date of writing, many applications have been received, the judgment of the commissioners is confirmed in regard to the necessity for such provision being made. In fact, it is generally believed that this scheme, when completed, will give a powerful stimulus to the industrial and commercial development of the city of Vancouver.

Important as this project is in itself, it is, however, only the first unit of an extensive scheme of rail and water terminal facilities which the commissioners have in view, to cope with the increase in shipping that will come to this port when normal conditions return.

General satisfaction has been expressed regarding the improved condition of the waters of the harbour.

Previous to the commissioners taking office, the amount of floating oil was such as to constitute not only a nuisance but also a very serious menace in the way of a conflagration—a danger which was magnified by the absence of proper fire-fighting equipment. Careful investigations were made as to the source of the leakages, and various successful prosecutions were made under the by-laws, with most satisfactory results.

In this connection should be mentioned another improvement. Floating logs and débris of various kinds had been an increasing hindrance and danger to naviga-

tion, more especially to ferry boats which, in not a few cases, suffered serious damage, necessitating costly repairs. To mitigate this trouble, a launch was purchased which has been almost constantly employed. No less than 1,519 logs and trees have been taken out during the year; and, while it is impossible, on account of conditions surrounding the harbour, to entirely remove this dangerous inconvenience, a very noticeable and much appreciated change in this regard has been effected.

In view of the anticipated increase in shipping at this port, the commissioners note with satisfaction the progress that is being made towards the completion of certain harbour works.

The widening of the channel at the harbour entrance from 450 feet to 1,200 feet, on which $500,000 has been spent, up to the present, and for the completion of which about $250,000 more is to be expended, is an undertaking that will add to the port of Vancouver's reputation of being one of the finest harbours in the world. Although the old channel was sufficient for ships of the deepest draught, the widening of the channel will make the entrance proportionate to the extensive accommodation of the inner harbour and will remove the possibility of congestion. An indirect result of these dredging operations, which is already noticeable to some extent, will be to decrease very considerably the strength of the tidal current both at ebb and flow.

The new wharf now under construction at the foot of Salisbury Drive and which, it is understood, will be completed about November next at an approximate cost of one and three-quarter million dollars, is regarded as a noteworthy step in the direction of providing this harbour with facilities the need of which is increasingly felt, while the dredging of a channel 20 feet deep at low water from English bay at a cost of about $850,000, will be of great assistance to the industries on False creek.

The building of a grain elevator at Vancouver is a timely provision. Careful investigation and consideration lead to the conclusion that, as a result of the opening of the Panama canal, combined with the facts that this port is open for navigation all the year round and the rail haulage is less by this route than by the East, the grain grown in the Western prairie provinces will be shipped in steadily increasing proportion via Vancouver, and the commissioners look forward with satisfaction to the completion by the end of this year of a large terminal elevator on the site of the new wharf, with a total storage capacity of 1,250,000 bushels, and a loading capacity of 30,000 bushels of grain per hour.

From the Customs returns for the year ending March 31, 1915, the classification of shipping entered inwards and outwards at this port is as follows:—

Foreign, going inwards, 1,538 vessels, tonnage, 1,871,034 tons.

Foreign, going outwards, 1,351 vessels, tonnage, 1,673,029 tons.

Coastwise, going inwards, 7,623 vessels, tonnage, 3,313,377 tons.

Coastwise, going outwards, 7,966 vessels, tonnage, 3,049,123 tons.

In conclusion the commissioners desire to record that the various members of the staff have rendered diligent and loyal service.

F. CARTER COTTON,
President.

JAS. A. FULLERTON,

S. McCLAY,
Commissioners.

SUMMARIZED STATEMENT of operations from May 16, 1913 (being date of incorporation) to March 31, 1915.

WILSON & WILSON,
Auditors

TORONTO HARBOUR COMMISSION.

The Toronto Harbour Commissioners.

GENTLEMEN,—I have the honour to submit my report for the year 1914.

The harbour was not frozen over last winter until January 13, 1914, and was clear of ice on April 2; having been frozen over for 79 days or nine days longer than for last year.

The first vessel to arrive was the *Dalhousie City,* Captain Maddock, with passengers and cargo, on April 4.

The last arrival was the *Macassa,* Captain Henderson, on December 6. She came in light for winter quarters.

The highest water recorded on the Commissioners' gauge was 24½ inches above zero on June 7, nad the lowest water was recorded as 8 below zero on December 22. Average for the year 11½ above zero.

The quantity of coal imported by vessel is as below, viz:—

	Tons.
Anthracite coal	103,020
Bithuminous coal and screenings	47,570
	150,590

This amount is 10,802 tons more than in 1913.

The total quantity of coal imported into Toronto by rail and vessel as returns from Ottawa is as follows, viz:—

	Tons.
Anthracite coal	872,712
Soft coal and screenings	1,114,472:2
	1,987,184

The number of vessels arriving in this port for 1914 was 2,961, a falling off of 433 vessels. Below is a comparative statement of arrivals.

Kind of Vessel.	1913.	1914.	Decrease.	Tonnage, gross.
Propellers	769	406	363	418,912
Passenger steamers	2,267	2,212	55	2,672,263
Sail and tow barges	358	343	15	49,458
	3,394	2,061	433	3,040,633

The Harbour Dues for this year amount to	$ 8,036 20
In 1913 the Harbour Dues amounted to	8,593 24
This shows a deficit in this year of	$ 557 04

Until the middle of summer the freight business was more than usually good, the amount collected for harbour dues being considerably above that in the previous year, which was the banner year for harbour dues. But the freight business, in common I suppose with most other businesses fell off to almost nothing and except for the increase in coal the deficit would have been larger.

The harbour buoys were placed out April 20, and taken in on December 2. The gas buoy was placed at the mouth of the intake pipe on May 21; it was re-charged on October 1, and taken in on December 3. Buoys were placed at the Exhibition and Humber river for motor boat racing on August 21, nad taken in on September 18. The Bell Telephone Company's submarine cable was taken up on October 28, to admit of dredging in the bay at the foot of John street. Bell buoys were placed off Gibraltar Point and at the intake pipe on June 27, and taken in November 23.

There are 118 vessels wintering here this season, viz.:—11 passenger steamers, 11 steam ferries, 14 propellers, 4 tow barges, 19 steam tugs, 10 steam yachts, 38 pleasure yachts, and 11 dredges with their scows and derricks; in all about 55,212 tons.

Below I give a comparative statement of the goods arriving at this port for the years 1913 and 1914.

Description of Goods.		1913.	1914.
General merchandise	Tons.	99,415	82,396
Coal	"	139,788	150,599
Horses, horned cattle and motors		486	153
Fruit	Brls.	527	683
"	Crates.	33,085	9,705
"	Baskets.	501,839	396,695
"	Bags.	543	181
Grain	Bushels.	3,330	
Ice	Tons.	9,379	11,249
Common bricks	"	574,000	
Fire bricks		159,000	
Lake stone	Toise.	13,050	10,658
Lumber	Ft B.M.		2,646,000
Oil, in bulk	Brls.	131,953	107,430

The harbour dues collected during the year are as follows, viz:—

150,590 tons coal at 3 cents	$	4,517 70
82,396 tons general merchandise at 3 cents		2,461 88
10,658 toise Lake stone		532 90
153 Horses, etc., etc., at 5 cents		15 00
683 brls. fruit 9,705 crates fruit 390,635 baskets, fruit 181 bags, fruit		306 55
2,646,000 ft. B.M. lumber at 3 cents		79 38
11,249 tons, ice at 1 cent		112 49
	$	8,036 20

Mr. J. M. Wilson, engineer-in-charge, Public Works Department, reports as follows, viz:—

The new western channel is completed and carried to a depth of 16 feet below zero of the Harbour Commissioners' gauge and a clear width of 400 feet. The northerly pier is 2,236 feet in length, and the southerly pier is 2,538 feet in length. The westerly end is 30 feet wide and the remainder 20 feet wide, as is also the entire length of the northern pier. Both have concrete superstructures on cribwork substructure resting on a rock foundation. The revetment wall has been completed at the eastely end of the new western channel, 1,800 feet in length, of which 850 feet extends southerly from the south pier and 950 feet northerly and easterly from the north pier. About 56 acres have been reclaimed by the hydraulic dredging in connection with these works, composed of about 28 acres on either side of the new channel. The magnetic bearing of the new channel is north 61 degrees and 45 minutes, east. East channel: Six hundred and sixty feet of concrete superstructure, has been added this year to the east pier of the eastern channel, having a width of 40 feet, making a total of 1,260 feet renewed in concrete up to date on the northerly portion of the said pier. The magnetic bearing of the eastern channel is north 34 degrees and 45 minutes, west.

Mr. R. F. Stupart, director of the meteorological service in Toronto, reports as follows: Cautionary signals were hoisted twelve times during the season for moderate gales, and heavy gales were displayed on six occasions, namely, five times in November, and once in the beginning of December.

The cautionary signals displayed on the 1st and 15th November were not justified by subsequent moderate gales, while on the 18th and 28th of November and on the 3rd of December, when fresh to heavy gales were hoisted, moderate gales were only experienced at Toronto, although the gale was reported as locally fresh or heavy on Lake Ontario. The season of navigation on the Great Lakes was marked by an absence of severe storms, and of those occurring few reached the force of a fresh gale.

The precipitation for the year was 27·18 inches comprising 19·75 inches of rain, and 7·43 of snow reduced to water.

Dredging was actively engaged in throughout the season at the mouths of the city sewers, at the passenger docks, the freight wharves and at various points in the harbour; a statement of this work will be seen in the report of the Chief Engineer.

Easterly winds have greatly prevailed on Lake Ontario during this season of navigation, having the effect of keeping up the water level in this lake, thus benefiting water commerce.

Before closing my report, I dssire to give full credit to the deputy harbourmaster, Mr. John Allan. He has had much to do and he has done it well and has been of the greatest assistance to myself.

I am, gentlemen,

Your obedient servant,

(Sgd.) COLIN D. POSTLETHWAITE,

Harbourmaster.

APPENDIX No. 14.

PORT WARDENS' REPORTS FOR THE YEAR ENDING DECEMBER 31, 1914.

REPORT OF THE ANNAPOLIS ROYAL PORT WARDEN.

ANNAPOLIS ROYAL, December 26, 1914.

Deputy Minister of Marine,
Ottawa.

SIR,—In compliance with the Act requiring me to make a report of my year's work, as port warden for the port of Annapolis Royal, I beg to say that for the year 1914, I have nothing to report.

Yours truly,

JOSEPH J. MELANCON,
Port Warden.

REPORT OF THE PORT WARDEN OF CHATHAM, N.B.

CHATHAM, N.B., February 10, 1915.

The Deputy Minister of Marine,
Ottawa.

SIR,—I have the honour to enclose herewith reports of surveys held by me during 1914.

The season of navigation was an average one, closing on December 9.

Yours respectfully,

M. A. GOGGIN,
Port Warden, Chatham.

CHATHAM, June 2, 1914.

At the request of Captain Joseph Jimmo of the schooner *J. L. Colwell* of St. John, N.B., 99 registered tons, now lying at the port of Chatham with a cargo of coal on board, I, R. J. Walls, acting port warden; Angus McEachern, master mariner, and R. R. McLean, shipwright, proceeded on board the said schooner for the purpose of holding a survey, the vessel having previously struck on the ground off Escuminac lightstation, and unshipped her rudder, and sprung a leak while waiting there to discharge a cargo of coal. We found the vessel making 8 inches of water per hour, lying at the wharf in still water. We also found that the vessel had been strained considerably, owing to the wedges of the main mast being started, and waterways and stanchions on the starboard side strained and oakum spewed out of the seams. The starboard quarter was damaged, with loss of starboard anchor and 30 fathoms of chain. We therefore recommended that the cargo be discharged, voyage abandoned, that temporary repairs be made, and that the vessel proceed to a port where dry docking facilities were available to effect permanent repairs.

R. J. WALLS, *Acting Port Warden.*
ANGUS MCEACHERN, *Master Mariner.*
R. R. MCLEAN.

CHATHAM, August 22, 1914.

At the request of Captain Logan of the steamship *Yarborough*, of Glasgow, 1988 registered tons, from Chatham, N.B., bound to Garston, Scotland, with a cargo of deals:—

I, M. A. Goggin, port warden; R. J. Walls, harbour master; of Chatham, N.B., and H. Haviland, mechanical superintendent, proceeded to-day on board the said ship for the purpose of holding a survey—the ship then lying outside the Miramichi bar, with her forward peak full of water.

We ordered the pumps set to work and pumped for three hours steadily and found that the pumps made no impression on lowering the water in the hold; we therefore abandoned the idea of pumping her out.

We recommended that Captain Logan proceed to Pictou, N.S., with the ship, where he could procure divers to ascertain the damage and make necessary repairs to enable him to proceed on his voyage—there being no chance for a diver to work where the ship was lying, on account of the weather.

M. A. GOGGIN, *Port Warden.*
R. J. WALLS, *Harbour Master.*
HARRY HAVILAND, *Mechanical Superintendent.*

CHATHAM, N.B., October 19, 1914.

At the request of Captain Thomas King, of the schooner *Jennie B. Hodgdon*, 85 registered tons, now lying at the port of Chatham:—

We, M. A. Goggin, port warden, R. J. Wallis, harbour master, and Captain King, master mariner, proceeded on board the said vessel for the purpose of holding a survey, the vessel having previously been ashore at Caraquet and damaged her forefoot and stem.

We found on going aboard that temporary repairs had been made, and that the vessel was still making some water. We ordered her pumped dry, and let stand for four hours. On our return after four hours, we found that she had made four inches of water, on an average 1 inch per hour, which we considered very small leak.

We found the vessel's sails and rigging all in good condition, and therefore recommended that Captain King take on board a cargo of lumber and proceed to Prince Edward Island or Gut of Canso. We considered this vessel perfectly seaworthy and safe to proceed on voyage above mentioned either lumber-laden or in ballast.

We also recommended that the vessel, on arriving at her port of destination, be hauled out for permanent repairs, or at the first available opportunity.

M. A. GOGGIN, *Port Warden,*
R. J. WALLS, *Harbour Master.*
THOMAS KING, *Master Mariner.*

REPORT OF THE PORT WARDEN AT HALIFAX, N.S.

HALIFAX, N.S., January 2, 1915.

Deputy Minister of Marine,
Ottawa.

SIR,—I have the honour to submit my report for the year ending December 31, 1914, accompanied by a statement in duplicate of the receipts and expenditures during that period.

Surveys have been held on eleven steamers and two schooners, which arrived at this port in a damaged condition during the year.

The necessary repairs were made to the vessels, and those of them bound to other ports proceeded to their destinations, where they have safely arrived.

During the year ending December 31, 1914, there have been shipped from the port of Halifax, to ports in Great Britain, 1,274,736 bushels of wheat.

No live stock have been shipped from Halifax during the year 1914, except horses by the War Department.

RECEIPTS AND EXPENDITURES OF THE PORT WARDEN AT HALIFAX, N.S., FROM JANUARY 1, 1914, TO DECEMBER 31, 1914.

Dr.		Cr.	
To Amount received as fees	$ 2,357 25	By Paid assistants and office expenses	$1,071 21
		Amount to Port Warden	1,286 04
	$2,357 25		$2,357 25

I hereby certify that the above is a true and correct statement of the receipts and expenditures of the Port Warden at Halifax, N.S., from January 1, 1914, to December 31, 1914.

NEIL HALL,
Port Warden.

REPORT OF THE PORT WARDEN OF LOUISBURG.

LOUISBURG, February 10, 1915.

To The Deputy Minister of Marine,
Ottawa.

SIR,—I beg to submit the following report as port warden for the port of Louisburg, N.S., for the year ending December 31, 1914:—

January 26, 1914, ss. *Astarte* survey on ship afloat after ship being aground	$ 8 00
January 26, 1914, Molina certificate of sea worthiness	8 00
July 6, 1914, *Wearpool* certificate of seaworthiness	8 00
August 24, 1914, *Stanley*, certificate of seaworthiness	8 00
August 28, 1914, *Dinsdale Hall*, certificate of seaworthiness	8 00
September 7, 1914, *British Transport*, certificate of seaworthiness	8 00
October 8, 1914, *Asken Hall*, certificate of seaworthiness	8 00
October 23, 1914, *Diana*, certificate of seaworthiness	8 00
October 30, 1914, *Floriston*, survey ship stranded, ship condemned	8 00
November 11, 1914, *Harala*, certificate of seaworthiness	8 00
December 1, 1914, *Forne*, certificate of seaworthiness	8 00
December 31, 1914, *Grontoft*, certificate of seaworthiness	8 00
	$96 00

I am, sir,

Your obedient servant,

DONALD J. MATHESON,
Port Warden.

REPORT OF THE PORT WARDEN AT MONTREAL.

MONTREAL, January 7, 1915.

To The Deputy Minister of Marine,
Ottawa.

SIR,—I have the honour, by direction of the council of this board, and in compliance with section 31 of the Act governing the port warden's office, 45 Vic., chap. 45, to transmit herewith documents as follows:—

1. Port Warden's annual report for the year 1914.
2. Audited statement of receipts and expenditures of the port warden's office for the year ending December 31, 1914.
3. Statement of investments of port warden surplus funds.

I have the honour to be, sir,

Your obedient servant,

GEO. HADRILL,
Secretary.

MONTREAL, December 23, 1914.

To The President and Council of the Montreal Board of Trade.

GENTLEMEN,—I have the honour to submit the annual report of the business of the port warden's office, with statement of the exports, receipts and expenditure for the year 1914.

The river St. Lawrence was clear of ice and the buoys laid from this port to the gulf on the 25th April, but the ocean steamships could not avail themselves of it, as they were detained by field ice outside the Cabot straits.

The season of ocean navigation opened on the 29th April by the arrival from sea of the steamships *Corsican, Saturnia,* and *Ionian,* ten days later than last year.

The steamship *Jacona,* of the Thomson Line, was the first steamship to enter the St. Lawrence by the straits of Belle Isle; she passed point Amour inward at 8 p.m. June 27, but owing to the large quantities of field ice and bergs reported, the strait was very little used this season, and as the reports of the signal service were suppressed after war was declared, no record could be kept of vessels using that route.

The sudden and unexpected declaration of war with Germany at midnight on the 4th August caused a stagnation of the shipping for a time, but as soon as the vessels were assured of protection the sailings were resumed.

The British Government having acquired several of the regular line steamships, the sailings have been very irregular, and the imports smaller than they otherwise would have been. The arrivals of vessels were increased by tramp steamers which came to load full cargoes of grain.

With the exception of the grounding of the steamships *Anglo Brazilian* and *Zeeland,* we have no disasters of a serious nature to report on the river between this port and Quebec.

Navigation closed by the departure of the steamship *Manchester Spinner* at 8 a.m. December 4.

Five hundred and sixty foreign-going steamships reported at this office this season, with a tonnage of 2,063,517 tons, against 478 vessels of 2,033,752 tons last season, an increase of eighty-two vessels and 29,765 tons.

The business to the lower ports this season, consisted of: entered, 362 vessels of all classes with a tonnage of 688,284 tons, against 349 vessels of 647,903 tons, an increase of thirteen vessels and 40,381 tons.

SESSIONAL PAPER No. 21

Clearances of vessels loaded for the lower ports this season were: 107 vessels of all classes, with a tonnage of 65,759 tons, against 100 vessels of 75,873 tons, an increase of seven vessels and decrease of 10,114 tons from last season.

The shipments of various kinds for the past season, manifested and reported at this office are as per attached statements.

All of which is respectfully submitted,

ARCHIBALD REID,

Port Warden.

COMPARATIVE STATEMENT of shipments, 1913 and 1914, as per manifests reported at the port warden's office.

Port Warden.

REPORT OF THE QUEBEC PORT WARDEN.

QUEBEC, December 30, 1914.

Deputy Minister of Marine,
Ottawa.

SIR,—As requested by the 30th section of the port warden's rules, I beg respectfully to submit the following annual statement of the business transacted in this office during the year ending the 30th December, 1914.

Fifty-four steamers were surveyed for clearance outwards, after taking part cargo on board at this port, having previously shipped part cargo of grain and other goods at Montreal.

Seventy-five steamers were surveyed, their hatches opened and cargo examined, on their arrival from sea.

Eight steamers and one barge were surveyed on account of collision damage.

Six steamers and one yacht were surveyed on account of grounding and stranding in the river St. Lawrence below and above Quebec.

Two steamers were surveyed and value estimated for general average purpose.

Twenty-seven surveys were held on damaged goods.

The receipts and disbursements of this office are as follows:—

Receipts	$1,524 50
Expenses	288 00
	$1,236 50

With much respect, I remain

Your obedient servant,

ALEX. RUSSELL,

Port Warden.

NORTH SYDNEY PORT WARDEN.

NORTH SYDNEY, N.S., August 2, 1915.

Deputy Minister of Marine,

SIR,—I beg to submit my report as Port Warden, for the year 1915.

(Signed) W. H. KELLY,

Port Warden.

VANCOUVER PORT WARDEN.

VANCOUVER, B.C., January 7, 1915.

The Deputy Minister of Marine,
Ottawa.

SIR,—I have the honour to submit the annual report of the port warden's office, in compliance with R. S. 113, chap. 13, section 899 of the Canada Shipping Act, for the year 1914.

The total number of surveys held on hatches of vessels arriving at this port was seventy-nine. Included in this number fifty-seven vessels' cargoes unloaded at this

port were surveyed for damage (by perils of the sea and otherwise), and reported thereon. Damage to goods received by merchants of this city at their respective premises ex-steamers, to the number of eight, were examined and reported upon, also eight vessels which loaded part cargoes outward with wheat were duly examined and certificates granted in accordance with the provisions of the Canada Shipping Act. The quantity of wheat shipped from the port of Vancouver during the year amounted in all to 2,705 tons, made up as follows:—

Mexico	767·6 tons.
Japan	1,241·4 "
New Zealand	696·0 "
Total tons	2,705·0 "

Owing to the depression of trade during the past year, fewer vessels overseas with lesser individual cargoes arrived than during the previous year. Towards the end of the past year and since the outbreak of the war, the Canadian Pacific Railway Company's overseas fleet consisting of five vessels was requisitioned by the Admiralty, together with several other regular liners trading to this port, notably the Royal Mail line. However, their sailings have latterly been filled up by vessels of the Japanese Line "Osaka Shosen Kaisha" and the "Russian Volunteer Fleet," the first of each of these lines vessels arrived on their initial voyages towards the close of the year.

The total amount of fees collected for services rendered was $1,324.50.

The total number of surveys held on hatches of vessels arriving at this port from the 1st of January to 31st March, 1915, was eighteen. Cargoes unloaded at this port were surveyed for damage to the number of eighteen, one vessel was surveyed for insurance purposes, also one further survey held on account of structural damage.

The quantity of wheat shipped from the port of Vancouver from January 1 to March 31, is as follows:—

January 16, steamship *Hornellen,* 23,450 bushels for New Zealand.

The total amount of fees collected during this quarter was $382.50.

I have the honour to be, sirs,

Your obedient servant,

S. CULLINGTON,

Port Warden.

REPORT OF THE PORT WARDEN OF VICTORIA AND ESQUIMALT, B.C.

VICTORIA, B.C., January 5, 1914.

The Deputy Minister of Marine,
Ottawa.

SIR,—I have the honour of submitting herewith my report as port warden for the ports of Victoria and Esquimalt, B.C., for the year ending on the 31st of December, 1914.

Amount of fees received for surveys on the hatches and cargo of thirty-eight steamships, $488.

I have the honour to be, sir,

Your obedient servant,

CHAS. E. CLARE,

Port Warden.

REPORT OF THE PORT WARDEN OF WESTPORT, N.S.

WESTPORT, N.S., January 4, 1915.

Deputy Minister of Marine,
Ottawa.

SIR,—I beg leave to report that as port warden for the port of Westport, N.S., that there has been no business that has needed my attention during the past year of 1914.

I am, respectfully yours,

WM. B. WELCH,
Port Warden.

REPORT OF THE PORT WARDEN, YARMOUTH, N.S.

YARMOUTH, N.S., January 4, 1915.

Deputy Minister of Marine,
Ottawa.

SIR,—Enclosed please find year 1914, port warden's returns.

Would have had these in sooner but have been busy with steamship *Bavaria* on reef Holims island, 14 miles from town.

1914.

APPENDIX No. 15.

REPORTS OF SUBSIDIZED WRECKING COMPANIES.

SALVAGE SERVICES RENDERED BY THE QUEBEC SALVAGE AND WRECKING COMPANY FROM THE 31ST MARCH, 1914, TO 31ST MARCH, 1915.

1914.

April 29.—Towed off the ss. *Montfort* ashore at Beauport flat.

May 13.—Towed ss. *Saronic* from Grosse Isle to Quebec, owing to breakdown of machinery.

June 1.—Went to the assistance of the ss. *Storstad,* which steamer collided with the *Empress of Ireland.* Met her off cape Salmon and conveyed her to Montreal.

July 2.—Made temporary repairs to Canadian ss. *Canada* at Lévis. This steamer struck up the river at cap à la Roche.

July 23.—Saved the Canadian ss. *Canada,* which steamer was hard ashore off cape Chat.

August 8.—The ss. *Lord Strathcona* with superintendent and diver operated in connection with Mr. Wotherspoon recovering bodies from the wreck of the ss. *Empress of Ireland* for forty-six days.

August 17.—Went to the assistance of the Norwegian ss. *Folk,* ashore at Saguenay river, and towed her off.

August 23 to September 1.—Saved the British steamer *Monkshaven,* which steamer was ashore off Ste. Felicite, and brought her to Quebec.

September 3 to 16.—Went to the assistance of the British steamer *Floriston,* which steamer had been beached off Port Saunders, Newfoundland, after being in collision with an iceberg. On arrival at Port Saunders found the steamer had been towed off beach and was anchored at Port Saunders, badly leaking. Furnished the necessary pumps and compressor and by the help of the same brought her to Quebec conveyed by the *Lord Strathcona.*

September 15.—Diver examined the bottom of the steamer *Ivernia* at the port of Quebec. This steamer ran ashore off Father point, but came off without assistance.

November 23.—Went to the assistance of the ss. *Zeeland,* ashore off isle au Raisin on the upper part of lake St. Peter. By applying arrangement for compressed air through her bottom and the assistance of the dredges from the Public Works and Government steamers, also steamer from McNaughton, Montreal, and the *Lord Strathcona* also the ss. *Musquash.* This steamer was towed off under the direction of the superintendent, Captain H. Kjerland.

November 27.—Went to assist the steamer *Hendonhall,* which steamer ran ashore off point des Monts. Owing to serious position and the lateness of the season, could do nothing to save steamer.

December 8, 1914, to May 3, 1915.—The *Lord Strathcona,* with the proper salvage equipment, superintendent, wreck foreman, diver and wreckers left Quebec for St. John, N.B., on December 8, 1914, and returned to Quebec on May 3, 1915, and during this interval the salvage plant had its station at St. John, N.B., for operation of the Atlantic coast and the bay of Fundy.

December 30, 1914, to January 3, 1915.—Went to the assistance of the ss. *Navarra,* stranded off Yarmouth, N.S. Condition of position did not permit salvage of steamer, but rendered the necessary assistance to secure steam for winch for saving of her cargo.

Quebec Salvage & Wrecking Co., Ltd., of Montreal.

Haakou Kjerland, *Superintendent.*

REPORT OF BRITISH COLUMBIA SALVAGE COMPANY.

Salvage Services of ss. "Salvor."

March 31, 1914, to March 31, 1915.

August 19, 1914, to October 5, 1914.—To wreck of ss. *Prince Albert,* on The Knob Group, Browning Passage, British Columbia.

October 10, 1914, to October 11, 1914.—To wreck of ss. *Sious, on Dungeness,* Washington, U.S.A.

October 14, 1914, to October 15, 1914.—Towed ss. *Prince Albert* to Vancouver, B.C. Keeping her free of water until docked.

January 10, 1915, to January 14, 1915.—To wreck of C.G.S. *Galiano,* on Colburg Peninsula spit.

January 21, 1915, to February 10, 1915.—To wreck of ss. *Delhi,* on Straits island, Sumner straits, Alaska.

February 15, 1915, to February 24, 1915.—To wreck of ss. *Delhi* on Sumner straits, Alaska.

Victoria, B.C., April 23, 1915.

APPENDIX No. 16.

LIVE STOCK SHIPMENTS.

List of Live Stock shipped from May, 1914 to November, 1914, to ports in Great Britain and France.

APPENDIX "D" OF THE METEOROLOGICAL REPORT.

This appendix was received after the Meteorological Report of Director R. F. Stupart was in print, and is therefore out of its proper place in the annual report.

Most of the information which this appendix contains was obtained from observations during the season of 1915, and being of an extremely interesting character it was thought well to publish it this year instead of deferring its publication until 1916.

It, furthermore, shows some of the steps taken to introduce agricultural meteorology into the meteorological service of Canada, the preparatory arrangements and the actual work done in this line of collecting data as the result of observations and investigations into the effect of climatic conditions, at different stations, upon the growing grain and other agricultural products in Canada in 1915. One of the objects that will be kept in view, in connection with this branch of meteorological service in Canada is to ascertain the most suitable kind of seed grain to sow in different farming localities.

It will be observed that while the meteorological service is controlled by the Marine Department, the co-operation of the officials at Experimental Farm stations has been accorded.

APPENDIX "D" OF THE METEOROLOGICAL REPORT.

METEOROLOGICAL OFFICE,
TORONTO, October 20, 1915.

R. F. STUPART, Esq., F.R.S.C.,
Director of the Meteorological Service,
Toronto.

SIR,—I beg to furnish herewith a report on the Department of Agricultural Meteorology, of which you have placed me in charge.

It is estimated by one thoroughly acquainted with cereals in Canada, that in the province of Saskatchewan, under the best farming methods known to modern agriculturists, that the yield of spring wheat varies from 10 to 20 bushels per acre to 50 bushels per acre, according to the season—unfavourable or favourable. Here is a possible loss of at least 30 bushels per acre of wheat, chargeable to the weather alone. Surely the great unsolved problem indicated in these figures is a challenge to every effort on the part of scientific agricultural investigators.

The *Experiment Station Record,* published by the United States Department of Agriculture, said editorially in June, 1913:—

> "An elaborate report, proposing an international organization of agricultural meteorology, presented at the General Assembly of the International Institute of Agriculture at Rome in the spring of 1911, was striking evidence of an awakening to the need of development in this neglected field of agricultural inquiry.
>
> "Several of the established weather services of the world are now actively engaged in the study of ways and means of securing the additional meteorological information required by agriculture, and of making that already in hand more immediately available. In a few cases separate services for agricultural meteorology have been organized.

"There is evidence that those who give thought to this subject are more clearly convinced than ever before of the need of experimental investigation into the specific effects of known and controlled conditions of moisture, temperature, sunshine, etc., on plant growth and healthy development.

"Prof. Cleveland Abbe has advocated the more exact study of the relation of meteorological and climatological conditions to plant growth by means of 'climatological laboratories' in which the conditions are more or less completely controlled, thus supplementing and furnishing a check upon outdoor observations.

"The Russian Bureau of Agricultural Meteorology gives great prominence to problems of research and the direct correlation of meteorological factors and plant growth, without neglecting the popular and educational features of the work. It is probably the most completely organized attempt at exact and comprehensive investigation in this field now in existence.

"The service in Russia was organized in 1897. Its characteristic feature is a system of agricultural-meteorological stations scattered throughout the Empire, which, in addition to being equipped with the necessary meteorological instruments, are provided with experimental fields on which various crops are grown for the purpose of definitely studying the effect of the meteorological and climatological conditions on plant growth. This system of stations has accumulated a large amount of valuable data bearing upon the relation of meteorological factors to the soil and to the life and growth of cultivated plants, especially with reference to critical periods of the growth of various plants. Those experimented with have included, among others, corn, wheat, oats, rye, millet, and buckwheat. Similar studies have been extended to the effect of the meteorological factors on the life and activities of domestic animals.

"There is a present need for more systematic research on a plan similar to that of the Russian Bureau of Agricultural Meteorology, and embodying certain of the features proposed by Professor Abbe.

". . . It appears in brief that the fundamental needs as regards the application of meteorology to agriculture are, in logical sequence and in ascending order of importance, as follows: (1) The organization and correlation of statistical data on weather conditions and crop growth already available in large amount; (2) the organization, as proposed by Voorhees, of more extensive and systematic effort to secure exact data along this line by all interested agencies; and (3) special studies of the adjustment of plants and animals to their atmospheric environment, requiring the co-operation of the biologist with the meteorologist."

Mr. A. C. True, Director of the States Relations Service, of the United States Department of Agriculture, in a letter to the writer in October, 1914, said: "No meteorological work has been undertaken in the United States in accordance with the Russian plan. . . . . On the whole, agricultural meteorology appears to have been strangely neglected as a clearly defined subject of investigation although it seems highly important that meteorological investigations bearing directly upon plant and animal growth and crop production should be given a prominent place in agricultural research and should be broadly planned and persistently followed."

In a paper entitled, "Relation of meteorological study to more logical systems of cropping and to crop production", J. F. Voorhees, Esq., Consulting Meteorologist at the Agricultural Experiment Station of Tennessee, U.S.A., writes, on page 101: "If the experiment stations will each investigate the growing habits of as many crops as possible and make the investigations uniform; if the Weather Bureau will put its data in the best shape for use in the solution of this problem; and if each of the other bureaus of the department whose activities touch on this problem in any way will

co-operate heartily, it will be possible in five years to get together a mass of information that will make it possible to double and perhaps quadruple the efficiency of the farms of the south."

Dr. Raphael Zon, Chief of Forest Investigations, in the United States wrote me in June, 1914, stating: "I believe in both extensive and intensive investigations with relation to plant life. The extensive studies should be supplied by the regular weather service of the country, while intensive studies should be conducted at agricultural and forest experiment stations. The extensive observations, properly conducted and worked up, would be of enormous benefit for the proper understanding of plant distribution over a wide territory, while the intensive studies would answer some specific problems of the relation between definite climatic factors and plant growth."

Professor Broounoff, Chief of the Bureau of Meteorology for Russia, in a pamphlet in French, styled "Some considerations on the organization of a meteorological service in the interests of agriculture," wrote (translated) with regard to the practical results of the studies at the agricultural-meteorological stations: "Adaptation, be it only to the average weather—the actual weather being impossible to foresee—leads in many localities in Russia to an appreciable increase in yields. Another advantage of the knowledge of critical periods lies in the possibility of a judicious application of irrigation, which is extremely important in our arid regions, e.g. Turkestan and the southeast of Russia in Europe."

Dr. T. K Doherty, Commissioner for Canada of the International Institute of Agriculture, wrote this department in June, 1914: "Doubtless the meteorological system of the Russian Government is pretty fully developed and the publication issued . . . would be, if translated into English, of great value."

In November, 1914, I received a letter from Dr. J. E. Church, of the Department of Meteorology, of the University of Nevada, U.S.A., congratulating Canada on taking the initiative in following the suggestions of the International Institute of Agriculture, with regard to agricultural meteorology. Through the International Institute, there was appointed a permanent commission to direct the international efforts in this work, and this commission was to have met in Paris in the summer of 1914, but has been, and likely will be, prevented from meeting, by the great European war, for an indefinite time to come.

G. P. Burns, Esq., Botanist of the University of Vermont, U.S.A., wrote to me in February, 1915: "I am much interested to know that Canada has established a branch of the service to study agricultural meteorology. This is an important, but little known field, and one which offers many obstacles."

Prof. J. W. Crow, of the Department of Horticulture, Ontario Agricutural College, wrote in July, 1914: "I am most interested in your line of work." And R. M. Winslow, Provincial Horticulturist for British Columbia, wrote me in January, 1915: "I quite agree that there is a great field of opportunity in the study of such problems, but they need to be taken up thoroughly and scientifically to bring accurate results."

J. Bracken, Esq., Professor of Field Husbandry at the University of Saskatchewan, wrote me in May, 1914: "We shall be very glad to co-operate with you in securing data or in carrying out field experiments, if we can be of any service to you in that way."

It seemed to the writer that field work in agricultural meteorology ought to be inaugurated in Canada, and when Dr. F. T. Shutt, Assistant Director of the Dominion Experimental Farms System, was approached with a plan of co-operative work, in January, 1915, he replied: "At a general meeting of the chief officers and the superintendents of the branch farms and stations . . . I presented in outline the proposed plan for obtaining data for the closer study of the influence of 'weather' on crops. You will be pleased to learn that they expressed themselves as impressed with the value that such investigations would in the long run be to the farmer and, further, that they would be willing, in so far as they were able, to co-operate in the work."

At the request of Dr. Shutt, I prepared in February, 1915, an outline of the new movement in agricultural meteorology, which was incorporated in a publication from the Central Experimental Farm, Ottawa.

Some of the Russian forms used in field studies of spring grains were translated for me by Dr. Zon, and I have now on file a fairly complete set of Russian publications, which await translation. With the assistance of Dr. Shutt and of Dr. Chas. E. Saunders, Dominion Cerealist, I adapted the translated form to conditions possible this year in Canada, involving no additional outlay of money, and not an excessive demand on the time of the observers at the Experimental Stations. Each of fourteen stations, well distributed over Canada, grew during this season of 1915 a plot of Marquis spring wheat, and notes on the development of the crop were recorded on the forms supplied by this department.

I am at present engaged in correlating the crop data, by a graphical method, with the daily temperatures, precipitation, and bright sunshine occurring throughout the growing season of the wheat.

I visited each station during the growing season and obtained a first-hand acquaintance with the plots and field conditions; took careful notes, copies of which were supplied to Dr. Shutt; encouraged uniform methods of taking meteorological observations; investigated climatic conditions through observation and conversation with experienced men; studied the suitability of most of our important crops to the climate of each Dominion Experimental Station; collected a lot of information which will assist in an intelligent study of the crop and weather data.

Prof. J. Warren Smith, of Ohio, who has done valuable work along the line of correlating crop statistics with weather data at present available in the United States, wrote me in October, 1915: "You have made a start in the right direction, and I will add that it is a splendid one."

The plans of my department include a study of the data accumulated this season, arrangements for the early translation of all Russian publications of value to investigators in agricultural meteorology, and after these precedents have been thoroughly studied, the perfecting of field methods and equipment, so that a serious attack may be made on this great problem.

As was pointed out at the beginning of this report the problem challenges scientific investigators all over the world. In a spirit of lethargy they may say: "The weather cannot be changed. What can we do about all this?" Or in the indomitable spirit of modern science they may say: "Here is a great unsolved problem. We will never relinquish our energies until a solution is found."

It is in this spirit that Russia has attacked the question, and results indicate that her efforts have been worth while.

Respectfully submitted,

R. W. MILLS,

In charge of Dept. of Agricultural Meteorology.

To the Honourable

J. D. HAZEN,

Minister of Marine and Fisheries,

SIR,—I have the honour to submit herewith the twenty-fifth List of Shipping issued by this Department.

A. JOHNSTON,
Deputy Minister of Marine and Fisheries.

Department of Marine and Fisheries,
Ottawa, 1916.

A l'honorable J. D. Hazen,

Ministre de la Marine et des Pêcheries.

Monsieur,—J'ai l'honneur de vous soumettre la vingt-cinquième liste des navires publiée par ce Département.

A. JOHNSTON,
Sous-ministre de la Marine et des Pêcheries.

Ministère de la Marine et des Pêcheries,
Ottawa, 1916.

LIST of vessels whose names have been changed by the Minister of Marine and Fisheries, under Section 27 of Chapter 113 of the Revised Statutes of Canada, 1906, during the year ended December 31, 1915.

LISTE des navires dont les noms ont été changés par le Ministre de la Marine et des Pêcheries, d'après les dispositions de l'article 27, chapitre 113 des Statuts Revisés du Canada, 1906, durant l'année terminée le 31 décembre 1915.

Official Number. — Numéro officiel.	Present Name of Vessel. — Nom actuel du navire.	Port of Registry. — Port d'enregistrement.	Former Name of Vessel. — Ancien nom du navire.

SUPPLEMENT TO LIST OF VESSELS, 1915.

List of Ships (distinguishing Steam and Sailing Ships) belonging to the Dominion of Canada, reported to the Department of Marine and Fisheries in respect of their Registry while the list was in preparation.

A.—Ships for which Registers were opened.

B.—Ships whose Registers were closed in consequence of their having been wrecked, etc.

C.—Ships whose names have been changed.

Note.—Names of Motor Vessels are printed in *italics*.

A. JOHNSTON,
Deputy Minister of Marine and Fisheries.

SUPPLEMENT A LA LISTE DES NAVIRES, 1915.

Liste des Navires (les voiliers sont indiqués indépendamment des vapeurs) appartenant à la Puissance du Canada, et signalés pour fins d'enregistrement au Ministère de la Marine, alors que la liste était en cours de préparation.

A.—Navires ayant été enregistrés.

B.—Navires ayant été biffés à la suite de naufrages, etc.

C.—Navires dont les noms ont été changés.

Note.—Les bateaux à moteur sont indiqués en *italiques*.

A. JOHNSTON,
Sous-ministre de la Marine et des Pêcheries.

TABLE I.—STEAMERS REGISTERED—VAPEURS ENREGISTRÉS.

Official No. — N° officiel.	Name of Ship. — Nom du navire.	Port of Registry. — Port d'enregistrement.	Built. — Construit en	Where Built. — Lieu de construction. OTTAWA, October, 1915.

HON. J. D. HAZEN,

Minister of Marine and Fisheries.

SIR,

I have the honour to submit the Supplement to the Forty Eighth Annual Report of the Department of Marine and Fisheries (Marine Branch) for the fiscal year 1914–15, being the Report of the Chairman of the Board of Steamboat Inspectors.

I have the honour to be, sir,

Your obedient servant,

A. JOHNSTON,

Deputy Minister of Marine and Fisheries.

BOARD OF STEAMBOAT INSPECTION

INTRODUCTION.

OTTAWA, October 1, 1915.

To the Deputy Minister of
Marine and Fisheries,
Ottawa.

SIR,—I have the honour to submit, herewith, the supplement to the annual report of the Steamboat Inspection Service for the fiscal year ending March 31, 1915, containing tables showing steamboats inspected, etc., and engineer's certificates issued during that period.

Particulars of changes in the staff of the Steamboat Inspection Service, Board Meetings held, and casualties which occurred during the fiscal year, also a table showing the number and gross tonnage of vessels inspected throughout Canada and the fees collected, will be found in the Annual Report of the Department in Appendix 12, pages 275 to 280.

I have the honour to be, sir,

Your obedient servant,

T. R. FERGUSON,
Chairman.

Steamboat Inspection Staff for the Dominion of Canada during the Fiscal Year ended March 31, 1915.

INSPECTORS OF BOILERS AND MACHINERY.

Lighter No. 3	268 129	Toronto, Ont. Steel.	Frt.	Screw 19·46	Toronto	Port Nelson.
Lobnitz No. 3	438 389	Renfrew, G.B. Steel.	Rockbreaker	Screw 15·0	N. B. and P. E. I.	Buctouche river.
Loon Lake	9 6	Fort Francis, Ont. Wood.	Tug	Screw 1·2	Kenora	Rainy lake.

Louis Philippe	600 251		Levis, Que Steel.	Ferry	Screw 58·0	Quebec	Montreal and Longeuil.
M. & F. Hopper Barge No. 1	675 238		Levis, Que Steel.		Screw 74·0	Sorel	St. Lawrence river.
M. & F. No. 11	843 734		Sorel, Que Steel.	Spoon dredge	Screw 53·6	Sorel	St. Lawrence river.
M. & F. No. 12	842 682		Sorel, Que Steel.	Elevator dredge	Screw 47·8	Sorel	St. Lawrence river.
M. & F. No. 13	842 682		Sorel, Que Steel.	Elevator dredge	Screw 47·8	Sorel	St. Lawrence river.
M. & F. No. 14	888 332		Collingwood, Ont Steel.	Elevator dredge	Screw 87·1	Sorel	St. Lawrence river.
M. & F. No. 15	888 332		Collingwood, Ont Steel.	Elevator dredge	Screw 87·1	Sorel	St. Lawrence river.
Major	2,149 1,721	1889	West Bay City, Mich Composite.	Frt	Screw 137·0	Collingwood	All lakes and rivers.
Malaspina	392 129		Dublin, Ireland Steel.	Fishery cruiser	Screw 81·54	Victoria	Pacific coasting.
Margaret F	31 19		Collingwood, Ont Wood.	Yacht	Screw 6·0	Toronto	Moon river and vicinity.
Mariel	49 8		Chicago, Ill Wood.	Tug	Screw 17·0	Collingwood	St. Mary river.
Mariska	2,502 1,875	1890	Cleveland, Ohio Steel.	Frt	Screw 252·0	Collingwood	All lakes and rivers.
Marlton	64 44		Goderich, Ont Wood.	Tug	Screw 24·0	Toronto	Lake Huron.
Malava	2,241		Cleveland, Ohio Steel.	Frt	Screw 191·36	Toronto	All lakes and rivers.
Mary H. Cann	58 24		Mahone Bay, N.S. Wood.	Fishing boat	Screw 14·7	Halifax	Coasting.
McLean No. 3	177 164		Sault Ste Marie, U.S. Wood.	Dredge	Screw 6·7	Collingwood	St. Mary river.
Mildred C.	73		Winnipegosis, Man Wood.	Tug	Screw 2·7	Kenora	Lake Winnipegosis.
Minga	20 13		New York, N.Y. Wood.	Yacht	Screw 7·35	Toronto	Muskoka lakes.
Musquash	198 4		Gartson, G.B. Steel.	Tug	Screw 89·0	Quebec	St. Lawrence river
Nasjo	116 73		Grouard, Alta Wood.	Frt. and Pass	Stn .Pad 1·7	Kenora	Lesser Slave lake.

TABLE V.—Statement showing Steam Vessels added to the Dominion during the Fiscal Year ended March 31, 1915—*Continued.*

Name of Vessel.	Tonnage. — Gross. Reg'd.	When and Where Built. — Material.	Trade.	Method of Propulsion. — N.H.P.	Division.	Route.
Nereid	40 28	Watersborough, N.B. Wood.	Tug	Screw 13·0	N.B. and P.E.I.	St. John harbour and river.
Niagara		Wood.	Dredge	50·14	Toronto	Hamilton bay.
Nipisiguit	94 22	Bathurst, N.B. Wood.	Tug	Screw 16·6	N.B. and P.E.I.	Coasting.
Nitinat	332 58	South Shields, G.B. Composite.	Pass. and tug	Screw 145·0	Victoria	Coasting.
Northern	14 9	Simcoe, Ont. Wood.	Alligator tug	Twin screw 5·4	Port Arthur	Rainy lake.
Nubertha	21 17	1914 Walkers Point, Ont. Wood.	Pass. tug	Screw 6·28	Collingwood	Muskoka lakes.
Otter	20 13	Port Frances, Ont. Wood.	Alligator tug	Twin screw 5·4	Port Arthur	Rainy lake.
P. R. T. No. 1	40 27	Prince Rupert, B.C. Wood.	Tug	Screw 14·5	Vancouver	Coasting (Oil burner).
Passe Partout		1912 Montreal, Que. Wood.	Tug	Screw 2·7	Montreal	Montreal harbour.
Pelee	538 243	1914 Collingwood, Ont. Steel.	Passenger	Screw 58·45	Collingwood	Windsor and Pelee island.
Phoebe 2nd	13 9	Kingston, Ont. Wood.	Yacht	Screw 4·95	Toronto	Muskoka lakes.
Puncher	52 23	Sorel, Que. Steel.	Tug	Screw 13·0	Quebec	Seven islands, P.Q.
QUINITSA	30 22	Vancouver, B.C. Wood.	Tug	Screw 5·8	Vancouver, B.C.	Coasting (Oil burner).
Robert L. Fryer	2,033 1,158	West Bay City, Mich. Wood.	Floating elevator	Screw 129·5	Port Arthur	Thunder bay.
Rockbreaker No. 1	309 198	Sorel, Que. Steel.		25·0	Sorel	St. Lawrence river.

Rounder	7 5		Fort George, B.C. Wood.	Freight	Screw 1·0	Victoria	Fraser river.
Sable I	734 341		Pasley, Scot Steel.	Passenger and freight.	Screw 85·2	N. S.	Coasting.
Santa Maria	309 197		Govan, Scot Steel.	Passenger and freight.	Screw 54·0	Vancouver	Vancouver and Powell river.
Say When	11 8		Hamilton, Ont Wood.	Passenger	Screw 10·23	Toronto	Hamilton bay.
Sharon	2,278 1,389		Sunderland, G. B Steel.	Freight	Screw 163·8	N.B. and P.E.I.	Government service.
Sheba	2,268 1,341		Sunderland, G. B Steel.	Freight	Screw 163·8	N.B. and P.E.I.	Government service.
Sir Lomer	48 18		Portneuf, Que Wood.	Tug	Screw 23·0	Quebec	St. Lawrence river.
Stanstead	1,549 970	1881	West Bay City, Mich Wood.	Freight	Screw 98·0	Montreal	All lakes and rivers.
Stella A. K	61 35	1914	Buckingham, Que Wood.	Tug	Screw 4·8	Montreal	All rivers.
T. J. Wolfe	202 104		Smith's Falls, Ont Wood.	Freight	Screw 5·0	Kingston	Lake Ontario and Rideau canal.
Thomas Fisher	52 23		Fort William, Ont Wood.	Tug	Screw 14·4	Port Arthur	Thunder bay.
Tillie Battle	76 51		Thorold, Ont Wood.	Freight	Screw 6·53	Toronto	Thorold and Pt. Maitland.
Toiler	1,659 1,334	1910	Newcastle-on-the-Tyne Steel.	Freight	Screw 70·0	Collingwood	All lakes and rivers.
Torsand	56 23		Manitowoc, U.S. Wood.	Tug	Screw 9·21	Toronto	Lake Ontario.
Val Cartier	3,748 2,250		Cleveland, Ohio Steel.	Freight	Screw 147·9	Port Arthur	Great lakes.
Vaughn	134 91		Selkirk, Man Wood.	Tug	Screw 20·16	Kenora	Lake Winnipeg.
W. Grant Morden	8,973 6,594		Port Arthur, Ont Steel.	Freight	Screw 210·7	Port Arthur	Great Lakes.
Woodnymph	19 13		Lund, B.C. Wood.	Tug	Screw 2·6	Vancouver	Coasting.

TABLE VI.—Statement of Steam Vessels Lost, Broken up or Laid up as unfit for service, in the Dominion during the Fiscal Year ending March 31, 1915, and where and how last employed.

Name of Vessel.	Gross Tonnage.	Class of Vessel.	Division.	Where Employed.	——
Abitibi	106	Tug	Montreal	Lake Abitibi	Wrecked.
Aid	25	Tug	Montreal	Ottawa river	Burnt.
Alberni	28	Tug	Vancouver	Coasting, B.C.	Lost.
Alva D.	22	Tug	Collingwood	Georgian bay	Burnt.
Anna Siemon	19	Tug	Collingwood	Georgian bay	Dismantled.
Archer	15	Tug	Victoria	Arrow lakes	Unfit for use.
B. B.	25	Passenger	Vancouver	Burrard inlet	Damaged by fire.
Balmoral	40	Tug	Kenora	Winnipeg river	Unfit for use.
Berthier	937	Passenger and freight	Sorel	Montreal–Three Rivers	Burnt at Montreal.
Cacouna	1,451	Freight	Halifax	Halifax–Coasting	Wrecked at Ferry Land, Cape Race.
Captain	68	Tug	St. John	St. John river	Hull condemned and broke up.

Charlotte	217	Passenger and freight	Victoria	Upper Fraser river	Stranded.
City of Dresden	194	Passenger	Toronto	Lake Erie	Dismantled.
Cruiser	27	Tug	Kenora	Lake of the Woods	Dismantled.
Dorothy J.	24	Fishing tug	Toronto	Lake Huron	Burnt.
Dredge Nipissing	.....	.....	Montreal	.....	Dismantled.
Dryden Bell	15	Tug	Kenora	Lake Wabigoon	Dismantled.
Dundurn	1,120	Passenger	Toronto	Lakes and rivers	Dismantled.
E. G. Laverdure	54	Tug attending dredges	Sorel	St. Lawrence river	Laid up.
Edward P.	38	Tug	St. John	St. John river	Sunk at Reversible Falls, N.B.
Emerald	385	Passenger	Montreal	St. Lawrence river	Condemned.
Energy	116	Freight	Toronto	Detroit river	Dismantled.
Essex	.....	Dredge	Toronto	Pelee island	Burnt.
Ethel	20	Tug	Kenora	Lake of the Woods	Dismantled.
F. A. Hodgson	173	Freight	Toronto	Georgian bay	Dismantled.
Fleur de Mai	7	Freight	Montreal	Lake Nipissing	Dismantled.
Fort Fraser	33	Passenger	Victoria	Upper Fraser river	Machinery taken out.
Gertie	21	Tug	Kingston	Cornwall canal	Hull used up.
Glacial	109	Ferry	Sorel	Three Rivers–St. Angele	Sunk.
Glyn	20	Tug	Collingwood	North channel	Burnt.
Grahame	360	Passenger and freight	Kenora	Saskatchewan river	Dismantled.
Grain Elevator No. 1.	135	.....	Montreal	Montreal harbour	Dismantled.
Grain Elevator No. 2.	177	.....	Montreal	Montreal harbour	Dismantled.
Grain Elevator No. 6.	168	.....	Montreal	Montreal harbour	Dismantled.
Grain Elevator No. 10	172	.....	Montreal	Montreal harbour	Dismantled.
H. S. G. No. 1	171	Dredge	Vancouver	Howe island	Broken up.
H. Larose	13	Tug attending dredges	Sorel	St. Lawrence river	Laid up.
Highlander	59	Tug	Kenora	Lake Winnipeg	Dismantled.
Irine	10	Tug	Kenora	Lake Wabigoon	Dismantled.
J. A. Paul	77	Tug attending dredges	Sorel	St. Lawrence river	Dismantled.
John R.	225	Passenger	Toronto	Hamilton bay	Dismantled.
Kilkeel	252	Freight	Halifax	Halifax and coasting	Wrecked off Bauld Rock, Canso.
Klahowya	175	Freight and passenger	Victoria	Columbia river	Boiler taken out.
La Have	49	Freight	Halifax	Halifax and coasting	Burnt and sunk off Devil's island.
Lisea	14	Passenger	St. John	St. John river	Burnt at Marble Cove, N.B.
Lorne	288	Passenger and tug	Victoria	Coasting	Hull damaged by stranding.
Maggie McLean	37	Tug	Toronto	French river	Dismantled.
Magnet	24	Tug	Vancouver	Coasting	Broken up.
Mary Hatch	121	Tug	Kenora	Lake of the Woods	Dismantled.
Maude	175	Salvage ship	Victoria	Coasting, B.C.	Machinery taken out.
Minawa	172	Freight	Port Arthur	Lake Nipigon	Broken up.
Miner	49	Tug	Halifax	Coasting, N.S.	Wrecked off Scatari, C.B.
Minnitaka	18	Freight	Port Arthur	Lake Minnitaka	Burnt.
Montmagny	1,269	Government service	Halifax	.....	Sunk in collision in St. Lawrence river.
Muriel	16	Tug	Kenora	Lake Minnitaki	Dismantled.
Natashquan	991	Passenger and freight	Quebec	Quebec–Natashquan	Boiler taken out—Hull converted into a barge.
Novajo	179	Freight	Kingston	Lake Ontario	Wrecked—broken up.
Niagara	396	Passenger	Kenora	Lake Superior	Dismantled.
Nyanza	83	Tug	St. John	Bathurst harbour	Hull condemned.
Phoebe	11	Yacht	Toronto	Muskoka lakes	Burnt.
Pioneer	16	Passenger	Kenora	Lake Killarney	Unfit for use.
Premier	56	Ferry	St. John	Kennebecasis river	Wrecked on rocks at Digby.
Rambler	6	Tug	Collingwood	Lake Huron	Burnt.
Rhoda	310	Ferry	Montreal	Verdun–La Prairie	Broken up.
Rulo	9	Yacht	Toronto	Muskoka lakes	Burnt.

TABLE VI.—Statement of Steam Vessels Lost, Broken up, or Laid up as unfit for service, in the Dominion during the Fiscal Year ending March 31, 1915, and where and how last employed—*Concluded.*

Name of Vessel.	Gross Tonnage.	Class of Vessel.	Division.	Where Employed.	——
St. Joe	118	Freight	Port Arthur	Thunder bay	Unfit for use.
Sharon	14	Tug	Toronto	Muskoka lakes	Dismantled.
Sharon	2,278	Freight—Gov't service	Halifax		Wrecked on voyage to France.
Somass Queen	10	Freight and passenger	Victoria	Alberni canal	Machinery taken out.
Sorel	158	Ferry	Quebec	Three Rivers–St. Angele	Unfit for service.
Sultana	3	Tug	Kenora	Lake Minnitaka	Dismantled.
Thor	323	Freight	Quebec	River du Loup–Tadoussac	Engine and boiler taken out. Hull converted into a barge.
Thos. R. Scott	258	Freight	Collingwood	Cockburn to Owen Sound	Lost in gale on Georgian bay.
Two Macs	24	Fishing tug	Toronto	Lake Huron	Burnt.
Tussler	20	Tug	Victoria	Inside coast waters	Boiler taken out—hull condemned.
